NATIONAL REGISTER OF HISTORIC PLACES
REGISTRATION FORM

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in How to Complete the National Register of Historic Places Registration Form (National Register Bulletin 16A). Complete each item by marking "x" in the appropriate box or by entering the information requested. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word processor, or computer, to complete all items.

1. Name of property

historic name East Durham Historic District

2. Location

street & number bounded roughly by Southern Railway right-of-way, North Guthrie Avenue, Holloway Street, Hyde Park Avenue, South Plum Street, and Vale Street

zip code 27703

3. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act of 1986, as amended, I hereby certify that this nomination request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60. In my opinion, the property meets does not meet the National Register Criteria. I recommend that this property be considered significant nationally statewide locally. (See continuation sheet for additional comments.)

### 8. Statement of Significance

**Applicable National Register Criteria**

(Verify a check mark in the column for the criteria qualifying the property for National Register listing)

- [X] A Property is associated with events that have made a significant contribution to the broad patterns of our history.
- [ ] B Property is associated with the lives of persons significant in our past.
- [X] C Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- [ ] D Property has yielded, or is likely to yield information important in prehistory or history.

**Criteria Considerations**

(Verify a check mark in all the boxes that apply.)

- [ ] A owned by a religious institution or used for religious purposes.
- [ ] B removed from its original location.
- [ ] C a birthplace or a grave.
- [ ] D a cemetery.
- [ ] E a reconstructed building, object, or structure.
- [ ] F a commemorative property.
- [X] G less than 50 years of age or achieved significance within the past 50 years.

**Period of Significance**

ca. 1890-1955

**Significant Dates**

1902

**Significant Person**

(Complete if Criterion B is marked above)

N/A

**Cultural Affiliation**

N/A

**Architect/Builder**

Architects: Rose & Rose; Githins, Fred
Builders: Sally, John T.; Wilkinson, Thomas; Rollins, R.C.

Paperwork Reduction Act Statement: This information is being collected for applications to the National Register of Historic Places to nominate properties for listing or determine eligibility for listing, to list properties, and to amend existing listings. Response to this request is required to obtain a benefit in accordance with the National Historic Preservation Act, as amended (16 U.S.C. 470 et seq.).
The East Durham Historic District is located between the Southern Railway Tracks and Holloway Street, one and one-quarter mile east of the center of Durham. The roughly rectangular-shaped East Durham Historic District, approximately five blocks wide from west to east and ten blocks long from south to north, has an irregular grid plan. The central spine, Driver Street, is a wide north-south avenue lined with trees. The major east-west arteries are Angier Avenue at the south end and Holloway Street at the north end. Most of the buildings in the district face the north-south streets. The north-south streets, in order from west to east, are the 100 block of South Plum Street, 100-600 blocks of North Hyde Park Avenue, 200 block of Vine Street, 100-200 blocks of South Maple Street, 100-600 blocks of North Maple Street, 200-300 blocks of Clay Street, 500-600 blocks of Spruce Street, 100-300 blocks of Cherry Grove Street, 100 block of Roberson Street, 100-800 blocks of North Driver Street, 100-400 blocks of South Driver Street, Salem Street, 500-800 blocks of Park Avenue, 100-400 blocks of North Guthrie Avenue, and 100-200 blocks of South Guthrie Avenue. The east-west streets in order from south to north are 1700-1800 blocks of Vale Street, 1700-2200 blocks of Angier Avenue, 1900-2100 blocks of Ashe Street, 1900-2100 blocks of Hart Street, 1700-2100 blocks of East Main Street, 1600-1900 blocks of Taylor Street, 1800-2000 blocks of Southgate Street, 1100-1400 blocks of Liberty Street, 1100-1200 blocks of Eva Street, and 1000-1400 blocks of Holloway Street. The four southern blocks, from Main Street down to the railroad tracks, have a less regular grid street plan because this area was subdivided in a piecemeal fashion from the 1880s to about 1900. Lot sizes are more irregular than the north five blocks, created in 1903 by a master plat, with a regular grid of blocks and standardized lots.

The East Durham Historic District is largely residential, with a two-block commercial area at the junction of Angier Avenue and Driver Street. Three schools are scattered throughout the district. The district contains 563 principal buildings built between ca. 1890 and ca. 1955 that contribute to the significance of the district. Due to age or lack of integrity, 138 principal buildings are noncontributing. 168 outbuildings, primarily garages and sheds, were built before 1956 and are contributing. Ninety-three outbuildings, primarily sheds and detached carports, were built after 1955 or have lost their integrity. The district contains thirty-nine scattered vacant lots that do not affect overall district integrity. The Barbee Graveyard is a contributing site. Two swimming pools are noncontributing structures. Seventy-six percent of the total resources contribute to the historical and architectural significance of the district. No buildings have previously been listed in the National Register, however three are on the North Carolina Study List: Holloway Street School (2001), East Durham Graded School (2003), and Advent Christian Church (2001). The People's Bank, 318 South Driver Street, is a locally designated historic landmark (1995).

District boundaries follow the logic of historical development. The Southern Railway tracks form the historical boundary between the mills and mill villages south of the tracks and the privately owned housing within the district to the north. The western boundary, at the rear lot lines of the houses on the west side of Hyde Park Avenue, is the historical boundary between the early twentieth century mill housing of Edgemont, constructed for the Durham Hosiery Mills, and private housing in the district. It is also the current boundary between the Hope VI Revitalization Project currently being constructed by the Durham Housing Authority, now known as
the North East Central neighborhood. The boundary on the north and east is drawn to include the densest concentration of pre-World War II construction that retains integrity. The land elevation generally drops east of Briggs Avenue, one block east of the district, and north of Holloway Street. These areas of lower elevation were developed in the mid-1900s with buildings of a less substantial character.

A number of historic landscape and architectural features create a unifying character in the East Durham Historic District. The densely-built district is marked by narrow lots, small and medium-sized houses with small front yards, sidewalks edged by granite curbstones, and a striking absence of open space. Many front yards have attractive stone or brick retaining walls. The largest open areas are the expansive yards of the three public school buildings. In spite of its relatively high density, the district has the tranquility of a small town because of its low automotive traffic except on Angier Avenue, Holloway Street, and the 400 block of South Driver Street.

The oldest houses in the district are several dozen one and two-story late Victorian houses—1-Houses, Queen Anne-style houses, and Gothic Revival cottages built in the 1890s south of Main Street. In the 1800 block of Vale Street at the southwest corner of the district stand a group of two-story early-twentieth-century houses. 1805 Vale Street, a frame 1-House with a bargeboarded front gable, may be the 1880s farmhouse of J. N. Cheek. 1809, 1817, 1808, and 1810 Vale Street houses are two-story 1-Houses or gable-and-wing Queen Anne-style houses that apparently were built about 1900. The oldest documented house is the John Cheek House, 201 South Driver Street, built in 1899. The one-story gable-and-wing cottage with a profusion of sawnwork ornament outlining the front bay window and gable roofline was built for Cheek, who ran the company grocery for the Durham Cotton Manufacturing Company. About 1900, the first superintendent of the Durham County Home, John Evans, built a stylish frame Gothic Revival cottage with a center decorative gable and flanking gabled dormer windows at 118 South Driver Street. The house has peaked window lintels and a wraparound porch. A similar Gothic cottage, probably built about the same date, stands at 111 South Guthrie Avenue, with three gabled wall dormers. Carpenter Thomas H. Young built a sturdy 1-House with a two-story rear ell on his corner lot at 2117 East Main Street. Young's handsome woodwork survives on the interior. Thomas H. Alford, a grocer who operated a general store on South Driver Street at the turn of the century, built one of the most significant Queen Anne-style houses in the district on South Guthrie Avenue about 1900. The house features a pyramidal roof and front and side wings with bracketed sunbursts, scalloped siding, and decorative ventilators. About 1930 the house was moved around the corner to 2108 East Main Street in order to save it from demolition. At 1702 Angier Avenue, James B. Vaughan, a master mechanic with the Durham Hosiery Mills, built ca. 1900 a two-story Queen Anne style residence with gabled wings, a wraparound porch, and an upper recessed balcony with a sawnwork drip course. The style was still popular in 1910, when Sidney A. Maynard had one built on his new lot at 709 North Driver Avenue, purchased in 1910 at the north end of the district. Maynard's two-story Queen Anne house features a gabled front wing with a bay window, a side bay window, and a wraparound porch.

Another group of houses of approximately the same age are not architecturally striking landmarks, however they are important examples of plain and modest mill houses. No houses built by mills have been documented in the East Durham Historic District, but it is likely that a few exist. 1917, 1918 and 1922 Hart Street and 211 and 212
South Driver Street, built ca. 1890 to 1900, are tall one and one-half-story side-gabled houses that have the same form as the original 1885 mill houses south of the Durham Cotton Manufacturing Company. Some have central chimneys, others gable end chimneys. These were rental houses in the 1930s, and have undergone numerous minor alterations. Their earlier history is unknown.

Three modest vernacular house types—the tri-gable, the gable-and-wing, and the pyramidal cottage account for the majority of houses built in the district from 1900 to 1920. The tri-gable house is a one-story side-gable house, one room deep, with a central front decorative gable that is a vernacular echo of the earlier Gothic cottage style. Dozens of examples stand in the district. The tri-gable is one of the most popular early twentieth century house types in North Carolina. Grocer John Cheek built a stylish tri-gable house about 1910 at 117 South Driver Street as a rental investment. Highly decorative bay windows protrude from each end of the house, with brackets decorated with star motifs. The original porch has turned posts with decorative brackets. A row of three well-preserved tri-gable houses, built about 1910, stand at 202, 204, and 206 South Guthrie Avenue. No. 202 was apparently built for Otis Rogers, a superintendent at an unknown mill, and its end bay window with star-decorated brackets and its peaked window lintels indicate that it was built by the same carpenters with trimwork from the same supply house as that of John Cheek. No. 204 may have been built for deputy sheriff Lonnie Morgan. A late tri-gable house was built for Earl Hoffler, a clothier, who bought a lot at 1206 Eva Street in 1915 and must have had his house built soon afterward.

Another popular type in the district, the gable-and-wing house, is a one or two-story house with a side-gable main block and a gabled front wing. The porch may be partial, sheltering only the main block, or may be full, extending around the front wing. Plain gable-and-wing-type houses fill many lots throughout the district, although most of them had some decorative gable and porch trim that has been removed. Two well-preserved examples are at 1906 Angier Avenue and 1910 Taylor Street, both built about 1910. No. 1906, perhaps built by Joseph Carlton, has a decorative front cross-gable and a full porch with original turned posts with sawnwork brackets and a scalloped drip course. 1910 Taylor Street, perhaps built for Frank Thomas, features front and side bay windows with decorative brackets and a porch with original turned posts that extends across the front and around the side bay window.

The third main house type in the district is the pyramidal cottage, a one-story four-room house with a deep pyramidal-hip roof. Common features include a front gable and a full front porch. Minzey Lawrence, a carpenter and farmer, bought a lot at 1222 Holloway Street in 1912 and probably built his pyramidal cottage, which features, like other larger pyramidal cottages in the district, a front gabled wing and a wraparound porch, about that time. A. Cleveland Marshall, a Southern Railway conductor, bought a lot at 314 North Driver Street in 1912 and probably had his pyramidal cottage with wraparound porch built soon afterward. James Hall, a truck driver, bought his lot at 1208 Eva Street in 1917 and probably built his pyramidal cottage with a gabled front wing and wraparound porch about the same time.

In the 1920s and 1930s, the bungalow, a compact one or one-and-one-half story house with an up-to-date open floor plan, became the house of choice in the East Durham Historic District for both owner-occupants and for
landlords' rental houses. The style was derived from the Arts and Crafts movement and is thus called the “Craftsman” style. There are three main forms of bungalows in the district. The earliest form is a one-and-one-half-story bungalow with side gabled roof, front dormer, eaves with triangle brackets in the gables and exposed rafter tails, and an engaged full façade porch with Craftsman supports: tapered box posts on brick piers. The second form is a one-story bungalow with multiple gabled roofline consisting of crossed, overlapping and subsidiary gables, and engaged porch with Craftsman supports. The third and simplest form is a one-story front-gable or hipped-roof bungalow with recessed full façade front porch with Craftsman supports.

The earliest bungalows appear in 1910. Robert Crabtree, who owned the Crabtree Pharmacy at the corner of Angier Avenue and Driver Street about 1905, apparently had the large bungalow built at 1808 Angier Avenue. The large one and one-half-story, side-gabled house has a stone foundation and an engaged porch with stone piers. 1804 Vale Street is a smaller one and one-half-story, side-gabled bungalow with a full engaged porch. Machine operator Lex Veazey purchased his lot at 1210 Eva Street in 1921, and probably built his side-gabled bungalow with an engaged porch in the same year. About 1925 Dock Brown, owner of a dry cleaners first located on Driver Street and later on Angier Avenue, built a substantial brick bungalow, unusual in the district, at 418 North Driver Street. The side-gabled one and one-half story house has a front gabled block with an engaged, wraparound porch with large brick posts and a ramped brick railing. Building contractor Thomas Wilkinson constructed his own bungalow residence at 510 North Driver Street about 1932. The side-gabled one and one-half story frame house has a large gabled front dormer window, a gabled porch with Craftsman posts and a shingled front gable, and decorative eave brackets.

The most unusual Craftsman-style house in the district is the residence of Dr. George Ross, at 2111 East Main Street, built about 1925. The large two-story rectangular main block has a straightforward Craftsman style, with weatherboard on the first story, a wood-shingled upper story, and wide overhanging eaves. In front are unusual one-story wings extending diagonally to enclose a bowed porch with a weatherboarded railing and massive shingled porch piers. No other house of this scale or creativity was built during the 1920s in the district.

The picturesque revival styles so popular for housing in Durham's middle-class neighborhoods in the 1920s and 1930s are scarce in the East Durham Historic District. The Colonial Revival and the Tudor Revival styles appear rarely here. About a dozen Tudor Cottages, mostly of one and one-half story brick construction, stand north of Main Street. These were built for more affluent owner-occupants, not as rental or speculative construction. Carr United Methodist Church built a Tudor Revival cottage-style parsonage at 111 North Driver Street about 1930. The pastor of the Edgemont Free Will Baptist Church lived in a Tudor Cottage at 303 North Hyde Park Avenue, built about 1955, probably by his church. A cluster of Tudor Cottages in the 500-600 blocks of North Hyde Park Avenue were built in the 1930s. Number 509, with its clinker brick walls, gabled porch with stucco gable, sturdy brick piers, and stone quoins around the façade window, is one of the most stylish examples. Albert Osteen, a department foreman, is the earliest known owner. 510 North Hyde Park, perhaps built for truck driver Sidney Webster, is a one and one-half story side-gabled brick Tudor Cottage.

