TRAVELING EXHIBIT PROGRAM

History on Two Wheels

EXHIBIT BACKGROUND

The first bicycles were of wooden construction, from their frame to their wheels and later moved from wooden to iron elements. Bicycles evolved during the late 19th century and, by 1900, elements of modern bicycles had emerged. In the early 1900s, upgrades to bicycles during the "Safety Era" made them more sturdy, safe, and reliable modes of transportation with improvements to the seats, brakes, tires, and wheel spokes.

Bicycles offered an option for exercise and faster transport than walking. They represented freedom for women, even as conservatives feared they would lead to female corruption. Women pushed past the controversy to enjoy bicycles in all types and sizes, even joining clubs and participating in contests. The bicycle has stood the test of time as a healthy and enjoyable mode of transportation.

AT-A-GLANCE SPECS

SIZE 5 retractable free-standing banners (34" wide x 80" tall) with possible addition of artifact and reproduction cycles from N.C. Transportation Museum

DURATION OF EXHIBIT 8-12 weeks

NOTE There is the possible addition of reproduction and antique bicycles with this exhibit. These cycles are part of the collections of the North Carolina Transportation Museum.

If you would like to investigate borrowing the cycles on loan for the duration of the exhibit at your location, please contact James Hart (704) 636-2889 x256 or LeAnne Johnson (704) 636-2889 x230.

The Division of Education and Outreach has created a series of traveling exhibits on a variety of topics. The exhibits are often accompanied by programming ideas, additional reading materials, and other tools to assist host institutions in sharing the remarkable stories of our state. For more information or to request an exhibit, contact Adrienne Berney at **919-814-6641** or **adrienne.berney@ncdcr.gov**.
