EFFECTIVE DATE: 03/15/2023

SEC. 2. Place hazardous waste containers under cover or in secondary containment.
- Place these containers where they may spill or leak into wells, stormwater drains, groundwater or surface water.
- If a spill occurs, clean area immediately.

SEC. 3. Provide staking or anchoring of portable toilets during periods of high winds or in high foot traffic areas.

SEC. 4. Monitor portable toilets for leaking and properly dispose of any leaked material. Utilize a licensed sanitary waste hauler to remove leaking portable toilets and replace with a new device.

SEC. 5. Collect all spent fluids, store in separate containers and properly dispose as hazardous waste (recycle when possible).

SEC. 6. Remove all vehicles and construction equipment from service until the problem has been corrected.

SEC. 7. Locate washouts in an easily accessible area, on level ground and install a stone entrance pad in front of the washout. Additional controls may be required by the approving authority.

SEC. 8. Implementing the details and specifications on this plan sheet will result in the construction of a washout that meets the requirements of NCG01 CONSTRUCTION GENERAL PERMIT.

CONCRETE WASHOUTS

1. Do not discharge concrete or cement slurry from the site.
2. Dispose of, or recycle, settled, hardened concrete residue in accordance with local and state solid waste regulations and at an approved facility.
3. Manage washout from mortar mixers in accordance with the above item and in addition place the mixer and associated materials on impervious barrier and within 50 foot offset from the storm drain vicinity.
4. Install temporary concrete washouts per local requirements, where applicable. If an alternate method or product is to be used, contact your approval authority for review and approval.
5. Do not use concrete washouts for dewatering or storing defective curb or sidewalk components when no longer functional. When utilizing alternative or proprietary techniques in the table below:

GROUNDS STABILIZATION SPECIFICATIONS

Polyacrylamides (PAMS) and Flocculants

1. Select flocculants that are appropriate for the soils being exposed during construction, selecting from the NC DWR List of Approved PAMS/Flocculants.
2. Apply flocculants at or near the site and in accordance with the Environmental Control Measures.
3. Apply flocculants at the concentrations specified in the NC DWR List of Approved PAMS/Flocculants and in accordance with the manufacturer’s instructions.
4. Provide ponding area for containment of treated Stormwater before discharging offsite.
5. Store flocculants in leak-proof containers that are kept under storm-resistant cover or secondary containment structures.
