Linda –

We do not have additional Test America results that include April 15, 2018. We do have internal, daily sample results for April 15, 2018. The internal preliminary result is 1,981 ppt. There was a rain event also on April 15, 2018 of 0.9 inches.

We believe this high result was due to ongoing remediation activities that involved an inspection that disturbed sediments in the cooling water channel.

We will submit the Test America results as soon as we receive them.

Thank you –  
Christel

Linda,

Please find additional Outfall 002 data that was received today, May 1, 2018.

Additional Outfall 002 Results

Please find below additional Outfall 002 results analyzed by Test America for HFPO Dimer Acid. In addition to the rain totals also provided below, it is worthy to note that there were remediation activities associated with the cooling water ditch that may have affected the April 9 composite result (sample collected April 5 – April 9).

<u>Date Sample Collected (3.5-day Composites)</u>	<u>Results (ppt)</u>
Apr 5, 2018	91
Apr 9, 2018	1,300
Apr 12, 2018	120

- On April 7, 2018, the site had 0.59 inches of rain.
- On April 8, 2018, the site had 0.6 inches of rain.
- On April 9, 2018, the site had 0.26 inches of rain.

Thank you –  
Christel
