NORTH CAROLINA REGISTER

The North Carolina Register is published bi-monthly and contains information relating to agency, executive, legislative and judicial actions required by or affecting Chapter 150B of the General Statutes. All proposed, administrative rules and amendments filed under Chapter 150B must be published in the Register. The Register will typically comprise approximately fifty pages per issue of legal text.

State law requires that a copy of each issue be provided free of charge to each county in the state and to various state officials and institutions. The North Carolina Register is available by yearly subscription at a cost of one hundred and five dollars ($105.00) for 24 issues.

Requests for subscriptions to the North Carolina Register should be directed to the Office of Administrative Hearings, P.O. Drawer 11666, Raleigh, N.C. 27604, Attn: Subscriptions.

ADOPTION, AMENDMENT, AND REPEAL OF RULES

An agency intending to adopt, amend, or repeal a rule must first publish notice of the proposed action in the North Carolina Register. The notice must include the time and place of the public hearing; a statement of how public comments may be submitted to the agency either at the hearing or otherwise; the text of the proposed rule or amendment; a reference to the Statutory Authority for the action and the proposed effective date.

The Director of the Office of Administrative Hearings has authority to publish a summary, rather than the full text, of any amendment which is considered to be too lengthy. In such case, the full text of the rule containing the proposed amendment will be available for public inspection at the Rules Division of the Office of Administrative Hearings and at the office of the promulgating agency.

Unless a specific statute provides otherwise, at least 30 days must elapse following publication of the proposal in the North Carolina Register before the agency may conduct the required public hearing and take action on the proposed adoption, amendment or repeal.

When final action is taken, the promulgating agency must file any adopted or amended rule for approval by the Administrative Rules Review Commission. Upon approval of ARRC, the adopted or amended rule must be filed with the Office of Administrative Hearings. If it differs substantially from the proposed form published as part of the public notice, upon request by the agency, the adopted version will again be published in the North Carolina Register.

A rule, or amended rule cannot become effective earlier than the first day of the second calendar month after the adoption is filed with the Office of Administrative Hearings for publication in the NCAC.

Proposed action on rules may be withdrawn by the promulgating agency at any time before final action is taken by the agency.

TEMPORARY RULES

Under certain conditions of an emergency nature, some agencies may issue temporary rules. A temporary rule becomes effective when adopted and remains in effect for the period specified in the rule or 180 days, whichever is less. An agency adopting a temporary rule must begin normal rule-making procedures on the permanent rule at the same time the temporary rule is adopted.

NORTH CAROLINA ADMINISTRATIVE CODE

The North Carolina Administrative Code (NCAC) is a compilation and index of the administrative rules of 25 state agencies and 38 occupational licensing boards. The NCAC comprises approximately 15,000 letter size single spaced pages of material of which approximately 35% is changed annually. Compilation and publication of the NCAC is mandated by G.S. 150B-63(b).

The Code is divided into Titles and Chapters. Each state agency is assigned a separate title which is further broken down by chapters. Title 21 is designated for occupational licensing boards.

The NCAC is available in two formats.

1. Single pages may be obtained at a minimum cost of two dollars and 50 cents ($2.50) for 10 pages or less, plus fifteen cents ($0.15) per each additional page.

2. The full publication consists of 52 volumes totaling in excess of 15,000 pages. It is supplemented monthly with replacement pages. A one year subscription to the full publication including supplements can be purchased for seven hundred and fifty dollars ($750.00). Individual volumes may also be purchased with supplemet service. Renewal subscriptions for supplements to the initial publication available.

Requests for pages of rules or volumes of the NCAC should be directed to the Office of Administrative Hearings.

NOTE

The foregoing is a generalized statement of the procedures to be followed. For specific statutory language it is suggested that Articles 2 and 5 of Chapter 150B of the General Statutes be examined carefully.

**CHAPTER 7 - COASTAL MANAGEMENT**

**SUBCHAPTER 7H - STATE GUIDELINES FOR AREAS OF ENVIRONMENTAL CONCERN**

**SECTION .0200 - THE ESTUARINE SYSTEM**

**ALTERNATIVE A**

**.0208 USE STANDARDS**

(a) General Use Standards

(5) Outstanding Resource Waters are those estuarine and public trust waters classified as Outstanding Resource Waters by the North Carolina Administrative Code as Outstanding Resource Waters (ORW) upon finding that such waters are of exceptional state or national recreational or ecological significance. In those estuarine and public trust waters classified as ORW by the Environmental Management Commission, no permit required by the Coastal Area Management Act will be approved unless, after review of a CAMA permit application, the Division of Environmental Management determines that the proposed development will maintain the exceptional water quality and outstanding resource values of the ORW.

