15A NCAC 18D .0105 DEFINITIONS

The following definitions shall apply throughout this Subchapter:

- (1) "Acceptable Experience"
- (a) For all surface grade certifications, the term shall mean at least 50 percent of the duties consist of active on-site performance of operational duties, including on-site water facility laboratory duties, at a surface water treatment facility. This experience shall be based on the use of mathematics, equipment, materials, maintenance, installation and repair techniques, cross-connection control, and other skills necessary for maintaining and operating a surface water treatment facility. The remaining duties shall be in related fields, such as wastewater facility operation, a water or wastewater laboratory, water pumping stations, water system design and engineering, wells, distribution systems, or cross-connection control. The experience of Public Water Supply Section personnel shall be acceptable if at least 50 percent of their job duties include inspection or on-site technical assistance of public water systems.

- (b) For all well grade certifications, the term shall mean at least 50 percent of the duties consist of active on-site performance of operational duties for public water systems with chemical treatment having one or more wells. This experience shall be based on the use of mathematics, equipment, materials, maintenance, installation and repair techniques, cross-connection control, and other skills necessary for maintaining and operating a treated well water system. The remaining duties shall be in related fields, such as wastewater facility operation, a water or wastewater laboratory, water pumping stations, water system design and engineering, surface facilities, distribution systems, or cross-connection control. The experience of Public Water Supply Section personnel shall be acceptable if at least 50 percent of their job duties include inspection or on-site technical assistance of public water systems.
 - (c) For all distribution grade certifications, the term shall mean at least 50 percent of the duties consist of active on-site performance of operational duties for distribution systems within public water systems. This experience shall be based on the use of mathematics, equipment, materials, maintenance, installation and repair techniques, cross-connection control, and other skills necessary for maintaining and operating a water distribution system. The remaining duties shall be in related fields, such as wastewater facility operation, a water or wastewater laboratory, water pumping stations, water system design and engineering, surface facilities, wells, or cross-connection control. The experience of Public Water Supply Section personnel shall be acceptable if at least 50 percent of their job duties include inspection or on-site technical assistance of public water systems.
 - (d) For all cross-connection control grade certifications, the term shall mean the duties consist of on-site performance of cross-connection control duties for a public water system. This experience shall be based on the use of mathematics, equipment, materials, maintenance, installation and repair techniques, back flow prevention, and other skills necessary for maintaining and operating a cross-connection control program for a public water system. The remaining duties shall be in related fields, such as wastewater facility operation, a water or wastewater laboratory, water pumping stations, water system design and engineering, surface facilities, or wells. The experience of Public Water Supply Section personnel shall be acceptable if at least 50 percent of their job duties include inspection or on-site technical assistance of public water systems.
- (2) "Certified Operator" means any holder of a certificate issued by the Board in accordance with the provisions of G.S. 90A-25.
 - (3) "College Graduate" means a graduate of a four-year institution accredited by an agency recognized by the United States Department of Education and awarding degrees on the bachelor level.
 - (4) "Fire Protection System" means dry or wet sprinkler systems or fire hydrant connections to the water distribution system.
 - (5) "Owner" means the person, unit of local government, firm, corporation, association, partnership, or non-profit corporation formed to operate a public water supply facility.
 - (6) "Satisfactorily Completed" means the attendance of at least 80 percent of the training required for examination eligibility and 100 percent of the training required for professional growth hours.
 - (7) "Secretary" means the Secretary of the Department of Environmental Quality.
 - (8) "Service Connection" means a water tap made to provide a water connection to a water distribution system.

SECTION .0200 – QUALIFICATION OF APPLICANTS AND CLASSIFICATION OF FACILITIES

15A NCAC 18D .0201 GRADES OF CERTIFICATION

(a) Applicants for certification shall be at least 18 years old, possess a high school diploma or general educational development equivalent (GED), and meet the following educational and experience requirements:

