SUMMARY
The Norwood Park Historic District in Asheville, North Carolina is located north of downtown, just to the east of Merrimon Avenue, one of the main north-south arteries through the northern part of the city. The Grove Park Historic District (NR 1989) is located to the southeast and the Kimberly Amendment to the Grove Park Historic District (NR 1990) is located to the northeast. The Norwood Park Historic District is bounded roughly by Murdock Street on the west and south, Woodward Avenue on the north, and Norwood Avenue on the east. The twenty-six acre residential district contains concentrations of houses, from greatest to least occurrence, in the Craftsman bungalow, Colonial Revival, Minimal Traditional, Dutch Colonial Revival, and Tudor Revival styles, dating from ca. 1900 through the early 1950s, all of which were built within the historically platted Norwood Park subdivision.

The district forms an intact representation of Asheville’s boom time in the first three decades of the twentieth century, along with some additional building which took place in the late 1930s through the 1950s. Outside the district boundaries to the north, east, and south are additional historic residential areas, with modern commercial development located to the west along Merrimon Avenue. The district has retained a high degree of historic architectural integrity.

The topography of the district varies widely. Some lots, such as those along parts of Woodward and Woodley Avenues are nearly level, unlike the steep hillsides and siting of houses high above the street on Murdock Street. Most lots have gently sloping topography, dropping slightly to the rear, often allowing for a full above-ground basement level. Lots are typically small, with houses lining both sides of the streets built close together in a steady rhythm of setback.

The nominated district consists of 154 contributing buildings and outbuildings, one contributing structure, twenty-eight non-contributing buildings and outbuildings, and five non-contributing structures. There are no vacant lots in the district, and non-contributing buildings are a mixture of buildings constructed outside of the period of significance, and historic buildings with significant alterations, such as porch enclosures or the removal of numerous key architectural features. Contributing buildings are those buildings that are at least fifty years old, and retain a high degree of architectural integrity. If a building retains its historic form and detailing, but is clad in artificial siding, it is still counted as a contributing resource.

INVENTORY LIST
Buildings are listed in the order of north-south streets first, followed by east-west streets. Due to the curvilinear layout of some of the streets, they are broken into directional segments, generally with the west or north side listed first, followed by the east or south side second. Dating of houses is based upon 1917, 1925 and 1943 Sanborn maps, city directories, and owner questionnaires. These sources are noted with each entry. If the original owner or long-time occupant of the house is known, it is given as the name of the property. Otherwise, properties are called House.
Woodward Avenue, West Side

This one-story, hip roof, single-bay frame outbuilding with a double-leaf door and German siding is not part of the adjacent property to the north. It is a stand-alone outbuilding that is not associated with any current property, but is owned by a property owner on Woodward Avenue. (Sanborn maps; city directories)

2. 24 Woodward Avenue. House. Contributing. ca. 1924.
This two-story side-gable roof bungalow with knee braces and exposed rafter ends has a large front-gable dormer at the front and a full-width shed roof dormer at the rear. Walls are German siding on the first floor and shingle on the second. Windows are six-over-one and six-light square casements, door is multi-light, and the foundation is brick. There is one central brick chimney. Attached front porch has a shed roof, wood posts, and a two-by-two balustrade. Occupants have included E. S. Koon, president of Koon Oil Company, and wife Irene (1925); J. D. Casey, a traveling salesman, and wife Mollie (1926); B. B. Compatible new two-story, hip roof outbuilding in keeping with the main house in style, massing, and materials. There is a two automobile-bay garage on the first level, with an apartment above. The first floor is stuccoed, with shingle siding on the second. Windows are five-vertical-lights-over-one, and there is a central balcony on the second level. The second story is cantilevered and has flared eaves, like the adjacent outbuilding to the east (#10). The first floor is concrete block, with shingles on the second. There are stairs on the west side to the upper level apartment.

