Conservation Easement Allowed Uses Clarification

MARYS CREEK Stream Restoration
EEP Project #241
Nov 2013

NOTE:
This exhibit shows the stream crossing that is described in the Conservation Easement document.
A pre-existing crossing was converted from a ford crossing to a culverted crossing during stream construction.

The pre-existing crossing within the conservation easement, as shown on map, is allowed by Grantee as reserved use for Grantors. See recorded conservation easement document (Deed Book 20499 Page 970).
