SEED Application Overview

The State Exchange of Education Data (SEED), formerly known as Southeast Education Data Exchange (SEED) enables participants to track and share information for K12 transfer students who cross state lines. Collaboration among participating states enables students’ data to follow them across state lines. The application goals for participating states are two-fold:

- Validate K12 student mobility within the region. Detecting that a student has moved to another state has the potential to reduce a state’s dropout rate.
- Ensure that a K12 student’s longitudinal data is transferred from one state to another when the student transfers within the region. The amount of data shared, in terms of years and content, is determined by individual participating States. (Note: North Carolina is currently sharing LEA Directory, School Directory, Student Identity, Student Demographics and Student Contact, with participating states.)

When these goals are met, participating States realize three primary benefits:

- Improved continuity of services for regional K12 transfer students
- Enhanced accuracy of K12 graduation and drop-out rate calculations
- Contribute to other efforts aimed at ensuring all K12 students graduate from high school ready for a career and/or a postsecondary course of study

The Georgia Department of Education has developed, operates, and maintains a centralized point of exchange (HUB) for routing requests and responses for information related to transfer of students across state lines for states participating in SEED.

The charter states that participated in this project include Alabama, Colorado, Florida, Georgia*, Kentucky*, North Carolina*, Oklahoma, and South Carolina.

* Pilot State
Introduction

Overview

The purpose of this SEED User Manual is to identify features of the SEED application and to provide instructions to SEED users on how to navigate and use the application.

Intended Audience

This document is intended for use by NC SEED users (NC State Administrators, NC District Administrators, NC State Users, and NC District Users).
Accessing the SEED Application

Request SEED User Account

In order to access the SEED application, a user must first request a SEED User Account from their NC SEED Administrator. For State level users and District Administrators, the SEED Administrator is the NC SEED State Administrator; for LEA level users, the SEED Administrator is the NC SEED District Administrator (assigned per LEA).

It is up to each LEA/Charter to determine who shall be granted access to the SEED application. Typically, LEAs/Charters will grant access to their PowerSchool Coordinator, Data Manager, or someone in their Accountability department. It is advised that each LEA/Charter have at least two district administrators so there is a backup when one is not available.

Every SEED user must first submit a *SEED Account Maintenance* form (see Appendix B: SEED Account Maintenance Form) to the NC DPI. This form is available on the NC DPI SEED web page (http://www.ncpublicschools.org/data/seed/account/). The LEA/Charter Site Security Officer completes Part 1 of the form and the individual requesting access to SEED completes Part 2 of the form. The individual requesting access to SEED (Part 2 of form) must sign the form and check both the FERPA statement and the Confidentiality Agreement boxes otherwise the individual will not be granted access. If the individual requesting access to SEED (Part 2 of form) is the Site Security Officer (Part 1 of form), the individual’s information will be used to populate both Part 1 and Part 2 of the form.

In addition, the Site Security Officer Name (Part 1 of form) must match the name of the Site Security Officer on file at the NC DPI. If the names do not match, the individual requesting access to SEED will be notified and requested to update the SEED Account Maintenance form with the correct Site Security Officer name that is on file at the NC DPI. If the Site Security Officer has changed at the LEA/Charter, the LEA/Charter will need to update the Site Security Officer name on file at the NC DPI. Please refer to the SEED Registration page (http://www.ncpublicschools.org/data/seed/account/) for contact information or any questions regarding LEA/Charter site security officers.

Email the completed SEED Account Maintenance form to the contact found on the top of the form next to ‘RETURN TO:’. The contact information is also listed on the SEED registration page (http://www.ncpublicschools.org/data/seed/account/).
Most SEED User Accounts are created within 2 business days of receipt of the form, but it can be up to 7 business days before the site security officer is verified and the account is created.

Upon creation of your SEED User Account, an email notification is sent to the email address given to the SEED Administrator that created the user account. It is imperative that the email address used for your SEED user account is a valid, working email account and that you have access to it.

The email notification will show up in your Inbox with the subject line ‘Your SEED Account has been created’. The email will come from ‘donotreply@doe.k12.ga.us’. The body of the email will provide a link to the SEED application and a temporary password.

Click on the link in the body of the email to launch the SEED application or paste the link (URL: https://ncidp.seedx.org/Account/Login.aspx) into your preferred web browser (Internet Explorer, Mozilla Firefox, Google Chrome).