With the exception of several Dutch Colonial Revival-style houses, the Colonial Revival style appears only
United States Department of the Interior

NATIONAL REGISTER OF HISTORIC PLACES
CONTINUATION SHEET

Section 7 Page 5
East Durham Historic District
Durham County, North Carolina

rarely in the district. Hurley Parrish, manager of the East Durham branch of The Fidelity Bank, built a two-story Colonial Revival-style house with handsome stone rubble walls, a pedimented entrance, and a screened side porch on a large lot at 410 North Driver Street about 1935. Dr. Norman Spikes, a physician with an office in downtown Durham, built a two-story frame house with an arched porch and entrance with a fanlight and sidelights at 601 North Hyde Park Avenue about 1930. Although the house stands out for its size on the street of one-story houses, its Colonial Revival features are modest. About 1950 the Angier Avenue Baptist Church replaced its parsonage at 301 North Driver Street with a two-story brick Colonial Revival-style house with a tall two-story Mount Vernon portico.

By 1940, few vacant building lots remained in the district. Most of these were in the north half, north of Main Street. In the 1940s and 1950s these lots were infilled primarily with small Minimal Traditional-style houses or duplexes. Approximately forty small Minimal Traditional-style houses, one-story side-gable houses, usually of frame, with modest Colonial trim such as a classical entrance porch, are scattered throughout the district, although primarily in the northern half. Most were built for owner-occupants, rather than as rental houses. 511 North Driver Street, built about 1940 for city fireman Lemuel Foster, is a frame house with a gabled entrance porch with decorative metal posts and railing. Ela Page, owner of Page Oil Company, apparently built the Minimal Traditional-style house at 506 North Hyde Park Avenue about 1940. The small side-gabled house has a gabled entrance porch with an arched soffit. A group of five very modest Minimal Traditional houses, 512, 514, 516, 518, and 520 Spruce Street, were built about 1948, probably as speculative housing. The small one-story side-gable frame houses, three bays wide, have a center front door sheltered by a bracketed stoop, and flanking six-over-six sash windows. The original owners were blue collar tradesmen such as textile and tobacco mill employees. Charles Gurley, an employee at Duke University, is the earliest known owner of a larger Minimal Traditional-style house at 1202 Eva Street built about 1950. The one-story side-gabled brick house has a shallow front wing and a porch with lattice-work wooden posts set into the angle. Aubrey Crutchfield, employee at the Model Food Store, is the first known owner-occupant of the Minimal Traditional-style brick house at 2107 Hart Street, built about 1955. Like the Gurley House, this has a front wing and a porch in the angle of the facade. Metal casement windows, a front picture window, and iron porch posts give the house a 1950s character.

The Ranch house--a low, one-story rectangular house--first appears about 1960, on the few infill lots remaining in the district. 417 North Hyde Park Avenue, a four-bay wide brick ranch house with a hipped roof and a front picture window, was probably built for Nathan Shipp, a foreman at American Suppliers. The scarcity of open lots and their narrow width generally kept the Ranch house type out of the district.

In a lower middle class neighborhood such as the East Durham Historic District, the duplex is an important house type. Duplexes have been built in the neighborhood since the late 1920s. Over forty historic, pre-1955 duplexes stand in the district, and fall into several subtypes that change over time. The earliest duplexes are frame bungalows, with hipped or front-gable roofs and full front porches that contain two living units located side by side. Except for the presence of two front doors, such duplexes might be mistaken for single-family bungalows. A group of three bungalow-style duplexes stand together at 1108, 1113, and 1115 Eva Street. The duplexes, built in the late 1920s, have typical bungalow features such as engaged front porches, German siding,
and decorative exposed rafter tails. 2004 Southgate Street is another intact duplex bungalow built in the late 1920s. The hipped duplex has engaged porch with original Craftsman posts and German siding. Mrs Lula Sherron, owner-occupant from 1925 to 1945, lived in one unit and rented out the other. About 1935 a group of four nearly identical duplexes were built at 1302, 1304, 1306 and 1308 Liberty Street. The one-story frame buildings have hipped or front-gabled roofs and full hipped porches sheltering two front doors.

The second duplex type are brick Minimal Traditional or Cape Cod style, side-by-side duplexes built in the late 1930s and the 1940s to meet the housing shortage in Durham. Little construction occurred in the early years of the Depression in the early 1930s, and building materials were in very short supply during the war years and post-war years. The 1300 block of Holloway Street contains four brick duplexes built in the late 1930s. All four have modest Minimal Traditional finish, including small entrance porches with decorative metal posts and railings. Typical of the post-war type are a pair of Cape Cod-style brick duplexes at 418 and 420 North Hyde Park Avenue, built about 1945. The side-gable duplexes have arched, bracketed hoods over the front doors. No. 418 was apparently built for U. S. Army serviceman Ralph Carpenter, who in 1945 lived in one unit and rented out the other. Three duplexes built in the late 1940s at 208, 210 and 212 North Hyde Park Avenue are one and one-half-story, side-gabled frame buildings of more vernacular design, with German siding. No. 208 has a brick façade and corner recessed entrance porches, and Nos. 210 and 212 have projecting entrance porches.

The late 1950s-1960s duplex type, popular throughout Durham on narrow lots intended for single family houses, is a rectangular building set sideways on the lot, with one unit behind the other unit. An excellent example of this duplex type stands at 813 Park Avenue. Roderick Mullen, captain of the city fire department, apparently had this brick, hipped roof duplex built about 1960. The front unit has an entrance porch recessed into the corner of the facade, and the rear unit has its own entrance porch recessed into the middle of the side elevation. Mullen is living in one of the units and renting out the other.

Another significant building type in the East Durham Historic District is the small grocery store. Four of these are in the district. The oldest documented store is Community Groceries at 106 South Guthrie Avenue, built about 1900. The small flat-roofed frame store has a remodeled storefront with two front doors. Clark Dry Goods, 2012 Angier Avenue, ca. 1920, is a narrow one-story flat-roofed frame store with original recessed door and flanking wooden display windows. The George Brown Grocery Store, ca. 1920, is a one-story flat-roofed frame store at 2003 Angier Avenue built about 1920. Contractor R. C. Rollins built Rollins Store, 501 North Driver Street, beside his house in 1923 for his wife Josie, who operated it for the rest of her life. The small front-gabled building has a center door, flanking sash windows, and a modest false front.

Three historic commercial areas served the citizens of the East Durham Historic District. At the south end of Driver Street, across from the Durham Cotton Manufacturing Company, the two-story brick People’s Bank was erected about 1905. The elegant Neoclassical Revival-style bank has a corner diagonal entrance, arched windows with drip moldings, and a corbeled brick cornice. Next door at 457 South Driver Street, a one-story buff brick building with a paneled and corbeled cornice was built in the 1910s and housed a grocery store in its early years. When the trolley line was built in 1902 along Angier Avenue to East Durham, a new business

East Durham Historic District

Durham County, North Carolina

The district began to develop at the intersection of Angier and Driver Street. About 1915 the large two-story brick Seagroves Grocery Store at 400-404 South Driver Street, at the Angier Avenue corner, was constructed. Interestingly, Seagroves Grocery has two distinctly different architectural styles along its two street elevations. The elevation facing Driver Street features old-fashioned common bond brick, arched windows, and a corbeled brick cornice. The elevation facing the street car line on Angier Avenue has a stylish dark red brick veneer with geometric brick patterns and rectangular windows. In 1921 the People's Bank acknowledged the shift in the neighborhood's commercial center by constructing a showplace Neoclassical Revival-style stone "temple-style" bank across from Seagroves Grocery, at 318 South Driver Street. The remainder of the 300 block filled in with one-story brick commercial buildings in the 1920s to 1940s. These stores housed groceries, a post office, a dime store, shoe shop, and barber shop. The A&P was located at 316 South Driver Street from 1930 to 1960. The third commercial cluster stands on Holloway Street, on either side of the intersection of Hyde Park Avenue, also on the trolley line. Built in the 1920s, these one-story brick buildings, each housing two stores, at 1026-1028 and 1100-1102 Holloway Street, were grocery stores for many years.

The largest buildings in the district are the three public schools: the Y. E. Smith School, 107 South Driver Street, designed by New York architect Fred Githins in 1910; the Holloway Street Elementary School, 1107 Holloway, designed by Durham architects Rose and Rose in 1928, and the ca. 1940 East Durham Junior High School, 401 North Driver Street. The Smith School has a Neoclassical Revival style; the other two schools are of simple brick construction with decorative entrances.

Six historic churches are scattered through the district. The oldest building is the Advent Christian Church, 1801 East Main Street, a small frame Gothic Revival-style building constructed in the early 1920s. In 1924 the East Durham Baptist Church (now Angier Avenue Baptist Church), built a large brick Colonial Revival-style sanctuary with a Doric portico at 2101 Angier Avenue. Carr United Methodist Church erected their brick and stone Gothic Revival-style complex with a parsonage at 107 North Driver Street between 1930 and 1948. From the 1930s to the 1950s three other small churches, front-gabled brick construction on corner lots, were built. These are the Holloway Street Christian Church, 1118 Holloway Street; Pentecostal Holiness Church, 314 North Hyde Park Avenue; and the Gospel Tabernacle, 500 North Driver Street.

The district contains three historic filling stations located along the busy thoroughfares of Angier Avenue and Holloway Street. The earliest and most architecturally significant station is East Durham Service Station, 2201 Angier Avenue, built in the late 1920s. The tiny brick office is fronted by a large front porte-cochere of red brick with decorative yellow brick trim and a heavy wooden classical cornice. The Wilkinson Filling Station, 1901 Angier Avenue, is a rectangular stuccoed station built about 1940, with modest Art Moderne stuccoed details. The Hyde Park Gulf Station, 1023 Holloway Street, ca. 1945, is an Art Moderne station with porcelainized enamel walls with rounded corners.

From 1955, the end of the period of significance, to the present, very little construction has taken place in the district. There has been some demolition and construction of fourplex apartment buildings, as well as construction of a number of infill duplexes and small single family houses. Five fourplexes are scattered in the
district, most constructed on corner lots on the sites of historic houses. All but one are rectangular two-story frame blocks with two entrance doors in the first story and two in the second story, reached by a set of wooden or metal stairs at the façade corners. Most are set far back on the lot, with a paved parking lot in front. Approximately two dozen post-1955 duplexes are scattered in the district. These are invariably small, one-story frame or brick buildings of extremely plain design. One notable cluster of new houses are the five infill dwellings built at 115, 201, 203, 205, and 209 North Maple Street in 2003 by Habitat for Humanity. Erected on the site of the Louise Knitting Mills, these one-story frame houses of front-gable form with full front porches are nearly indistinguishable from the 1920s and 1930s bungalows around them, with the exception of the newness of the materials.

Architectural Integrity: Due to the economically depressed conditions in the neighborhood, few of the houses have ever received additions or major remodeling. Standard alterations that have occurred and that do affect the architectural integrity of the buildings are the widespread replacement of historic porch posts with metal supports, or recently, with vinyl or new wooden posts, widespread use of aluminum or vinyl siding, and the growing usage of replacement vinyl windows. Historic houses generally retain architectural integrity. Nearly all still have front porches of Victorian and Craftsman character. Approximately seventy of the 138 noncontributing principal buildings are historic houses that have lost integrity through substantial alterations, usually by the replacement of siding, windows, and porches.

INVENTORY LIST

Note: To understand the following inventory list, it is necessary to know a few peculiarities of the street plan: The first block of the north-south streets north of East Main Street is a long block containing house numbers from 100-300, and bounded at the north end by Taylor Street. The 400 block, bounded by Taylor Street on the south and Southgate Street on the north, is normal in length. The third block between Southgate and Liberty streets contains numbers from 500-600. One further peculiarity is that East Main Street jogs northward at the Maple Street intersection, putting three houses with the addresses of 100, 102, and 104 North Main Street on the south side of the intersection.

House Numbers: North-south streets are numbered from Main Street. To the north, numbers ascend in a northerly direction. To the south, numbers ascend in a southerly direction. East-west streets are numbered from west to east, as East Durham was growing east from the city of Durham.

The list is arranged alphabetically, by street name, north side first, then south side; west side first, then east side. Buildings are of frame construction unless otherwise stated. Dates and names of houses are derived from the following primary and secondary sources. The primary sources are the 1913 and the 1937 Sanborn Maps [1913, 1937 SM]; Durham City Directories dating from 1930 to 1960 (CDs); and interviews. The major secondary source is The Durham Architectural and Historic Inventory by Claudia P. Roberts and Diane E. Lea, 1982.
Dating Methodology: Dates of construction are derived from a sampling of the Durham City Directories beginning in 1930, the first year that street listings for most of the district are included. Each building number was tracked in 1930, 1935-36, 1940, 1945, 1950, 1955-56, and 1960 to determine when it was included in the directory. The date of its first appearance in a city directory is noted as the approximate construction date of the house, unless other information is available or unless the house is located in a block that was not included in the directory until later because of its more remote location. If a street address does not appear in the 1955-56 directory, that building is assumed to be noncontributing due to age. The date of any house built prior to 1930 is based either on an educated guess based on its construction features and style or on other information. The vernacular tri-gable and pyramidal cottage-type houses in the south section of the district are present on the 1913 Sanborn map, thus those in the north section of the district that were not mapped are also assumed to predate 1913. Houses that first appear in the 1930 directory are dated as "ca. 1930," houses that appear in the 1935 directory are dated as "ca. 1935," and so on.

Names of houses are based on the earliest known owner-occupant, or on the name of the owner-occupant who lived in the house for the longest period of time prior to 1955, the end of the period of significance. The first directory in the sample that differentiates owner-occupants from tenants is 1940. Houses are not named after individuals who are assumed to have been tenants. Owner-occupants identified in the 1940 directory were searched backward in the alphabetical listings of the directories to determine when they occupied the house. Occupation, where given, refers to the occupation listed in the alphabetical listings of the city directory in the first year in which the individual is listed at the address.

