**FACT SHEET**  
**SOLID WASTE PERMIT NUMBERS 7407-CDLF-2001 and 7407-CDLF-2009**

**FACILITY:** C&D Landfill, Inc.  
**COUNTY:** Pitt County  
**CITY:** Greenville, North Carolina  
**OWNER &  
OPERATOR:** EJE Recycling & Disposal, Inc./C&D Landfill, Inc.

**DESCRIPTION**

EJE Recycling & Disposal, Inc. / C&D Landfill, Inc. owns and operates the C&D Landfill located at 802 Recycling Lane in Greenville, North Carolina. The landfill is currently divided into two phases for a total of 160.14 acres. Phase 1 is unlined and closed consisting of 34.21 acres, and Phase 2 is unlined and active consisting of 125.93 acres. In 2009, Phase 1 and Phase 2 were combined into one unit and permitted under the Solid Waste Rules 15A NCAC 13B .0531-.0546 that became effective January 1, 2007. Phase 1 and Phase 2 are separated by a drainage feature, and the phases are beside wetlands and two tributaries to Grindle Creek which empties into the Tar River.

The Solid Waste Section issued a Permit to Construct (PTC) for Phase 1 of the landfill on April 26, 2001 to receive construction and demolition (C&D) waste. On July 21, 2009, a PTC was issued for Phase 2 of the landfill.

Semiannual routine groundwater and surface water monitoring is currently being conducted at the landfill (Phase 1 and Phase 2) in accordance with 15A NCAC 13B .0544 and 15A NCAC 2L. In addition, quarterly routine methane gas monitoring is currently being conducted at the landfill (Phase 1 and Phase 2) in accordance with 15A NCAC 13B .0544.

In 2009, concentrations of volatile organic compounds first exceeded the North Carolina 2L Groundwater Standards within groundwater monitoring wells located at Phase 1, and an Assessment Monitoring Program was initiated for Phase 1 in accordance with 15A NCAC 13B .0545. Then, in 2013, Phase 2 was added to the Assessment Monitoring Program for groundwater exceedances. Appendix II sampling has been conducted, and additional groundwater monitoring wells have been installed to determine the nature and extent of the groundwater contamination at both Phase 1 and Phase 2.

An *Assessment of Corrective Measures* was submitted in October 2017 in accordance with 15A NCAC 13B .0545(c). The *Assessment of Corrective Measures* evaluates the effectiveness of potential remedies to address the groundwater contamination. EJE Recycling & Disposal, Inc. / C&D Landfill, Inc. conducted a public meeting to discuss the *Assessment of Corrective Measures* on December 14, 2018 in accordance with 15A NCAC 13B .0545(e). Based upon the potential remedies listed within the *Assessment of Corrective Measures*, EJE Recycling & Disposal, Inc. / C&D Landfill, Inc. has selected a groundwater

remedy and has submitted a *North Carolina Solid Waste .0545 Groundwater Corrective Action Permit Modification Application*, dated December 2019 in accordance with 15A NCAC 13B .0545(e).

### **PUBLIC COMMENT PERIOD**

In accordance with 15A NCAC 13B .0533 and .0545, the 45-day public comment period for the notice of groundwater selected remedy begins on January 15, 2020 and ends on March 2, 2020. Persons wishing to comment on the proposed groundwater selected remedy should submit their comments in writing by 5 p.m., February 2, 2020. All comments should be sent to the address shown below and include the solid waste permit number. All comments received within the 45-day period may be considered in making the final approval for the groundwater selected remedy.
