Faison, William E., House
Sampson County, North Carolina

7. NARRATIVE DESCRIPTION.

Built circa 1870 and located near Giddensville in the rich farming region of northeastern Sampson County, North Carolina, the William E. Faison House is one of a group of important post-bellum plantation and town houses built within a radius of several miles around the economic and cultural center of Faison. The close-knit society of Faisons, Herrings, Hickses, and others retained ownership.

North Carolina highway 50 passes in front of the house as it extends west-to-east from Suttontown to Faison across the Sampson-Duplin County line. The house faces southwest, toward NC 50 and is set approximately 100 feet from the road. State Route 1757, a 1.2-mile spur running southeast, angles into NC 50 directly in front of the house. The house sits on a spacious lawn with rather casual landscaping—some bushes around the foundation piers and large pecan trees dot the plot. A family cemetery devoid of markers, save for one, occupies the extreme northern corner of the parcel. There is no evidence of two twentieth-century outbuildings that had been behind the house. Originally, the plantation was 3,670 acres in extent; the property now encompasses a rectangular 2.87-acre homestead parcel.

The William E. Faison House is a striking example of late nineteenth-century architectural design that combines elements of Greek Revival and Italianate styles in a pleasing arrangement. The builder used square, as well as curvilinear, elements in creative ways to give the structure a solid, yet animated, appearance against a flat terrain that composes the surrounding landscape.

A. Exterior.

The primary focus of the two-story, hip-roofed, double-pile house is the handsome, one-story front porch, supported on six square posts with stepped caps; low, elaborately turned balustrades across the front and side interstices. Graceful segmental arches spring from the upper terminations of the posts; curvilinear brackets are centered above each post; and a delicate dentil molding extends beneath the porch roof eaves. The main block of the house is three bays wide and two bays deep, with plain weatherboarding terminating at corner pilasters crowned by Greek Revival style angular caps. The upper walls feature a stepped frieze incorporating single and paired brackets, and a denticulated cornice. The wide roof soffit likewise is stepped giving the eaves a slight lift. Two interior chimneys rise through the side slopes of the hipped roof midway between the front and rear rooms. The front, central entrance contains a four-panel door, paneled sidelights, and a wide transom. Square moldings surround six-over-six sash, and the original moveable-slat window blinds remain intact and operable. The one-story bay window in the rear room on the southeast side is a
mid-twentieth century alteration. It replaced an earlier window, the framing for which was cut through to accommodate the change.

A one-story, gable roofed rear ell extends to the northeast. Local tradition is that it was an older building, moved in and attached to the main structure. Its interior features confirm that it is the earliest part of the house, evidencing transitional Federal/Greek Revival styles. An exterior stepped-shoulder chimney is centered on the rear wall of the kitchen. The northwest wall of the rear wing contains two, early, nine-over-six and one later six-over-six sash, and a pair of casement windows. There also is a pair of casements on the opposite side.

B. Interior.

A wide central hall runs through the house, with the staircase placed to the rear portion of the space. Closet doors beneath the stairs and in the chambers are of two vertical panels of the Greek Revival mode. The west parlor is the most elaborate in detail, including symmetrically molded, reeded, window surrounds; concentric-circle corner blocks; and skirts of narrow tongue-and-groove boards installed in a chevron pattern. The mantel is similarly ornamented. The other mantels in the house are of a stolid, Greek Revival style, having pilasters with molded caps, wide lintels and molded shelves. The staircase, one of the finest designs in the region, features an unusual three-tier, polygonal newel post, square balusters, and a graceful walnut handrail that forms a swan’s neck at the upper level where it eases into the upper hall balustrade encompassing the stairwell. Originally, the stair ran front to rear on the other side of the hall. Mrs. Faison instigated the change before the house was completed.\(^1\)

The interior plaster was removed by a previous owner, allowing observation of the construction sequence. Originally, the house was one room deep (sitting room) on the southeast and two deep (parlor and dining room) on the northwest paralleling the center hall. Gable roofs probably covered both sections. A room at each the first and second levels (both bedrooms) in the east corner, was added shortly after the house was completed since their doors and moldings are virtually identical to those in the original section of the house. The chimney was enlarged to accommodate the additional fireplaces. Even later, a bay window configured on the southeast side and a rear piazza room (child’s bedroom) on the northeast were added. The first floor rooms were false grained in mahogany and golden oak.\(^2\)

An earlier building was attached to the northwest side of the rear porch and contained a pantry and kitchen. It now contains the kitchen, bath and laundry. The central, recessed rear porch joins at a right angle another section of porch that runs along the southeast to connect to the kitchen.

