NATIONAL REGISTER OF HISTORIC PLACES
REGISTRATION FORM

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in How to Complete the National Register of Historic Places Registration Form (National Register Bulletin 16A). Complete each item by marking "x" in the appropriate box or by entering the information requested. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word processor, or computer, to complete all items.

1. Name of property

historic name Mallard, John Wesley, House

other names/site number N/A

2. Location

street & number west side of SR 1301, 0.25 miles south of SR 1329 (1371 Warren Road) not for publication N/A

city or town Faison

vicinity N/A

state North Carolina code NC county Duplin code 061 zip code 28341

3. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act of 1986, as amended, I hereby certify that this nomination request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60. In my opinion, the property meets the National Register Criteria. I recommend that this property be considered significant nationally statewide locally. (See continuation sheet for additional comments.)

8. Statement of Significance
Applicable National Register Criteria
(Mark "X" in one or more boxes for the criteria qualifying the property for National Register listing)

____ A Property is associated with events that have made a significant contribution to the broad patterns of our history.

____ B Property is associated with the lives of persons significant in our past.

____ C Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.

____ D Property has yielded, or is likely to yield information important in prehistory or history.

Criteria Considerations
(Mark "X" in all the boxes that apply.)

____ A owned by a religious institution or used for religious purposes.

____ B removed from its original location.

____ C a birthplace or a grave.

____ D a cemetery.

____ E a reconstructed building, object, or structure.

____ F a commemorative property.

____ G less than 50 years of age or achieved significance within the past 50 years.

Paperwork Reduction Act Statement: This information is being collected for applications to the National Register of Historic Places to nominate properties for listing or determine eligibility for listing, to list properties, and to amend existing listings. Response to this request is required to obtain a benefit in accordance with the National Historic Preservation Act, as amended (16 U.S.C. 470 et seq.).

Estimated Burden Statement: Public reporting burden for this form is estimated to average 18.1 hours per response including the time for reviewing instructions, gathering and maintaining data, and completing and reviewing the form. Direct comments regarding this burden estimate or any aspect of this form to the Chief, Administrative Services Division, National Park Service, P.O. Box 37127, Washington, DC 20013-7127; and the Office of Management and Budget, Paperwork Reductions Project (1024-0016), Washington, DC 20503.
7. NARRATIVE DESCRIPTION.

Built ca. 1886 in the fertile agricultural region of western Duplin County, North Carolina, the John Wesley Mallard House is numbered among a group of classically inspired plantation seats that were erected within close proximity to the county's northwestern economic and social center of Faison. Many of the properties remain in the hands of family descendants. The J. W. Mallard House faces east, looking onto SR 1301, Warren Road. Surrounded by cotton fields, the house sits on flat land, drained by agricultural ditches. Beside the rear wing, to the south, sits an old, well-maintained tobacco pack house; at the rear, west of the house is a large modern barn.

State road SR 1301, Warren Road, running north-south almost midway between US-117 and I-40, skirts the front (east side) of the Mallard property and continues north less than a mile to a junction with NC-403 (Faison's Main Street). About one mile west of the house is the Duplin-Sampson County line, and in various directions, as wheel spokes, spread the headwaters of Reedy, Horsepen and Tenmile branches. The ten-acre house site lies within a thirty-three-acre trapezoidal tract bordered on the east by SR 1301, ditches on the north and south, and wooded stretch on the west.

The landscaping around the house is casual; perennial flowerbeds cascade from the edge of Azalea bushes planted along the foundation. A river birch and a chestnut oak grow to the east, between the house and the road. Tall pecan trees line the drive on the south and have perennial flowers planted at the bases.

1. House. ca. 1886. Contributing building

The two-story, Greek Revival-Italianate residence is an example of the styles; a decade after fashions in other regions of the county and state began to turn to Queen Anne and other late Victorian designs. The ca. 1886 house is a simple Greek Revival style house with Italianate brackets hung on the cornices. Except for the enclosure of the front porch with screens and the interior remodeling of the rear wing, the "I-house" house stands much as it did when J. W. Mallard had it built in 1886.

Exterior.

