e-Manifest Fact Sheet

EPA is establishing a national system for tracking hazardous waste shipments electronically. This system known as "e-Manifest," will modernize the nation’s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states. EPA is establishing e-Manifest per the Hazardous Waste Electronic Manifest Establishment Act, which Congress enacted into law on October 5, 2012. e-Manifest is a multi-faceted program that includes system development; regulation and policy; implementation and communication; and consultation with the e-Manifest federal advisory committee.

Top Five Things to Know

2. e-Manifest has been and will be available for testing, prior to launch, through Spring 2018.
3. All receiving facilities, e.g. facilities that receive waste that must be manifested under federal law or receive state-only hazardous waste that must be manifested as required by either the state in which the waste was generated or received, must submit those manifests to EPA either in paper or electronically. EPA will charge receiving facilities an associated fee for each manifest.
4. Handlers will be required to register for e-Manifest to submit manifests electronically and to make corrections.
5. Once the system launches, e-Manifest data will be generally available to the public 90 days post-receipt of the manifest.

Scope of e-Manifest

EPA will implement the e-Manifest regulations until Resource Conservation and Recovery Act (RCRA) authorized states adopt and become authorized for the e-Manifest regulations. (Note: some parts of the e-Manifest regulations, such as collection of user fees, will only be implemented by EPA.)

As electronic manifest use is optional, the system is offering a range of alternatives to a fully electronic manifest. These include submission of paper manifests, submission of image and data files, and a hybrid electronic/paper option all of which will enable EPA to establish a national database of all manifest data.

RCRAInfo

e-Manifest will be linked to the existing RCRA Information System (RCRAInfo) and will have the ability to validate information entered on an electronic manifest against information in RCRAInfo. RCRAInfo is a separate EPA information system that collects information on hazardous waste sites, publicly available here: https://rcrainfo.epa.gov/rcrainfoweb/action/main-menu/view.

Benefits of e-Manifest

EPA is establishing a national system for tracking hazardous waste shipments electronically. This system known as "e-Manifest," will modernize the nation’s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states. Benefits include:

- Cost savings,
- Accurate and more timely information on waste handling,
- Rapid notification of discrepancies or other problems related to a shipment,
• One-stop reporting of data to EPA and the states through a single hub,
• Increased effectiveness of monitoring of waste shipments by regulators, and
• Potential for integrating manifest reporting with other federal and state information systems.

Federal Links and Contacts

• For more information on EPA’s e-Manifest Program and frequently asked questions go to http://www.epa.gov/e-manifest
• Submit input/questions to eManifest@epa.gov or https://www.epa.gov/e-manifest/forms

• To subscribe to the developers only Listserv send a blank message to: e-manifestdev-subscribe@lists.epa.gov

State Information

When will e-Manifest be effective in North Carolina?
e-Manifest will be effective in North Carolina on the same day e-Manifest launches nationwide – June 30, 2018.