Statutory Authority G.S. 113A-107(a); 113A-107(b); 113A-113(b); 113A-124.

**.0209 ESTUARINE SHORELINES**

(c) Use Standards

(9) Where an estuarine shoreline is contiguous to estuarine or public trust waters classified as Outstanding Resource Waters (ORW), no permit required pursuant to the Coastal Area Management Act will be approved unless, after review of a CAMA permit application, the Division of Environmental Management determines that the proposed development will maintain the exceptional water quality and outstanding resource values of the ORW.

Statutory Authority G.S. 113A-107(b); 113A-108; 113A-113(b); 113A-124.

**ALTERNATIVE B**

**.0209 ESTUARINE SHORELINES**

(b) Description. Estuarine shorelines are those non-ocean shorelines which are especially vulnerable to erosion, flooding, or other adverse effects of wind and water and are intimately connected to the estuary. This area extends from the mean high water level or normal water level along the estuaries, sounds, bays, and brackish waters as set forth in an agreement adopted by the Wildlife Resources Commission and the Department of Natural Resources and Community Development [described in Regulation .0206(a) of this Section] for a distance of 75 feet landward. For those estuarine shorelines immediately contiguous to waters classified as Outstanding Resource Waters by the Environmental Management Commission, the estuarine shoreline AFC shall extend to 575 feet landward from the mean high water level or normal water level. However, an alternative boundary may be established by the Coastal Resources Commission following the legally required public hearing within the affected counties containing waters classified as Outstanding Resource Waters.

(e) Use Standards
(9) Within the AFC for estuarine shorelines contiguous to waters classified as Outstanding Resource Waters by the EMCR, no CAMA permit will be approved unless the proposed development has a built upon area of 25 percent or less, and:
  (A) has no stormwater collection system;
  (B) is at least 30 feet from water classified as ORW; and
  (C) it is demonstrated that no areas within the project site are of such high density that stormwater threatens the water quality of the ORW.

Statutory Authority G.S. 113A-107(b); 113A-108; 113A-113(b); 113A-124.

ALTERNATIVE C

However, an alternative boundary may be established by the Coastal Resources Commission following the legally required public hearing within the affected counties containing waters classified as Outstanding Resource Waters.

(e) Use Standards

(9) Where an estuarine shoreline is contiguous to estuarine or public trust waters classified by the N.C. Environmental Management Commission as Outstanding Resource Waters (ORW), no permit required pursuant to the Coastal Area Management Act will be approved unless, after review of a CAMA permit application, the Division of Environmental Management determines that the proposed development will maintain the exceptional water quality and outstanding resource values of the ORW.

ALTERNATIVE D

SECTION .0500 - NATURAL AND CULTURAL RESOURCE AREAS

.0501 GENERAL

The fourth and final group of AECs is gathered under the heading of fragile coastal natural and cultural resource areas and is defined as areas containing environmental, natural or cultural resources of more than local significance in which uncontrolled or incompatible development could result in major or irreversible damage to natural systems or cultural resources, scientific, educational, or associative values, or aesthetic or recreational qualities.

Statutory Authority G.S. 113A-107(a); 113A-107(b); 113A-113(b)(4e) to (b)(4g); 113A-124.

.0502 SIGNIFICANCE

(a) Fragile coastal natural resource areas are generally recognized to be of educational, scientific, economic, biological, or cultural value because of the natural features of the particular site. These features in the coastal area serve to distinguish the area designated from the vast majority of coastal landscape or waters and therein establish its value. Such areas may be key components of systems unique to the coast which act to maintain the integrity of that system.

Statutory Authority G.S. 113A-107(a),(b); 113A-113(b)(4e) to (b)(4g); 113A-124.