Contributing/Noncontributing Status: All buildings are categorized as C (contributing) or NC (noncontributing) based on the following criteria. Contributing buildings were constructed prior to 1956, and are at least fifty years old. They also retain sufficient integrity of design, setting, materials, workmanship, feeling, and association to contribute to the historic character of the district. Any building built after the end of the period of significance, in 1955, is noncontributing due to its age (NC-age). Buildings built before 1955 that have lost their architectural integrity because of substantial additions and/or alterations incompatible with their historic character are categorized as noncontributing because of these changes (NC-alt.). Examples of this are complete window, door, and porch replacements; artificial siding that obscures the original door, window, wall and eave detailing, and extensive post-1955 additions. Artificial siding such as aluminum, vinyl or asbestos shingles does not automatically render a building noncontributing if it retains its historic form and other early features such as window sashes and a porch. A number of district houses have vinyl covering the walls and trim and replacement vinyl windows. If the historic form and original porch are present, then the house is still considered contributing. Most NC-alt. houses have lost their character because they have walls and trim covered with artificial siding, replacement windows, and porches with replacement posts or that have been enclosed as rooms.

Ave., north side

1703 Angier Ave.  Ella Marcom House.  Pyramidal cottage with shallow front and side gabled wings and a full front porch with replacement posts and railings. Other original features are German siding and 2-over-2 sash windows. 1930-1940 CDs: Ella Marcom, widow of George, occupant.

1705 Angier Ave.  G. Allie Ellis House.  Pyramidal cottage with shallow front and side gabled wings, German siding, and a wraparound porch with replacement Craftsman-era stone piers and balustrade and battered wood posts. Replacement vinyl sash windows. 1930-1940 CDs: G. Allie Ellis owner/occupant (auto mechanic).

1700 blk Angier Ave., south side

1702 Angier Ave.  James B. Vaughan House.  2-story Queen Anne-style house with a hipped roof, front side gabled wings, and a full wraparound porch with slender classical columns and a replacement railing. Above the entrance is a recessed balcony with a turned railing and sawnwork drip course. The house has 1-over-1 sash windows and 1-story gabled rear wings. A 1-story rear porch is now enclosed. Vinyl siding. James B. Vaughan, a master mechanic with the Durham Hosiery Mills, built this as his residence about 1900. His wife, Adella, operated a small neighborhood grocery store next door that is now demolished. [Roberts, Durham A&HI, 92; 1913 SM]

1708 Angier Ave.  House.  1-story tri-gable house with a decoratively shingled front gable with sawnwork bargeboard, 2-over-2 sash windows with peaked lintels with applied sawnwork, and German siding. The full hipped porch has replacement metal posts. George L. King occupant in 1930. [1913 SM; 1930 CD]

1800 Angier Ave. NC-alt.
Hudson Funeral Home. 2-story Colonial Revival-style building with a flat roof, a brick veneer façade, and sides and rear covered with vinyl siding. The entrance features sidelights and pilasters supporting a swan’s neck pediment. First story façade windows are infilled with glass blocks, with flat arches with keystones. Upper façade windows have 2-over-2 horizontal sashes. A 2-story classical portico with boxed posts shelters the façade, with a Chippendale rooftop balustrade. At the rear are a 1-story gabled wing and 1-story sheds that flank the main block. The building is overbuilt around a 1 1/2-story frame late 19th century house. 1930-1960 CDs: S. Vance Hudson, undertaker, lived here in 1930. Ollie T. Hudson lived here and operated the funeral home in 1955 and 1960. [Little-Stokes & Dickinson, No. 166]
Late 19th c., Ca. 1960

Church. 1-story front-gabled brick church with a wide colored glass window in the center façade, a double entrance sheltered by a flat metal canopy with decorative metal posts, and no side windows. The front edge of the roof juts forward to shelter the façade. This is currently occupied by Power in the Word Ministry.

Robert Crabtree House. Large, architecturally distinguished 1½-story side-gable bungalow with a front 3-bay shed dormer window and an engaged porch with stone foundation and piers, fluted classical posts, and an original wood railing. Windows are original 1-over-1 sashes on the first story, 6-over-6 sashes on the 2nd story, and a bay window beneath the porch. The eaves have brackets and exposed rafter tails. Aluminum siding. 1913 SM. 1911-1912 CD: Robert A. Crabtree lives on Angier Ave. 1930-1940 CDs: Robert A. Crabtree owner/occupant (clerk, Crabtree Pharmacy).

House. 2-story gable-and-wing Queen Anne-style house with an original 1-story side wing, weatherboard, and 2-over-2 sash windows. Sawnwork bargeboard decorates the gable of the wing. The wraparound porch has Craftsman-style posts and railing. The façade has 9-over-1 Craftsman sash windows. [1913 SM; 1930 CD]

Wilkinson Filling Station. Stuccoed 1-story building that retains modest Art Moderne pilasters and cornice molding. All openings have been enclosed and a low gabled roof has been added to the original flat roof. John W. Wilkinson Jr. built this station between 1935 and 1940. [1940 CD]
East Durham Historic District  Durham County, North Carolina

Ave., south side

1902 Angier Ave. House. 2-story gable-and-wing type house with German siding, 2-over-2 sash windows, an original 1-story side wing, and a wraparound porch with slender classical columns. The house is similar, but much plainer than 1810 Angier Ave. Alterations include some new windows. Many windows are boarded up and the house is deteriorated and vacant. 1913 SM. 1930-1940 CDs: Margaret Pope owner/occupant.

1904 Angier Ave. House. 1-story hipped-roof house with front and side gabled wings that are apparently original, and 4-over-1 vertical sash windows. The full porch has replacement metal posts. Aluminum siding. 1913 SM. 1930-1935 CDs: J. Frank Adams occupant (shipping clerk, Durham Cotton Mfg. Co.).

1906 Angier Ave. House. 1-story gable-and-wing type house with a secondary front cross-gable, German siding, and a full porch with original turned posts with sawnwork brackets and a scalloped dripcourse. Replacement 1-over-1 sash windows. 1913 SM. 1930-1940 CDs: Joseph P. Carlton owner/occupant (bus driver).

1908 Angier Ave. House. 1-story gable-and-wing type house with a secondary front cross-gable, some 2-over-2 sash windows on the sides, and a full porch. Alterations include vinyl siding, replacement façade windows, and replacement metal porch posts. [1913 SM; 1930 CD]

2000 blk Angier Ave., north side

2005 Angier Ave. House. 1-story side-gable house with 6-over-6 sash windows and a hipped porch. Alterations include vinyl siding and metal porch posts and railing. 1930 CD; 1937 SM.
2007 Angier Ave.  | House. 1-story side-gabled duplex with central chimney, 4-over-1 vertical sash windows, aluminum siding, and a porch with replacement metal posts and railing.  
| 1930-1935 CDs, 1937 SM. Built between 1930 and 1935 as a single family house, later changed to a duplex.  
Ca. 1935

C    Ca. 1913

309 Clay St.    House. 1-story tri-gable house with weatherboard, 4-over-4 sash windows, and a hipped porch with replacement metal posts. The original turned pilasters are still in place. 1913 SM. 1935-1940 CDs: Lynn Wilkie occupant (driver J. M. Mathes Co.).

C    Ca. 1913

313 Clay St.    House. 1-story gable-and-wing type house with German siding, 2-over-2 sash windows, and a front cutaway bay window with pendant brackets. The bay windows have been replaced. The wraparound porch has classical columns. The left side porch bay has been enclosed. 1913 SM, 1935 CD.

400 blk Clay St.,
west side

402 Clay St.    House. 2-story gable-and-wing type house with weatherboard, 2-over-2 sash windows, and a bay window in the front gable. The wraparound porch has classical columns and a replacement railing. The scalloped drip course is an addition. The house is unusual because the entrance is located in the front wing. The stair is also located in the front wing room. Because of the narrow lot, the 1-story kitchen ell is located on the south side rather than the rear. 1913 SM, 1930 CD.

C    Ca. 1900

100-300 blks N.
Driver St., west
Carr United Methodist Church. Prominent brick Gothic Revival-style sanctuary with attached 2-story original annex on south side. The entrance features a Gothic arched sandstone portal, with a large sandstone arched opening above it containing 3 windows. Buttresses punctuate the Flemish bond brick walls. Side elevations have Gothic arched windows with stained glass. The annex features an entrance tower with arched ventilators in the 3rd stage, and rectangular sash windows. The cornerstone reads “Carr United Methodist Church Aug. 1886-Aug 1947.” The original church, organized at the Durham Cotton Manufacturing Co., owned by Carr, stood on Pettigrew St. The congregation outgrew that frame building and constructed this complex in 3 stages from 1930 to 1948.

Former Carr United Methodist Church Parsonage. Brick 1 ½-story Tudor Cottage with arched front door and gabled 1-bay porch with half-timbered gable and diamond window, a front-gabled wing, and front and side shed dormer windows. Replacement sash windows.

Claude Carr House. Pyramidal cottage with hipped front dormer with decorative windows and a side pedimented wing. Other features are a wraparound Craftsman porch. German siding, 1-over-1 sash windows and an original landscape window beneath porch. 1913 SM. 1930-1940 CDs: Claude Carr owner/occupant (Carr & King). Garage. Ca. 1940. Side-gabled garage with replacement vertical siding.

Charles Johnson House. 2-story gable-and-wing type house with some original 2-over-2 sash windows and some replacement windows. The porch has Craftsman posts and a replacement railing. Vinyl siding. 1913 SM. 1930-1940 CDs: Chas. Johnson owner/occupant (bus operator).

Kate Fuller House. 1-story tri-gable house with 4-over-4 sash windows, an entrance with 1 sidelight, and vinyl siding. Craftsman-style hipped porch has a solid frame balustrade now covered with vinyl. 1913 SM. 1930-1940 CDs: Kate Fuller owner/occupant.

East Durham Junior High School. Art Moderne-style 2-story brick school that occupies the entire block along Driver St. between Taylor and Southgate streets on the sides and Maple St. on the rear. The original building consists of a 3-bay entrance pavilion with a stone facing, flanked by 8 bay brick elevations. The building rests on a raised basement. Brick is 1-to-5 common bond. The recessed entrance has a pilastered surround. The stepped entrance parapet is inscribed “East Durham Junior High School.” Rows of triple windows, with flanking single windows, illuminate the classrooms. These are replacement metal windows with transoms. About 1950, a 2-story auditorium addition was added on the south side. It closely follows the design of the original building, with a stone Art Moderne entrance bay. It retains 6-over-6 wood sash windows. On the north side is a 1-story gymnasium addition of brick, with metal casement windows. The final addition is an International Style concrete and glass cafeteria, constructed to the rear about 1980. This striking addition is supported on concrete piers, with a heavy concrete framework enclosed with large glass bays. Until 1935 this was the Durham Baseball Park. 1940 CD: East Durham Jr Hi School. The school, still owned by the Durham School system, operated as the CIS Academy until it closed in the 1990s.

400 blk N. Driver St., east side

Ca. 1930

House. 1-story hip-roofed Craftsman-style house with a hipped dormer, 1-over-1 sash windows, and a front picture window addition. The wraparound porch has replacement metal posts. 1930 CD.
Hurley Parrish House. 2-story side-gable Colonial Revival-style house of random-coursed stone rubble, with a gable end chimney and 6-over-6 sash windows with flat arches. The entrance has a fluted pilasters and a classical pediment. On the south side is a screened shed porch. The house occupies a large lot. 1935-40 CDs: Hurley Parrish owner/occupant (mgr. East Durham Branch, The Fidelity Bank).

Ernest Carlton House. 1-story side-gabled Craftsman-style house with a front-gable Craftsman porch. The porch wraps around to an original side wing. Other features are 6-over-1 sash windows, and vinyl siding. 1930-1940 CDs: Ernest Carlton owner/occupant (v. pres., Carolina Clothing Co.).

House. 1-story side-gable bungalow with gabled dormer, 6-over-1 sash windows, and an engaged Craftsman porch. Alterations consist of 1 picture window replacement beneath the porch and vinyl siding. 1930 CD.

House. Pyramidal cottage with 2 interior chimneys, front and side gables, 1-over-1 sash windows, and a wraparound porch with original posts and railing. The side sunroom accessed by the porch may be original. Walls have asbestos siding. 1913 SM, 1930 CD.

Dock W. Brown House. Substantial 1 ½-story brick bungalow with side and front-gabled roofs and an engaged porch with a dentil frieze, brick posts, and a solid brick railing with ramped concrete coping. The entrance has sidelights. The porch wraps around the north side but has been enclosed on this side. Windows have 4-over-1 vertical sashes. The eave brackets are covered in vinyl. 1930-1940 CDs: Dock W. Brown owner/occupant (D. W. Brown Dry Cleaners).

Rollins Store. 1-story front-gabled store with a parapeted façade, a center door and flanking 6-over-6 sash windows. The store is covered with weatherboard and has exposed rafter tails. R. C. Rollins, whose residence is next door at 503 N. Driver St., built the store in his side yard in 1923. His wife Josie ran the grocery for many years,

East Durham Historic District, Durham County, North Carolina

607 N. Driver St. House. 1-story side-gabled Craftsman-style house with weatherboard, 9-over-1 sash windows, eave brackets, exposed rafter tails, and a 2-bay shed porch with a gabled entrance bay and boxed posts. 1930 CD.

609 N. Driver St. Duplex. 1-story hipped and front-gabled duplex with 4-over-1 vertical sash windows and a full hipped porch. Alterations include aluminum siding and replacement metal porch posts and railings. 1940 CD: 2 occupants.

611 N. Driver St. Bunn Coble House. 1-story front-gabled Craftsman-style brick house with 6-over-1 sash windows and a 2-bay gabled entrance porch. The front gables are stuccoed. The porch has replacement metal posts and railings. 1945: Bunn Coble owner/occupant (asst. superintendent of mails).

C Garage. Ca. 1945. Front-gabled garage with German siding and exposed rafter tails.

615 N. Driver St. Lawyer J. Rainey House. 1-story side-gabled Tudor Cottage with a front chimney, a trio of wooden casement windows, and 9-over-1 sash windows. Other features are weatherboard, eave brackets, exposed rafter tails, and a bracketed stoop over the entrance. 1930-1940 CDs: Lawyer J. Rainey owner/occupant (clothes cleaner).