\(^1\) Telephone interview with Ella Lewis Cobb, July 20, 2004
\(^2\) Ibid.
Horizontal tongue-and-groove boards sheath the walls of the kitchen wing. A small, transitional Federal/Greek Revival door opened into a pantry at the north end of the rear porch. Its form and detail are unique in the house, having two square panels outside and flush, vertical boards inside, probably to give extra protection for its valuable contents. The door, now sealed from the interior, shows its paneled face within the porch of the wing. The mantel in the kitchen is likewise of transitional Federal/Greek Revival style, having delicate moldings that form two horizontal panels in the frieze beneath the well-molded shelf.

The 1979 surveyor of the house, Tom Butchko, noted that the door was moved from William E.’s father’s, Wright Faison’s house, but does not reveal the source of the information or the location of the house. W. E.’s father was Thomas Kilby, not Wright Faison. He died when W. E. was six years old. The child was placed under the guardianship of his uncle, William Wright Faison.¹

The four rooms on the second floor each have Greek Revival mantels like those on the first floor. The eastern bedroom has false-grained woodwork.

2. **Faison Family Graveyard.** Ca. 1904. Contributing site

A Faison family graveyard exists on the north corner of the property. It is devoid of markers, save for the government issue, Confederate stone of William E. Faison who died in 1904. The burying ground long overgrown, is now accessible thanks to the efforts of the new owners.

¹ *Seventh Census of the US, 1850, Duplin County, North Carolina, 235.*
8. STATEMENT OF SIGNIFICANCE.

Summary

The William E. Faison House, a locally important example of a late Greek Revival and Italianate style dwelling incorporating delicacy of design and craftsmanship in rural Sampson County, meets National Register Criterion C for architecture. The house, built ca. 1870, is situated in the northeastern corner of Sampson County, less than a mile from the Sampson-Duplin County line, on 2.87 acres of the 3670 acres acquired by William. The broad, flat farm fields are encompassed on the north and east by Youngs Branch which arcs around into Goshen Swamp and from there, to the headwaters of the Northeast Cape Fear River. The picturesque setting and distinctive detail of the house are heightened by the termination, directly in front of the house, of SR 1757, leading from the county seat of Clinton, fourteen miles southwest.

The high level of design and craftsmanship seen in the structure reflects the economic prosperity, cultural refinement, and accessibility of materials made possible by the railroad that linked upland settlements of Sampson and Duplin counties with urban centers. While in Sampson County, the William E. Faison House takes its architectural cues from nearby Duplin County, especially, the town of Faison, a gathering point for commercial and social interaction.

Historical Background

The land on which the house is built was part of the post-bellum development of upper Sampson County. Citizens began aggregating property, taking advantage of the post-war agricultural boom.4

William E. (Elias) Faison (1842-1904), was just six years old when he lost his father in 1848. He was reared by his uncle, William W. Faison. William E. was the son of Thomas Kilby (1799-1848) and Mary Ann Oates Faison (1811-1882).5 He served in the Confederate army, rising from a sergeant to captain. He suffered wounds twice, and was among those who surrendered at Appomattox Court House, Virginia on April 9, 1865.6 In 1870, as a 28-year-old husband and father, he was farming in Piney Grove Township, Faison Depot, with his 20-year-old wife, Margaret Hobbs, his son, Ernest K., 2 months, and his mother, Mary A. Faison, 58.7 Faison acquired the land from the division of his father’s estate, registered in 1851,8 on which he had his house constructed about 1870. In the

8 Sampson County Deeds: Book , 31, 112.
Upon the death of William E., in 1904, the commissioners divided his approximately 3,670 acres of land among the eight children. The “house lot” of 31.5 acres and other property, went to Eldon Faison.10 At the age of 21, in 1911, he sold the property to Thomas Kossuth Adams.11 The bachelor Eldon,12 a house carpenter, lived with his sister and brother-in-law, Mary and Junius McCullen.13 On September 27, 1935, Adams and his wife, Annie J., conveyed 50 acres to their son, Pritchard Adams, with the proviso that “the grantors shall make their home and live in the dwelling house.”14 Pritchard, that same day, transferred the land and “the homeplace of T. K Adams and wife” to his sister, Annie Elizabeth Adams (1898-1991), wife of William Emmett Lewis (1893-1961).15

On June 28, 1990, the widow, Annie A. Lewis conveyed to William D. Lewis and wife, Annie M., the same 50 acres, save for two exceptions, 5 acres which they had conveyed to William D. in 1955 and 12 ¼ acres that she had deeded to William D. and his wife in 1973.16

In 1993, Matthew Faison, a descendent of the original owner, bought the house and 2.87 acres.17 He began restoration, but before completing it, conveyed his holdings to Preservation North Carolina18, which in 2001, sold the house, with preservation covenants, to current owners, Curtis Meglionico and Carol Sabo.19 They are restoring the house themselves, beginning with the kitchen wing and the second floor rooms.