**SEED Application Training**

It is advised that anyone planning to use the SEED Application receive training appropriate to their user role. If your role is:

- **District User**: obtain training from your LEA/Charter SEED District Administrator. Once the training video is available, you may obtain training by watching the SEED User Training Video.
District Administrator: after initial rollout in March-April 2015, quarterly training will be available. Once the training video is available, you may obtain training by watching the SEED District Administrator Training Video.

State User: after initial rollout in March-April 2015, quarterly training will be available. Once the training video is available, you may obtain training by watching the SEED User Training Video.

Please visit the NC DPI SEED website for SEED State and District Administrator contact information http://www.ncpublicschools.org/data/seed/.

### Accessing SEED for the First Time

When the URL link is accessed in a web browser, the following Log In page is displayed:

To log into the SEED application, the user enters his/her email address and a password. If this is the first time logging into the SEED application, use the temporary password that was provided in the User Account Created email notification. Provided that the email address and temporary password was entered correctly, you will be prompted to change your password.
Enter the new password twice and click the **Change Password** button. (The SEED application requires a minimum of 8 characters for the password.) If the passwords match then the SEED application displays a message that the password was updated successfully.

Click the **Continue** button to log into the SEED application. The SEED Log In page is displayed.
Logging into SEED

The *Email Address* and *Password* fields on the **Log In** page are mandatory. The SEED application will provide an error message if an attempt is made to log into the SEED application without entering an *Email Address* and a *Password*. 
Additionally, the *Email Address* and *Password* combination must be valid. If a user login fails authentication, the SEED application provides an error message regarding invalid login credentials.

Note: The maximum number of invalid login attempts is 3. If a user exceeds the maximum number of invalid login attempts, their SEED User Account will be locked. The user will need to contact their SEED Administrator to unlock their SEED User Account.

After entering valid log in credentials, the following **Home** page is displayed. Note that the user’s email address is displayed in the upper right corner, next to the **Sign Out** button that allows the user to exit the SEED Application.
Forgot/Reset Password

To reset a forgotten password or to change a password, click the ‘Forget/Reset Password’ link above the Log in button on the Log in page.

The SEED application displays the Forgot Password page. Enter your email address in the space provided and click the Submit button.
The SEED application sends an email notification, containing a ‘user code’ to the specified email address. The email notification will show up in your Inbox with the subject line ‘SEED account password change request’. The email will come from ‘donotreply@doe.k12.ga.us’. The body of the email will provide temporary password.

Use the temporary password in the email as input to the User Code on the Forgot Password page. Enter the new password twice; once as New Password and once as Re-enter Password. (The SEED application requires a minimum of 8 characters for the password.) The error message ‘Passwords do not match’ is displayed when the two passwords do not match exactly.
FERPA Acknowledgement

To access the Student Search feature, click either the **SEED Search** link (on the far left of the **Home** page) or the **SEED Search** tab (on the far right of the **Home** page).

All SEED users are required to agree to the regulations defined by the Family Educational Rights and Privacy Act (FERPA) before they access any student data. As such, the SEED application has been configured for North Carolina to display the FERPA **Acknowledgement** screen prior to advancing to the **Student Search** page. To advance to the Student Search page, click the **I Agree** button.

Each time a user logs into the SEED application and requests the Student Search function, he/she will be presented with the FERPA **Acknowledgement** screen and must agree to the FERPA Regulations to proceed further. At this point, should the user choose not to agree to the FERPA Regulations, he/she must close the web browser to exit the SEED application.

Clicking the I Agree button indicates a user’s willingness to comply with FERPA Regulations and allows the user access to the Student Search page, from which the user may invoke an interactive student search or a batch student search.

The Student Search page is divided into two tabs. The first, and default, tab is the Interactive Student Search tab. The Interactive Student Search is used to find a single student using the student search form as input to the search. The second tab is the Batch Search tab and is used to find more than one student using a batch file of student records as input to the search.

Note that the right top corner of the Student Search page provides the current SEED software version number and date of last software update.
Interactive Student Search

Submit Interactive Student Search

The Interactive Student Search is the default search on the Student Search page. The Student Search page initiates the request to locate a student. Only 3 data elements are required to search for a student: Last Name or First Name, Birth Date, and State or States to Search. Each of these data elements is denoted by a red asterisk (*).

