North Carolina Home School Statistical History

The home school statistical year began July 1, 2020 and concluded May 31, 2021.

All statistics in the table below are statewide totals. The numbers of schools are actual numbers, not estimates. The number of students given for the 85–86 through 95–96 school years are also actual numbers. However, the number of students for the 96–97 school year and beyond are estimates based on an algorithm of the actual number of schools operating during each school year. The 85–86 school year was the first school year home schools were legally recognized as non-public schools.

*****Home school numbers and enrollment is based on all data collected between July 1, 2020 and May 31, 2021.**