.0504 AECS WITHIN CATEGORY

The description, significance, and management objectives for each AEC (coastal complex natural areas, coastal areas that sustain remnant species, unique coastal geologic formations, significant coastal architectural resources, and significant coastal historic architectural resources) within the grouping of fragile coastal natural and cultural resource areas follows in Regulations .0505, .0506, .0507, .0509, and .0510, and .0511 of this Section.

Statutory Authority G.S. 113A-107(a),(b); 113A-113(b)(4e) to (b)(4h); 113A-124.

.0511 OUTSTANDING RESOURCE WATERS IMPACT AREAS
(a) Description. In accordance with Title 15, Subchapter 2B .0216 of the North Carolina Administrative Code, the Environmental Management Commission (EMC) may classify "...certain unique and special surface waters of the state as outstanding resource waters (ORW) upon finding that such waters are of exceptional state or national recreational or ecological significance..." It is considered likely that the EMC will, pursuant to petitions for rulemaking and upon a finding that such waters have exceptional water quality and outstanding resource values, designate as ORWs certain estuarine waters in coastal North Carolina. Since the type and density of development in ORW waters and land areas adjacent to waters designated ORW can have an adverse impact on the integrity of water quality and resource values in the ORW, coastal waters classified ORW by the EMC and land areas contiguous to a designated ORW are defined as ORW Impact Areas of Environmental Concern. The landward extent of an ORW Impact AEC will be at least 75 feet landward of the mean high water level or normal water level. The maximum landward extent will be determined on a case-by-case basis based on the potential impact on the ORW from nonpoint source water pollution as determined by the CRC.

(b) Significance. Development on lands adjacent to or bordering designated ORWs has the potential to degrade the water quality and resource value of the waters classified ORW through nonpoint source water pollution. Regulating uses of both these waters and the density and type of development on adjacent lands is necessary to ensure the integrity and resource value of these waters.

(c) Management Objective. To ensure that development in designated coastal ORWs and adjacent land areas is compatible with the need to protect these waters from degradation of water quality and diminution of their resource value.

Statutory Authority G.S. 113A-107(a)(b); 113A-124.

.0512 NOMINATION AND DESIGNATION PROCEDURES

Environmental Management Commission (EMC) acceptance of a petition for a site specific water body as a candidate for Outstanding Resource Waters (ORW) classification shall be the exclusive means of nomination of ORW Impact AECs. At the next meeting of the CRC after EMC acceptance of an ORW nomination, the CRC will direct and coordinate a staff analysis and preparation of specific use standards and boundaries for ORW Impact AECs. To the extent allowed by law, staff review and requisite public hearings shall be fully coordinated with the EMC, Marine Fisheries Commission and any other appropriate regulatory bodies.

Statutory Authority G.S. 113A-107(a)(b); 113A-113(b)(4); 113A-124.

.0513 GENERAL USE STANDARDS

The proposed design, location, and use of development in designated coastal ORW Impact AECs shall maintain the exceptional water quality and outstanding resource values of the waters upon which the ORW classification is based, including:

1. Preservation of the value of the stated individual biological and/or economic resources identified by the EMC;
2. Not adversely affecting the outstanding scientific associative or educational resources identified by the EMC; and/or
3. Consistency with the recreational values of the resource as defined by the EMC.

Statutory Authority G.S. 113A-107(a)(b); 113A-113(b); 113A-124.

.0514 SPECIFIC USE STANDARDS

Site-specific land use and water use standards for an ORW Impact AEC will be adopted on a case-by-case basis after the classification of a coastal water body as an outstanding resource water. These use standards will be developed in conjunction with management plans prepared by the Division of Environmental Management and approved by the EMC for each designated coastal ORW.

Statutory Authority G.S. 113A-107(a)(b); 113A-113(b); 113A-124.

SECTION .0600 - DEVELOPMENT STANDARDS APPLICABLE TO ALL AECs

.0602 POLLUTION OF WATERS

(a) No development shall be allowed in any AEC which would have a substantial likelihood of causing pollution of the waters of the state in which shellfishing is an existing use to the extent that such waters would be officially closed to the taking of shellfish. This rule shall also apply to development adjacent to or within closed shellfish waters when a use attainability study of those waters documents the presence of a significant shellfish resource in an area that could be expected to be opened for shellfishing given reasonable efforts to control the existing sources of pollution.

