**Background:**

When did you start your pallet recycling program (date)?

**Collection details:**

Briefly describe how you provide for the separation of pallets from the waste stream (e.g., do you have a separate drop-off area at the landfill or transfer station?)

Are pallets segregated into a pile, or in a container or trailer? If a container or trailer is used, how many are dedicated to pallets?

**Markets and costs:**

How are the collected pallets managed (e.g., do you recycle any of them through a pallet recycler? Do you grind them?)?

If you recycle the pallets, which pallet recycler do you use?

Does the pallet recycler charge to accept the pallets? Or, do you receive any payment for the pallets?

Does the recycler provide a trailer or any other type of equipment or assistance?

If you grind the pallets, how is the material marketed (e.g., sold as mulch? as boiler fuel?)?

Do you use a contract grinder? If so, who?

**Other:**

Do you have any other insights or additional information that would be useful to other local governments seeking to divert pallets? (Please feel free to expand on any of these fields on a second page.)

Please e-mail this completed document with photos of your pallet recycling program to Wendy Worley at wendy.worley@ncdenr.gov or fax it to (919) 707-8136. Questions can be directed to (919) 707-8136.
