OIL FILTER RECYCLING

It's As Easy As

- 1. CHANGE IT!**
- 2. DRAIN IT!**
- 3. DROP IT!**

RECYCLING USED OIL FILTERS IS AS EASY AS 1-2-3

1. CHANGE IT!

Change your motor oil and filter.

2. DRAIN IT!

Drain the used filter and capture the oil into an oil change catch pan.

3. DROP IT!

Take your used oil and filter to a recycling center and drop the filter in the used oil filter drum. Pour your used oil into the drum labeled, "Used Motor Oil."

Used oil filters can hold as much as eight ounces of residual motor oil. If the estimated 143 million filters generated in North Carolina were sent to landfills, they could introduce up to 970,000 gallons of used oil into those-landfills. As of Oct. 1, 2009, by law, no used oil filters can be sent to North Carolina landfills. This law includes oil filters changed by home owners as well as by commercial oil change shops and garages.