500-600 blks N. Driver St., east side

500 N. Driver St. Gospel Tabernacle. Front-gabled brick sanctuary, 3 bays wide and 8 bays deep, with paired rectangular stained glass windows. The marble cornerstone has the date 1945. A 1960s narthex addition of contemporary design features a large green glass window that occupies the front gable, with two glazed entrances sheltered by a flat metal awning. At the rear, a small front-gable Craftsman-style house, apparently built in 1945, is attached. This was probably the original parsonage. It has 4-over-1 vertical sash windows, a recessed 2-bay Craftsman porch, and vinyl siding. Now the Mt. Calvary Lighthouse of Faith. The building is noncontributing due to the prominent 1960s addition. 1945 CD: Gospel Tabernacle. 1960 CD: Gospel Center.

506 N. Driver St. John Goodwin House. 1-story front gable Craftsman house with exposed rafter tails,

Fire Station Number 3. Modernist 1-story brick fire station with 2-bay flat roof central truck storage section and lower flanking flat-roofed wings. Among the stylish features are a severe stone facing around the firetruck bays, wide overhanging eaves sheltering horizontal metal sliding glass windows, and an original planter box along the south wing. The brick veneer has Flemish bond variation. 1960 CD: Fire Station No. 3. This now serves as the “Public Works Impact Team” office.

107 S. Driver St.

C
Ca. 1910, ca. 1925.

Y. E. Smith School. Architecturally significant Classical Revival-style 2-story brick public school of tripartite form, on a raised basement with a deck-on-hip roof. The central 7-bay section is flanked by recessed 3-bay wings. Red common bond brick walls are accented with beige brick corner pilasters. First story windows have rusticated granite lintels, 2nd story windows are segmentally-arched. All sashes are replaced. The front entrance and side entrances have wide round-arched surrounds. A balcony originally located above the main entrance has been removed. The school was designed by Fred Githens of the New York firm of Tilton & Githens. When the school was
converted to the East Durham High School ca. 1925, a rear addition doubled the size of the school from 11 bays to 20 bays deep. The brick addition has replacement windows with transoms, unified by a corbeled brick string course beneath each story of windows. About 1945 the school became an elementary school named the Y. E. Smith School. It closed in 1987. 1913 SM. 1925-1940 CDs: East Durham High School. 1945 CD: Y. E. Smith School.

115 S. Driver St. Gilbert H. Boger House. Large Pyramidal Cottage with 2 interior chimneys, front hipped dormer window, a north side wing, 1-over-1 sash windows, and a wraparound porch. Alterations include vinyl siding and replacement metal posts and railing. This may have been the residence of the East Durham Graded School principal. 1930-1940 CDs: Gilbert H. Boger owner/occupant (textileworker).

117 S. Driver St. Cheek-Thomas House. Architecturally significant 1-story tri-gable house with a cutaway bay window on each side with pendent brackets with star motifs. All gables have sawtooth shingles. Original 2-over-2 sash windows have peaked lintels. Original double front door. The original porch has turned bracketed posts and an original railing. John Cheek, a grocer who lived at 201 S. Driver St., built the house as a rental. Neighborhood grocer S. A. Thomas purchased it from Cheek's widow in the early 1940s. [Roberts, Durham A&HI, 99]

119 S. Driver St. House. Architecturally significant 1-story tri-gable house that is similar to 117 S. Driver St., but has less ornate trimwork. All gables have decorative sawtooth and staggered shingles. Original 2-over-2 sash windows have peaked lintels with additional sawnwork ornament. The original porch has turned bracketed posts. 1930 CD.
C Garage. Ca. 1930. Front-gable garage with German siding and exposed rafter tails.

200 blk S. Driver St., west side

202 S. Driver St. House. 1-story tri-gable house with a diamond vent in the front gable and a hipped Craftsman porch. Alterations include vinyl siding and replacement sash windows.1913 SM. 1930 CD.

206 S. Driver St. House. 1-story gable-and-wing type house with German siding, 4-over-4 sash windows, a full porch with original turned posts with brackets and a simple wood

John Cheek House. Architecturally significant 1 1/2-story gable-and-wing type house with weatherboard, 2-over-2 sash windows with peaked lintels, and a front cutaway bay window with pendant brackets with star motifs. The front gable has sawnwork bargeboard and sawtooth shingles. At the rear is a porch with original turned posts. A Craftsman-style addition created living space in the attic by raising the roof and adding front and rear shed dormer windows. The front wraparound porch was given a solid weatherboarded railing and boxed wood posts. John Cheek, who ran the company grocery for the Durham Cotton Manufacturing Company, built the house in 1899 as his residence. As his family grew, he remodeled it to its current appearance in the 1920s. [Roberts, Durham A&HI, 99]

Former Seagroves Grocery. Prominent, architecturally significant 2-story brick commercial building located at the corner of Angier Ave., with a diagonal entrance facing the intersection. The east elevation facing Driver St. has common bond brick, segmentally-arched windows and a corbeled cornice. In contrast, the north elevation facing Angier Ave. has a stylish dark red brick veneer with a flat parapet with a geometric design of raised and contrasting brick. Windows have original 1-over-1 sashes. Apparently both facades are original and reflect the greater importance of Angier Ave. as a transportation corridor. At 2026 Angier Ave., on the north side, is an original store that has been a barber shop for many years. An original 1-story rear wing
contains 2 stores (2024 and 2022 Angier Ave.) The parapets feature the same brickwork as the main block, although storefronts are replacements. The 1913 Sanborn Map shows a house on this site.

1930 CD: Boone Drug Co. at No. 402; Lindsay P. Seagroves Grocery at No. 404.

1940 CD: Carswell Drugs and Andrews' Meat Market. Dr. Shuler had offices on the 2nd floor.

Lindsay Seagroves House and Store. 1-story side-gable house with a front gable, weatherboard, 9-over-1 paired sash windows, and a Craftsman porch with a replacement railing. A frame store addition, No. 406, projects from the west front bay of the house to the sidewalk. The façade has been covered with metal. This store abuts the brick building to the north at 400-404 S. Driver St. 1925-1945 CDs: Lindsay P. Seagroves owner/occupant. Seagroves was vice-president of Knit-Well Hosiery Mill in 1925.

House. 1-story tri-gable house with German siding, 6-over-6 sash windows, a double front door with arched upper glass panes, and a full front porch. Alterations include some vinyl siding and replacement metal porch posts and railing. The rear ell has a large 1-story addition that adjoins a side-gable building that was the original detached kitchen. 1913 SM. 1930-1940 CDs: Wm. N. Lowe owner/occupant.

House. 1-story gable-and-wing type house with weatherboard, 4-over-4 sash windows, and a full porch with original turned posts with brackets and a scalloped drip cornice. 1913 SM. 1930 CD.

House. 1-story gable-and-wing type house with German siding, sawtooth and staggered shingles in the front gable, 4-over-4 sash windows, and a porch with replacement Craftsman posts sheltering the main block. 1913 SM. 1930-1940 CDs: D. Cary Jackson owner/occupant (barber, 2026 Angier Ave.).

House. 1-story gable-and-wing type house with 2-over-2 sash windows and peaked lintels with decorative sawnwork. Alterations include asbestos siding and Craftsman post replacements on the full porch. 1913 SM. 1930-1940 CDs: Isaac B. Fonville owner/occupant (cooper).

NC Shed. Ca. 1950s. Concrete block shed with shed roof and exposed rafter tails.

House. 2-story side-gable L-House with a front gable, 9-over-9 sash windows, and a front shed porch. Alterations include replacement weatherboard, a rooftop cupola, and
Ca. 1900, ca. 1990  
large brick porch posts that are integrated into a brick wall that encloses the small front yard. 1913 SM. 1930-1940 CDs: Robt. A. Tippitt owner/occupant (car repair).

Vacant Lot  
Vacant Lot

434 S. Driver St.  
House. 1-story gable-and-wing type house with 2-over-2 sash windows, and a full porch. Alterations include asbestos siding, replacement metal porch posts and railing. 1930 CD.

456 S. Driver St.  
Commercial Building. 1-story flat-roofed brick building with common bond and a tile coping. The display windows flanking the center door are boarded up. 1935 CD:
Durham Milk Bottle Exchange.

458 S. Driver St.  
Commercial Building. 1-story flat-roofed brick building with common bond and a tile coping. The storefronts of the three stores have been altered. 1935 CD: 458 and 460 are vacant; Goodies Candy & Sandwich Co. manufacturers occupies 462.

400 blk S. Driver St., east side  
Vacant lot. Used as a parking lot for Crabtree Corner Pharmacy.

Vacant lot  
Vacant lot.

Vacant lot  
Vacant lot.

423 S. Driver St.  
House. 1½-story tri-gable house with hipped porch with Craftsman piers. Alterations include replacement vinyl sash windows, vinyl siding, and upper metal porch posts and railing. 1913 SM. 1930 CD.

429 S. Driver St.  
House. 2-story side-gable I-House with a front gable, 2-over-2 sash windows, a hipped 1-story porch with Craftsman posts and original wood railing, and asbestos siding. 1913 SM. 1930-1940 CDs: Paul D. Lea owner/occupant.

455 S. Driver St.  
Garland Woodcraft Company. 1-story flat-roofed brick office building, 8 bays wide, with 2 doors and 6-over-6 wooden sash windows with fanlights that are examples of the millwork of Garland Woodcraft Company, who constructed this as offices. The company, owned by A. B. Stone, Ralph Ripley and Ed Brady, bought the lumber yard
East Durham Historic District

of Garland Haithcock, that stood on this site ca. 1945 and built this building soon after. The façade was replaced about 1970, making the building noncontributing. Extending from the rear of the building is the woodshop complex, consisting of five sections added at different times, but all connected. Directly to the rear is a 1-story frame gabled woodshop. Two additional gabled frame woodshop wings are attached to the south side of this. To the east (rear) is a 2-story concrete block warehouse for rough products. To the north extends a 2-story finished products warehouse, with some exposed concrete block walls and some metal walls. 1945 CD: Garland Woodcraft Cabinetmakers No. 451-453.

Commercial Building. 1-story buff brick building with intact façade with paneled and corbeled cornice. The center bay contains a double door. Flanking bays contain single doors. The 1913 SM shows a frame building on this lot. 1930 CD: Home Cash Store Grocery. Later it was the East Durham Post Office branch. It was purchased by Garland Woodcraft Company after 1947 and is now a part of the company complex.

People's Bank. Prominent, architecturally significant 2-story buff brick building of Classical Revival style, with a double door entrance with transom in the diagonal corner elevation facing the railroad tracks and Peabody St. The 10-bay-wide building has 2 stores with plate glass display windows that are now boarded up. The upper façade contains elegant round-arched windows with drip moldings and a corbeled brick cornice. The rear elevation, of common bond brick, has 4-over-4 sashes in segmental arched windows. Built ca. 1905 as the People's Bank, this was later the Boone Drug Company, with a post office branch in the rear. 1930 CD: King & Mathes Drugs at No. 461. 1935: Royal's Sandwich Shop at No. 461. 1955 CD: Cramo Hosiery Mills at No. 459-463. The Salvation Army Boys Club was upstairs at No. 459. In the later 20th century it was acquired by Garland Woodcraft Company, who now uses it for prefinishing woodwork.

House. 1-story hipped bungalow with a hipped dormer and an engaged porch. The entrance has sidelights. The house is under rehabilitation, and the door and windows are boarded up. It has allover vinyl siding, and the porch is now enclosed as 2 rooms, leaving only the entrance bay open. 1930 CD, 1937 SM.
House. 1-story front gable Craftsman house with 6-over-6 sash windows and a gabled 1-bay porch. Alterations include all-over vinyl siding and replacement metal porch posts and railing. Not on 1937 SM. 1945 CD.

Otis Johnson House. 1-story hipped Craftsman-style house with 2-over-2 sash windows and a full gabled porch. Alterations include all-over vinyl siding and replacement metal porch posts. Along the front is a quartz retaining wall. 1930-1940 CDs: Otis A. Johnson owner/occupant (Citizens Realty & Ins. Co.). 1937 SM.

House. 1-story front-gabled bungalow with German siding, 4-over-1 vertical sash windows, and a gabled porch with brick piers and replacement metal posts. The house has German siding, eave brackets and exposed rafter tails. 1930 CD, 1937 SM.

House. 1 ½-story side-gable bungalow with engaged porch and shed dormer window. Alterations include asbestos siding, replacement windows, and replacement metal porch posts. 1930 CD, 1937 SM.

Duplex. 1-story hip-roofed duplex with decorative exposed rafter tails, 12-over-2 sash windows, German siding, and an engaged porch with replacement posts. The porch shelters 2 doors. Very similar to 1115 Eva St. 1930 CD: 2 tenants. 1937 SM shows this as a single family house.

Duplex. 1-story hip-roofed duplex with decorative exposed rafter tails, 12-over-2 sash windows, German siding, and an engaged porch with posts and railing covered with German siding. The porch shelters 2 doors. Very similar to 1113 Eva St. 1930 CD: 1 tenant. 1935 CD: 2 tenants. 1937 SM: not a duplex.

House. 1-story hip-roofed house with decorative exposed rafter tails, 12-over-2 sash windows, German siding, and an engaged porch with replacement posts and railing. Very similar to 1113 and 1115 Eva St. 1930 CD: 1 tenant. 1937 SM: not a duplex.

Duplex. 1-story front-gabled duplex with 6-over-6 sash windows and 2 gabled entrance porches with slender Craftsman posts. Allover vinyl siding. Not on 1937 SM. 1940 CD: 1 occupant.

House. 1-story side-gable Minimal Traditional-style house with 6-over-6 sash windows and a gabled entrance porch with metal posts. All-over vinyl siding. Not on 1937 SM.

East Durham Historic District

409 N. Guthrie Ave.  House. Pyramidal cottage with a front cross-gable, 6-over-6 sash windows, and a hipped porch with replacement posts. Aluminum siding. 1930 CD.

411 N. Guthrie Ave.  House. Pyramidal cottage with a hipped dormer window and engaged porch. Alterations include replacement smaller sash windows, replacement porch posts, and all-over vinyl siding. 1930 CD.

413 N. Guthrie Ave.  Duplex. 1-story front-gabled duplex with 6-over-6 sash windows and 2 bracketed stoops. All-over vinyl siding. 1950 CD: 2 tenants.

415 N. Guthrie Ave.  House. 1-story side-gabled Minimal Traditional-style house with 8-over-8 and 6-over-6 sash windows and an arched entrance porch with metal posts. All-over vinyl siding. 1950 CD.