- (1) GRADE C-SURFACE applicants shall have six months of acceptable experience at a surface water facility and have satisfactorily completed a C -Surface school approved by the Board.
- (2) GRADE B-SURFACE applicants shall:
 - (A) be a college graduate with a bachelor's degree in the physical or natural sciences or be a graduate of a two-year technical program with a diploma in water and wastewater technology, have six months of acceptable experience at a surface water facility, and have satisfactorily completed a B-Surface school approved by the Board; or
 - (B) have one year of acceptable experience at a surface water facility while holding a Grade C-Surface certificate and have satisfactorily completed a B-Surface school approved by the Board.
- (3) GRADE A-SURFACE applicants shall have one year of acceptable experience at a surface water facility while holding a Grade B-Surface certificate and have satisfactorily completed an A-Surface school approved by the Board.
- (4) GRADE D-WELL applicants shall have three months of acceptable experience at a well water facility and have satisfactorily completed a C-Well or D-Well school approved by the Board.
- (5) GRADE C-WELL applicants shall:
 - (A) be a college graduate with a bachelor's degree in the physical or natural sciences or be a graduate of a two-year technical program with a diploma in water and wastewater technology, have three months of acceptable experience at a well water facility, and have satisfactorily completed a C -Well school approved by the Board;
 - (B) have six months of acceptable experience at a well water facility and have satisfactorily completed a C-WELL school approved by the Board; or
 - (C) hold either a Grade A-Surface certification or a Grade A-Distribution certificate and have satisfactorily completed a C-Well school approved by the Board.
- (6) GRADE B-WELL applicants shall:
 - (A) be a college graduate with a bachelor's degree in the physical or natural sciences or be a graduate of a two-year technical program with a diploma in water and wastewater technology, have six months of acceptable experience at a well water facility, and have satisfactorily completed a B-WELL school approved by the Board; or
 - (B) have one year of acceptable experience at a well water facility while holding a Grade C-Well certificate and have satisfactorily completed a B-WELL school approved by the Board.
- (7) GRADE A-WELL applicants shall have one year of acceptable experience at a well water facility while holding a Grade B-Well certificate and have satisfactorily completed an A-WELL school approved by the Board.
- (8) GRADE D-DISTRIBUTION applicants shall have three months of acceptable experience at a distribution system and have satisfactorily completed a C-Distribution or D-Distribution school approved by the Board.
- (9) GRADE C-DISTRIBUTION applicants shall hold a certificate of completion of trench shoring training from a school approved by the Board and shall:
 - (A) be a college graduate with a bachelor's degree in the physical or natural sciences or be a graduate of a two-year technical program with a diploma in water and wastewater technology, have three months of acceptable experience at a Class C or higher distribution system, and have satisfactorily completed a C-Distribution school approved by the Board; or
 - (B) have six months of acceptable experience at a Class D or higher distribution system and have satisfactorily completed a C-Distribution school approved by the Board.
- (10) GRADE B-DISTRIBUTION applicants shall:
 - (A) be a college graduate with a bachelor's degree in the physical or natural sciences or be a graduate of a two-year technical program with a diploma in water and wastewater technology, have six months of acceptable experience at a Class B or higher distribution system, have satisfactorily completed a B-Distribution school approved by the Board, and shall hold a certificate of completion of trench shoring training from a school approved by the Board; or
 - (B) have one year of acceptable experience at a Class C or higher distribution system while holding a Grade C-Distribution certificate and have satisfactorily completed a B-Distribution school approved by the Board.

- (11) GRADE A-DISTRIBUTION applicants shall have one year of acceptable experience at a Class B or higher distribution system while holding a Grade B-Distribution certificate and have satisfactorily completed an A-Distribution school approved by the Board.
- (12) GRADE CROSS-CONNECTION CONTROL applicants shall:
 - (A) be a college graduate with a bachelor's degree in the physical or natural sciences or be a graduate of a two-year technical program with a degree in water and wastewater or civil engineering technology, and have satisfactorily completed a cross-connection control school approved by the Board;
 - (B) have six months of acceptable experience at Class D-Distribution or higher system or have one year experience in the operations of cross connection control devices, and have satisfactorily completed a cross-connection control school approved by the Board; or
 - (C) be a plumbing contractor licensed by the State of North Carolina and have satisfactorily completed a cross-connection control school approved by the Board.
- (13) APPRENTICE applicants shall have met the education requirement and satisfactorily completed a Grade B, Grade C, Grade D, or cross-connection control school approved by the Board and shall have correctly answered at least 70 percent of the questions on an examination designed for the class of certification for which the applicant is applying. The apprentice certification may be renewed annually for a maximum of five years, pursuant to the continuing education and renewal requirements of this Subchapter. An apprentice shall not act as a certified operator or an Operator in Responsible Charge for a facility. An apprentice is eligible for Grade B, Grade C, Grade D, or cross-connection control certification after meeting the applicable experience requirements as set forth in this Rule and making application to the Board.

