Clinical Coverage Policy 1M-2: Childbirth Education

Overview of Proposed Revisions

This overview provides the background and context for policy changes proposed by NC Medicaid.

Public Comment Period: July 29, 2020 to Sept. 12, 2020

NC Medicaid is proposing telehealth-related changes to Clinical Coverage Policy 1M-2: Childbirth Education to complement and build upon the new 1H: Telehealth, Virtual Patient Communications and Remote Patient Monitoring policy, which expands coverage of remote physical and behavioral health care to Medicaid and North Carolina Health Choice (NCHC) beneficiaries.

Proposed revised 1M-2 will:

- Enable childbirth education classes to be delivered via telehealth.

When revisions to Policy 1M-2 are approved, the former policy will be replaced in its entirety on a date to be determined later in 2020. Additionally, NC Medicaid has issued several temporary Special Medicaid COVID-19 Bulletins related to telehealth coverage that remain in effect until further notice. A list of Special Medicaid COVID-19 Bulletins can be found on the NC Medicaid COVID-19 Guidance and Resources web page.

NC Medicaid will provide 30 days’ notice before this policy becomes effective and when the temporary Special Medicaid COVID-19 Bulletins will be retired.
To all beneficiaries enrolled in a Prepaid Health Plan (PHP): for questions about benefits and services available on or after implementation, please contact your PHP.

1.0 Description of the Procedure, Product, or Service

Childbirth education is a series of classes designed to help pregnant women and their support person to understand the changes experienced during pregnancy, to prepare for the labor and delivery experience, and to understand the postpartum period, including, but not limited to, the importance of proper postpartum care for the mother and the child. These classes are based on the goals and objectives approved by NC Medicaid, which are listed in Subsection 5.2, Class Requirements.

2.1.2 Specific

2.2 Special Provisions

2.2.1 EPSDT Special Provision: Exception to Policy Limitations for a Medicaid Beneficiary under 21 Years of Age

a. 42 U.S.C. § 1396d(r) [1905(r) of the Social Security Act]

Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) is a federal Medicaid requirement that requires the state Medicaid agency to cover services, products, or procedures for Medicaid beneficiary under 21 years of age if the service is medically necessary health care to correct or ameliorate a defect, physical or mental illness, or a condition [health problem] identified through a screening examination (includes any evaluation by a physician or other licensed practitioner).

This means EPSDT covers most of the medical or remedial care a child needs to improve or maintain his or her health in the best condition possible, compensate for a health problem, prevent it from worsening, or prevent the development of additional health problems.

Medically necessary services will be provided in the most economic mode, as long as the treatment made available is similarly efficacious to the service requested by the beneficiary’s physician, therapist, or other licensed practitioner; the determination process does not delay the delivery of the needed service; and the determination does not limit the beneficiary’s right to a free choice of providers.

EPSDT does not require the state Medicaid agency to provide any service, product or procedure:

1. that is unsafe, ineffective, or experimental or investigational.
2. that is not medical in nature or not generally recognized as an accepted method of medical practice or treatment.

Service limitations on scope, amount, duration, frequency, location of service, and other specific criteria described in clinical coverage policies may be exceeded or may not apply as long as the provider’s documentation shows that the requested service is medically necessary “to correct or ameliorate a defect, physical or mental illness, or a condition” [health problem]; that is, provider documentation shows how the service, product, or procedure meets all EPSDT criteria, including to correct or improve or maintain the beneficiary’s health in the best condition possible, compensate for a health problem, prevent it from worsening, or prevent the development of additional health problems.

b. EPSDT and Prior Approval Requirements

1. If the service, product, or procedure requires prior approval, the fact that the beneficiary is under 21 years of age does NOT eliminate the requirement for prior approval.

2. IMPORTANT ADDITIONAL INFORMATION about EPSDT and prior approval is found in the NCTracks Provider Claims and Billing Assistance Guide, and on the EPSDT provider page. The Web addresses are specified below.
2.2.2 EPSDT does not apply to NCHC beneficiaries

2.2.3 Health Choice Special Provision for a Health Choice Beneficiary age 6 through 18 years of age

NC Medicaid shall deny the claim for coverage for an NCHC beneficiary who does not meet the criteria within Section 3.0 of this policy. Only services included under the NCHC State Plan and the NC Medicaid clinical coverage policies, service definitions, or billing codes are covered for an NCHC beneficiary.

2.3 Limitations
