

stuff to look for, ask & think about

● look for

the raw ingredients! Name at least three things this craftsperson uses for tools or materials. Is it stuff you buy in stores?

the steps! Watch the craftsperson work for at least three minutes. Can you figure out the steps in making this thing? What might happen if you skip a step or mix them up?

● ask

What's your favorite part of making this thing? What's your least favorite?

Who taught you how to do it? Are you teaching anyone?

What does this tool do? (Ask this question if you've watched for a while and still can't figure it out.)

● think about

What's this object for? Is there something like it in my home?

Could I make this if I needed to? How would I change it?

Ask permission before you touch anything.
