Introduction to Unity – 3 hour
Presented by Holly Camplin, M.S., CCC-SLP

Friday, Sept 22, 2017 from 9:00 am - 12:00 pm Local Time
Raleigh, NC, North Carolina Assistive Technology Program
ASHA CEUs: 0.3

Learn all about Unity on the Accent 800, 1000 or 1400. This product training will provide participants with an overview of vocabulary options. Participants will practice saying single words and simple phrases in Unity 1-hit. The bulk and remainder of the class will focus on learning the 5 patterns of Unity Sequenced. Throughout the class, basic implementation strategies including temporarily limiting vocabulary with Vocabulary Builder will be reviewed and demonstrated.

A PRC Accent device or laptop is required for this training. Please bring an Accent 800, 1000, or 1400 with the most current software version available. Participants can bring a laptop computer pre-loaded with PASS demo software for Accent. If you want to use a Mac laptop you will need a Windows emulator with PASS installed. PASS software is not compatible with iPads.

This training is appropriate for SLPs, OTs, ATPs, educators, family members, and others who support individuals who currently use or may need to use AAC devices.

Basic Programming for All PRC Devices – 3 hour
Presented by Holly Camplin, M.S., CCC-SLP

Friday, Sept 22, 2017 from 1:30 pm – 4:30 pm Local Time
Raleigh, NC, North Carolina Assistive Technology Program
ASHA CEUs: 0.3

This training focuses on basic programming and operations of any PRC device (Accent 800, 1000 and 1400 and legacy devices). Participants will learn how to: choose a vocabulary, change the voice, set the access method, add vocabulary and messages, add photos, temporarily limit vocabulary, disable the toolbox, update software and perform a memory transfer to back up device contents. In addition, participants will learn about basic care and maintenance.

A PRC Accent device, legacy device or laptop is required for this training. Please bring an Accent 800, 1000 or 1400 with the most current software version available. Participants can bring a laptop computer pre-loaded with PASS demo software for Accent. If you want to use a Mac laptop you will need a Windows emulator with PASS installed. PASS software is not compatible with iPads.

This training is appropriate for SLPs, OTs, ATPs, educators, family members, and others who support individuals who currently use or may need to use PRC devices.
