The name of this organization shall be the State Government Geographic Information Systems Users Committee (SGUC), hereinafter referred to as the State GIS Users Committee (SGUC), of the North Carolina Geographic Information Coordinating Council. Policy and procedures for geospatial data distribution, technical standards, funding, data collection, and other matters related to the most effective use of geographic information and GIS technology can and should be coordinated with other state government agencies and with local and federal users and developers of geospatial data in North Carolina.

The SGUC shall monitor, evaluate, and make recommendations to the Council on the needs, direction, priorities, standards, funding, and responsibilities for GIS projects and initiatives in state government; and shall aid in the coordination of geospatial data activities in North Carolina. The SGUC shall abide by the policies and procedures set forth in these bylaws.
