Eligible Beneficiaries

NC Medicaid (Medicaid) beneficiaries shall be enrolled on the date of service and may have service restrictions due to their eligibility category that would make them ineligible for this service.

NC Health Choice (NCHC) beneficiaries, ages 6 through 18 years of age, shall be enrolled on the date of service to be eligible, and must meet policy coverage criteria, unless otherwise specified. EPSDT does not apply to NCHC beneficiaries.

EPSDT Special Provision: Exception to Policy Limitations for Beneficiaries under 21 Years of Age

42 U.S.C. § 1396d(r) [1905(r) of the Social Security Act]

Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) is a federal Medicaid requirement that requires the state Medicaid agency to cover services, products, or procedures for Medicaid beneficiaries under 21 years of age if the service is medically necessary health care to correct or ameliorate a defect, physical or mental illness, or a condition [health problem] identified through a screening examination (includes any evaluation by a physician or other licensed clinician). This means EPSDT covers most of the medical or remedial care a child needs to improve or maintain his/her health in the best condition possible, compensate for a health problem, prevent it from worsening, or prevent the development of additional health problems. Medically necessary services will be provided in the most economic mode, as long as the treatment made available is similarly efficacious to the service requested by the beneficiary’s physician, therapist, or other licensed practitioner; the determination process does not delay the delivery of the needed service; and the determination does not limit the beneficiary’s right to a free choice of providers.

EPSDT does not require the state Medicaid agency to provide any service, product, or procedure

a. that is unsafe, ineffective, or experimental/investigational.

b. that is not medical in nature or not generally recognized as an accepted method of medical practice or treatment.

Service limitations on scope, amount, duration, frequency, location of service, and/or other specific criteria described in clinical coverage policies may be exceeded or may not apply as long as the provider’s documentation shows that the requested service is medically necessary “to correct or

ameliorate a defect, physical or mental illness, or a condition” [health problem]; that is, provider
documentation shows how the service, product, or procedure meets all EPSDT criteria, including to
correct or improve or maintain the beneficiary’s health in the best condition possible, compensate
for a health problem, prevent it from worsening, or prevent the development of additional health
problems.

EPSDT and Prior Approval Requirements
a. If the service, product, or procedure requires prior approval, the fact that the beneficiary is
under 21 years of age does NOT eliminate the requirement for prior approval.

b. IMPORTANT ADDITIONAL INFORMATION about EPSDT and prior approval is
found in the Basic Medicaid and NC Health Choice Billing Guide, sections 2 and 6, and on
the EPSDT provider page. The Web addresses are specified below.

EPSDT provider page: https://medicaid.ncdhhs.gov/

Health Choice Special Provision: Exceptions to Policy Limitations for Health Choice
Beneficiaries ages 6 through 18 years of age

EPSDT does not apply to NCHC beneficiaries. If a NCHC beneficiary does not meet the clinical
coverage criteria within the Outpatient Pharmacy prior approval clinical coverage criteria, the
NCHC beneficiary shall be denied services. Only services included under the Health Choice State
Plan and the NC Medicaid clinical coverage policies, service definitions, or billing codes shall be
covered for NCHC beneficiaries.

Criteria
1. Require a trial of at least two different prescription products from the following list within the
previous 60 days: nystatin cream, nystatin ointment, nystatin/triamcinolone cream,
nystatin/triamcinolone ointment, or clotrimazole cream.
2. Beneficiary must be at least 4 weeks of age.
3. A quantity limit of 50 gm per 60 days prescription is in place.

Procedures
Length of therapy may be approved for up to 60 days.