106 S. Guthrie Ave.  Community Groceries. 1-story flat-roofed grocery store, with vinyl siding, a front brick wainscot, 2 front doors, and glass display windows. The store, built about 1900, was located on the corner of E. Main St. and was moved to this adjacent lot between 1913 and 1919. J. C. Spencer, proprietor of the grocery in 1919, is the earliest known proprietor. 1930 CD: Wm. N. Bradley groc. 1935 CD: John Andrews gro. 1940 CD: Community Store. [Roberts, Durham A&HI]

118 S. Guthrie Ave.  House. 1-story tri-gable house with German siding. Alterations include replacement sash windows and front picture window additions, replacement entrance sidelights, and a replacement porch. The replacements harmony with the original features. 1930 CD, 1937 SM.

120 S. Guthrie Ave.  House. 1-story tri-gable house with German siding, 6-over-6 sash windows, a porch
James Pleasants House. Large, architecturally distinguished 1 ½-story side-gabled bungalow, with a shed dormer window and a shed porch with boxed posts that wraps around the north side. Original features include weatherboard, eave brackets, 1-over-1 sash beneath the porch, 6-over-9 and 1-over-1 sash on the sides, and Queen Anne sash in the upper story. 1930-1935 CDs: Jas. F. Pleasants occupant (member, Durham City Council).

Lonnie Markham House. 1-story side-gable Craftsman-style house with 4-over-1 vertical sash windows. Alterations include all-over vinyl siding, the enclosure of the gabled porch, and the addition of a flat-roofed metal porch. Not on 1937 SM. 1940 CD: Lonnie G. Markham owner/occupant (bus operator).

H. Ward Montague House. 1-story hip-roofed Craftsman-style house with German siding, 4-over-1 vertical sash windows, and boxed eaves. The engaged front porch with arched bays set on Craftsman posts lends the house a degree of style. H. Ward Montague had the house built in the early 1920s. He was a butcher who operated a shop in a tiny building in the rear of his side yard that is now gone. When Floyd C. Craven lived here in the 1920s, the building was used as a paint shop. [Roberts, Durham A & HI]

Lascar Ferrell House. Rare example of a Gothic Revival Cottage in East Durham, featuring 3 gabled wall dormers in the front of the 1 ½-story side-gable house. Original finish includes 2-over-2 sash windows, a door with 1 sidelight, and a hipped porch. Alterations include aluminum siding and replacement metal porch posts. 1930-1935 CDs: Lascar Ferrell occupant (farmer).

William Hall House. 1-story front-gable bungalow with weatherboard, exposed rafter tails, 9-over-1 sash windows, and a gabled porch with replacement metal posts. 1937 SM. 1940 CD: Wm. E. Hall owner/occupant, with 1 additional tenant.

Hiram Vickers House. 1-story side-gable brick bungalow with a full gabled porch with a stuccoed half-timbered gable, Craftsman posts, and a corner enclosed sunroom.
East Durham Historic District

Ca. 1935
A frame rear addition was added when the house was converted to a duplex. 1935-1940 CDs: Hiram E. Vickers owner/occupant (salesman).

119 S. Guthrie Ave. Walter Williams House. 1 1/2-story side-gable Craftsman-style house with German siding, eave brackets, a full front shed dormer, and a shed wraparound Craftsman porch. Alterations include replacement sash windows, a replacement porch railing, and vinyl siding. 1930-1940 CDs: Walter J. Williams owner/occupant (Home Cash Store).

Ca. 1930

121 S. Guthrie Ave. House. Pyramidal cottage with 2 interior chimneys, a front cross-gable, and 2-over-2 sash windows. Alterations include all-over vinyl siding and replacement vinyl porch posts. 1930 CD, 1937 SM.

C Shed. Ca. 1940. Front-gable shed with German siding.

Ca. 1920

123 S. Guthrie Ave. Mary Ferrell House. 1-story tri-gable house with all-over-vinyl siding, replacement sash windows, and an enclosed porch. 1930-1940 CDs: Mary Ferrell owner/occupant (widow, Rufus J. Ferrell).

Ca. 1915

200 blk S. Guthrie Ave., west side

202 S. Guthrie Ave. Otis Rogers House. Intact, architecturally significant 1-story tri-gable house with Queen Anne decorative trim, including a side cutaway bay window with pendants brackets with star motifs and gables with decorative wood shingles. All windows have decorative Queen Anne-style sash, and the bay windows have peaked lintels with sawnwork ornament. Weatherboard siding. The original porch has Craftsman posts. 1930-1940 CDs: Otis H. Rogers owner/occupant (superintendent)

Ca. 1910

204 S. Guthrie Ave. Lonnie Morgan House. 1-story tri-gable house with weatherboard, decorative wood shingles in the front gable, and a hip-roofed porch. Alterations include replacement sash windows and metal porch posts. 1930-1940 CDs: Lonnie L. Morgan owner/occupant (deputy sheriff).

Ca. 1910

206 S. Guthrie Ave. W. Albert Hall House. 1-story tri-gable house with a gable end chimney, 6-over-6 sash windows, and a hipped porch. Alterations include all-over vinyl siding and metal porch posts. A quartz wall retains the front yard. 1930 CD: W. Albert Hall, occupant. 1935-1940 CDs: V. Emma Hall owner/occupant.

Robert Hall House. 1-story tri-gable house with much alteration, including all-over vinyl siding, replacement windows, and the replacement of the original porch with a flat-roof stoop with metal posts. 1930-1935 CDs: Robt. Hall occupant. 1940 CD: Mary E. Hall owner/occupant (manager).

House. 1-story gable-and-wing type house with some 4-over-4 sash windows and a Craftsman porch. Alterations include all-over vinyl, some replacement sash windows. 1930 CD, 1937 SM.

House. 1-story gable-and-wing type house with German siding, a door with sidelights, and some original 2-over-2 sash windows. Alterations include some replacement sash windows and replacement metal porch posts. 1930 CD, 1937 SM.

House. 1-story front-gable Craftsman-style house with 2-over-2 sash windows and a hipped Craftsman porch. Asbestos siding. A quartz wall retains the front yard. 1930 CD, 1937 SM.

John Andrews House. 1-story hip-roofed bungalow with engaged porch and a hipped dormer window. Alterations include all-over vinyl siding, replacement windows, and replacement but early metal posts and railing. 1930 CD. 1935-40 CDs: John I. Andrews owner/occupant (grocer, 106 S. Guthrie St.). 1937 SM shows this as a duplex.

House. 1-story front-gable Craftsman-style house with German siding, eave brackets and rafter tails, 4-over-1 vertical sash windows, and a corner gabled Craftsman porch. 1930 CD, 1937 SM.

House. 1-story tri-gable house with many alterations, including asbestos siding, replacement windows, and the replacement of the original porch with a gabled stoop. 1930 CD, 1937 SM.

Emory Woodell House. 1-story side-gable house with 2 gabled dormers, 6-over-1 sash windows, and an engaged porch with boxed posts and a plank railing. Aluminum siding. 1930-1940 CDs: Emory Woodell owner/occupant (salesman, J. S. Gatewood & Co.).

Duplex. 1-story front-gable duplex with plywood siding, 2-over-2 horizontal sash windows, and 2 front doors.

House. 1-story tri-gable house with narrow German siding. Alterations include replacement sash windows and a replacement shed porch. 1930 CD, 1937 SM.

House. 1½-story front-gable house with vinyl siding and replacement windows. One 4-pane window remains in the front gable end and in the upper sides. The shed porch may be original. 1930 CD, 1937 SM.

House. 1-story house with a hipped roof, a front cross-gable, German siding, 2-over-2 sash windows, and a door with sidelights. The wraparound porch has replacement metal posts and an enclosed side room. 1930 CD, 1937 SM.

Owen Jones House. 1½-story brick Minimal Traditional-style house of gable-and-wing form, with one original metal casement. Alterations include replacement sliding windows and the enclosure of the front porch. 1950 CD: Owen Jones owner/occupant (printer, Commercial Printers).

House. 1-story tri-gable house with 4-over-4 sash windows and a shed porch. Alterations include all-over vinyl siding and vinyl-covered porch posts. The house has been condemned and the openings are covered with plywood. 1930 CD, 1937 SM.

Robert Green House. Intact 1½-story tri-gable house with German siding, 4-over-4 sash windows, and a shed porch with turned posts and sawnwork brackets and a turned railing. Front windows have 6-over-6 sashes. A quartz wall encloses the front yard. 1930-1940 CDs: Robt. R. Green owner/occupant (auto mechanic, Clark & Sorrell).

1928, 1949, 1954

Holloway Street Elementary School. Prominent and architecturally significant 2-story brick graded school with some Collegiate Gothic influence. The school has a raised basement, dark red brick walls, and a flat roof with a parapet. The 8-bay façade features 2 Jacobean-style entrance pavilions with arched door surrounds, 3 lancet windows flanked by stone corner quoins in the upper stories, and decorative curved parapets. The tall entrance transoms are infilled with glass brick. A detached brick and concrete gymnasmium of recent construction is connected by a metal walkway at the rear. Designed in 1928 by Durham architects Rose and Rose. Rear additions in 1949 and 1954 by Durham architect George Watts Carr, Sr. create a U-shaped building. The school occupies the entire block bounded by Hyde Park Ave. and Spruce St. In recent years the building served as the Northeast Central Durham Community Service Center. [Roberts, Durham A&HI]

1100 blk Holloway St., south side

1100-02 Holloway St. C
Ca. 1930

Purity Stores/Pop's Place. 1-story brick flat-roofed commercial building with 2 stores. The brick is laid in common bond. The façade features corner piers of stacked brick that create a pilaster effect. Both storefronts are original, with a recessed center door, plate glass display windows, and a transom concealed by metal. An additional storefront is located on the west rear elevation. 1930 CD: B’s Home Cash Gro. 1940-

by the addition of a new wall concealing a stair to the porch roof, concealed at the roof level with a lattice screen. William B. Rowland, bookkeeper with Blackwell's Durham Tobacco Company, who lived here in 1912, probably had the house built. Mrs. Mary F. Rowland resided here in 1925. The Bonnie M. Gregory family, owners of the Rite-Way Laundry on Angier Ave., are listed here by 1930. They lived here for many years. The building is now a private school. [1912 CD; Roberts, Durham A&HI, 87]

Duplex. Brick 1-story hipped-roof duplex with 2-over-2 horizontal sash windows and 2 front brick stoops. From 1925 until at least 1937, the Knit-Well Hosiery Mill stood on this site. [1925 CD, 1937 SM]

2100 blk E. Main St., north side

2105 E. Main St. C Ca. 1900, moved

House. 1-story tri-gable house with unusual detailing, including sawtooth shingled gables, and an entrance bay with a front door flanked by decorative Queen Anne-style windows. The door and windows have dentilled lintels. Weatherboard siding. The entrance opens to a center room with a corner fireplace. The house stands at the northeast corner of Driver and Main streets on the 1913 Sanborn Map. It was moved to this lot from the lot just west on the corner of N. Driver St. sometime after 1937. Since that time it served as apartments. Due to a recent fire, it is now condemned. [Roberts, Durham A&HI]

2107 E. Main St. C Ca. 1940

Duplex. 1-story front-gabled brick bungalow duplex with some original 6-over-6 sash windows and an engaged porch with brick piers and a solid brick balustrade. Some windows are replacements. Not on 1937 SM. 1940 CD: 2 tenants.

2109 E. Main St. C Ca. 1930

D. Ernest Ward House. 2-story hip-roofed Craftsman-style house with a hipped dormer window, an entrance with a bracketed gable stoop, and a side Craftsman porch with brick piers and shingled posts. The lower front windows are replacement picture windows, but the remaining windows have 1-over-1 sash that are probably original. 1930 CD: D. Ernest Ward occupant (supt. Redrying plant, American Suppliers Inc. (Durham Division). 1937 SM.

2111 E. Main St. C Ca. 1925

Dr. George Ross House. Large 2-story Craftsman-style house with a pyramidal roof, wide boxed eaves, 9-over-1 and 12-over-1 sash windows, and an unusual center front chimney. The most unusual feature are the 1-story front wings set on the diagonal, with a connecting bowed porch. The porch has elephantine granite posts and granite steps, wood-shingled upper posts, and a weatherboarded railing. The front elevation of the wings have replacement sliding windows. All-over vinyl siding. A semicircular front driveway is marked by granite entrance piers. Dr. George Ross built a house on this lot.
2117 E. Main St.  
C  
Ca. 1900  

**Young-Boyd House.** Large 2-story gable-and-wing house with a 2-story rear ell, 4-over-4 sash windows, and a 1-story porch sheltering the main block with replacement Craftsman posts. A hipped porch extends the length of the side elevation facing N. Guthrie Ave., with replacement metal posts. All-over vinyl siding. Carpenter Thomas M. Young built the house for himself. The interior contains handsome woodwork created by Mr. Young. At Mr. Young's death about 1930, M. R. Boyd, Sr., who lived next door on N. Guthrie Ave., purchased the house and lived here. His son inherited the house and was still living here in the 1980s. [Roberts, *Durham A&HI*]

**Thomas H. Alford House.** One of the most ornate Queen Anne-style houses in East Durham, the 2-story house has a pyramidal roof, tall interior chimneys, and front and side gabled wings. The gables have scalloped weatherboards, decorative ventilators, and bracketed sunbursts. Walls retain original weatherboard, but have smaller replacement windows. The 2-story side bay window has pendent brackets at its apex. The wraparound 1-story porch has an entrance gable with scalloped siding, and replacement Craftsman posts. An original balcony above the center façade has been enclosed. Built originally on S. Guthrie Ave. behind the Y. E. Smith School for Thomas H. Alford, who ran D. L. Alford & Company, a grocery and general merchandise store on S. Driver St. In the 1930s the city bought the property. The house was moved to this lot between 1915 and 1935. It is now apartments. Section 7 Page 101
East Durham Historic District Durham County, North Carolina

509 Park Ave. House. 1-story front-gabled bungalow with 3-over-1 sash windows and an engaged Craftsman porch. Alterations include all-over vinyl siding and replacement metal porch posts. 1935 CD, 1937 SM.
Ca. 1935

511 Park Ave. House. 1-story front-gabled bungalow with weatherboard, 4-over-1 vertical sash windows, exposed rafter tails, and a 2-bay gabled Craftsman porch. The railing is a replacement. 1935 CD: 2 tenants. 1937 SM.
C Ca. 1935

513 Park Ave. Duplex. 1-story hipped and front-gabled duplex with a full hipped porch with boxed posts. The form, with the rear hipped section wider than the front gabled section, is similar to a number of other bungalows in East Durham. Alterations include all-over vinyl siding, replacement windows, replacement doors, and replacement porch railing. 1935 CD, 1937 SM.
C Ca. 1935

515 Park Ave. Duplex. 1-story front-gabled duplex with small wings on the side elevations. Most exterior fabric is replacement, including vinyl siding, sash windows, and porch railing. The boxed porch posts are apparently original. 1935 CD, 1937 SM.
C Ca. 1935

519 Park Ave. Felix D. Markham House. This large I-House actually faces Liberty Street to the north, thus presents its east side to Park Avenue. Although it is so altered that it is noncontributing, it does retain a large east gable chimney, a front cross-gable with a peaked window. Most of the front windows and door have been removed, vinyl covers the entire house, and all sash have been replaced. A large 2-story rear addition was added to create four apartments. This appears on late 19th century Sanborn maps. The property from Liberty, Southgate, Guthrie and Driver streets was the farm of sheriff Felix D. Markham. It was subdivided into lots in 1920 by the Durham Realty & Insurance Company (Plat Book 3, 111). Realtor George W. Hursey lived here in the 1920s. By 1935 it had been converted to 4 apartments. 1935-1960: 4 apartments. 1937 SM: apartments. [Roberts, Durham A&HI, 97]

Ca. 1935

514 Park Ave. Duplex. 1-story front-gable duplex with exposed rafter tails, German siding, 4-over-1 vertical sash windows, and 2 gabled entrance porches with Craftsman posts. 1930 CD, not on 1937 SM.