(b) Applications for certification of an operator certified in a state other than North Carolina shall be submitted to the Board for review. The application for out-of-state, civilian applications includes information regarding the applicant's current employment, the type of licenses granted in the state of origin, the years of water treatment experience, and a listing of water treatment plant experience. The application for applicants with military experience includes a listing of water treatment plant experience and an attached copy of the applicant's Verification of Military Experience and Training (VMET). The information supplied shall assist the Board in determining whether the requirements under which the out-of-state certification was obtained are equivalent to those required by the Water Treatment Facility Operators Board of Certification.

15A NCAC 18D .0205 PUBLIC WATER SYSTEM TREATMENT, DISTRIBUTION, AND CROSS-CONNECTION CONTROL CLASSIFICATIONS

(a) Public water system treatment facilities, except for Class D-Well systems, shall be classified based on the sources of water and the number of points assigned to the facilities pursuant to Rule .0203 of this Section, as follows:

Class C	1-50 points
Class B	51-110 points
Class A	over 110 points

Non-community public water systems with hypochlorite solution as the only treatment applied to the water shall be classified as Class D-Well.

(b) The classification of distribution systems shall apply to all community and non-transient non-community public water systems. The distribution system class level shall be the greater of the treatment plant class level from Paragraph (a) of this Rule or the following class level based on the number of service connections and existence of a fire protection system:

- (1) Class D-DISTRIBUTION is any system with 100 or fewer service connections with no fire protection system;
- (2) Class C-DISTRIBUTION is any system with more than 100 service connections but not exceeding 1,000 service connections with no fire protection system;
- (3) Class B-DISTRIBUTION is any system with more than 1,000 service connections but not exceeding 3,300 service connections or any system not exceeding 1,000 service connections with a fire protection system; and
- (4) Class A-DISTRIBUTION is any system with more than 3,300 service connections.

(c) The classification CROSS-CONNECTION CONTROL shall be applied to any distribution system that is required to have installed five or more testable backflow prevention assemblies in accordance with 15A NCAC 18C .0406(b), which is hereby incorporated by reference, including subsequent amendments and editions.

Readopted Eff. September 1, 2018.

15A NCAC 18D .0206 CERTIFIED OPERATOR REQUIRED

(a) All public water systems, except transient non-community systems with either or both ultraviolet light disinfection, or softening (not required by the North Carolina Department of Environmental Health - Public Water Supply Section), as the only treatment applied to water, must have a certified operator in responsible charge for each water treatment facility that alters the physical, chemical, or microbiological characteristics of the water; has approved plans for such alterations; or has equipment installed for such alterations. Upon vacancy of a position resulting in noncompliance with this requirement each facility must notify the Board Office and Division of Environmental Health Public Water Supply Section Regional Office, in writing, within 10 days.

(b) There must be an operator holding at least a Grade C-Surface certification or above assigned to be on duty on the premises when a surface water treatment facility is treating water. Implementation of this requirement is subject to the following provisions:

- (1) Upon vacancy of a position resulting in noncompliance with this requirement each facility must notify the Board Office within 24 hours or at the start of the next regular business day of such vacancy;

