Re: Monthly Emissions Report Pursuant to Consent Order Paragraph 8

Dear Mr. Abraczinskas,

Pursuant to Paragraph 8.d of the Consent Order, please find enclosed the August monthly emissions report for GenX Compounds from Fayetteville Works, prepared with support from our consultant, ERM NC, Inc. ("ERM"). The report shows the estimated GenX Compounds emissions through July, the projected emissions for the rest of the year, and the assumptions that underlie the estimates. Based on the identified assumptions, ERM's calculations continue to show that the facility will meet the Consent Order's 82% and 92% requirements for plant-wide interim reductions of emissions of GenX Compounds.

As we previously reported to you, in June, we completed installation and startup of a carbon bed at Vinyl Ethers South (VES) for further control of process and indoor equipment emissions from that facility. We performed emissions testing at VES on July 16 and 17, and we have incorporated the results from that testing into the enclosed monthly emissions report. The emissions test report for the July 16 and 17 testing at VES, prepared by Weston Solutions, Inc., is also enclosed.

As with the prior monthly emissions reports, the spreadsheet file with the calculations underlying the enclosed monthly emissions report contains confidential business information of Chemours, so we will send that spreadsheet file under separate cover directly to you, and the spreadsheet file will not be further distributed or posted on Chemours' website.

If you have any questions, please contact me at Brian.D.Long@chemours.com.

Sincerely,

A handwritten signature in black ink that reads "Brian D. Long". The signature is written in a cursive style with a large initial 'B' and a long, sweeping tail.

Brian D. Long
Plant Manager
