Inventory Deprecation, Transfer, and Distribution Process Overview
Overview

To provide NCDHHS with an accurate picture of the COVID-19 vaccine inventory at your disposal, you will need to update the CVMS Provider Portal with COVID-19 vaccine inventory reductions, or deprecations. These actions typically involve:

1. COVID-19 Vaccine Wastage
2. COVID-19 Vaccine Insufficient Quantity
3. COVID-19 Vaccine Transfer and Redistribution Processes

The processes discussed in this training guide are primarily for the Healthcare Location Managers profile.

You will also need to:

- Use the latest version of Chrome, Edge Chromium, Firefox, or Safari browsers (Internet Explorer or Edge non-Chromium are not supported)

Now, let’s get started!

When to declare in CVMS a COVID-19 Vaccine Inventory Deprecation

When a COVID-19 vaccine is wasted
Healthcare Location Manager accesses the Vaccine Wastage Survey Form, providing reason for waste and other applicable information.
Once submitted, the Healthcare Provider Location’s Total COVID-19 Vaccine On Hand Inventory is decreased accordingly.

When a COVID-19 vaccine vial has insufficient quantity
Healthcare Location Manager accesses the Vaccine Inventory and inputs that a vial from that inventory has yielded an insufficient quantity (any time a vial yields less than what the CDC considers standard doses per vial for the specific COVID-19 vaccine type).

When a COVID-19 vaccine is to be redistributed/transferred to another provider location
Healthcare Location Manager enters the COVID-19 Vaccine Redistribution/Transfer Request into the CVMS Provider Portal with details such as Primary Location Secondary Location, lot number, and quantity to redistribute/transfer. The approved redistribution/transfer is reflected as an order for the Secondary Location.
The COVID-19 Vaccine On Hand inventory of the sending location is decreased. The receiving location has a COVID-19 Vaccine Inventory Record auto-created, but the quantity is noted as "in transit". Secondary Location completes "Inbound Redistribution/Transfer" process, and the quantity is changed from "in transit" to "available".

COVID-19 Vaccine Outbound Transfer or Redistribution
Overview of an Outbound Redistribution/Transfer

Redistribution and transfer requests require **NCDHHS IMMUNIZATION BRANCH APPROVAL** to ensure proper storage capabilities and tracking of COVID-19 Vaccine Inventory movements. There are three scenarios that transfer requests will fall under.

1. If a provider requests a redistribution between two CVMS Provider locations within the same organization, who have an existing redistribution agreement, **THE TRANSFER IS AUTOMATICALLY APPROVED BY NCDHHS IMMUNIZATION BRANCH**

2. If a provider requests a redistribution between two locations within the same organization, but there is no existing redistribution agreement, the **TRANSFER MUST BE MANUALLY APPROVED BY NCDHHS IMMUNIZATION BRANCH**

3. If a provider requests a transfer to a location that is outside their location’s organization, the **TRANSFER MUST BE MANUALLY APPROVED BY NCDHHS IMMUNIZATION BRANCH**

Step 5 of 10: Confirm the Redistribution/Transfer Request was Submitted

1. On the ORDERS related list from the Vaccine Inventory Related Tab, the new Order redistribution or transfer request will appear.
2. If the status shows as SUBMITTED or PROCESSING, that indicates the redistribution or transfer is pending approval from NCDHHS Immunization Branch.
3. If the status appears as TRANSFER IN TRANSIT, that indicates the transfer has been approved by NCDHHS Immunization Branch.
Once your **NC COVID-19 VACCINE REDISTRIBUTION/TRANSFER REQUEST** is approved, you will be able to **SHIP YOUR VACCINE INVENTORY** to the receiving location.

As soon as the transfer is approved, the Healthcare Location Manager who initiated the transfer request will receive an automated email indicating the approval.