One-and-one-half-story, side-gable roof Craftsman bungalow with knee braces and shingle siding. There is a large shed roof dormer at the front, single and paired diamond-pane-over-one windows, a stone and brick foundation, and one interior brick chimney. Front door has sidelights, and the foundation is a mixture of stone and brick. The attached front porch has a shed roof, triple corner posts, and a solid shingled balustrade. House is on a hill, with a notable, beaded mortar joint, fieldstone retaining wall with a beveled granite base. During recent renovation work, the current owners found newspaper insulation which dated from 1917. Occupants have included C.O. Stauffer, superintendent with Williams-Brownell Planing Mill, and wife Alma (1917 –1940); and James M. Hearn, owner of J. M. Hearn & Company bicycles, and wife Nancy Sue (1941 –1956). (Sanborn maps; city directories; owner information)

Notable original hip roof outbuilding associated with the property but built later than the house. Two-story building is a multi-car garage on the first level, with a cantilevered second story with flared eaves. First floor is fieldstone, upper is shingle. Building has a central chimney, large carved brackets supporting the second story cantilever, diamond-pane-over-one windows, and folding multi-panel, multi-light garage doors. There is a small front-gable dormer.

One-story converted one-automobile-bay, front-gable, weatherboard sided garage with a house added to the rear. House is a one-story, front-gable roof building with single and paired one-over-one windows with snap-in muntins, and weatherboard siding. Foundation is concrete block. There is an entry stoop on the west side. (Sanborn maps; city directories)

Two-story, hip roof Colonial Revival house with Four Square form has stucco walls, a belt course between floors, and an interior stuccoed chimney. Windows are paired four-vertical-lights-over-one, and a covered entry projects from the recessed doorway with balcony above. There is a two-story wing at the rear, built after 1943. House sits on a hill with a notable river rock retaining wall at the sidewalk. Occupants have included Daniel Silverman, with Aldan’s Store and wife Belle (1925 –1929); J. O. McGuire, wholesale druggist, and wife Chess (1930 –1953); and Mrs. Mary C. McGuire, widow (1954 –1956). (Sanborn maps; city directories)

One-story, hip roof, single-bay garage with a double-leaf door and stucco and shingle siding.

13. 84 Woodward Avenue. **House.** Contributing. 1922.
This one-story, clipped side-gable roof bungalow with eyebrow dormers has cornice returns, German siding, multi-light-vertical-lights-over-one windows, including a picture window with flanking windows. French doors open onto the front entrance facing the north side of Woodward Avenue that features an attached front porch with a clipped-gable roof, brick piers with double wood posts, and brick steps. There is a secondary entry facing the west side of Woodward Avenue with a segmental arch covering, German sided posts on brick piers, and semi-circular brick steps. There is a front interior end brick chimney, a side-gable modern addition on the southwest corner, and a notable fieldstone retaining wall on the south side of the property. Foundation of the house is brick. This house was listed as vacant in 1922. Occupants have included Mrs. Inder London (1923); Dr. J. Y. Malone, physician, and wife Nellie (1925); Mrs. F. H. Pierce (1926 – 1927); Fred K. Hummel and wife Maria (1928); B. R. Carroll, department manager at Denton & Company, and wife Consuella (1929 – 1930); Charles Davis (1931); L. M. and Jean Sherrill (1932); and H. Orrin Spears, salesman with Brown-Williamson Tobacco Company (1935 – 1956).
(Sanborn maps; city directories)

13A. 84 Woodward Avenue. **Garage.** Contributing. 1922.
One-story clipped front-gable, rolled roof single-bay garage with cornice returns, German siding over stucco, and vertical light fixed windows.

One-story frame greenhouse and storage shed which appears to be of recent construction.

14. 88 Woodward Avenue. **Hamilton Block House.** Contributing. 1924.
This one-and-one-half-story Tudor Revival house with stucco walls and steeply pitched side-gable roof with a projecting center cross-gable has a flat-roof dormer on the front, and a hip roof attached porch with triple corner posts and French doors. Porch has a granite floor which extends out as a path into the landscape. Windows are multi-light casement, some with arches as on the projecting cross-gable, and the secondary front door under flared hip roof hood is v-board. There is a central brick ridge chimney, and the foundation of the house is brick. Occupants have included Hamilton Block, real estate and insurance (1924 – 1927); Dr. O. N. Donahoe, osteopath, and wife Helen (1931); W. I. Lee, president-treasurer Security Investment Company, and wife Adelaide (1932); Joseph W. Little, a lawyer, and wife Lula (1936 – 1937); Clarence W. Bryson and wife Sarah (1938 – 1941); and Charles C. Ricker, office manager at F & G Motors, and wife Nellie (1943 – 1956). This house had several periods of vacancy as well.
(Sanborn maps; city directories; deed search)
Two-bay concrete block garage with glass and panel lift doors is one-story with a front-gable roof and masonite board siding in the gable ends.