514 Park Ave.

C

Ca. 1930

516 Park Ave. House. 1-story front-gabled bungalow with eave brackets, exposed rafter tails, German siding, and a full hipped porch with fieldstone piers and railing and boxed posts. Replacement sash windows. 1930 CD, 1937 SM.

516 Park Ave.

C

Ca. 1925

518 Park Ave. Trice House. 1-story tri-gable house with a full hipped porch. The main block and the porch have ornate eave brackets. Alterations include plywood siding, replacement sash windows, and replacement porch posts and railing. The style of the house dates from the early 20th century, but a house did not appear on this property until about 1930. Either the brackets were reused from an older house, or the house was moved to this site. [Roberts, Durham A&HJ, 96] 1930 CD, 1937 SM.

518 Park Ave.

NC-alt.

Ca. 1915

520 Park Ave. House. 1-story front-gabled bungalow with an engaged Craftsman porch. Alterations include vinyl that conceals walls and eave brackets, and replacement sash windows. 1935 CD, 1937 SM.

813 Park Ave.  Roderick Mullen Duplex. 1-story brick hip-roof duplex with 1 unit set behind the other. Other features are metal casement windows and corner recessed porches with metal posts and railings. This is one of the more finely finished examples of a duplex form that is common in the district in the 1960s. 1960 CD: Roderick Mullen owner/occupant (capt. city fire dept.). 1 tenant.

817 Park Ave.  Fourplex. 2-story side-gable brick fourplex with metal stairs to upper apartments located at each end of the façade. In front is a large paved parking lot.

700-800 blks Park Ave., east side

706 Park Ave.  Duplex. Small 1-story side-gable duplex with a gabled entrance wing containing 2 recessed doors. Alterations include vinyl siding and replacement sash windows. 1950 CD.

708 Park Ave.  House. 1 ½-story side-gable bungalow with a shed dormer window, weatherboard, and an engaged wraparound porch with boxed posts and a weatherboarded railing. Now a duplex, the upstairs unit is accessed by stairs built into the side porch area. The windows probably have replacement sashes. 1930-1945 CDs: Jas. F. Daniel occupant (bus operator). 1937 SM.

710 Park Ave.  Ralph Jones House. 1-story hip-roof bungalow with weatherboard, exposed rafter tails, 1-over-1 sash windows, and a full gabled Craftsman porch with a replacement metal railing. 1930-1940 CDs: Raleigh W. Jones owner/occupant (machine operator American Tobacco Co.). 1937 SM.

802 Park Ave.  John T. Sally House. Large 2-story side-gable roof house with weatherboard, 8-over-1 sash windows, and a front shed section that may have originally been a porch. The house has been converted to a duplex, and the shed section is enclosed as rooms, with a corner recessed porch on one side and a door on the other. Some picture windows have been added. A finely laid fieldstone wall with 2 gates encloses the corner yard. 1930 CD: John T. Sally, owner/occupant (bldg. contractor). 1940-1945 CDs: Raymond A. Sorrell owner/occupant. 1937 SM shows a full 1-story porch.

804 Park Ave.  Duplex. Small 1-story side-gable duplex with a single front door with a gabled
NC-alt. entrance porch with replacement posts, vinyl siding, and replacement sash windows. 1937 SM. 1940 CD: 1 occupant. 1945 CD: 2 occupants.

806 Park Ave. Duplex. Small 1-story side-gable duplex nearly identical to 804 Park Ave., with a single front door with a gabled entrance porch, vinyl siding, and replacement sash windows. The original arched porch has original classical wood columns. 1937 SM: “from plans.” 1940 CD: 1 occupant. 1945 CD: 2 occupants.

200 blk S. Plum St., east side

207 S. Plum St. Arthur Houston House. Pyramidal cottage with 2 interior chimneys, a gabled dormer window, German siding, 4-over-1 vertical sash windows, and a hipped porch with boxed posts and a replacement railing. 1930-1940 CDs: Arthur B. Houston owner/occupant (employee Durham Lumber Co.).

C Shed. Ca. 1940. Front-gable shed with vertical siding. [1937 SM]

100 blk Roberson St., West side

110 Roberson St. House. Pyramidal cottage with weatherboard, a front cross-gable, 2-over-2 sash windows, and a full hipped porch with replacement metal posts. 1937 SM. 1940 CD: Edmund D. King, occupant.

112 Roberson St. House. Pyramidal cottage with a front cross-gable, 2-over-2 vertical sash windows, and a full hipped porch. Alterations include asbestos siding and the screening of the porch. 1937 SM. 1940 CD: John R. Casey occupant (painter).

114 Roberson St. House. Pyramidal cottage with a full hipped porch. Alterations include vinyl siding, replacement vinyl sash windows, and replacement turned porch posts. 1937 SM. 1940 CD: Samuel E. Casey occupant (custodian).

East Durham, the largest and most densely populated historic neighborhood in Durham, began with the construction of the Durham Cotton Manufacturing Company along the North Carolina Railroad tracks in 1884, one and one-quarter mile east of Durham’s center. Additional mills were constructed along the tracks in the 1880s and 1890s, and smaller mills built on neighborhood streets in the early twentieth century. The approximately rectangular district, containing 701 buildings that are primarily single family houses and duplexes, with a number of historic stores, three public schools, and six churches, is bounded by the Southern Railway tracks on the south and by Holloway Street on the north. At the south end of Driver Street, across from the district, is the site of the Durham Cotton Manufacturing Company. The East Durham Historic District is a community of privately built houses, both owner occupied and rental, unlike the company-built mill villages located to the south and west. The major developer of the district was the Durham Land and Security Company, a real estate firm founded by prominent Durham businessmen Eugene Morehead, J. L. Watkins, R. I. Rogers and W. W. Fuller. The company subdivided several hundred acres from 1887 to 1903 into a grid pattern of blocks and sold lots until 1933. At the north end of the district, developers L. D. and L. J. Kirkland subdivided the area between Liberty Street and Holloway Street in lots in 1909. Individual owners and investors built simple one-story frame houses of tri-gable, gable-and-wing, and pyramidal cottage forms from the 1890s to ca. 1915, and bungalows from ca. 1910 to ca. 1940. A sizeable number of historic duplexes were built from the 1920s to the 1940s. Following World War II the remaining lots were infilled with small Minimal Traditional style houses. The period of significance begins in 1899 with the oldest documented building, the John Cheek House at 201 South Driver Street, and ends in 1955. The end of the period of significance is just less than fifty years old in order to recognize a group of resources that date to 1955 which are consistent with earlier post-war resources in character and scale and which reflect the development of the neighborhood in the years following the war.

The East Durham Historic District meets National Register Criterion A for its community planning and development significance to the city of Durham. The district is also eligible under Criterion C for its local architectural significance as an extensive, intact collection of representative early twentieth century housing in Durham. The district also contains a significant early twentieth century business district around the intersection of Angier Avenue and South Driver Street.

Historical Background

Julian S. Carr, one of Durham’s most prominent industrialists, built the Durham Cotton Manufacturing Company, Durham’s first textile mill, at 2000 East Pettigrew Street, one and one-quarter mile east of town on the North Carolina Rail Road (later Southern Railway) in 1884-1885. Carr’s partners were the Odell family, owners of the Cannon Mills in Concord, North Carolina. At the same time he constructed a mill village with long rows of identical one and one-half story side-gabled frame houses around the mill for his 200 white employees. Throughout the mill’s history, only whites were hired as mill hands. Blacks worked in a few menial custodial tasks, and were not allowed to live in mill housing. The mill was expanded in the 1890s, and by 1895 employed 225 hands. Approximately 200 houses comprised the mill village located on the south side of the tracks, all built before 1900. Carr, like other Durham industrialists, managed his employees paternalistically, attending to many of their needs. Carr built Carr’s Chapel, an ornate frame Methodist Church, in 1887 across on the north side of the tracks at the corner of Clay Street. A two-story parsonage was soon built beside the chapel on Clay Street. A Baptist Sunday School was also established at the mill that became the East Durham Baptist Church. The mill’s first company store was in a frame building beside the mill. By 1895 a row of frame stores stood on the other side of the tracks.

In 1899 ownership of the mill passed from Carr and the Odells to the Erwin Cotton Mills, the textile mills built in West Durham in 1892 by the Duke family and their associates. The new owners substantially enlarged the Durham Cotton Manufacturing Company about 1900. From 1910 to the Depression, employment remained steady at approximately 500 hands. The Durham Cotton Manufacturing Company’s steady growth in the early twentieth century drove the constant expansion of East Durham as a residential suburb. The paternalism of the nineteenth century Carr era was replaced by the private market housing system of the Erwin era. As Claudia Roberts Brown states in her study of the Durham Cotton Manufacturing Company, the new employees apparently rented houses from private landlords, since the mill apparently built no new mill houses after 1900.

Durham’s business community had been developing the land on the north side of the tracks into the residential community of East Durham since the late 1880s, and there was no need for the mill owners to provide housing when the private market was supplying the need.

Throughout the late nineteenth and early twentieth century other mills were built along the tracks east of Durham. The Wyatt and Young Planing Mill and the Durham Roller Mills were built in the 1890s a short

---

1 The 1898 Sanborn Map has an inset of the Durham Cotton Manufacturing Company on page 9, marked as “at E. Durham 1 ¼ mi. SE of PO.”
2 Roberts Brown, Durham Cotton Mills Village Historic District nomination.
3 Ibid., 8.2.
4 Ibid. 8.2-3.
distance west of the cotton mill. Other nearby early mills were the Commonwealth Cotton Manufacturing Company, the Durham Fertilizer Company, the Virginia Carolina Chemical Company, the Chatham Lumber Company, and the W. C. Carrington Lumber Company. The Durham Hosiery Mill was built about 1901 at 803 Angier Avenue, at the junction of East Main Street and Angier Avenue, seven blocks west of the district. Across Main Street the Golden Belt Hosiery Company was built about 1900. By 1910 the two mills were the largest manufacturer of cotton hosiery in the world. Golden Belt Mill built hundreds of mill houses of three main types: a one-story tri-gable house, a one-story gable and wing house, and an I-House (for superintendents). By 1927 the Durham Hosiery Mill’s village, known as Edgemont, contained 300 mill houses. The area containing the East Durham Historic District first appears in the Sanborn Maps in 1913, when the private housing in the lower five blocks of the district— from Plum Street east to Driver Avenue and north to Main Street, are mapped.

A number of smaller mills operated on the edge of the district or inside its boundaries. The Knit-Well Hosiery Mill stood at the southwest corner of East Main Street and South Maple Street by 1925. Lindsay Seagroves, who owned Seagroves Grocery at the corner of Angier and Driver streets, was vice-president of Knit-Well Mill at this time. The mill went out of business during the Depression. By 1940 the Lions Club Industries had purchased the building and reworked it as a workshop for the blind. The Louise Knitting Mills was located in the 200 block of North Maple Street from 1935 to 1955. Another knitting mill stood at the southeast corner of East Main and Robeson streets in 1937. The only remnant of these mill buildings is the Lions Club Industries building, outside the district, which incorporates a portion of the old Knit-Well Mill into its much larger building.

Construction of the Durham Cotton Manufacturing Company stimulated immediate land speculation across the tracks, in the area that is the present East Durham Historic District. The 1891 “Bird’s Eye View of Durham, North Carolina” map includes an engraving of the Durham Cotton Manufacturing Company and its surroundings. The land across the tracks is shown as rural farmland with a few scattered houses, but entrepreneurs had already begun to subdivide the area for suburban development. Durham County deeds of the 1880s-1890s indicate that the land was owned by farmers such as Gray Barbee, and by Durham men such as photographer C. W. Rochelle and sheriff Felix D. Markham. In 1886 four of Durham’s leading businessmen—banker Eugene Morehead, attorney W. W. Fuller, Robert I. Rogers, owner of the Durham Marble and Brownstone Works, and Dr. John L. Watkins, a leaf tobacco dealer, formed the Durham Land and Security Company and issued $100,000 in general stock. Soon afterward the company purchased tracts of land north of East Main Street.

---

5 Little-Stokes and Dickinson, “An Inventory of Edgemont and East Durham,” H3-H8; Roberts Brown, Durham Architectural and Historic Inventory, 85.
6 Sanborn Map coverage for East Durham Historic District begins in 1913, when East Durham is shown as a separate village. Maps 71, 72 and 78 show the south area of the district north to about Taylor Street.
7 The Knit-Well Hosiery Mill is listed at 102 S. Maple St. in the 1935 city directory, but is “vacant” on the 1937 Sanborn Map. The 1940 city directory has no listing for 102 S. Maple St., but the Lion’s Club Workshop for the Blind is listed at 1806 E. Main St., the same corner.
the mill from Gray Barbee, W. J. Wyatt and Calvin O'Brian, as well as two of the incorporators, Eugene Morehead and R. I. Rogers. Eugene Morehead sold 125 acres known as the "Driver Land" for its previous owner, J. T. Driver, to the company for $15,000, its largest acquisition. The Driver Land was bounded by lands of C. W. Rochelle, Joseph H. Briggs, T. E. Cheek, and others. The new public road leading from Durham to Wake County (now known as Angier Avenue) went through the land. Calvin O'Brian sold a ninety-acre tract adjacent to the new public road and to the Driver Land for $7,000 to the Durham Land and Security Company in 1887 (DB 7, 481). Durham Land and Security Company laid out streets—Driver Avenue, Heartt Street, Angier Street, and Guthrie Avenue—and subdivided the property into lots of one-half acre to eight acres. In 1898 the company subdivided the blocks between Angier, Driver, Heartt and Briggs streets, part of which was the W. J. Wyatt property (DB 18, 542-543). Mrs. Mary Ann Emery had bought a lot at the northeast corner of Driver and Angier streets from the company in 1888 and built a house that is shown on the property plat (DB 8, 394).

A number of deeds show the company selling these lots to individuals. In 1887 W. J. Wyatt paid them $1,800 for eight and one-half acres along Driver Avenue and Heartt (now Hart) Street, adjoining land of Joseph H. Briggs, Gray Barbee, and others (DB 8, 135). These tracts continued to be subdivided by the new owners and subsequent owners until the district reached its current dense, small lot pattern. In 1898 J. F. Wiley subdivided the W. J. Wyatt property between Heartt Street, Driver Avenue, Ashe Street and Briggs Avenue (about three blocks) into lots and sold them (DB 18, 542). Y. E. Smith, president of the People's Bank and superintendent of the Durham Cotton Manufacturing Company, purchased two lots from J. F. Wiley in 1898 for $270. In 1902 he sold a lot on Driver Street to T. H. Alford for $200. Alford ran a general store on the railroad tracks at the corner of Barbee Street. Durham Land and Security Company sold a lot at the northwest corner of East Main and Guthrie streets to Thomas M. Young in 1898, who built the house that still stands at 2117 East Main Street (DB 18, 450). In 1902 Young sold a half-acre tract of it to George H. Ross (DB 26, 175). Ross built a house on his lot at 2111 East Main Street, then replaced it with a new house about 1925. John Evans, first superintendent of the Durham County Home, bought a sizeable tract of land along South Driver Street and built a stylish Gothic cottage at 118 South Driver Street about 1900. As his eight children grew up, they were given lots on the block on which to build their own houses.8

Some of the buyers of the Durham Land and Security Company’s land were probably investors who built the smaller district houses, the one-story tri-gable houses, the small pyramidal cottages, and the one-story gable-and-wing houses, as rentals for mill workers. A few houses in the southern end of the district, along Ashe and South Driver streets, may actually be late nineteenth century mill houses built by the Durham Cotton Manufacturing Company. The dwellings at 1917, 1918 and 1922 Hart Street and 211 and 212 South Driver Street have the same distinctive one and one-half-story side-gable form as the Durham Cotton Mill houses.

8 Roberts Brown, *Durham Architectural and Historic Inventory*, 98.
These may have been moved to these lots from the mill village, although they probably stand on their original lots. At 1901 Hart Street, at the corner of South Maple Street, is an I-House built about 1900 that resembles a mill superintendent's house.

By the late 1890s, James H. Southgate became the new president of the Durham Land and Security Company. Southgate was the owner of J. Southgate and Son, the largest insurance company in North Carolina in the early twentieth century, established by his father in Durham in 1871. Born in 1859 and raised in Hillsborough, N.C., Southgate joined his father's pioneer insurance firm when he was nineteen. Southgate was one of Durham's foremost civic leaders. In 1889 he founded the Durham YMCA. He was a candidate for vice-president on the prohibition ticket in 1896. At his death in 1916 he was president of the Durham county fair, president of the Durham Chamber of Commerce, and chairman of the board of Trinity College (Duke University). Until his death he managed the Durham Land and Security Company's sale of their East Durham property.

East Durham's first business district developed across the street from the Durham Cotton Manufacturing Company at the south end of Driver Street. By 1898 frame stores stood on both sides of the intersection. By 1910, these had been replaced with one and two-story brick buildings with decorative corbelled brickwork. The People's Bank, a handsome corner brick Classical Revival-style building, was built about 1905 on the site of the earlier frame general store at 461 S. Driver Street.

In 1902 a branch of the trolley line extended out Angier Avenue to East Durham, turning north up Driver Street, and returning to town by way of Holloway Street, thus tracing a U-shaped track through the district that encouraged the Durham Land and Security Company to develop the northern section of its "Driver Land." Perhaps to promote trolley ridership, the Durham Traction Company that operated the trolley system built the Durham Ballfield on the 400 block of North Driver Street. Durham's larger mills had baseball teams, whose spirited rivalry made baseball one of Durham's primary diversions. The field remained until the trolleys stopped running in 1932. Durham's home team, the "Durham Bulls," are a contemporary link to the city's baseball history. The former East Durham Junior High School now sits on the site.

In 1903 the Durham Land and Security Company subdivided the remaining approximately seventy acres of their "Driver land," the central nine blocks stretching from North Maple on the west to Briggs Avenue on the east, and from Hart Street on the south to Southgate Street on the north (Plat Book 5, 59). The existing streets in the south end of the district were continued up into the new subdivision, and lots fifty to sixty feet wide and generally between 150 and 250 feet deep were laid out. The largest lots are in the blocks between Driver, Main, Guthrie and Southgate streets. Smaller lots were along the cross-streets and along Cherry Grove Street and the east side of Maple Street.

9 "J. H. Southgate Died Yesterday," Durham Morning Herald, Sept. 30, 1916; Dula and Simpson, Durham and Her People, 49; Boyd, The Story of Durham, 266-267...
The new trolley line along Angier Avenue created a new business district at the intersection of Angier and South Driver streets. The earliest store was Crabtree Drug Store, a frame building at the southeast corner, built in 1904. About 1925 the present brick drugstore replaced it.\textsuperscript{10} The corner building at 402 South Driver Street was built for Lindsay P. Seagroves's grocery store about 1915. Its two facades express the transition of commercial activities from the older main thoroughfare of South Driver Street to the new axis of East Angier Avenue. The Driver Street facade is finished in a late Victorian style with common bond brick and a corbeled cornice. The Angier Avenue facade features up-to-date dark red brick veneer with a decorative brick parapet. People's Bank built a new branch at the intersection, at 318 South Driver Street, in 1921, and abandoned its original branch on the railroad tracks. The Neoclassical Revival stone and brick landmark bank is the district's showplace. People's Bank apparently failed during the Depression, and the building was bought by the Fidelity Bank about 1935.\textsuperscript{11} A solid row of one-story brick stores extend along the west side of the 300 block of South Driver Street, built as groceries and other types of businesses in the 1920s.

The developers of the northermost section of the district, from Liberty to Holloway streets, were brothers Lawrence D. Kirkland, a cashier at the Fidelity Bank, and Leon J. Kirkland, a salesman. Leon's house, built about 1915, at 1203 Liberty Street, is the largest pyramidal cottage in the district. The plats of their subdivisions are Plat Book 2, page 24 (1909: L. D. and L. J. Kirkland Homeplace Property), and Plat Book 2, page 59 (south side Holloway Street). In addition to acting as developers for this section, in which they sold lots from 1907 to the late 1930s, they also purchased and resold many lots in the Driver lands section developed by the Durham Land and Security Company. For example, the large lot at the southeast corner of Driver and Taylor streets (314 North Driver Street) contains a large pyramidal cottage. The Durham Land and Security Company sold the lot for $300 to L. D. Kirkland in 1910 (DB 42, 122). In 1912 Kirkland resold the property for $500 to A. C. Marshall, a Southern Railway conductor (DB 45, 426). The $200 increase reflects either rising land value or the construction of the house.

From about 1910 to the 1930s the Kirklands sold lots on Liberty, Eva, North Driver, and Holloway streets to merchants, tradesmen and mill workers who built small, comfortable houses. Sidney A. Maynard purchased the double lot at 709 North Driver Street from the Kirklands in 1910 for $600 (DB 41, 471) Maynard had a two-story Queen Anne-style house built on the property that still stands. In 1912 M. W. Lawrence purchased the lot at 1222 Holloway Street (DB 60, 675). Lawrence, a farmer and carpenter, probably built the comfortable pyramidal cottage with wraparound porch soon afterward. In 1912 William F. Mullerschoen, a machinist, bought the lot at 1217 Liberty Street for $450 (DB 45, 59). Possibly the lot already contained the one and one-half story bungalow. Three lots in a row, at 1206, 1208 and 1210 Eva Street, were sold from 1915 to 1921. Earl Hoffler, owner of the Piedmont Clothing House, purchased the 1206 Eva Street lot in 1915 for $100 (DB 49,

\textsuperscript{10} Roberts, "Durham Architectural and Historic Inventory," page 100.

\textsuperscript{11} 1930 city directory: People's Bank, 318 S. Driver St. 1935 city directory: Fidelity Bank, East Durham branch, 318 S. Driver St.

200). He probably built the one-story tri-gable house soon afterward. Truck driver James E. Hall bought the lot at 1208 Eva Street in 1917 (DB 52, 618). He probably soon built the pyramidal cottage. Machine operator Lex E. Veasey bought the lot at 1210 Eva Street in 1921 (DB 56, 454), and probably soon afterward built the one and one-half story bungalow.

Along Holloway Street are a number of large, fine pyramidal cottages. The most significant group stand at 1301, 1303 and 1305 Holloway Street, built about 1910, with multiple decorative gables and large full front porches. The largest house in the district stands at 1402 Holloway Street, on the eastern edge of the district. The two-story Neoclassical Revival-style frame house with a wraparound porch and porte-cochere was built about 1911 for William B. Rowland, bookkeeper at the W. T. Blackwell Tobacco Factory, Durham’s oldest tobacco plant. One of the last significant parcels of land in the district was Sheriff Felix D. Markham’s homeplace, located between North Driver Avenue, Liberty, Guthrie and Southgate streets. Another large development company, the Durham Realty and Insurance Company, subdivided this two blocks into lots in 1920 and sold them in the 1920s and 1930s (Plat Book 3, 111).

In 1920 East Durham was a thriving suburb outside the city limits. The Durham Cotton Manufacturing Company was the lifeblood of the community. The East Durham School (later Y. E. Smith School) on Driver Avenue was part of the county system and was the only school in the section. Life centered around the mill community, and higher priced homes were relatively few.12 About 1925 East Durham was annexed into the city, and some East Durham streets were renamed to provide continuity with preexisting city streets. At this point the city directories began to include house numbers for the district. East Main Street, which dead-ended at Maple Street, was curved north to connect with Reams Street, which became an extension of East Main Street. North Street was renamed Maple Street. Heartt Street was renamed Hart Street. West Street was renamed Taylor Street. Lottie Street was renamed Liberty Street. First Avenue became North Driver Street.13

The steady growth of East Durham continued in the 1920s. In 1922 the Durham Cotton Manufacturing Company’s capitalization increased to one million dollars.14 Block after block of bungalows were constructed north of Main Street on Hyde Park Avenue, Maple Street, Eva Street, Liberty Street, and Taylor Street. Holloway Street, the northern boundary of the district, gained its own small business district during this decade. At the Hyde Park Avenue corner, at 1026-1028 Holloway, a brick building with two stores was built about 1925. Inscoe Grocery Store occupied the building from 1925 to 1955. Store owner Genada Inscoe lived in a bungalow two blocks down Hyde Park Avenue, at 608 North Hyde Park Avenue. In 1928 the area was so populous that the Holloway Street Elementary School, a two-story brick graded school, was built in the 1100

12 Dula and Simpson, Durham and Her People, 16.

14 Roberts Brown, Durham Cotton Mills Village nomination, 8.3.
block. Durham architects Rose and Rose designed the brick building with two imposing arched entrances with stone quoins and decorative brick parapets. The school remained in use until the early 1990s. About 1930 another brick commercial building was built on the other corner of the Hyde Park Avenue intersection, directly across from the school at 1100-1102 Holloway Street. The original business was B’s Home Cash Grocery. In the 1940s and 1950s the Purity Stores grocery and Pop’s Place confectionary occupied the building.

The two oldest churches in the district were organized by employees at the Durham Cotton Manufacturing Company in the 1880s. Carr United Methodist Church, organized in 1886, was named for Julian S. Carr, mill owner who built the first church across from the mill. The congregation outgrew the frame building and built the brick Gothic Revival-style church and educational building in three stages, from 1930 to 1948, at 107 North Driver Street. The 1937 Sanborn Map shows the education building and Tudor Revival-style brick parsonage next door already in place. The East Durham Baptist Church, 2101 Angier Avenue, was organized in 1889 by cotton mill employees, who built a frame church at the corner of Angier Avenue and Driver Street. In 1924 the church constructed a splendid brick Colonial Revival-style sanctuary with a monumental Doric portico, and, in 1959, a large Modern-style educational wing. One of the original small frame churches in the district is the Advent Christian Church at 1801 East Main Street, built in the early 1920s. The little vernacular Gothic Revival-style church has weatherboard, bracketed eaves, and simple Gothic arched sash windows. By 1945 the building had become The House of Prayer. By 1935 the Church of Jesus Christ of Latter Day Saints stood at 1203 Holloway Street in a frame building of residential form. By 1955 the Kingdom Hall of Jehovah’s Witnesses occupied the building, and today it is the Christian Tabernacle. By 1937 the Holloway Street Christian Church occupied a brick sanctuary at the corner of Holloway and Spruce Street. In 1956 the congregation built a new church on the opposite corner at 1118 Holloway Street, with a striking flat-roofed modern-style tower. Today it is the Progressive Holiness Church. One other historic church stands in the district---the Pentecostal Holiness Church, 314 North Hyde Park Avenue, built about 1940.

Three public schools were built in the district during the period of significance: two graded schools and one junior high school. The first school in the district was the East Durham Public School, built at 107 South Driver Street in 1898. The two-story frame school had eight grades served by seven classrooms. In 1902-1903 337 students were enrolled. In 1909-1910 the frame building was replaced by the present brick school, designed by New York architect Fred Githens. An auditorium was located on the second floor. From 1925 to 1940 it was listed in city directories as the East Durham High School. By 1945 it had became the Y. E. Smith School, an elementary school. At this time it was doubled in size with a rear brick addition. The school closed in 1987. In 1928 the Holloway Street Elementary School (1107 Holloway Street) was built at the north end of the district. In the late 1930s the East Durham Junior High School was built at 401 North Driver Street on the block that had been the Durham Baseball Field, owned by the Durham Traction Company, from least 1913 until the 1930s.  