NORTH CAROLINA REGISTER 1032
(b) In waters and land areas adjacent to waters that have been nominated for ORW designation and have been accepted by the EMC as candidates for intensive study and public hearing, permits for development will not be approved unless the proposed development maintains the exceptional water quality and outstanding resource values of the nominated ORW.

Statutory Authority G.S. 113A-107(a),(b); 113A-124.

SUBCHAPTER 7J - PROCEDURES FOR HANDLING MAJOR DEVELOPMENT PERMITS: VARIANCE REQUESTS; APPEALS FROM MINOR DEVELOPMENT PERMIT DECISIONS: AND DECLARATORY RULINGS

SECTION .0203 - PREPARATION OF WORK PLATS

(a) General. Project plans or work plats must include a top or plan view, a cross-sectional view, and a location map. Work plats must be submitted on 8 1/2" by 11" white paper, must have a one-fourth inch margin on all four sides and must contain a title block and page number. All plats must have the standard north arrow. When two drawings are shown on the same sheet, they should be drawn so that their middles are parallel. North should be at the top of the plat. The drawing must be in black pencil or black ink. The prints must be neat and sufficiently clear to permit photographic reproduction. Originals are preferred as copies are often found to be unacceptable. The applicant should use as few sheets as necessary to show clearly what is proposed. Work plats must be accurately drawn to scale. A scale of 1" = 200' or less is normally required in order that project detail can be easily understood.

(b) Details of Work Plats

(1) Topview or Planview Plats. Such drawings must show existing and proposed features such as dune systems, shorelines, creeks, marshlands, docks, piers, bulkheads, excavated areas, fill areas, type and location of sewage treatment facilities and effluent outlets. Existing water depths must be indicated using mean low water as base or zero. These can be shown either as contours or spot elevation. Care should be used in indicating which features are existing and which are proposed. Property boundaries, as they appear on the deed, and the names of adjacent property owners must be shown on the detailed plat. The work plat must clearly show the any areas to be excavated and exact locality for disposal of the excavated material. Both these areas must be clearly indicated by hachures or other means on all copies and suitably designated by words. When fill material is to be placed behind a bulkhead or dike, the plan must be sufficiently detailed to show the exact location of such bulkheads or dikes, and the adequacy of the bulkhead or dike to confine the material. Ebb and flood tide directions, or upstream-downstream flow directions of river or streams as appropriate must be indicated on the plat. Also, where pertinent, fresh water outflows, such as natural drainage routes, springs, ponds, etc. must be included. Indicate approximate mean low and mean high water lines and the presence of marsh in the area of proposed work. In areas where the difference in daily low and high tides is less than six inches, only an average water level must be indicated.

(2) Cross-Section Drawing. A cross-sectional diagram showing depth and elevation of proposed work relative to existing ground level -- mean low and mean high water line must be included in the plan. The mean low water must be the reference for water depths and land elevations (i.e., mean low water should be depicted as “Elevation 0.0 M.L.W.”). First floor elevations relative to mean sea level must be shown for any proposed buildings.

(3) Location Map. A map of small scale showing the location of the proposed work is also required. The location map may be on a separate sheet or may be shown on a site map on a corner of the sheet showing the details of the project. The inset is preferred. A section may be taken from a navigational chart or a North Carolina county road map with an arrow drawn to the project location. The location map must provide adequate information to locate the project site, such as secondary road names to enable investigatory personnel to locate the project site.

(4) Title of Drawing. Each drawing must have a simple title block to identify the project or work, and shall include name of applicant, and date the plat was prepared, and scale of the plat. The date of any revisions must be clearly noted. The applicant must also include the name of
the person who drew the plat and the scale of the plat.

Statutory Authority G.S. 113A-119; 113A-124.

.0204 PROCESSING THE APPLICATION
(b) Application processing will begin when an application is accepted as complete. Before an application will be accepted as complete, the following requirements must be met:
(5) notice to adjacent riparian landowners must be given as follows:
(A) Certified return mail receipts (or copies thereof) indicating that adjacent riparian landowners (as identified in the permit application) have been sent a copy of the application for notice of the proposed development must be included in a CAMA major development and/or dredge and fill permit application. Said landowners have 30 days from the date of notification in which to comment. Such comments will be considered by the department in reaching a final decision on the application.

Statutory Authority G.S. 113-229; 113A-119; 113A-122(c); 113A-124.