- (2) Upon such vacancy the facility must fill the position with a certified grade C-Surface operator or an operator with a temporary C-Surface within 90 days.
- (c) There must be an operator in responsible charge for the distribution portion of the community and non-transient non-community public water systems. This operator must possess a valid certificate issued by the Board equivalent to or exceeding the distribution classification of the facility for which he or she is designated. A system serving 100 or fewer service connections is exempt from this requirement if it has an operator in responsible charge as required in Paragraph (a) of this Rule. A system which is classified as D-distribution only may use a state certified distribution, well or surface operator to meet the operator in responsible charge requirements of this Rule.
- (d) Effective July 1, 2003 there must be an operator in responsible charge for the cross-connection-control facilities of the distribution system for all public water systems required by 15A NCAC 18C to have five or more testable backflow prevention assemblies. This operator must possess a valid Grade Cross-Connection-Control certificate issued by the Board.
- (e) All operators of community and non-transient non-community public water systems must follow the standard operating procedures established by the operator in responsible charge. Any decisions about water quality or quantity that affect public health which have not been defined in the standard operating procedures must be referred to the operator in responsible charge or to the certified operator on duty.
- (f) No operator in responsible charge is required for transient non-community public water systems with ultraviolet light (uv) disinfection or softening (not required by the North Carolina Department of Environmental Health - Public Water Supply Section) as the only treatment applied to water.

- (a) If an operator fails to pay the renewal fee or meet the continuing education requirements of Rule .0308(a) of this Section, the operator's certificate shall expire.
- (b) If an operator in responsible charge fails to meet the requirements of 15A NCAC 18D .0701, his or her operator's certificate may be revoked pursuant to G.S. 90A-26.
- (c) An individual who has had certification revoked by the Board may petition the Board for any certification sought if:
 - (1) two years have elapsed since the effective date of the revocation; and
 - (2) the individual has completed a school approved by the Board and passed an exam corresponding to the certification being sought.

15A NCAC 18D .0308 PROFESSIONAL GROWTH HOURS

(a) All certified operators shall complete six professional growth hours of Board-approved training each year following the year of initial certification. Board-approved training shall contain subject matter relevant to water treatment facility operators and includes the following categories: rules and regulations, equipment, operation and maintenance, record keeping, new treatment technologies, water treatment processes, courses taught as part of certification school curriculum, and management of water treatment facilities. Submitting proof of professional growth hours shall be the responsibility of the operator. Failure to complete the six professional growth hours shall result in expiration of the operator's certificates.

(b) Training providers shall seek Board approval prior to offering events that provide professional growth hours. Training providers shall submit an attendance roster to the Board within ten business days after completion of the training event. The roster shall contain each attendee's full name and certification ID number. The organization providing the training shall give each participant a certificate or other proof of completion that includes the name of the provider, the provider's address, and contact person with telephone number. The proof of completion shall identify the name of the participant, the number of professional growth hours completed, the course name, the course number assigned by the Board, the instructor's name, and the date of the training. For in-house training, an instructor from outside of the organization shall provide the training.

(c) The Board shall mail renewal notices to operators prior to the renewal date and shall state whether the Board has a record of their professional growth hours for the preceding year. If the Board does not have a record of professional growth for an operator, the operator shall provide proof of the required six professional growth hours of training prior to renewal of any certification issued by the Board. Failure to receive a renewal notice shall not relieve a certified operator of the responsibility to renew the certificate by the renewal due date.

15A NCAC 18D .0309 CERTIFICATION REINSTATEMENT

(a) An operator whose certification has expired may seek reinstatement within two years of expiration by paying any renewal fees in arrears, including late fees, and either providing proof of six contact hours of professional growth training for each calendar year as required in Rule .0308 of this Section or passing another examination of that grade.

(b) An operator whose certificate has been expired for less than two years must pay any renewal fees in arrears and late fees before seeking an upgrade from the certificate type that has expired.

(c) Any person whose certification has been expired for more than two years may apply to the Board for reinstatement of the certificate type that was expired.

- (b) The petition shall contain the following information:

- (1) either a draft of the proposed rule or a summary of its contents;
- (2) the statutory authority for the agency to promulgate the rule;
- (3) the reasons for the proposal;
- (4) the effect of proposed rules on existing rules or orders;
- (5) any data supporting the proposal;
- (6) the effect of the proposed rule on existing practices in the area involved, including cost factors;
- (7) the names and addresses, if known, of those most likely to be affected by the proposed rule; and
- (8) the name and address of the petitioner.

(c) The Board shall determine, based on a study of the facts stated in the petition, whether the public interest will be served by granting the petition. The Board shall consider all the contents of the submitted petition, plus any additional information it deems relevant.

