Re: Information Pursuant to Paragraph 21 of Proposed Consent Order

Dear Ms. Holman,

Paragraph 21 of the proposed Consent Order states that:

Chemours shall fund sampling by a third party laboratory approved by DEQ of drinking water wells for a distance of at least one-quarter (1/4) mile beyond the nearest well with test results showing a quantifiable level of any PFAS listed in Attachment C above 10 ng/L. Such testing shall be completed within eighteen (18) months of entry of this Order. Additionally, by December 31, 2018, Chemours shall fund re-analysis by a third party laboratory approved by DEQ for all PFAS listed in Attachment C of any previously collected groundwater samples that were analyzed only for GenX, GenX Compounds, or a subset of the PFAS listed in Attachment C.

Pursuant to that paragraph, Chemours hereby notifies the North Carolina Department of Environmental Quality ("DEQ"), and hereby seeks DEQ's approval, that Chemours intends to use TestAmerica Laboratories, Inc. and Lancaster Laboratories Inc. as third-party laboratories to implement the testing described in Paragraph 21. To ensure prompt receipt of results, Chemours will utilize either one of the two laboratories at any given time based on its availability. Chemours has also executed purchase orders with both laboratories for re-analysis of groundwater samples, meeting the deadline in Paragraph 21 to "fund re-analysis by a third party laboratory" by December 31, 2018.

Please provide us as soon as you are able, as we would like to proceed with the analysis required, with DEQ's approval of the utilization of these laboratories pursuant to Paragraph 21.

Sincerely,

A handwritten signature in cursive script that reads "Brian D. Long".
