In follow up to LME-MCO Communication #J254, Changes to the Agency Monitoring Process this is to advise that, following continued collaborative efforts and assessment of the Monitoring Process, the DHHS Monitoring Tools for Providers and the DHHS Unlicensed AFL Review Tool for Providers has been updated (Guidelines revised effective May 3, 2018) and are posted to the DHHS website. In addition, the Clinical Coverage Policies reference has been updated in all of the tools. The revision of the guidelines is the on-going commitment by DHHS, provider organizations, providers and the LME-MCOs to improve the monitoring process. Utilization of the revised guidelines will be effective May 3, 2018.

The update in process does not diminish or reduce the LME-MCOs responsibility/authority to analyze and aggregate the data to determine trends/patterns specific to their Provider Networks.

The Department continues to focus on streamlining processes that will be more efficient, effective, ensures the best use of all available resources, and will result in positive outcomes for individuals supported across the mental health, developmental disabilities and substance abuse service system.
