Introduction to AMH

Vision for Advanced Medical Homes

Build on Carolina ACCESS to preserve broad access to primary care services for Medicaid enrollees and strengthen the role of primary care in care management, care coordination, and quality improvement as the state transitions to managed care.

Practices have options as AMHs:

- Current Carolina ACCESS practices may continue as AMHs with few changes; practices ready to take on more advanced care management functions may be eligible for additional payments
- Practices may rely on in-house care management capacity or contract with a Clinically Integrated Network (CIN) or other partner of their choice
NC DHHS Care Management Principles

Robust care management is a cornerstone of the State’s managed care transition

Care Management Guiding Principles

- Medicaid enrollees will have access to appropriate care management
- Care management should involve multidisciplinary care teams
- Local care management is the preferred approach
- Care managers will have access to timely and complete enrollee-level information
- Enrollees will have access to programs and services that address unmet health-related resource needs
- Care management will align with statewide priorities for achieving quality outcomes and value

AMHs are designed to serve as a vehicle for executing on this approach in a managed care context
AMH Tiers

**Tiers 1 and 2**
- PHP retains primary responsibility for care management
- Practice requirements are the same as for Carolina ACCESS
- **Providers will need to coordinate across multiple plans:** Practices will need to interface with multiple PHPs, which will retain primary care management responsibility; PHPs may employ different approaches to care management

**AMH Payments** *(paid by PHP to practice)*
- PMPM medical home fees
  - Same as Carolina ACCESS
  - Non-negotiable

**Tier 3**
- PHP delegates primary responsibility for delivering care management to the practice level
- Practice requirements: meet all Tier 1 and 2 requirements plus take on additional Tier 3 care management responsibilities
- **Single, consistent care management platform:** Practices will have the option to provide care management in-house or through a single CIN/other partner across all Tier 3 PHP contracts

**AMH Payments** *(paid by PHP to practice)*
- PMPM medical home fees
  - Same as Carolina ACCESS
  - Non-negotiable
- Additional PMPM care management fees
  - Negotiated between PHP and practice
Care Management Approach

The State has developed a process to ensure that high-need individuals and those transitioning out of the hospital will receive appropriate, local care management.

- Care Needs Screening
- Risk Scoring and Stratification
- Comprehensive Assessment
- Care Management for High-Need Enrollees

Transitional Care Management

General Care Coordination

Prevention and Population Health Management

All enrollees, as needed

High-need enrollees

Tier 3 AMH practices are responsible for a range of local care management functions; CINs/other partners can assist practices in fulfilling some or all of these responsibilities.
AMH Tiers and Value-Based Payment (VBP)

The AMH program will provide clear financial incentives for practices to become more focused on cost and quality outcomes for populations, increasing accountability over time.

Goals of AMH Program

- Preserve broad access to primary care services to Medicaid enrollees
- Strengthen the role of primary care in care management, care coordination and quality improvement
- Allow practices to implement a unified approach to serving Medicaid beneficiaries, minimizing administrative burden

Over time, the AMH program provides a pathway for practices to have a larger role in managing the health outcomes and cost for their patient populations. The AMH TAG will consider these aspirations broadly in its initial sessions.

Note: North Carolina’s VBP Strategy is under development and the TAG will be briefed on VBP design and discuss impacts to the AMH program in future sessions.
In September 2018, practices were grandfathered into AMH Tiers 1 and 2. Between 12/18 and 3/25, the majority of practices used NCTracks to attest into AMH Tier 3.*

* Data as of 3/25/2019. Practice and beneficiary counts are subject to change daily.
AMH Attestation Facts and Figures

AMH practices are distributed across the state with robust AMH Tier 3 participation

Timeline of AMH Program Launch

AMHs, CINs, and PHPs have entered into the contracting phase for PHP Regions 2 and 4

9/9/18
Existing Carolina ACCESS practices grandfathered into corresponding AMH Tier

Attestation

10/1/18 – 1/31/19
Interested practices attest to meeting AMH capabilities

2/4/19
• NC DHHS announces PHP and region selection
• State finalizes list of certified AMHs

PHP Contracting

PHPs form their provider networks; AMH-certified practices contract with PHPs as AMH practices

MC & AMH Go-Live

Nov. 2019+
Practices in PHP Regions 2 and 4 begin receiving payments from PHPs
Agenda

1. Agenda
2. Review Advanced Medical Home (AMH) Program
3. AMH Technical Advisory Group (TAG) & Data Sub-Committee
4. Questions
The AMH TAG will help North Carolina Medicaid make informed policy decisions on the development of the program

- An advisory body chaired by DHHS and consisting of a group of approximately fifteen (15) invited representatives from PHPs, AMH practices, and other AMH stakeholders including CINs

- The AMH TAG will weigh in on **strategic and policy issues** in the AMH program and will develop **recommendations** for North Carolina Medicaid’s consideration

- The TAG will coordinate with the State’s Medical Care Advisory Committee (“MCAC”) (*see next slide*)

- The TAG may create ad-hoc technical groups (“subcommittees”), as needed, to develop formal recommendations on technical aspects of the program that require greater degrees of expertise
The TAG sits parallel to the Medical Care Advisory Committee (MCAC) within NC Medicaid.

- Direct transfer of advisory recommendations
- Committees keep each other apprised of recommendations; share select members
- The TAG may create ad-hoc technical groups when a greater degree of expertise is needed

Meeting #4, 6/25, 1 – 4 pm: Discussion Topic TBD
The Data Subcommittee will support the AMH TAG by making informed recommendations on critical care management data issues

What is the Data Subcommittee?

- An **advisory body** chaired by DHHS that consists of care management data and information system subject matter experts from participating AMH TAG member organizations

- The Data Subcommittee will respond to requests from DHHS and the AMH TAG to provide input, identify opportunities, risks and challenges and formulate **recommendations** to the AMH TAG and DHHS regarding data and information sharing issues

- The Data Subcommittee will be informed by **ad-hoc “tiger teams”** that will be organized to rapidly address specific, time-sensitive data issues

*First Subcommittee meeting is June 21. Topic: Member & Claims Data*
The Data Subcommittee will support the AMH TAG and help guide ongoing data work.

**North Carolina Medicaid**

- **AMH TAG**
  - Transmit advisory recommendations
  - Transmit recommendations for AMH TAG review
  - Set priorities & charges Data Subcommittee to develop recommendations on technical standards

- **AMH TAG Data Subcommittee**

- **DHHS-facilitated technical design discussions**
  - DHHS staff work directly with PHPs, AMHs, CINs and LHDs on technical implementation and provide updates to the Data Subcommittee

- **Ad-hoc technical teams (i.e., “Tiger Teams”)**
  - The Department may convene small teams of SMEs on an ad hoc basis in addition to the Data Subcommittee