States to Search defaults to all participating states that are listed; however, the user can select or deselect individual states from the list.

NOTE: NC District Administrators and NC District Users do not have access to search NC student data. As a result, North Carolina is not listed as a participating state to search for NC District Administrators and NC District Users.

While only 3 data elements are required to search for a student, providing only these data elements may result in a large number of possible matches. The more data elements provided for the search, the more precise the results. To prevent phishing, the number of possible matches returned is limited to 10 per state.
Several search data elements have drop-downs for ease of entry and consistency of results. They are:

- Gender
- Race/Ethnicity
- Birth Country
- Birth State
- Grade Level
- Former State

Possible values for these data elements are compliant with the Common Education Data Standards (CEDS). Race/Ethnicity is a good example of a data element whose values in the drop-down are compliant with CEDS values.

Once a sufficient number of data elements are entered, click on **Submit** button to initiate the search or the **Clear** button to reset the screen for a new search.

**Validation Error Messages**

Very little validation is required on the **Student Search** screen, but the following errors are possible:

- Please enter the Last or First Name.
- Please enter a valid Birth Date.
- Invalid format, please reenter as (MM/DD/YYYY).
- Please select a State or States to search.

See Appendix A: Data Element Validations for complete list of validations that are applied to each of the SEED search data elements.

If an error occurs, the error message is displayed in red as shown below:

The keyed data is displayed under the Searching for: Section near the bottom of the page as you tab to the next field or when you click the Submit button.
Interactive Search Results

While the SEED application is searching for student records, the ‘Searching’ disc is displayed.

Once the SEED application has completed the search, the disc disappears and search results are displayed.

Summary results are displayed in real-time to show progress in each state that was selected as a state to search.
Legend for Search Results by State:

<table>
<thead>
<tr>
<th>Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>![Green Circle]</td>
<td>Indicates at least 1 record found per the search criteria on that State’s appliance.</td>
</tr>
<tr>
<td>![Yellow Triangle]</td>
<td>Indicates no matching records were found for the provided search criteria on that State’s appliance</td>
</tr>
<tr>
<td>![Orange Exclamation]</td>
<td>Indicates the system is busy searching the state’s appliance for records</td>
</tr>
<tr>
<td>![Red Square]</td>
<td>Indicates the state’s appliance is unavailable and was not searched (having technical issues)</td>
</tr>
</tbody>
</table>

Click on the Expand icon to expand the search results and view possible matches provided by a state:

If, after reviewing all the possible matches, the student is not found, consider providing additional search criteria or expanding the search to include other participating states.
Student Record Retrieval

Once the student is found among the possible matches returned by the states, the user can click on the Get Student Record icon to view the found student’s record.

Note: Keep in mind the FERPA Regulations and that only after the student match has been verified to be the exact student, should the student records be downloaded from the SEED application.

A window opens with all available student data for the selected student.

Note: The student information displayed below is not actual student data and does not resolve to a real person. The student information was made up for purposes of testing the SEED application and producing a user manual.

Due to the amount of data available, scrolling up/down and right/left may be required.
The available data categories associated with a student record include:

- LEA Directory
- School Directory
- Student Identity
- Student Demographics
- Student Contact
- Parent/Guardian Identification
- Enrollment
- Discipline
- Assessment
- Assessment Performance Level
- Academic Record
- Program
- Program ID

If a State does not include a particular data category in their SEED database, then the message ‘Data not available’ is displayed below the column headings for that data category.

If a User’s role does not permit them to see a particular data category, then the message ‘Your role is not authorized to view this data’ is displayed below the column headings for that data category.

The amount of data returned will vary from state to state. All participating states have agreed to make as much data available as possible; however, until further notice, North Carolina is providing only the following information to other states:

- LEA Directory
- School Directory
- Student Identity
- Student Demographics
- Student Contact

When finished reviewing the student’s record, click the Close button to return to the Student Search screen.
Export Student Record Data

On the Student Record page is an option to export the student’s data. The MyData button, shown in the upper right corner of the student record, provides this capability.