14B. 88 Woodward Avenue. Storage. Contributing. ca. 1924.
One-story, side-gable-roof outbuilding set on brick piers with shingle siding, a band of one-horizontal-over-one windows and a replacement pedestrian door.

This two-story Colonial Revival brick house has a side-gable roof with wide eaves and returns. Front door is notable, with a fanlight, square-light sidelights, and a protruding segmental brick arch. There is a glass-enclosed porch at the northeast corner of the second story, and a second entry stoop at the northwest corner with a hood supported by decorative brackets. There is a brick exterior end chimney on either side of the building, multi-light casement and six-over-six double-hung windows, and large boxwood hedge at the front of the house. Foundation of the house is brick. This house was listed as vacant in 1923. Occupants have included Joseph Kartus, president of Commercial Credit & Guarantee Company, and wife Mollie (1924 –1932); Herbert W. and Beatrice Stanley (1936); Frank A. Reinhardt, manager at McIntire-Jones Oil Company, and wife Kathleen (1938); E. Clarence Gardner, manager at S. H. Kress Company, and wife Thelma (1940); Blackburn W. Johnson, editor of Farmers Federation News, and wife Ruth (1941); and Thomas F. King, road master with Southern Railway, and wife Kathryn (1942 –1956). (Sanborn maps; city directories)

One-and-one-half-story, side-gable, brick garage apartment with a shingled shed roof wall dormer and original multi-panel, double-leaf garage doors on the first floor. Windows are six-over-six double-hung.

According to the current owner, this house was a farmhouse, ca. 1900, which was set within an apple orchard. It appears to be what was called the Padgett House on the original Norwood plat. This one-and-one-half-story Dutch Colonial Revival house has a gambrel roof with a large gambrel wall dormer, and a glass-enclosed attached porch with square posts and simple brackets. There is weatherboard siding on the first floor and shingles on the second, paired six-over-one windows and shed roof dormers with multi-light casement windows at the front and rear. Foundation of the house is brick. There are some shed roof additions at the rear, which, based upon the window styles, appear to date from the 1950s. There is a large hedge surrounding the lot. Occupants have included E. H. Jones (1922 – 1924 and again 1929 - 1930); W. F. and Carrie Augustine (1925); S. W. and Teena Hendricks (1928); Edouard Albion, concert artist, and wife Peggy (1931); D. Hiden Ramsey, general manager at the Asheville Citizen-Times newspaper, and wife Mary (1937 – 1945); Alan A. Smith, employed at Dr. T. C. 68. 51 Ramoth Road. W. Thomas Roland House. Contributing. 1924.
Two-story Colonial Revival house has a hip roof, weatherboard siding, six-over-six windows, French doors, and a modern addition at the northwest corner consisting of a two-story garage on the first floor with living space on the second floor. The attached full-façade front porch and the entry porch on the north side have been changed since 2003 from a ca. 1960 change, back to a more compatible design. Porch details include wood posts supporting the hip roof and paired one-by-one balusters. Porch on the south side has a hip roof. There is also a hip roof porch on the south side with a solid weatherboard sided balustrade, square posts, and a modern deck added at the rear. The foundation of the house is brick that has been stuccoed. Occupants have included W. Thomas Rowland, a real estate agent, and wife Frances (1924 –1939); and P. Cash Gregg, assistant secretary with Morgan Brothers Wholesale Candy Company, and wife Ida (1941 –1956). The house was built by Tom Roland. (Sanborn maps; city directories; interview with Shirley Whitener Shepard)