The east-facing main block of the house is two-stories high, three bays wide and two bays deep with plain-edge weatherboarding that terminates at the ends in narrow corner boards. Windows contain six-over-six sash within unmolded frames. The central entrance consists of a four-panel door surrounded by sidelights above panels and a wide transom. A one-story front porch extends across the principal facade, its four, square posts supporting a low-pitched hip roof. Diminutive Italianate brackets accentuate the porch cornice and are repeated in full scale in the eaves and return cornices of the gable-end main block. Twin exterior end chimneys of dark-hued bricks, laid in running bond
United States Department of the Interior

Continuation Sheet

John Wesley Mallard House
Duplin County, North Carolina

above a stepped base and offset flues with stepped caps, rise at the gable ends. The one-story
transverse, end-gable rear wing is one bay wide and four bays deep with a door centered in the south
side and six-over-six sash in the side walls. The eaves contain brackets similar to those on the front
porch. A chimney stack rises through the ridge about one-third of the way from the house. On the
west elevation is a modern, gable roof storage area, accessible through a five, horizontal paneled
door.

Interior.

The house has a center hall plan, one room deep on the south and two rooms deep on the north.
The hall has been shortened to accommodate a bathroom on the western end. A straight-run
staircase rises from the rear, with a turned newel post on a square base, turned balusters, and a
molded handrail. A diminutive board-and-batten door on the side face provides access to the
enclosure beneath. The mantels throughout have a simple, robust Greek Revival character with flat
pilasters supporting wide, flat lintels and 45° angle Greek Revival moldings used decoratively below
the shelves. The firebox opening is closed in the northeast room and the mantel removed. Doors
feature four raised panels, box locks and faux wood-grained knobs; the front door has a Carpenter
lock dated 1867. The frames are molded with two-parts. The ceilings are of beaded wood, except
for the Celotex one in the parlor on the south. The chamber on the northeast is part of the rear
wing. It has battens added along the lengthwise seams of the boards. This chamber also has a
wainscot of beaded boards installed vertically. The one-story, rear wing also contains a laundry,
dining room, kitchen, and den with fireplace, all of which are finished with modern materials. They
were configured within a vintage service wing, which contained the kitchen, pantry and dining room,
connected by a porch running along the south. The second floor contains two bedchambers in
the front. They are finished identically to most of the rooms on the first level: wooden, Greek Revival
mantels, simple door and window trim, four-panel doors, plaster walls and beaded board ceilings.
Carpeting covers the tongue-and-groove heart pine floors.

Southwest of the house stands the pack house, a small, gable roof, frame structure, with side sheds,
now used as a storage shed.

A large, new gable-front barn, sheathed with metal, rests on a continuous brick foundation.
8. STATEMENT OF SIGNIFICANCE.

Summary

The John Wesley Mallard House, an locally important, intact example of combined Greek Revival and Italianate styles appearing in the post-bellum period of architectural development in Duplin County, is eligible for listing under Criterion C: architecture. The property, originally consisting of 52 acres, now contains ten acres surrounding the house and outbuildings.

The architectural context of the John Wesley Mallard House is discussed in the associated historic contexts titled: “Town Building and Agricultural Development in Duplin County, 1876-1943,” pages E22-37 in the MPDF, Historic and Architectural Resources of Duplin County, North Carolina: ca. 1790-1943. The John Wesley Mallard House meets the registration requirements discussed on pages 63-64 for significance in the history of the county’s architecture outlined in Property Type 2B: “Houses Built Between the Civil War and 1943,” pages F60-63.

Historical Background

The upland region of Duplin County was greatly enhanced for agricultural development after 1838, when the Wilmington and Raleigh Railroad expanded transportation between local markets and centers of trade. The railroad enabled farmers to ship their produce south to the port city of Wilmington and north into Virginia. Planters who settled in the area during the antebellum period included the Faison, Herring and Hicks families who purchased tracts of farmland and built up a strong economic and social system that prevails into the early twenty-first century.

The railroad changed agricultural practices from being subsistence farming to raising crops for sale. Some farmers added industrial components to assist in their operations.

