

Landfill proposed near your community

**Your community is near a proposed landfill
Duke Energy wants to construct and operate
at its Sutton Energy Complex Facility in Wilmington.**

Duke Energy has proposed constructing the fully-lined landfill (see map) to dispose of coal ash currently contained in unlined basins on the utility's property.

**A state-issued solid waste permit will be required to
construct and operate the industrial landfill.**

**The draft permit includes safeguards to protect public health
and the environment.** For example, the draft permit requires Duke Energy to build the landfill with a system for collecting and treating wastewater. The N.C. Department of Environmental Quality will consult with the U.S. Environmental Protection Agency and review information gathered about the proposed landfill before making a final agency decision on the permit.

To read the draft permit online, log in to the following N.C. Department of Environmental Quality web page:
<https://ncdenr.s3.amazonaws.com/s3fs-public/draftsuttonpermit.pdf>