The façade of this Colonial Revival house faces west onto Murdock Street and the alley. The rear elevation is what faces onto Ramoth Road, but the house has a Ramoth Road address. The hip roof house with wide eaves has three stories in the front and two at the rear. Exterior walls are shingle, and there is a porch on both the front and rear. The original two-tier front porch, facing Murdock Street, has had some infill on the lower level of what was probably similar in detailing to the upper level which consists of triple corner columns and a 2 x 2 balustrade between. The Craftsman-influenced rear porch, facing Ramoth Road, is full-width, with bracketed posts on shingled piers. There is a one-story wing on the north side. Windows are diamond-pane-over-one, and the door at the rear of the house is double-leaf with diamond-pane glass. There are several chimneys, including an interior brick, and two interior end brick. Foundation of the house is brick. There is a public walkway to the north of the house down to Murdock Street. This house was a farmhouse that occupied the land which later was developed into Norwood Park. The house is oriented towards “Woolsey Dip” the low point below the west side of the neighborhood, just west of Murdock Street. City directories do not list it until 1924. Occupants have included Mrs. Laura B.
Cawood (1924 – 1928 and 1932 – 1938); Mrs. Ada M. Patterson (1930 – 1931); Verne G. Moser, president of Moser Plumbing company, and wife Aldean (1939 – 1955); and Harry D. Martin, brakeman with Southern Railway, and wife Lula (1956). Verne G. Moser lived at 129 Norwood Avenue (#99) from 1927 – 1938. (Sanborn maps; city directories; interview with Shirley Whitener Shepard, dating the house to ca. 1910)

One-story front-gable, single-automobile-bay garage with a modern multi-panel overhead door.

94. 46 Norwood Avenue. Neal R. Crawford House, Non-contributing. 1948.
This modern house has been extensively altered since 2003. Currently, it is comprised of a one-story, side-gable-roof wing on the west, and a two-story, hip roof block on the east, with a metal awning covering added on the lower level of both sections of the building. The lower level of the two-story block originally contained garage doors for a two-bay garage, with an apartment above. This lower level has been stuccoed, many windows are replacement and the side door has been removed. The original German siding remains on the upper level. The front door on the one-story wing has been replaced with a modern door. The foundation is stuccoed. Neal R. Crawford with Pilot Life Insurance Company lived here from 1948 until at least 1956. Norwood Avenue, South Side

95. 14 Norwood Avenue. House, Contributing. 1926.
One-story-on-raised-basement, hip roof bungalow with wide overhanging eaves and a gabled entry stoop, is noted on the Sanborns as being of fireproof tile construction. Walls are stucco over tile construction. On the Norwood Avenue side, windows are paired six-over-one, with a sliding door opening onto the added modern deck. On the north side, original six-over-one windows flank a larger six-over-one window at the northwest corner of the façade, with replacement one-over-windows on the northeast corner. The front door is multi-light, and there is one interior brick chimney. The foundation is stuccoed. Lot drops away to the south, with a one-bay garage with double-door located at the southwest corner, under the house. There is an extensive modern deck and patio added onto the west side of the house. House occupies a corner lot, with a low concrete retaining wall with a brick cap along the north border of the lot. Occupants have included C. F. Byrd, vice-president Federal Mortgage Company, and wife Alice (1926); T. A. Cox Jr., engineer, and wife Mabel (1927 – 1932); Richard S. Heavily altered one-story bungalow has a side-gable roof with returns, eyebrow dormers, German siding,
and a porch at the southwest corner which has been enclosed as a sunroom. There is an added deck at the
front, with two sets of French doors opening onto it, and a second story added to the original one-story
wing at the rear. There is a notable central front exterior brick chimney piercing the eave, with
contrasting color brick bands and brick chimney pots. Windows are replacement one-over-one with snap-in
muntings. Foundation of the house is brick. Occupants have included E. M. Rawls, salesman
Alexander & Black, and wife Eliza (1927 –1930); Frank Littleford (1931); J. W. Jackson, manager
Asheville Merchants Association, and wife Vivian (1932); T. W. Alexander, president Smoky Mountain
Camps & Tours, and wife Judith (1935); John B. and Marion Otey (1936); A. Jordan Bernstein, civil
engineer, and wife Kate (1937 –1940); J. Walton Chessborough, lawyer, and wife Ann (1941 –1956);
and J. W. Byers, superintendent Asheville City Schools, and wife Rose (1945). (Sanborn maps; city
directories)