16 1913 Sanborn Map, page 78. The 1937 Sanborn Map still shows the block as an athletic field.
The two-story brick school has a modest Art Moderne-style entrance with stone trim.

A few of the many contractors who constructed houses in the East Durham Historic District have been identified. L. J. and L. D. Kirkland sold some of their lots in the 1910s for $100, and others for $450, which probably included the house. Apparently the Kirklands built speculative houses. Contractor R. C. Rollins, who built his own two-story Craftsman-style house in 1922 at 503 North Driver Street, built many houses in East Durham from 1900 to 1941.17 Contractor Thomas Wilkinson constructed his own bungalow residence at 510 North Driver Street about 1932, and probably built other houses in the neighborhood. Prolific Durham builder John T. Sally built speculative and custom houses in Durham from the 1910s until his death in 1947. About 1930 he built a two-story Craftsman-style house at 802 Park Avenue, where he lived for a short period of time, but from about 1935 to his death he lived in the Trinity Park neighborhood. One of Sally's specialities was bungalows, and likely he built some of those in the district.18

Life in East Durham changed during the Great Depression, as did life throughout Durham. In 1930 the Durham Traction Company sold the street car system to the Durham Public Service Company, which replaced the trolleys with buses. The Durham Land and Security Company, which had been the primary developers of East Durham since the 1880s, ceased selling lots in early 1933. In 1934 the Golden Belt Hosiery Mill No. 1 closed. The Knit-Well Hosiery Mill shut its doors about 1936. The Durham Cotton Manufacturing Company gradually decreased employment during the Depression to under 300 workers, then closed in 1938 and sold all of its real estate in 1939.19

During the 1940s East Durham recovered from the Depression due to the continued financial success of Durham's tobacco factories, where many of the displaced textile workers found employment, and to the diversification of Durham's economy. The district had never been a solid mill-employed neighborhood. Heads of household in 1930 in the district included, in addition to mill workers, doctors, firemen, policemen, bus drivers, grocers, auto mechanics, salesmen, pharmacists, store clerks, railway workers, contractors, and farmers.20 In 1950, near the end of the district's historical significance, it remained a white, largely owner-occupied neighborhood.21 East Durham's level of home ownership remained stable throughout the 1960s due to Durham's strong industrial and business economy.

In the past twenty-five years, however, disinvestment in East Durham has caused neighborhood blight. Most of the white homeowners in East Durham have left the neighborhood, and many of the houses have become rental

21 The 1950 Durham City Directory is the last directory within the sample conducted for this nomination that distinguishes white and African American occupants.
houses, thereby increasing the ratio of rental to owner-occupied housing to the present ratio of less than twenty per cent in some areas of the district. The racial composition of the residents has gradually changed from white to predominantly African American and Hispanic. North of Main Street, many of the residents own their homes, while to the south are predominantly rental houses. One of the last mills that remained open—the Golden Belt Hosiery Company’s Mill No. 6—closed in 1967. The Y. E. Smith School closed in 1987; the Holloway Street Elementary School closed in the early 1990s. The East Durham Junior High School became an elementary school, then closed in the 1990s. The retail stores in the business district at Angier and Driver streets have been replaced by storefront churches, a mosque, small restaurants, or vacant, shuttered storefronts. Fidelity Bank became a pawn shop, and even that is now closed. Fire Station No. 3, at 103 South Driver Street, is closed and used as offices and vehicle storage for a division of city government.

East Durham is waiting for a rebirth. To the west, the old mill villages of Golden Belt Mill and the Durham Hosiery Mill have been demolished. In their place the new neighborhood of North East Central Durham is rising through the efforts of the Durham Housing authority using grants supplied by Hope VI, a Housing and Urban Development program, and the Community Builders, a private non-profit national development corporation. New single-family houses, a new elementary school and other facilities are creating a new community. The City of Durham, the Historic Preservation Society of Durham, and the residents of the East Durham Historic District are working to revitalize their community through historic preservation rather than demolition. The East Durham Historic District stands as the largest, most densely populated of Durham’s historic neighborhoods, with a large inventory of sturdy historic buildings and a population of stable residents. Its potential is exciting.

Community Planning and Architecture Significance

The community planning and development significance of the East Durham Historic District is illuminated in Claudia Roberts Brown’s Durham multiple property documentation form, "Historic Resources of Durham," 1984. As Brown notes in the historic context “Textiles and Other Matters,” (pages 15-17), the Durham Cotton Manufacturing Company, Durham’s first textile plant, built in 1885 by Julian S. Carr, prospered. The surrounding company-built village [Durham Cotton Mills Village Historic District, NR 1984] and the mill were enlarged in the late nineteenth century, “forming the nucleus of the East Durham neighborhood, which had its own churches and schools, sponsored by Carr, and a business district.” The context “City of the New South: Public Services and Real Estate Development” (pages 22-24), highlights the importance of the trolley system introduced in 1902, which ran between central Durham and the mill villages of East and West Durham. This enabled suburban developments such as East Durham to develop, since the distance between home and jobs in central Durham could be traveled more quickly. The trolleys helped to shape growth in Durham until 1932 when the last car was retired. The context “Durham’s Steady Growth into the New Century” (pages 27-30), contrasts growth in East Durham and West Durham in the early twentieth century. In East Durham most housing was private. The

nineteenth century mill villages south of the railroad tracks did not grow after 1900, while the privately owned areas north of Angier Avenue, traditional privately-built popular house types, interspersed with a few more substantial dwellings, sprang up along the blocks extending north to Liberty and Holloway streets to accommodate a growing middle-class in a diversifying economy. In West Durham the opposite type of growth occurred, with most construction being mill housing and little private housing. The context, "The Development of Modern Durham: the 1920s and 1930s," (pages 33-34) documents the reality of the Roaring Twenties in Durham as a result of the city's thriving textile and tobacco industries. Building permits doubled in the mid-1920s. Although the textile industry suffered during the Great Depression, the tobacco industry was relatively untouched, thus the Depression had a relatively mild impact on the city.

"Historic Resources of Durham" contains three architectural contexts that illuminate the architectural significance of the district in section 7, chapter C, "Durham's Architecture." "Popular Housing, circa 1880 to the 1910s" (pages 9-11), explains that the majority of buildings in Durham's neighborhoods were popular house types, whose most elaborate form was a simplified Queen Anne style with a regular core with asymmetrically placed wings, often with three-sided bays, and turned and sawn ornament in gables, windows and porches. Many of the houses of this era were standardized dwellings built in groups as investments, often for rent to factory workers. These are almost indistinguishable from mill housing. "The Period Revival Styles, 1910s-1940" (pages 15-17), tracks the popularity by around 1920 of the Tudor Revival and Colonial Revival styles, often built from mail-order plans. "Picturesque Revival Styles: Institutional Buildings" (pages 16-17) shows the popularity in Durham of the Late Gothic Revival for churches and educational buildings. "Picturesque Revival Styles: Houses" (pages 18-20), documents the enormous popularity in 1920s and 1930s Durham housing of the bungalow, usually built from mail order plans, pattern books, magazines and contractors guides. Bungalows built by the relatively affluent homeowners in neighborhoods such as Watts-Hillandale and Trinity Park tended to be larger and more carefully finished than bungalows built in working class neighborhoods such as East Durham and Old West Durham. The newer portions of neighborhoods such as East Durham and West Durham that contained a predominance of tradesmen, artisans and laborers, exhibit large concentrations of modest bungalows with a compact form and a simple roofline which often encompasses a full porch. Frequent characteristic features are a shed or gabled attic dormer window and tapered box posts on brick piers that support the porches. A few of the more stylish bungalows, such as the Williams House, 1213 Holloway Street, have eave brackets of Oriental style, resembling paired exposed floor joists. In these neighborhoods period revival style houses, such as Tudor Cottages and Colonial Revival-style houses are scarce.

Thus the houses in the East Durham Historic District are modest versions of the types of houses popular in central Durham during the same eras. The Cleveland-Holloway Streets neighborhood, located just east of the central business district, is Durham’s earliest surviving fashionable residential neighborhood. Its range of late nineteenth and early twentieth century late Victorian styles includes the one-story tri-gable, the gable-and-wing house, the pyramidal cottage, and the two-story Queen Anne house. The smaller, more modest houses were
often built as rentals. In the early twentieth century the Colonial Revival style appeared in larger houses. Large numbers of 1910s-1930s bungalows are found in North Durham, the neighborhood to the north of the Cleveland-Holloway neighborhood which filled in rapidly after construction of the north-south trolley line in 1901. The earliest houses in the 1890s were the basic one-story and two-story single-pile forms with decorative millwork trim. The Colonial Revival style because popular in the early twentieth century, and the bungalow was introduced in the 1910s. Many of the bungalows were quite eclectic, incorporating elements of the English Cottage style. Tudor Revival cottages of brick were popular in the neighborhood during the late 1920s and 1930s. These ranged from the earlier and more elaborate cottages with stone trim and half-timbered gables to the later cottages with minimal stylistic references, such as a front chimney. Englewood Avenue, which had smaller lots than the grander Club Boulevard, the main avenue of the Watts-Hillandale subdivision, was built up during the 1920s with block after block of small bungalows that are similar to the northern blocks of the East Durham Historic District. In comparison to North Durham and Watts-Hillandale, the East Durham Historic District has few stylish Colonial Revival and Tudor Revival houses. Frame bungalows continued to be built in East Durham up to about 1940, when the Minimal Traditional style became popular.

The East Durham business district that developed from ca. 1915 to the 1930s is one of the four suburban commercial districts in Durham’s historic suburbs. Other suburban business districts are the “Little Five Points” business district of the Cleveland-Holloway street neighborhood, the commercial center of Lakewood Park, along West Chapel Hill Street, and the Ninth Street business district of West Durham. Each of these developed in the early to mid-twentieth centuries as the result of the trolley lines that connected early suburbs to central Durham. The Ninth Street district contains a branch of the Fidelity Bank at 626 Ninth Street designed in the early 1920s by Rose and Rose architects. The Neoclassical Revival style building is a larger, two-story building than the East Durham branch, perhaps reflecting the larger size of the primary mill in West Durham—the Erwin Cotton Mills, which employed over 1,000 workers in the early twentieth century. Ninth Street’s business district stretches for four blocks, much larger than East Durham’s two blocks of one-story brick stores. The Ninth Street business district continued to develop in the 1940s and 1950s as a student shopping area because of its proximity to Duke University, unlike the other suburban districts that stagnated after the demise of the trolley system. The Little Five Points and Lakewood Park business districts are smaller than that of East Durham. All of these suburban commercial districts provided grocery stores, a post office, and essential businesses such as general stores, hardware stores, shoe shops, and banks. East Durham’s most significant commercial buildings are the ca. 1905 People’s Bank, the ca. 1915 Seagroves Grocery and the People’s Bank of 1921. The ca. 1905 People’s Bank has an elegant Neoclassical Revival design with a diagonal corner entrance and arched upper façade windows that resemble the early twentieth century commercial buildings of central Durham, most of which are now demolished. While the 1921 branch bank has its counterpart in West Durham, Seagroves Grocery is unique in Durham. The large two-story brick building with a rear wing containing two additional

24 Roberts Brown, Durham Architectural and Historical Inventory, 148-150.
stores has an unusual architectural scheme with a late Victorian façade facing the old commercial thoroughfare of Driver Street and an up-to-date classical design on the façade facing the trolley line along Angier Avenue. The 1923 Rollins Store at 501 North Driver Street, a frame front-gabled building, is one of the best-preserved neighborhood stores in Durham.

Part of the architectural significance of East Durham as a suburban community is its three public schools. The Y. E. Smith School of 1910, designed by Fred Githins of New York, is a two-story Classical Revival style with red and beige brick with granite trim. The Holloway Street Elementary School of 1928, with Jacobean Revival entrances, was designed by Durham’s Rose and Rose architectural firm. The East Durham Junior High School of the late 1930s has a simplified Art Moderne entrance. Two of the schools have sites that encompass an entire block, making them almost the only open spaces in the dense urban district. A few other early twentieth century elementary and junior high schools have survived in Durham. The West Durham Elementary School (now E. K. Powe School) on Ninth Street, is a two-story brick Neoclassical Revival-style school designed by the Durham firm of Atwood and Nash. The Watts Street School in the Trinity Historic District is a two-story brick Neoclassical Revival-style school built in 1919. Carr Junior High School, 700 Morgan Street, in the Trinity Historic District, is a Colonial Revival-style two-story brick school designed in 1922 by Durham architect George Watts Carr. The three historic schools in the East Durham Historic District have significance for their association with education in Durham.

East Durham Historic District
Durham County, NC

Section 10: Boundaries

Verbal Boundary Description:
The boundaries of the district are shown by a black line on the accompanying map, drawn by the GIS Department, City of Durham, at a scale of 1 inch = 200 feet.

Boundary Justification:
District boundaries follow the logic of both historical development and current conditions. The Southern Railway tracks form the historical south boundary between the privately developed area of East Durham and the mills and mill villages across the tracks. The western boundary likewise separates privately owned housing and mill housing of Edgemont, much of which has been demolished in the past few years. The north and east boundaries are drawn to exclude areas of lower elevation that were developed generally after the period of historic significance. The boundary on the north and east is drawn to include the densest concentration of pre-World War II construction.

SUPPLEMENTARY LISTING RECORD

NRIS Reference Number: 04001393  Date Listed: 12/23/2004

Property Name: East Durham Historic District (Durham MRA)

County: Durham  State: NC

This property is listed in the National Register of Historic Places in accordance with the attached nomination documentation subject to the following exceptions, exclusions, or amendments, notwithstanding the National Park Service certification included in the nomination documentation:

Signature of the Keeper Date of Action

Amended Items in Nomination:

Section 5: Resource Count

The nomination is hereby amended to include the following numbers: 732 Contributing Buildings/230 noncontributing buildings; 733 contributing resources total/232 noncontributing resources total.

Section 7:

The property located at 411 North Guthrie (page 7-53 of original nomination) is now considered a contributing building. The non-historic siding has been removed, revealing the original, distinctive wood siding.

Tax credit file #38672

The North Carolina SHPO has been notified of this amendment.
