INFORMATION ABOUT THE NORTH CAROLINA REGISTER AND ADMINISTRATIVE CODE

NORTH CAROLINA REGISTER

The North Carolina Register is published monthly and contains information relating to agency, executive, legislative and judicial actions required by or affecting Chapter 150B of the General Statutes. All proposed administrative rules and amendments filed under Chapter 150B must be published in the Register. The Register will typically comprise approximately one hundred pages per issue of legal text.

State law requires that a copy of each issue be provided free of charge to each county in the state and to various state officials and institutions. The North Carolina Register is available by yearly subscription at a cost of ninety-five dollars ($95.00) for 12 issues.

Requests for subscription to the North Carolina Register should be directed to the Office of Administrative Hearings, P. O. Drawer 11666, Raleigh, N. C. 27604, Attn: Subscriptions.

ADOPTION, AMENDMENT, AND REPEAL OF RULES

An agency intending to adopt, amend, or repeal a rule must first publish notice of the proposed action in the North Carolina Register. The notice must include a reference to the Statutory Authority for the action; the time and place of the public hearing and a statement of how public comments may be submitted to the agency either at the hearing or otherwise; the text of the proposed rule or amendment; and the proposed effective date.

The Director of the Office of Administrative Hearings has authority to publish a summary, rather than the full text, of any amendment which is considered to be too lengthy. In such case, the full text of the rule containing the proposed amendment will be available for public inspection at the Rules Division of the Office of Administrative Hearings and at the office of the promulgating agency.

Following publication of the proposal in the North Carolina Register, at least 60 days must elapse before the agency may take action on the proposed adoption, amendment or repeal.

When final action is taken, the promulgating agency must file any adopted or amended rule with the Office of Administrative Hearings. If it differs substantially from the proposed form published as part of the public notice, the adopted version will again be published in the North Carolina Register.

A rule, or amended rule, cannot become effective earlier than the first day of the second calendar month after the adoption is filed.

Proposed action on rules may be withdrawn by the promulgating agency at any time before final action is taken by the agency.

TEMPORARY RULES

Under certain conditions of an emergency nature, some agencies may issue temporary rules. A temporary rule becomes effective when adopted and remains in effect for the period specified in the rule or 120 days, whichever is less. An agency adopting a temporary rule must begin normal rule-making procedures on the permanent rule at the same time the temporary rule is adopted.

NORTH CAROLINA ADMINISTRATIVE CODE

The North Carolina Administrative Code (NCAC) is a compilation and index of the administrative rules of 25 state agencies and 38 occupational licensing boards. The NCAC comprises approximately 15,000 letter size, single spaced pages of material of which approximately 35% is changed annually. Compilation and publication of the NCAC is mandated by G.S. 150B-63(b).

The Code is divided into Titles and Chapters. Each state agency is assigned a separate title which is further broken down into chapters. Title 21 is designated for occupational licensing boards.

The NCAC is available in two formats.

1. In looseleaf pages at a minimum cost of two dollars and 50 cents ($2.50) for 10 pages or less, plus fifteen cents ($0.15) per each additional page.

2. On microfiche. The microfiche edition is revised semi-annually (March and October) and can be purchased at forty dollars ($40.00) per edition. Due to the volume of the Code, the complete copy can only be purchased in microfiche. The NCAC on microfiche is updated monthly by publication of a "List of Rules Affected," which sets out rules filed the previous month, the action taken, and the effective date of the change. This list is published in the North Carolina Register.

Requests for looseleaf pages of rules or the NCAC on microfiche should be directed to the Office of Administrative Hearings.

NOTE

The foregoing is a generalized statement of the procedures to be followed. For specific statutory language, it is suggested that Articles 2 and 5 of Chapter 150B of the General Statutes be examined carefully.

.0209 CONTROL MEASURES

(a) Except as provided in Paragraph (d), the specific control measures for each disease and condition shall be those specified by the American Public Health Association in its publication, Control of Communicable Disease in Man. Control of Communicable Disease in Man is hereby adopted by reference in accordance with G.S. 150B-14(c). Copies of this publication are available from the American Public Health Association, Department JE, 1015 18th Street, N.W., Washington, DC 20036. A copy is available for inspection in the Communicable Disease Control Branch, Cooper Memorial Health Building, 225 N. McDowell Street, Raleigh, North Carolina 27602.

(b) In interpreting and implementing the specific control measures adopted in (a), and in devising control measures for communicable diseases and conditions for which a specific control measure is not provided by this Rule, the following principles shall be used:

(1) control measures shall be those which can reasonably be expected to decrease the risk of transmission;
(2) for diseases or conditions transmitted by the airborne route, the control measures shall require physical isolation for the duration of infectivity;
(3) for diseases or conditions transmitted by the fecal-oral route, the control measures shall require exclusions from situations in which transmission can be reasonably expected to occur, such as work as a paid or voluntary food handler or attendance or work in a day care center for the duration of infectivity;

497 NORTH CAROLINA REGISTER
(4) for diseases or conditions transmitted by sexual or the blood-borne route, control measures shall require prohibition of donation of blood, tissue, organs, or semen, needle-sharing, and sexual contact in a manner likely to result in transmission for the duration of infectivity.