One-and-one-half-story bungalow has a front-gable roof with knee braces, German siding, shingled gable
ends, and an engaged front porch with a solid brick balustrade and battered posts on capped brick piers.
There is a painted brick exterior end chimney, single and paired five vertical lights-over-one windows,
and an eight-light-over-panel door with sidelights. Foundation is brick. Occupants have included E. Boyd
and Clara Jenkins (1922); R. A. Hilliard, Pollitt & Hilliard insurance agents, and wife Maxie (1923); A. F.
Wenige, manager, Asheville Country Club (1924 –1929); Clarence Sawyer, president C. Sawyer Inc.,
and wife Carrie (1932 –1940); John D. Earle, employed at Earle-Chesterfield Mill Co., and wife Martha
(1942 –1944); Mrs. Genevieve Lanley, widow (1945); and Eugene C. Ochsreiter Jr., president
Ochsenreiter Auto, and wife Esther (1947- 1956). (Sanborn maps; city directories)

SUMMARY
The Norwood Park Historic District, located on the north side of Asheville, Buncombe County, has a period of significance from ca. 1900 to 1951, and meets National Register Criterion C for architecture and Criterion A for its contribution to the early twentieth century community planning and development of Asheville. Unlike most suburban neighborhoods developing on the north side of town concurrently with Norwood Park, the neighborhood appears to have been purposefully planned to fill a need for middle class housing north of the city, with generally smaller houses and lot sizes, higher density, and no land left undeveloped for open space. It is an intact collection of Craftsman, Colonial Revival, Minimal Traditional, Tudor Revival, and Dutch Colonial Revival style buildings dating from the late 1910s and 1920s. There are a handful of buildings dating from the late 1930s and early 1940s, and two farmhouses that pre-dated the planning of the neighborhood were located on the land which developed into Norwood Park.

HISTORIC BACKGROUND AND COMMUNITY PLANNING AND DEVELOPMENT CONTEXT
Buncombe County was founded in 1792 and the county seat of Asheville, originally called Morristown, followed soon after, in 1797. Asheville remained as an isolated community through most of the nineteenth century, with some trade opening up due to the building of the Buncombe Turnpike in 1828. This drover’s road connected Greeneville, Tennessee to Greenville, South Carolina, with Asheville being one of the main stopping points along the route. It was not until the railroad arrived in 1880, however, that Asheville began to experience its greatest boom time, lasting until the end of the 1920s. During this period, neighborhoods were planned and many houses were built in the most popular styles of the day. With railroad access, building materials were plentiful and there was seemingly no end to the amount of skilled labor available to meet these construction needs. Asheville’s earliest neighborhoods, Montford and Chestnut Hills, located south of Norwood Park, developed in the late nineteenth to early twentieth centuries as the first residential expansions northward. These communities were served by the new streetcar system which began operating in Asheville in 1889, and many of the houses included carriage houses.1

As the population and wealth of Asheville grew in the twentieth century, new residential neighborhoods were built further out from the center of town, extending to the far reaches of the streetcar system, which, by the 1910s, extended as far north as Charlotte Street. However, by this time a new invention, the automobile, had arrived in Asheville, a national transportation trend which rapidly took precedence over the streetcar system. The Grove Park neighborhood, located southeast of Norwood Park, and extending to the east and west of Charlotte Street, was one of these new automobile neighborhoods, laid out with a system of rear alleyways and garages to accommodate the new mode of transportation. Kimberly Lands, built as an extension to Grove Park, and located directly east of and adjacent to the nominated district, also continued this trend of northern movement out of the commercial core of the city. Norwood Park,

platted in 1914, followed this same trend of catering to the automobile, and streets were laid out with rear alleys and garages from the beginning.  

In addition to the street and alley design for the automobile, Norwood Park was part of the “suburb beautiful” movement taking place all over the country. This movement consisted of a design philosophy which included a curvilinear system of street design that paid close attention to the natural topography and incorporated within its boundaries amenities such as large lots, sidewalks, tree-lined streets, open spaces, and elaborate, high-style houses following the latest architectural trends of the day. The earliest example of the use of this design philosophy in Asheville is in the Albemarle Park neighborhood, laid out by landscape architect Samuel Parsons in 1899.

