Re: Approval of Test America Laboratories, Inc. and Lancaster Laboratories Inc. pursuant to Consent Order Paragraph 21

Dear Mr. Long,

Pursuant to paragraph 21 of the Consent Order and based on information provided by Chemours and the laboratories in question, this letter serves as the N.C. Department of Environmental Quality's (DEQ) conditional approval of Test America Laboratories, Inc. and Lancaster Laboratories Inc. for analysis of PFAS samples.

This conditional approval allows Chemours to utilize these laboratories to implement the testing described in paragraph 21 of the Consent Order. Full approval of the third-party labs will require additional information and assessment, including:

- Assessment of results across labs to evaluate direct injection and solid phase extraction laboratory techniques using split samples and round-robin approaches.
- Further information about available PFAS analytical standards.
- Resolution of reporting limits for certain compounds.
- Resolution of any additional items identified through these actions.

DEQ will coordinate with Chemours on the necessary next steps to obtain and evaluate the additional information noted above.

Sincerely,

A handwritten signature in blue ink, appearing to read "Michael E. Scott".

Michael E. Scott, Director
Division of Waste Management