15A NCAC 18D .0508 DECLARATORY RULINGS

(a) The Board shall have the power to make declaratory rulings. All requests for declaratory rulings shall be by written petition and shall be submitted to: Chairman, North Carolina Water Treatment Facility Operators Certification Board, 1635 Mail Service Center, Raleigh, North Carolina 27699-1635.

(b) Every request for a declaratory ruling must include the following information:

- (1) the name and address of the petitioner;
- (2) the statute or rule to which the petition relates;
- (3) a concise statement of the manner in which the petitioner is aggrieved by the rule or statute or its potential application to him; and
- (4) the consequences of a failure to issue a declaratory ruling.

(c) The Board shall notify in writing the petitioner of the Chairman's decision to refuse issue a declaratory ruling and state the reasons. The Chairman may refuse to consider a request for a declaratory ruling:

- (1) unless the petitioner shows that the circumstances are so changed since adoption of the rule that such a ruling would be warranted;
- (2) unless the rule making record evidences a failure by the agency to consider specified relevant factors;
- (3) if there has been a similar controlling factual determination in a contested case, or if the factual context being raised for a declaratory ruling was specifically considered upon adoption of the rule being questioned as evidenced by the rule making record; or
- (4) if circumstances stated in the request or otherwise known to the agency show that a contested case hearing would presently be appropriate.

(d) Where a declaratory ruling is deemed appropriate, the Board shall issue the ruling within 60 days of the receipt of the petition.

(e) A declaratory ruling procedure may consist of written submissions, oral hearings, or such other procedures as may be deemed appropriate, in the discretion of the chairman, in the particular case.

(f) The chairman may issue notice to persons who might be affected by the ruling that written comments may be submitted or oral presentations received at a scheduled hearing.

SECTION .0700 - OPERATIONS AND MANAGEMENT

15A NCAC 18D .0701 OPERATOR IN RESPONSIBLE CHARGE

(a) The owner shall ensure that the public water system facilities are managed by an operator in responsible charge who possesses a certificate equivalent to or exceeding the requirements in this Subchapter.

(b) The operator in responsible charge shall manage the daily operation and maintenance of the facility. No person shall be in responsible charge of more than any one of the following without written permission from the Board:

- (1) one surface water treatment facility;
- (2) five community public water systems with well water facilities;
- (3) ten non-community public water systems with well water facilities;
- (4) one distribution system serving over 3,300 service connections;
- (5) five distribution systems serving over 500 service connections and less than 3,300 service connections;
- (6) ten total distribution systems;
- (7) ten total cross-connection control systems; or
- (8) any facility located more than a 50-mile radius from where the operator resides.

No person shall be in responsible charge of any combination of a surface water treatment facility, a community public water system with well water facilities, a non-community public water system with well water facilities, a distribution system, and a cross-connection control facility without written permission from the Board.

(c) A request for permission from the Board shall include documentation demonstrating that the facilities in question will be managed in compliance with the requirements of 15A NCAC 18C, which is hereby incorporated by reference, including subsequent amendments and editions.

(d) The operator in responsible charge shall report, with annual certification renewal, the names and public water system identification numbers for all systems for which the operator is the operator in responsible charge.

(e) If an operator in responsible charge takes responsibility for an additional system or relinquishes responsibility for any system, the operator shall notify the Board in writing within 10 days of the change.

(f) The operator in responsible charge shall establish standard operating procedures for each facility for which he or she is responsible. These procedures shall ensure that his or her decisions about water quality or quantity that affect public health are carried out. The procedures shall instruct persons lacking proper certification to refer all the decisions affecting public health to the certified operator on duty or to the operator in responsible charge.

(g) The operator in responsible charge shall be available for consultation on the premises of the facility in case of an emergency, equipment malfunction, or breakdown of equipment. The operator in responsible charge may designate a temporary operator in responsible charge during times when it is impossible for the operator in responsible charge to be on the premises. The temporary operator in responsible charge shall be familiar with the water system and have access to the standard operating procedures developed under Paragraph (f) of this Rule. The temporary operator in responsible charge shall possess a certification equivalent to or exceeding that required by the water system treatment classification. The operator in responsible charge shall notify the Board of any temporary operator in responsible charge designation lasting longer than 14 days.