Clicking the MyData button presents two options for exporting the student’s data:

- SEED XML
- Comma Separated Values (CSV) file
Select the desired format (XML or CSV) to download and click the Get Data button to extract the record. Depending on your web browser settings, the operating system will either prompt you to Open or Save the file or the operating system will automatically save the file in the location designated for files downloaded from the Internet.
Example of a downloaded CSV file:
Example of a downloaded XML file:

```xml
<SEED_CEDS_V2.0>

      </Enrollment_Values>
    </Enrollment>
  </K12Student>
</SEED_CEDS_V2.0>
```
Batch Student Search

The **Batch Search** is an alternative to the **Interactive Student Search** function on the **Student Search** page. Where the **Interactive Student Search** searches for one student at a time, the **Batch Search** allows the user to search for more than one student at a time by submitting a .CSV file that contains search criteria on the students for which the search is being conducted.

The Batch workflow first validates the submitted data for any errors. Users have the option of exporting the errors for correction or continue to submit the batch for searching matches. Matched results are returned as a CSV file and can be downloaded and reviewed.

**Download Batch Student Search Template**

To begin the batch search, click on the **Get Template File** icon to download the batch search template from the **Batch Search** page.

Depending on your web browser settings, the operating system will either prompt you to **Open** or **Save** the file or the operating system will automatically save the file in the location designated for files downloaded from the Internet.

View the Batch Search Template: [SEED Batch File Template.xlsx](#)
View the Batch Search Template Information: [SEED Batch File Information.xlsx](#)
Open the **SEEDBatchRecords.csv** template in MS Excel to view the data elements (columns) that are used for the batch search.

Except for **Former State Student Unique ID, Number of Years to Search and State or States to Search**, all of the data elements on the **Interactive Student Search** page are included in the **SEEDBatchRecords.csv** template. (**Number of Years to Search** and **State or States to Search** fields are specified on the **Batch Search** page at the time the batch file is submitted to SEED.)
Prepare Batch Student Search File

Prepare the SEEDBatchRecords.csv file by entering the student search criteria into the spreadsheet. The Batch Search allows SEED Users to submit a batch of up to 4,000 students. The first record in the batch file must be the original Header Record. The Header Record is the record (or row) that contains the column names. (See the Download Batch Student Search Template section for instructions on downloading the Batch Search Template.) Except for the Grade Level field, the same validation rules apply to the batch search data elements that apply to the interactive search data elements. (See Appendix A: Data Element Validations for complete list of validations that are applied to each of the SEED search data elements.)

For submitting Grade Level in the Student Batch file, the valid values are:

<table>
<thead>
<tr>
<th>Dropdown Value</th>
<th>Batch File Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Infant/toddler</td>
<td>IT</td>
</tr>
<tr>
<td>Preschool</td>
<td>PR</td>
</tr>
<tr>
<td>Prekindergarten</td>
<td>PK</td>
</tr>
<tr>
<td>Transitional Kindergarten</td>
<td>TK</td>
</tr>
<tr>
<td>Kindergarten</td>
<td>KG</td>
</tr>
<tr>
<td>First Grade</td>
<td>01 or 1</td>
</tr>
<tr>
<td>Second Grade</td>
<td>02 or 2</td>
</tr>
<tr>
<td>Third Grade</td>
<td>03 or 3</td>
</tr>
<tr>
<td>Fourth Grade</td>
<td>04 or 4</td>
</tr>
<tr>
<td>Fifth Grade</td>
<td>05 or 5</td>
</tr>
<tr>
<td>Sixth Grade</td>
<td>06 or 6</td>
</tr>
<tr>
<td>Seventh Grade</td>
<td>07 or 7</td>
</tr>
<tr>

<td>08 or 8</td>
</tr>
<tr>
<td>Ninth Grade</td>
<td>09 or 9</td>
</tr>
<tr>
<td>Tenth Grade</td>
<td>10</td>
</tr>
<tr>
<td>Eleventh Grade</td>
<td>11</td>
</tr>
<tr>
<td>Twelfth Grade</td>
<td>12</td>
</tr>
<tr>
<td>Grade 13</td>
<td>13</td>
</tr>
<tr>
<td>Postsecondary</td>
<td>PS</td>
</tr>
<tr>
<td>Adult education</td>
<td>AE</td>
</tr>
<tr>
<td>Ungraded</td>
<td>UG</td>
</tr>
<tr>
<td>Other</td>
<td>Other</td>
</tr>
</tbody>
</table>
Note: Upon opening the .CVS file in MS Excel, MS Excel may reformat the Date of Birth column to a format that is unacceptable to the batch search. If this occurs, use the MS Excel ‘Format Cells’ function to format the date as MM/DD/YYYY.

