Re: Submission of Quarterly Report #3 – Characterization of PFAS in Process and Non-Process Wastewater and Stormwater – Chemours Fayetteville Works, Fayetteville, NC.

Dear Ms. Holman,

Chemours is submitting the enclosed Quarterly Report #3 – Characterization of PFAS in Process and Non-Process Wastewater and Stormwater, prepared by our consultant Geosyntec Consultants of NC, P.C. The Quarterly Report supports characterization of PFAS concentrations in the raw water intake, process wastewater, non-process wastewater, and stormwater, including water that is discharged through Outfall 002.

This report is prepared pursuant to Paragraph 11(c) in the executed Consent Order entered February 25, 2019 amongst Chemours, the North Carolina Department of Environmental Quality (DEQ), and Cape Fear River Watch (CFRW). We would welcome your comments on this Quarterly Report.

As always, if you have any questions, please contact me at Brian.D.Long@chemours.com.

Sincerely,

A handwritten signature in black ink that reads 'Brian D. Long'. The signature is written in a cursive style with a large, looped 'B' and a long, sweeping tail.

Brian D. Long
Plant Manager