Architectural Context

The Italianate style in America developed as part of the picturesque movement and the influx of a myriad of revival styles. Andrew Jackson Downing’s published architectural treatises of 1842 and 1850 launched the Italianate style into popularity. A full-fledged Italianate style raged in the port of Wilmington, the largest city in the state (Wilmington Historic District, NR 1974). By 1851,
Wilmington was using the Italianate forms and details found in Downing's 1850 *The Architecture of Country Houses* to create abodes for commission merchants and movers-and-shakers of the urban center. Wilmington had such an affinity for the Italianate style that used it through out the nineteenth century.

The traditional conservatism of North Carolina did not impede the Italianate style from infiltrating the rural areas. During the 1850s through the 1880s, in the Cape Fear region, large and small houses sprang up in the coastal plain exhibiting the mix of Greek Revival and Italianate styles. The tracks of the Wilmington and Weldon Railroad, running south to north through western Duplin County allowed the Italianate style easily to find its way from Wilmington. Within a short time, the style spread into the countryside evidenced by the ca. 1850 Buckner Hill House (NR 1973) in the Bowdens vicinity. It employs the Italianate style by attaching brackets to the otherwise double-pile Greek Revival style dwelling.

*An Inventory of Historic Architecture of Sampson County, North Carolina*, the survey publication, includes only one property, the hipped-roof, W. T. Beaman House in Beaman's Crossroads, ca. 1850, which may have been a stylistic trendsetter for the William E. Faison House. While some twenty years earlier, it is two-stories high, three bays, double-pile plan and has interior chimneys and a bracketed cornice. Its one-story hip-roofed porch has posts square-in-section and turned balusters. Although the William E. Faison House is a late example of Greek Revival design, it sports the in vogue brackets of the Italianate style. The other Italianate houses in Sampson County, notably the Hobbs House in Keener and the Joe Frank Westerbrook House in Newton Grove have exterior end chimneys, arched or paired windows, gable roofs, two-story porches and were built in the 1890s. They all have bracketed cornices in common with the earlier W. E. Faison House.

The William E. Faison House is just a mile east of the Duplin line and takes its architectural cues from that neighboring county and related gentry. The historic district of the nearby town of Faison (Faison Historic District, NR 1997) contains several examples of post-bellum Italianate style houses. An oral tradition associated with the house credits Faison Aubynge (sic) Lewis, carpenter, as being the builder. In fact, Aubynge Lewis' Greek Revival house in Faison, shares some features with William E. Faison House: hip roof; three bay-wide façade with second story center window being narrower and shorter than those flanking it; one-story porch; and front entrance surrounded by transom and sidelights. Two houses in Faison, the J. B. King House, ca. 1874, and the Walter L. Hicks House, ca. 1886 are even more closely related, architecturally. They exhibit hipped roofs, bracketed cornices ornamented with a dentil course, and porches that employ Doric posts, square-
in-section, spanned by slightly arched lintels. The porches of the King and Hicks houses are two-stories, with the second story resembling the Faison House. In all cases, the balusters are turned.

The intact William E. Faison House displays hallmarks of the Greek Revival style: cornerboards treated as pilasters; a four-panel door, surrounded by sidelights and a transom; a dentil molding variation on the house and porch cornices; a hip roof with chimneys piercing the side slopes. Delicate curvilinear brackets add an Italianate note to the exterior porch and roof cornices.

The interior of the William E. Faison House has a great deal of integrity, despite having had the plaster and much of the lathe removed by a previous owner. Four-panel doors in simple frames, tongue-and-groove, heart pine flooring and standard Greek Revival mantels with pilasters and straight entablatures are found throughout the house, save for the parlor. That room was updated, probably in the late 1880 or 1890s, with an elaborate Queen Anne mantel and panels beneath the windows ornamented with narrow beaded boards formed in chevrons. The parlor has reeded, window and door surrounds with concentric-circle corner blocks. The stair’s three-tier, polygonal newel post, and graceful walnut handrail that forms a swan’s neck is unique in the county. The current owners have uncovered faux painting on the woodwork in some rooms. The academic Greek Revival-Italianate design of the main house undoubtedly is a product of the cultural transference brought by the railroad that traveled through the area. But the surprising aspect is the transitional Federal-Greek Revival features found in the rear wing—the complexly molded mantel shelf and architrave and paneled frieze. It is a rare survivor of that earlier era in the county.

10. GEOGRAPHICAL DATA

Verbal Boundary Description

The property being nominated consists of 2.87 acre home tract of the Lewis Tract, Volume 1164, page 913, Sampson County Register of Deeds Office, Clinton, North Carolina, as shown on the accompanying 1 inch = 100 feet map.

Boundary Justification

The boundary of the nominated property encompasses the remaining intact tract historically associated with the William E. Faison House.
