Michael,

I am with the Chemours Corporate Remediation Group working with Kevin and Christel. I will be sending these preliminary residential sampling results to you going forward instead of Christel. I am responsible for the Chemours database and have started working with Amy Risen to facilitate data exchange. As we get our respective database systems exchanging data I am hoping we can replace these emails providing preliminary data for residences that qualify for water treatment with a more automated notification.

In the meantime, do you want me to continue to email these results?

Thanks, Craig Bartlett

Please see attached list of contact information (samples collected 03-11-2019 to 03-27-2019). This spreadsheet includes 4 sample results from 3 new Residences sampled as part of the 2019 Residential Sampling program.

One result exceeded 140 ppt:
7069 TABOR CHURCH RD

One result exceeded 70 ppt:
6319 CREEKBEND DR – NOTE this well is used for irrigating a garden. PFAS were not detected in the drinking water well.

Please note:

1. None of the residences share their well with neighbor's.
