Clarification on Billing for Long Acting Reversible Contraceptives (LARCs)
Clarification on Billing for Long Acting Reversible Contraceptives

For clarification purposes of information communicated in October 2018 Medicaid Bulletin, please note that effective Oct. 1, 2018 the new 4-digit Long Acting Reversible Contraceptives (LARC) DRG code is not required to be submitted on the claim.

For Inpatient Hospital services the appropriate reimbursement process will begin after the claim has been grouped using the Grouper Software as usual. Either the original maternity DRG, or the LARC will be assigned systematically.

If the LARC is inserted/implanted during an inpatient stay, and the provider seeks to receive the appropriate LARC reimbursement, the following ICD-10 and HCPCS codes should be billed on the claim accordingly.

ICD-10-PCS codes:
- **OU.H97HZ** Insertion of Contraceptive Device into Uterus, via Opening
- **OU.H98HZ** Insertion of Contraceptive Device into Uterus, Endo
- **OU.HC8HZ** Insertion of Contraceptive Device into Cervix, Endo
- **OU.HC7HZ** Insertion of Contraceptive Device into Cervix, via Opening
- **OU.H90HZ** Insertion of Contraceptive Device into Uterus, Open Approach

HCPCS codes:
