• Ms. Kakadelis opened discussion on the proposed management company. Ms. Reeves stated the management company has not managed any other schools. She wonders what resources the management company has to assist the school. Mr. Walker stated the CSAB really needs to drill down into the capacity of this Charter Management Organization (CMO).

• Ms. Valenscin stated they would be sister schools with the other school managed by the CMO. She stated this is not a replication. She stated the board chose CDS because the members of the CMO have very strong reputations in the county. She stated his would be the first school that CDS would manage, but members of CDS have experience opening other charter schools.

• Mr. Quigley asked what the school would receive for the $2M+ fee that CDS will receive from the school. Ms. Valenscin stated CDS will oversee the basic day to day operations. Ms. Valenscin stated that the board believes that CDS will help take the burden of daily operations off the board. Mr. Quigley stated so you have marketing and day to day operations. A representative from CDS stated the CMO would provide transportation and food services program. Mr. Quigley clarified the CMO would manage, not provide these services. The CDS representative stated the CMO would contract out transportation and handle day to day operations. Ms. Turner asked why the principal wouldn’t handle the daily operations. The CDS stated the staff members will be jointly employed by the CMO and by the governing board.

• CSAB members voiced concerns over why this board would need a CMO, especially given the high fee. They also discussed the fact that CDS has stated the CMO will not support the school if it falls behind financially.

• Applicant board members spoke about the confidence the board has in CDS. They also spoke about the built-in flexibility of the contract regarding the outflow of dollars.

• CSAB members discussed whether this school would really need a CMO. Members voiced concern about the high fee when the CMO is not actually providing anything upfront for the school. Mr. Walker stated he doesn’t want to second guess the board’s decision to use a CMO.

• Ms. Valenscin spoke about the application’s stated goals and mission. Ms. Kakadelis clarified that the application has a weighted lottery for 25%. Ms. Valenscin stated that is correct. Ms. Turner asked who from the CMO will be placed in the school to do things like evaluate teachers. The board member replied that the principal will be accountable to both the CMO and to the governing board. Ms. Turner stated that means the CMO is not actually evaluating the teachers. He stated that CDS has created rubrics to help the principal evaluate the effectiveness of teachers.

- Ms. Haire asked if the rubric has anything to do with student performance or just teacher performance. A CDS representative stated she is not sure if the current rubric accounts for both.

- Mr. Quigley asked the board treasurer to explain the value add of the CMO. The board treasurer stated that many board members do not have day to day knowledge of running charter schools, but the CMO does. He stated the board has put a lot of faith in the CMO in getting the school running.
• Mr. Maimone stated the fee structure in the CMO agreement is very confusing and asked if the board attorney reviewed the fee structure clearly. The board attorney spoke about the discussions the board had regarding the CMO agreement. He stated that because CDS drafted the agreement, any ambiguity would be seen in favor of the applicant in a court of law. The CSAB expressed some additional concerns and the board attorney stated they can look into those issues.

• Mr. Quigley asked if anyone with CDS has been a director or principal. A CDS representative stated no, but Mary Katharine Sauer, who is involved with CDS has run a charter school. • Mr. Walker stated he has confidence in the board to hold the CMO accountable. Mr. Walker does see issues with what the CMO is providing and doesn’t know if it is necessarily a good deal for the board. Ms. Kroeger stated that may be the case, but the contract is not written in the charter school’s favor. Ms. Kroeger continued that the CMO has no skin in the game in terms of financial support. She stated there are a lot of questions about whether the CMO is

Mr. Walker stated the school could have a student with an IEP that could require major transportation funds. Mr. Bhat spoke about the school’s plan to contract with a third-party bus provider. He stated the school would subsidize bus fare for students that qualify for free and reduced lunch. He stated the students that can afford the bus fare essentially subsidize those that cannot. Board members explained the current principal of Intelicor, Dr. Alghorani, will become the principal of Clara Science Academy. Dr. Alghorani stated that Clara Science Academy would share space with the upper grades from Intelicor. He stated it would be structured in such a way that there would be two separate wings. Mr. Maimone stated the major concern is enrollment, but the board seems very connected to that community which softens some of his concern. Ms. Vuncannon stated given the facility, it may make it easier if there are any enrollment issues.

• Ms. Turner stated it’s unlikely the current Intellicor students will remain at a private school if they can go to a charter school next door. Dr. Alghorani stated that currently Intellicor serves K-12, but if this charter school is approved, Intellicor will focus on middle and high school. Mr. Quigley stated he has concerns that this information was not in the application and this seems a lot like a conversion. Dr. Alghorani stated he understands but the schools will be totally different entities.

• Ms. Haire asked for enrollment at Intellicor. Dr. Alghorani stated around 120.

• Ms. Reeves stated the missions of the two schools are very different. Dr. Alghorani stated that is correct, but STEM education and a safe environment, are similar to Clara Science Academy and will draw parents. Ms. Kakadelis stated it seems like the charter school will be a feeder to the private school. Ms. Muhammad stated it is not a feeder to the private school and the two missions are completely different. She stated based on the low enrollment, the private school will probably not be able to sustain itself, so it is actually an advantage to Clara Science to be able to market to those students. is not suggesting they aren’t being honest. Mr. Maimone asked when the board approached
the private school. Mr. Muhammad stated after the application last year was rejected, before
this year’s application. Mr. Muhammad stated the private school has a daycare and Clara
Science is targeting all daycares and Headstart in the area for enrollment. Mr. Quigley voiced
concerns about how this will be perceived. Ms. Reeves stated perception is reality.

school. Mr. Friend confirmed there is no financial interest of the principal or board in the
facility.