Albemarle Park is perhaps the best example of a mountain community where the streets follow the curving mountain roads and the houses are constructed of native materials including cedar shingles, tree trunk posts and porch railings, and stone foundations. While earlier neighborhoods such as Montford and Chestnut Hills were laid out in a grid pattern, later neighborhoods such as Albemarle Park, and later Grove Park, designed by Biltmore Estate landscape architect Chauncey Beadle, utilized the “suburb beautiful” concept. The development of Norwood Park was very much in keeping with the 1910s to 1920s trend in Asheville, and the nation, to develop more suburban, park-like neighborhoods located farther from downtown. In contrast to the neighborhoods mentioned above, however, Norwood Park was designed with smaller lots, and a higher density of buildings. Norwood Park, while incorporating many of the concepts of the “suburb beautiful” movement in its curvilinear street patterns, uniform setbacks, close attention to the natural topography, sidewalks, and tree-lined streets, was smaller in land area and was designed to appeal to the middle class homeowner. Houses were generally less elaborate, typically in the Craftsman style, and no land was left undeveloped for a public park, as it had been in Grove Park and Albemarle Park where the centers of the neighborhoods still retain their original public green spaces. Norwood Park filled an important need in Asheville for more middle class housing, meeting a continuing desire of the population of Asheville to move farther from the center of town, made possible by the street car lines and the ease of access by automobile. Norwood Park, in its heyday of development in the 1910s to 1920s, provided housing for the middle class and formed the northern edge of residential communities available within the city limits of Asheville.

Norwood Park was comprised of the property of the Central Development Company, and was advertised as adjoining the golf links (later the Kimberly Lands portion of the Grove Park neighborhood to the east). The plat also noted the neighborhood as being “restricted homesites…city-water, sewerage, paved sidewalks, electric lights and telephones available”. G. B. Marshall was noted as being the exclusive agent for selling the lots with “easy terms, reasonable prices”. This first layout included Virginia

Avenue (later renamed Norwood Avenue); S. Woodward Avenue; Woodward Avenue; Midway Drive; and Lynndon Road (later Murdock Street) noted on the plat. To the west was Woolsey Avenue (now Merrimon Avenue), noting on the plat the location of the electric streetcar line, which gave ready access to the newly planned suburban neighborhood. The second plat for the neighborhood was laid out a year later, in June 1915. This was also the property of Central Development Company, comprised at this time of three individuals, S. M. Wolfe, superintendent of W. M. Ritter Labor Company, C. W. McCormick, and Guy Weaver, an attorney (all were noted as being of Ramoth, North Carolina on the plat, but all were Asheville residents). This plat included the southwest portion of the neighborhood, including lots laid out along Lynndon (Murdock); Romney Street (later the northwest portion of Ramoth Road); Carolina Avenue (later Ramoth Road); Woodley Avenue; and Hampshire Circle. Lots were small, averaging forty feet in width and one hundred twenty feet in depth, with closely spaced houses. To accommodate automobiles, the later portion of the neighborhood included a system of alleyways located behind Murdock Avenue and Midway Drive. Also platted were several public walkways connecting the houses set up on the hillsides to Murdock Street and the commercial areas along Merrimon Avenue.

While not fully documented, long-time residents note that there are two houses in the district that pre-date the rest of the neighborhood. These are 39 Ramoth Road (#70, ca. 1910) and 104 Woodward Avenue (#16, ca. 1900). Both of these were farmhouses on the land that later developed into Norwood Park. The land which eventually became part of Weaver Park, on the west side of Murdock Street, was originally a field associated with 39 Ramoth Road. The house presently located at 104 Woodward Avenue was noted as being the Padgett house on the 1914 plat. The Central Development Company also acquired lands for Norwood Park from several individuals. A typical deed from the Central Development Company to new owners included several restrictive covenants which were often included in deeds of this time period in Asheville’s developmental history. These included:

…that he will not erect or suffer or license to be erected on the land above described any commercial or manufacturing establishment or factory, or house or building to be used as a sanatorium or hospital of any kind, or at any time use or suffer to be used any building or buildings created thereon for any such purposes; that he will not erect or suffer to be erected on said land any residence to cost less than $2500.00. That in building on said land he will build on the building line as shown and indicted on the said plat hereinbefore referred to….

…that he will not build more than one residence on any one lot of said land, but may build thereon a garage or stable, in keeping with the premises and residence built thereon and of sightly appearance; that he will not during the term of twenty years from the date hereof, sell or convey said land, or any part thereof, to a negro or person of any degree of negro blood, or any person of bad character….