Once the batch search file has been prepared, the next step is to upload the batch file into the SEED application for validation. If errors are detected during validation, the user may fix the errors and resubmit the file or the user may request to go forward with the search for any records in the file that do not contain validation errors. (Note: The last two records in the above sample Batch Search file are invalid.)
Submit Batch Student Search File

To submit the batch search file, click on the **Browse** button to locate the batch search .CSV file that is to be uploaded to the SEED application.

Once the batch search file is selected, select the states to search (or accept default of ‘All States’) and validate the batch file by clicking on the **Validate** button. Optionally, enter the number of years to search in the **Number of Years to Search** field. The default for the **Number of Years to Search** is all years.
While the SEED application is validating the batch student search file, the ‘Validation in Progress’ disc is displayed. Once the SEED application has completed the validation, the disc disappears and validation results are displayed.
Batch File Validation

Upon completion of the batch search file validation, the SEED application displays the results. The results include the:

- Number of records validated,
- Number of records which had no errors, and
- Number of records which had errors.

At this point, the user may download the Export Error Details file by clicking on the ‘Export’ button, or if there are records that had no errors, submit the error-free records to the batch student search by clicking the ‘Submit’ button.

Batch File Validation Results

When the SEED application downloads the Error Details file, it is downloaded as a .CSV file. The file name is comprised of the Date and Time that the file was downloaded: MM_DD_YYYY HH_MI_SS, where MM is month, DD is day, YYYY is year, HH is hour, MI is minute, SS is second and AM or PM (Example: 9_13_2013 11_51_54 AM.csv).

The Error Details file includes all of the records that were included in the original batch student search file. It has the same format as the batch search file, with the exception of an additional column for error messages. The SEED application adds an ‘ErrorMsg’ column that contains the validation error message for records that did not pass validation. The example shown below illustrates this point. The last two records submitted in the batch search did not include Date of
Birth. As a result, these two records include the error message, ‘Missing/Invalid Birth Date’. The first two records passed validation and therefore, do not include an error message.

At this point, the user may wish to fix the records that did not pass validation and resubmit the file. It is not necessary to remove the ErrorMsg column as this column will be ignored by the Batch Student Search. Optionally, the user may submit the batch search file with errors, but only the error-free records will be considered for the batch student search.

Submit Batch Search File

To submit the student batch file, click the Submit button.
While the SEED application searches for student records, the ‘Searching for Matches’ disc is displayed. Once the SEED application has completed the search, the disc disappears and search results are displayed.

Batch Search Results

When the batch search for student matches is complete, the SEED application will display the results. The results include a count of:

- Records Submitted,
- Records With Errors,
- Records With Zero Results,
- Records With Only One Result, and
- Records Matched at Least One State.
At this point, the user may download the results file to view the contents. Depending on the search results, there may be student matches, no student matches and/or validation error messages. To export the results of the batch search, click on the ‘Download’ button.

The batch results file has the same format as the batch search file and batch error file, with the exception of additional columns representing the states that were searched. For each state that was searched, a column is added to the right of the ZipCode and ErrorMsg columns. The original batch student search records will have a ‘1’ in each of the State to Search columns, identified by their state abbreviation. Each results record will have a ‘1’ in the column that identifies the state where the match was found. In the above example, two records passed validation and were submitted to GA.
and KY. In each case, both GA and KY found a matching record. Records which were not found in any state do not have any result records but the source record has a ‘0’ in the column that identifies the state where the search was performed.
Logging Out of SEED

Upon completing a student search in the SEED application, North Carolina SEED users will need to sign out of the application twice to fully exit the application. This is because the SEED Search application is launched from the Log In application.

When working in the SEED Search application, click the Sign Out icon to fully exit the SEED Search application. Closing the browser will also exit the application, but signing out is the preferred method to exiting the SEED Search application.
After exiting the SEED Search application, you will see that the SEED Home page is still active in the web browser. Click the Sign Out icon on the SEED Home page to fully exit the SEED Log In application. Closing the browser will also exit the application, but signing out is the preferred method to exiting the SEED Log In application.
SEED Application Support Contact

Please report any issues with the SEED application to the appropriate support person.