.0207 AGENCY REVIEW/COMMENTS: MAJOR DEVELOPMENT/DREDGE AND FILL
(f) The Division of Coastal Management is one of the state agencies that comments on dredge and fill project applications. In its role as a commenting agency the division will use the following criteria in 15 NCAC 7HI and local land use plans to assess whether to recommend permit issuance, permit issuance with conditions, or permit denial. Elements of a project which are not addressed in the following criteria may also be considered in assessing a project and making recommendations. Other commenting state agencies will make assessments, in accordance with Paragraph (c) of this Rule. Division criteria are as follows:
(1) Channels shall be aligned or located so as to avoid highly productive shellfish beds or beds of submerged vegetation.
(2) Projects should be designed so as not to create stagnant water bodies.
(3) Marshes and boat basins must be developed on adjacent high ground so as not to disturb valuable wetland areas.
(4) Excavation of canals in high ground should employ the use of a temporary earth plug or other methods to minimize infiltration of adjacent water bodies.
(5) Project construction should be accomplished during periods of least significant biological activity.
(6) The project should be located so as not to adversely impact upon a primary nursery area.
(7) Channels and boat basins generally must not involve any excavation in highly productive salt cordgrass (Spartina alterniflora) marshes.
(8) Material must not be excavated from highly productive inland waters, bottomlands, and marshlands for the sole purpose of obtaining fill.
(9) Bulkhead alignment for the purpose of shoreline stabilization should approximate the mean high water (MHW) line or, in the absence of tidal influences, the normal water line (NWL).
(10) Bulkheads should be constructed inland of marshland and marshgrass fringes.
(11) Bulkhead fill material should be obtained from an upland source. If the bulkhead is a part of a project involving excavation, the material so obtained may be used as a backfill.
(12) Dredge canals located through any marshland should not exceed six feet wide by four feet deep unless it can be shown by hydraulic engineering that larger dimensions are required.
(13) Spoil derived from the construction or maintenance of drainage canals through a regularly or irregularly flooded marsh should result in spoil being placed on high ground. Projects of this type will be considered on a case-by-case basis.
(14) All excavated materials should be confined on high ground landward of regularly or irregularly flooded marshland. In addition, all dredge spoil must be confined on high ground behind adequate dike or other retaining structures to prevent the materials from entering any marsh or adjacent waters.
(15) In a hydraulic dredging operation the terminal end of the dredge pipeline should be positioned at or greater than 50 feet from any part of the dike and a maximum distance from spillway to allow adequate settlement of suspended solids.
(16) Effluent from diked areas receiving disposed from hydraulic dredging operations should be contained by pipe, trough, or similar device to a point at or below the mean low water line to prevent gulley erosion and resultant unnecessary siltation.
When project design is in conflict with these criteria and there is no feasible way that the project can be made to conform to the criteria, in making its decision the department will take into account demonstrated public benefit which will result from the project as offsetting the adverse effects of the project. In such cases the applicant must show that the project could not be undertaken on another site so as to achieve similar public benefit without conflicting with the criteria that the project results in public benefit and that the public benefit clearly outweighs the long range adverse effects of the project.

Statutory Authority G.S. 113-229; 113A-124(a)(1); 113A-124(c)(5).

SECTION .0300 - HEARING PROCEDURE

.0306 ACTION PENDING FINAL DISPOSITION

Pending the final decision in a contested case, no action may be taken that would be unlawful in the absence of an issued CAMA and/or dredge and fill permit.

Statutory Authority G.S. 113A-121.1(d) and (e).

.0312 SETTLEMENT

(b) The commission hereby delegates to the director the authority to enter into settlements of appeals concerning CAMA permits and dredge and fill permits prior to the time the administrative law judge opens the hearing on the permit appeal. The director may enter into a settlement without the commission's approval. Such a settlement shall not be considered a final commission decision, but shall be subject to appeal pursuant to G.S. 113A-121.1 and G.S. 113-229(k). The department shall provide public notice of any settlement entered into prior to the opening of the administrative hearing in the same manner as it provides public notice of permit decisions.

In addition, if any person continues to violate or further violates any such provision, regulation, rule or order after written notice from the designated local official, the court may determine that each day during which the violation continues or is repeated constitutes a separate violation subject to the foregoing penalties.