A May 1915 newspaper article noted that “choice lots” were for sale in Norwood Park, although they were generally smaller than those found in the adjoining Grove Park neighborhood. Over $14,000 had been invested by the developers in improving the Norwood Park property, however, including the grading of streets, concrete sidewalks, city water, electric lights, telephones, and link-up to the city sewage system. The article also pointed out the proximity to the existing street car system, making the neighborhood “one of the most desirable residential sections in or near Asheville”. The lots were all to be sold with a specified building line to give the property a “uniform park-like appearance and not to obstruct the view from any lot”. There were three homes under construction at the time this article was written, with several more being planned.9

According to the 1925 Sanborn Fire Insurance Map, there were only seventy-seven houses built by 1925, with the total number of available lots being 178. Some of these have been documented as being built in the late 1910s, but most of these were built in the early 1920s. The next group, which appears on the 1943 Sanborn map, was built in the late 1920s to the 1930s, with a handful being built in the early 1940s. Additional properties were built within the period of significance, in the late 1940s to early 1950s, filling in the few remaining lots in the neighborhood.

Residents of Norwood Park historically were a mix of socio-economic levels. Judging from the rapid turnover of occupants in some of the houses, as well as frequent vacancies, there were likely a lot of renters. In addition to the residents who worked for Asheville businesses, there were many business owners and other professionals who lived in the neighborhood, including physicians, dentists, accountants, lawyers, traveling salesmen, retired army personnel, insurance agents, postal workers, and U. S. and State Forest Service workers. Some of the businesses represented by employees living in the community included Southern Railway, Dave Steel, J. C. Penneys, Ivey’s Department Store, Asheville Citizen-Times newspaper, Parkland Chevrolet, American Enka Corporation Mill, Asheville Fish Company, Richbourg Motor Company, Asheville Paint Company, Brown-Williamson Tobacco Company, Asheville Transfer & Storage Company, and Morgan Brothers Wholesale Candy Company. In the mid-1940s, it was common to see many widows listed, an indication of husbands lost in the war. Business owners and executives living in Norwood Park included Ervin R. Bean of S. I. Bean Tile & Marble (22 Norwood); George R. Murphy, Superintendent of Asheville Cotton Mills (136 Norwood); G. J. Waechter, of Waechter’s Fabrics (1 Norwood); D. Hiden Ramsey, general manager of the Asheville Citizen-Times newspaper (104 Woodward); James M Hearn of J. M. Hearn’s Bicycles (62 Woodward); C. O. Stauffer, superintendent, of Williams-Brownell Planing Mill (also 62 Woodward); Verne G. Moser of Moser Plumbing (39 Ramoth Road); J. B. Bradford, of J. B. Bradford & Company barbers’ supplies (11 Woodward); W. A. Patterson, of Patterson Sewing Machine Shop (11 Woodward); Mack R. Warren, of Warren Safe & Lock (43 Woodward); Broadus E. Braswell, of Braswell’s Esso Service Station; Isadore Goldstein, of I. Goldstein Department Store (18 Woodley); Fred D. Severance, publisher of the Asheville News (295 Murdock Street); James P. Sawyer, of Sawyer Motor Company (7 Ramoth Road); and N. B. Clark, proprietor of Haywood Filling Station and Consumer’s Oil Company (123 Norwood).

ARCHITECTURE CONTEXT

The houses built in Norwood Park were very much in keeping with the typical styles built elsewhere in Asheville and in the nation. The building styles within Norwood Park, as mentioned above, are most similar to those seen in the Grove Park Historic District, with examples in both neighborhoods of the Colonial Revival, Craftsman, and Tudor Revival styles. However, due to the compactness of the neighborhood, Norwood Park is different in that there is a particularly large concentration of bungalows, which fit the smaller lots well and were popular among the middle class in particular. The Grove Park and Kimberly Lands neighborhoods, unlike Norwood Park, also have, within their boundaries, high style examples of the Prairie, Classical Revival, Georgian Revival, and Italian Renaissance styles, many of which are larger, more elaborate, and often architect-designed. The houses in Albemarle Park, one of several summer resort communities built in the mountains of western North Carolina, were not originally intended as year-round residences. Most were built in the Shingle and Craftsman styles, but with only a handful being equivalent in size to the bungalows typically found in Norwood Park. The Albemarle Park houses were purposefully designed to fit into that particular landscape, making use of native materials and topography to best showcase these homes which were originally used as summer cottages.