Eliza M. Hicks (1858-1900) sold 52 acres of property to John Wesley Mallard (1843-1916) in 1886 for $1040.1 The price does not indicate there was a substantial dwelling on the tract. Mallard built the house where he, his wife, three sons and a daughter lived. The 1900 census lists him as a farmer.2 Typical of rural residences, Mallard’s property also had “...a two acre ‘mill site’ where he had a sawmill, crate factory, grist mill and cotton gin. He built his own water tank to supply these enterprises. There was also an unusually good artesian well that supplied water through a large pump on the spacious back porch for the house. Most of the family were Methodists, but it is

2 Twelfth Census of the United States, 1900, Duplin County, 49.
known that he gave the lumber to build Miller’s (Free Will Baptist) Chapel Church. It is also said that he helped many colored ‘hands’ to buy their own homes.\textsuperscript{3}

His son, E. (Ernest, b. 1882) F. Mallard, the youngest son, inherited the house, but his mother, Bettie, had a life estate in the property. Upon her death in 1921, E. F. took possession.\textsuperscript{4} E. F. was living in Brunswick County, and was employed as the cashier of the Citizens Bank in Shallotte.\textsuperscript{5} He retained ownership until February 4, 1930 when, W. F. Pierce, receiver for the Bank of Shallotte, at sheriff’s sale, purchased the property.\textsuperscript{6} In 1933, A. W. and E. F. Mallard, executors of John Wesley Mallard’s estate, put in a successful upset bid. Within the upset bid process, they assigned the bid and the lands to N. H. Carter.\textsuperscript{7} N. H.’s widow, Lou H. Carter and her children and their spouses, conveyed the property to Collin R. Smith in 1943.\textsuperscript{8} In 1946, with his health failing, Smith, and his wife, Mattie May, sold the farm to John Warren, Sr.\textsuperscript{9} John Warren and his wife Effie, in 1959, sold 33.5 acres to their son, Kenneth R. Warren, retaining life estates in the “home place.”\textsuperscript{10}

Architectural Context

The Italianate style in America developed as part of the picturesque movement and the influx of a myriad of revival styles. Andrew Jackson Downing’s published architectural treatises of 1842 and 1850 launched the Italianate style into popularity. A full-fledged Italianate style raged in the port of Wilmington, the largest city in the state (Wilmington Historic District, NR 1974). By 1851, Wilmington builders were using the Italianate forms and details found in Downing’s 1850 The

Architecture of Country Houses to create abodes for commission merchants and movers-and-shakers of the urban center.

The traditional conservatism of North Carolina did not impede the Italianate style from infiltrating the rural areas. From the 1850s through the 1880s, in the Cape Fear region, large and small houses sprang up in the coastal plain exhibiting the Italianate style. Most often, the Italianate details, especially brackets, were appended to a basic Greek Revival style form; two rooms wide and one room deep. The tracks of the Wilmington and Weldon Railroad, running south to north through Duplin County allowed the Italianate style easily to find its way from Wilmington. Within a short time, the style spread into the countryside evidenced by the ca. 1855 Buckner Hill House in the Bowdens vicinity (NR 1973). It employs the Italianate style by attaching brackets to the otherwise Greek Revival style dwelling.

In Duplin County the Italianate style was second in popularity only to the most prevalent style—the Greek Revival. Kenansville, Duplin’s county seat (Kenansville Historic District, NR 1975) includes the 1855, wooden frame Chauncey Graham House. Within the town of Faison (Faison Historic District, NR 1997) are several examples of post-bellum Italianate style houses, among which are the J. B. King House, built ca. 1874, and the Walter L. Hicks House from the 1880s. Architecturally, the Mallard House is most closely related to the William E. Faison House, ca. 1876, located just across the Duplin County line in Sampson County. It is two-stories high, three bays by two bays, and has interior chimneys and a bracketed cornice. Its one-story hip-roofed porch has posts square-in-section and turned balusters. They all have bracketed cornices in common.

The J. W. Mallard House has good exterior and interior integrity in the Greek Revival style. The Mallard House has nicely executed gable ends with bracketed returns. The front entrance is well crafted, with transoms and sidelights around a four-panel door.

While like other Greek Revival style houses, the Mallard House has a center hall, it is only one room deep. The interior of the Greek Revival house is simply finished with plaster walls, plain door and window frames, baseboards, four-panel doors and pilastered mantels. The Duplin County Greek Revival dwellings owe their academic design quality to the cultural transference enabled by the railroad that traveled through the area. In the case of the J. W. Mallard House, it is rendered simply and decorated with Italianate brackets, a bow to the later style.

10. GEOGRAPHICAL DATA

Verbal Boundary Description

The property fronts along the west side of State Route 1301, 0.25 miles south of the intersection with SR 1329. See 1” = 200’ scale aerial tax map attached for property boundaries.

Boundary Justification

The boundary of the nominated property includes a two-acre tract historically associated with the John Wesley Mallard House. The nominated property retains integrity of location, setting, design, materials, workmanship, feeling, and association.
