Install, Connect and Log In
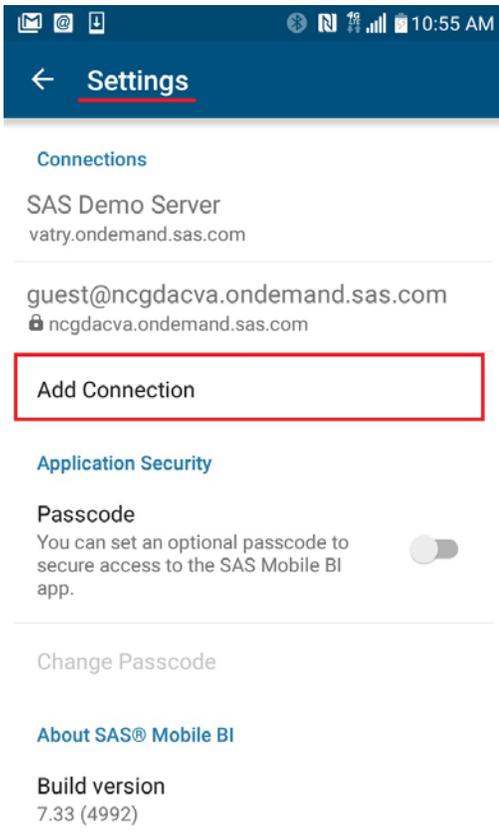

Install the App
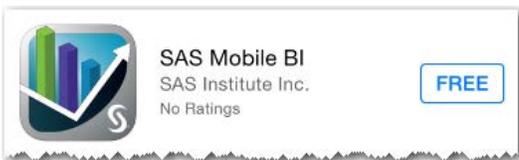

Download and install the **SAS Mobile BI** App from the Google Play store.

Connect to Server

Open the App and select **Settings** from the App menu.

On the Settings screen, select **Add Connection**.

Add Connection

Connection

Server

ncgdacva.ondemand.sas.com

Port

443

Secure Connection

yes

Log In

Log on as guest

Miscellaneous

Description   guest@ncgdacva.ondeman…

.

To add a connection enter the information below and select **Next**.

Note: The information below is case sensitive.

- ■ **Domain:** ncgdacva.ondemand.sas.com
- ■ **Port:** 443
- ■ **Secure Connection:** Yes (slide to select Yes)

Select **Log on as guest** and then select **Next**.

Note: If you change the text under "Miscellaneous" (guest@ncgdacva.ondemand.sas.com), you cannot tap **Next** to continue.

Select **Next** to complete the connection verification step.

Note: A message will appear briefly stating that the connection was successfully added.
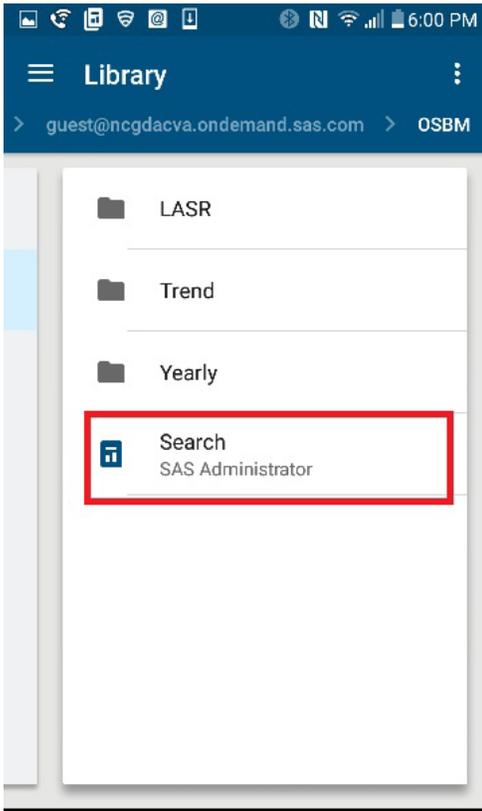

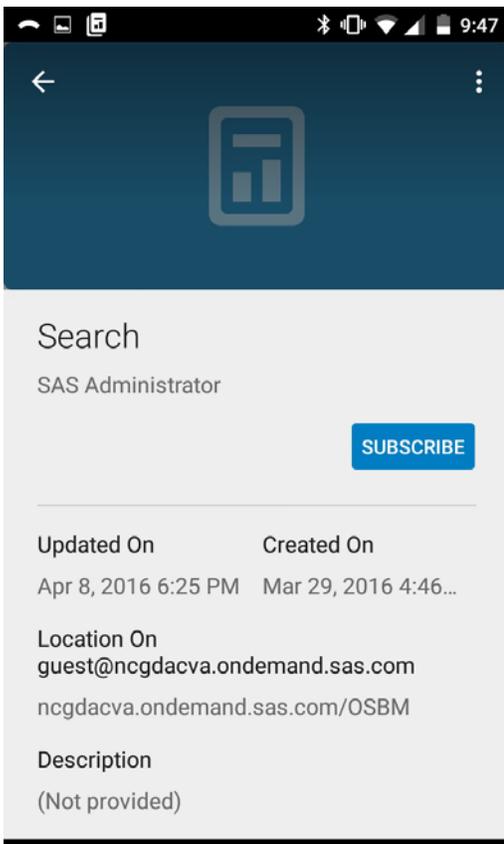

Using the App

Add Reports

Access the **Library** and follow the path
guest@ncgdacva.ondemand.sas.com.

Select **OSBM** and then select the report you want to access.

Select the report called **"Search".**

Select **Subscribe** to access the report.

View Reports

Reports that you subscribed to are listed and accessible under **Portfolio** on the App menu.

Note: You will also see several default or sample reports available in the Portfolio when you first install.

Help

Select the **Help** from the App menu.