The Craftsman style is most commonly found in Norwood Park. Craftsman bungalows, nationally popular from 1905 to 1930, typically are one to one-and-one-half-stories, with either front or side-gable roofs, with porches often including details such as battered posts on piers, solid balustrades, and an irregular floor plan. They make use of natural materials such as brick and stone, and Norwood Park is no exception to this stylistic feature.10 Particularly notable examples of the Craftsman style include the C. O. Stauffer House (#10, 1917), with its side-gable roof, knee braces, shingle siding, stone and brick foundation, and front porch with triple corner posts and a solid shingled balustrade; the house at 11 Ramoth Road (#75, 1926), with its steeply pitched side-gable roof with knee braces, large front-gable roof dormer with its own balcony at the front of the house, and massive truncated posts on brick piers; and the Clyde R. Pike House (#92, 1935), with its unusual engaged front porch with truncated triple corner Doric columns capped by oversize beams, ribbon of five-light casement windows, and oversized knee braces.

The second most popular style built in the neighborhood is the Colonial Revival (1880 - 1955), including several examples of the Four Square form, which typically is two rooms tall and two rooms deep in massing, with either a gable or hip roof and a full-width porch.11 One good example of the Four Square form is the R. L. Spaulding House (#5, 1924), with its hip roof, typical Four Square massing, German and shingle siding, attached, full-width front porch, and four-vertical-lights-over-one and diamond-pane windows. The Colonial Revival covers a wide range of building forms, but all typically include two stories, symmetrical massing, and often side-gable roofs with end or central chimneys. This popular style can also be seen at a larger scale with a central portico, hip roofs and a full-width porch. Good examples

---

of the Colonial Revival style in Norwood Park include the Joseph Kartus House (#15, 1923), with its side-gable roof, wide eaves, cornice returns, front door with fanlight and sidelights, and exterior end chimneys; and the house at 39 Ramoth Road (#70, ca. 1910), with its hip roof, shingle siding, diamond-pane-over-one windows, multiple brick chimneys, and notable central, two-tier porch. A sub-group within the Colonial Revival which is seen in small numbers in Norwood Park is the Dutch Colonial Revival. An example of the Dutch Colonial Revival is the house at 97 Woodward Avenue (#31, 1923) with its symmetrical massing, central brick chimney, front entry stoop with a pedimented roof supported by square posts, German siding and gambrel roof.

The Tudor Revival (1890 – 1940) house, of which there are a few examples in Norwood Park, typically is asymmetrical in massing, is built of masonry construction, with steeply pitched multi-gable roofs, casement windows, and an entry stoop. It can include applied half-timbering on the walls and there may be brick surrounds at doors and windows. There are two excellent examples of the Tudor Revival style in the neighborhood, the Hamilton Block House (#14, 1924), with its stucco walls, steeply pitched side-gable roof, multi-light casement windows, and v-board door; and the house at 30 Norwood Avenue (#100, 1932), with elongated concrete block walls, contrasting concrete quoins and window surrounds, steeply pitched multi-story side-gable roof, exterior end concrete block chimney, and multi-light front door.

The Minimal Traditional style (ca. 1935-1950), of which there are a handful of examples in Norwood Park, was a transitional style between the Craftsman and the modern house. These houses were typically one-story and incorporated asymmetrical massing, gabled roofs, and a wide variety of materials including wood, brick, or stone. An example of this style in the neighborhood is the Milton R. Williams House (#44, 1938), with asbestos siding, recessed entry with front-gable stone surround, patio, stone foundation, stone chimney, eight-over-eight and six-over-six windows, and a multi-panel door with transom.

As is the case with most historic neighborhoods, there have been some architectural changes made since Norwood Park was first laid out in 1914. In most instances, these are minor alterations that do not significantly interfere with the architectural integrity of the houses. These include replacement doors and windows, artificial siding, and small additions that do not overwhelm the original building in mass and scale. Some architectural changes within the neighborhood that have changed building integrity, include full porch enclosures, large additions, major changes to entries, and complete re-designing of prominent front porches. However, despite these changes, Norwood Park retains a high degree of architectural integrity in its presentation of architectural styles, setback, massing, materials, and street layout, retaining its sense of place and setting.