(c) Persons with congenital rubella syndrome, tuberculosis, and carriers of Salmonella typhi and hepatitis B who change residence to a different local health department jurisdiction shall notify the local health director in both jurisdictions.

(d) The following are the control measures for the Acquired Immune Deficiency Syndrome (AIDS) and Human Immunodeficiency Virus (HIV) infection:

(1) Infected persons shall:

(A) refrain from sexual intercourse unless condoms are used; exercise caution when using condoms due to possible condom failure;

(B) never share needles or syringes;

(C) not donate or sell blood, plasma, platelets, other blood products, semen, tissues, organs, or breast milk;

(D) have a skin test for tuberculosis;

(E) not breastfeed;

(F) notify future sex partners of the infection;

(G) if the time of initial infection is known, prepare, on a form provided by the division, a list of previous sex and needle partners who would have been exposed; if the date of initial infection is unknown, prepare, on a form provided by the division, a list of sex and needle partners for the previous year; the infected person shall place the list in an envelope, seal the envelope and give it to the attending physician;

(2) The attending physician shall:

(A) give the control measures in (d) (1) to infected patients, in accordance with 10 NCAC 7A .0210;

(B) obtain the list required by (d) (1) (G) from the patient; the physician shall sign the envelope and forward it to the Division of Health Services; the Division of Health Services shall retain the list until the division has undertaken to notify the partners; the patient may notify the partners prior to the division undertaking to do so;

(C) advise infected persons concerning proper clean-up of blood and other body fluids;

(D) advise infected persons concerning the risk of perinatal transmission.

(3) The attending physician of a child who is infected with HIV and who may pose a significant threat for transmission in the school or day care setting because of open, oozing wounds which cannot be adequately covered, incontinence of urine or feces, or behavioral abnormalities such as biting shall notify the local health director. The local health director shall consult with the attending physician, investigate the circumstances, and determine if such a risk exists. The local health director may consult with an interdisciplinary committee, which may include appropriate school personnel and medical and epidemiologic experts, to assist in the investigation and determination of risk. If a significant risk of transmission exists, the local health director shall notify the parents of the need for an alternate child care or educational setting and require that the school principal be notified accordingly. When an alternate educational setting is required, the local health director shall determine if school personnel directly involved with the child need to be notified of the HIV infection in order to prevent transmission. The local health director shall determine which school personnel shall be notified and shall ensure that these persons are instructed regarding the necessity for protecting confidentiality.

(4) When health care workers or other persons have had a significant nonsexual exposure to blood or body fluids, the following shall apply:

(A) When the source is known to be HIV-infected, the exposed person shall be notified of the source’s HIV infection, given control measures and offered testing for HIV infection as soon as possible after exposure and at reasonable intervals up to one year to determine whether transmission occurred or not. All persons so notified shall be instructed regarding the necessity for protecting confidentiality.

(B) When the source is known and is in a high prevalence group, but HIV-infection status is unknown, the exposure shall be discussed with the source and permission requested for testing for HIV infection. If permission is granted and the test is positive for
HIV infection, the exposed person shall be notified as provided in (4) (A). Control measures shall be given to the exposed person and testing shall be offered as provided in (4) (A).

(C) When the source is unknown or when the infection status of a known source has not been determined, the exposed person shall be given control measures and offered testing as in (4) (A).

(5) The attending physician shall notify the local health director when the physician, in good faith, has reasonable cause to suspect a patient infected with HIV is not following or cannot follow control measures and is thereby causing a significant risk of transmission.

(6) When the local health director is notified pursuant to Paragraph (5) of a person who is mentally ill or mentally retarded, the local health director shall confer with the attending mental health physician or appropriate mental health authority to develop an appropriate plan to prevent transmission.

(7) The Director of Health Services of the North Carolina Department of Corrections shall be notified by the attending physician of an HIV-infected person confined in a state prison. If the Director of Health Services determines that a confined HIV-infected person is not following or cannot follow prescribed control measures, thereby presenting a significant risk of HIV transmission, the director shall develop and implement jointly with the appropriate prison facility administrator a plan to prevent transmission.

(8) The local health director shall ensure that the health plan for local jails include education of jail staff and prisoners about HIV, how it is transmitted, and how to avoid acquiring or transmitting this infection.

(9) Health care workers, including emergency responders, shall follow blood and body fluid precautions with all patients.

(10) These control measures do not require restrictions in the workplace of persons with HIV infection except that health care workers with HIV infection who have secondary infections or open skin lesions which would place patients at risk shall not provide direct patient care.

(11) All equipment used to puncture human skin (in medical or other settings) must be disposed of in accordance with G.S. 90-113.4A after use or sterilized prior to reuse.

(12) Local health departments that provide testing for HIV infection shall offer anonymous testing with individual pre- and post-test counseling. Counseling shall include risk assessment, risk reduction guidelines, appropriate test result interpretation, and, when the person tested is determined to be infected with HIV, control measures.

(e) Notwithstanding the provisions of 10 NCAC 7A .0209 (d), when a person with HIV infection is enrolled in a study of the efficacy of alternative methods of notifying past sexual and needle partners, such notification shall be made in accordance with the study protocol if:

(1) the study protocol is approved by the State Health Director; and