District Users
- Contact your LEA/Charter SEED District Administrator for assistance with the following:
  - Request for access to SEED
  - Update your account information
  - Unlock your account
  - Training request / information

District Administrators
- Contact the NC DPI Help Desk at 919-807-4357 (HELP) or by sending an email to dpi.incidents@its.nc.gov for assistance with the following:
  - Update your account information
  - Unlock your account
- Email the completed SEED Account Maintenance form to the contact found on the top of the form next to ‘RETURN TO:’ to add/delete/revoke/resume a SEED District Administrator account. The contact information is also listed on the SEED registration page (http://www.ncpublicschools.org/data/seed/account/).
- Email the NC SEED State Administrator at SEED-Info@dpi.nc.gov for questions regarding training.

State Users
- Contact the SEED State Administrator by sending an email to SEED-Info@dpi.nc.gov for the following:
  - Update your account information
  - Unlock your account
  - Request for access to SEED
  - Training request / information
If the issue still cannot be resolved the NC SEED State Administrator will contact the Georgia Department of Education’s SEED Technical Team.

SEED General Questions or Comments
If you have any questions or comments about State Exchange of Education Data (SEED), email the NC SEED State Administrator at SEED-Info@dpi.nc.gov
Appendix A: Data Element Validations

The SEED Application enforces field level validations on most of the data elements that are entered (not selected from drop-downs) by the user. The data elements that are validated, along with the validation rules, are listed below:

<table>
<thead>
<tr>
<th>Data Element Name</th>
<th>Required</th>
<th>Validation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Last Name</td>
<td>Yes, unless First Name is provided</td>
<td>Limit 35 characters</td>
</tr>
<tr>
<td>First Name</td>
<td>Yes, unless Last Name is provided</td>

North Carolina Department of Public Instruction
SEED Account Maintenance Form

INSTRUCTIONS FOR COMPLETING PART 1:  The site security officer is responsible for completing
PART 1 and for assuring the accuracy of PART 2 information.

Site Name:  Print the immediate name of your organization. For example, local education agency name.

Site ID:  Pre-assigned unit, school, division, etc., site code, when applicable.

Office/Title:  Print the agency office name or appropriate title, when applicable. For example, Controller's office, Deputy State Superintendent, Assistant State Superintendent of ..., etc.

Division:  Print the name of the agency division, when applicable. For example, Division of Auditing & Accounting.

Check:  Check the specific type of actions that the SEED State Administrator should perform. Employee names should always specify the FIRST name, MIDDLE INITIAL, and LAST name.

Add:  Check this block to create a SEED account for an employee. Employee must complete PART 2.

Delete:  Check this block to delete an employee's SEED account. Print the employee's full name and email address.

Revoke:  Check this block to revoke an employee's access. Print the employee's full name and email address. Revocation suspends access authority without deleting the account or password.

Resume:  Check this block to resume access of a revoked SEED account. Print employee's full name and email address.

Security Site Officer Name:  Print your First Name, Middle Initial, and Last Name.

Phone Number:  Print your phone number including area code.

Email Address:  Print your full email address.

Signature:  SEED Account Maintenance forms must have all the required fields populated, be properly signed and dated or they will not be honored by the NC DPI SEED State Administrator.

INSTRUCTIONS FOR COMPLETING PART 2:  This section must be completed & signed by the employee when adding a new account.

Employee Name:  Print your first name, middle initial and last name.

Email Address:  Print your email address. This email address will be used along with your password to sign into the SEED application.

Job Title:  Specify your working job title.

Contract End Date:  For contracts on personnel only, specify the date your contract agreement terminates.

PPN:  For NC DPI (state office) employees only, specify your five (5) digit personnel position number.

SEED Accounts:  Specify any previous SEED account (email addresses) that you have been assigned that allowed access to the SEED application. This includes any currently assigned SEED account (email address) by another agency.

FERPA:  Your checkmark attests that you have read, understand, and agree to abide by the federal law that protects the privacy of student education data. Family Education Rights and Privacy Act (FERPA) as found on the website www.ed.gov/fpap

Confidentiality Agreement:  Your checkmark attests that you have completed, signed, and turned in a Confidentiality Agreement as found on http://www.ncpublicschools.org/docs/limitsmanagement/research/confidentiality.pdf. District Administrators and confidentiality agreement forms are turned in to their local organization.

Employee Signature:  Your Signature attests that the information given is accurate and that you will not use the SEED system for other than business-related purposes and that you will, to the best of your knowledge, comply with FERPA, state, and NC DPI policies and rules to protect student identity.
