INITIAL NOTIFICATION OF APPLICABILITY FORM
NESHP for Area Sources State of North Carolina
SUBPART AAAAAAA (7A) – Asphalt Processing and Asphalt Roofing Manufacturing

Facility Name: __________________________________________ Facility ID: __________

Facility Owner/Operator: _________________________________________________________

Owner/Operator Mailing Address: _________________________________________________

Facility Physical Address: ________________________________________________________

____ No, my facility is not subject to GACT Subpart AAAAAAA (7A)

Your facility IS NOT subject to GACT 7A if you answer No to question 1 or 2 OR Yes to question 3 on the following page.

____ Yes, my facility is subject to GACT Subpart 7A

Your facility IS subject to GACT 7A if you answer Yes to questions 1 and 2 on the following page.

If a source is subject to Subpart 7A and commenced construction on or before July 9, 2009 then the following apply:
“Existing” source
• Submit Initial Notification Form by April 1, 2010.
• Comply with Subpart 7A by December 2, 2010.
• Demonstrate compliance within 180 days after December 2, 2010.
• Submit Notification of Compliance Status Report within 60 days of the compliance demonstration.

If a source is subject to Subpart 7A and commenced construction after July 9, 2009 then the following apply:
“New” source
• Comply with Subpart 7A by December 2, 2009 or upon startup, whichever is later.
• Submit Initial Notification Form within 120 days of becoming subject to 7A.
• Demonstrate compliance within 180 days of December 2, 2009 or within 180 days of startup of the source, whichever is later.
• Submit Notification of Compliance Status Report within 60 days of the compliance demonstration.

1) Do you own or operate an asphalt processing and/or asphalt roofing manufacturing operation? _____
Yes _____ No

Asphalt processing operation means any operation engaged in the preparation of asphalt flux at stand-alone asphalt processing facilities, petroleum refineries, and asphalt roofing facilities. Asphalt preparation, called “blowing,” is the oxidation of asphalt flux, achieved by bubbling air through the
heated asphalt, to raise the softening point and to reduce penetration of the oxidized asphalt. An asphalt processing facility includes one or more asphalt flux blowing stills.

Asphalt roofing manufacturing operation means the collection of equipment used to manufacture asphalt roofing products through a series of sequential process steps. The equipment configuration of an asphalt roofing manufacturing process varies depending upon the type of substrate used (i.e., organic or inorganic). For example, an asphalt roofing manufacturing line that uses organic substrate (e.g., felt) typically would consist of a saturator (and wet looper), coating mixer, and coater (although the saturator could be bypassed if the line manufacturers multiple types of products). An asphalt roofing manufacturing line that uses inorganic (fiberglass mat) substrate typically would consist of a coating mixer and coater.

2) Is your facility classified as an Area Source?  ____ Yes  ____ No

Area Source means the facility’s after control potential emissions are less than 10 tons per year for a single hazardous air pollutant (HAP) and less than 25 tons per year for any combination of HAPs.

3) Is your facility subject to 40 CFR 63 Subpart LLLLL (5L) - National Emission Standards for Hazardous Air Pollutants: Asphalt Processing and Asphalt Roofing Manufacturing?  ____ Yes  ____ No
