The North Carolina Administrative Code (NCAC) has four major subdivisions of rules. Two of these, titles and chapters, are mandatory. The major subdivision of the NCAC is the title. Each major department in the North Carolina executive branch of government has been assigned a title number. Titles are further broken down into chapters which shall be numerical in order. The other two, subchapters and sections are optional subdivisions to be used by agencies when appropriate.

EXECUTIVE ORDER

EXECUTIVE ORDER NO. 33
TO ESTABLISH THE ATHLETIC INJURY MANAGEMENT RULE EFFECTIVE DATE

WHEREAS, in 1979, the General Assembly enacted Chapter 986, An Act to Provide Sports Medicine and Emergency Paramedical Services, and Emergency Life Saving Skills to Students in the Public Schools; and

WHEREAS, that Act directed the State Board of Education to establish minimum educational standards necessary to enable individuals serving as sports medicine and emergency paramedical staff to provide those services; and

WHEREAS, by Rule currently codified as 16 NCAC 6E .0203, the State Board adopted a rule that provided for “teacher athletic trainers” to provide these services for students who participate in high school interscholastic athletic programs; and

WHEREAS, by Session Law 1997-387, the General Assembly enacted the “Athletic Trainers Licensing Act,” one effect of which was that the State Board of Education needed to review and revise the qualifications and terminology for those persons who provide athletic injury management services to student-athletes but who are not licensed athletic trainers; and

WHEREAS, on December 31, 2001, the State Board adopted a temporary amendment to 16 NCAC 6E .0203; on July 11, 2002, the Board adopted amendments following a public hearing; and on August 15, 2002, the Rules Review Commission approved the permanent rule; and

WHEREAS, the standard effective date of the permanent rule under the Administrative Procedure Act. N.C. Gen. Stat. § 150B-1 et seq., would be March 1, 2003, at the earliest; and

WHEREAS, for high schools to obtain and provide necessary athletic injury management services to student-athletes in a timely and cost-effective manner it is necessary that the permanent rule become effective for the Fall 2002 sports season; and

WHEREAS, the Administrative Procedure Act authorizes the Governor, by Executive Order, to make effective a permanent rule upon finding that it is necessary to protect public health, safety, and welfare.

NOW, THEREFORE, by the power vested in me as Governor by the Constitution and laws of the State of North Carolina, IT IS ORDERED:

Section 1. Findings.

It is necessary that the permanent rule regarding athletic injury management services for student-athletes, 16 NCAC 6E .0203, become effective no later than September 30, 2002, in order to assure that high schools can provide these services in a timely and cost-effective manner within the funds available to them, for the protection of the public health, safety, or welfare.

Section 2. Effective Date of the Rule.

The permanent rule regarding athletic injury management services for student-athletes, 16 NCAC 6E .0203, is hereby made effective September 30, 2002, pursuant to Executive Order Exception authority contained in the Administrative Procedure Act, N.C. Gen. Stat. § 150B-21.3(c).

Section 3. Effective Date.

This Executive Order is effective immediately and shall remain in effect until rescinded.

ATTEST:

______________________________
Elaine F. Marshall
Secretary of State
Notice of Rule-making Proceedings is hereby given by the Social Services Commission in accordance with G.S. 150B-21.2. The agency shall subsequently publish in the Register the text of the rule(s) it proposes to adopt as a result of this notice of rule-making proceedings and any comments received on this notice.

Citation to Existing Rule Affected by this Rule-making: 10 NCAC 29B. 0103; 30.0217 - Other rules may be proposed in the course of the rule-making process.

Authority for the Rule-making: G.S. 143B-153; P.L. 107-171

Statement of the Subject Matter: The Social Services Commission proposes to adopt temporary rules that will align Food Stamp regulations with the TANF or Medicaid Programs. Chapter 30 consists of Rules for the Food Assistance Program commonly known as the Food Stamp Program. Subchapter 29B consists of Rules for the Low Income Energy Assistance Program (LIEAP).

Reason for Proposed Action: The 2002 Farm Bill that was enacted May 13, 2002, allows State agencies to implement options to exclude certain types of Income and Resources. The Social Services Commission will propose temporary rules which will allow the State to exclude certain types of income and resources, thereby aligning the State’s TANF cash assistance or Medicaid programs. The temporary adoption and amendment of these rules will encourage and promote participation in the Food Stamp Program for families for whom certain types of income and the value of certain types of resources would normally result in ineligibility under current policy. Further, the proposed temporary rules will allow low income families access to Food Stamp benefits which will assist families in meeting their nutritional needs.

Comment Procedures: Comments from the public shall be directed to Kris Horton, 325 North Salisbury St., 2401 Mail Service Center, Raleigh, NC 27699-2401, phone (919) 733-3055, fax (919) 733-9386, and email Kris.Horton@ncmail.net.

CHAPTER 30 – FOOD ASSISTANCE

Notice of Rule-making Proceedings is hereby given by Social Services Commission in accordance with G.S. 150B-21.2. The

agency shall subsequently publish in the Register the text of the rule(s) it proposes to adopt as a result of this notice of rule-making proceedings and any comments received on this notice.

Citation to Existing Rule Affected by this Rule-making: 10 NCAC 30. Other rules may be proposed in the course of the rule-making process.

Authority for the Rule-making: G.S. 143B-153; P.L. 107-171

Statement of the Subject Matter: The State agency has opted to simplify the Standard Utility Allowance by mandating the use of the SUA/BUA rather than actual utility costs for all households. Chapter 30 consists of Rules for the Food Assistance Program commonly known as the Food Stamp Program.

Reason for Proposed Action: A very small percentage of food stamp households receive the deduction for actual utility expenses. The average deduction is less than $100.00, which is much less than the current standard deduction. It would be in the best interest of all food stamp households to receive the SUA/BUA deduction rather than actual utility cost. The rule as outlined in Public Law 107-171 of the Farm Bill will enable households to receive a higher deduction in determining their allotment for food stamp benefits. The 2002 Farm Bill enacted May 13, 2002, allows State agencies the authority to disregard reported changes in deductions during certification periods except for changes associated with a new residence or earned income until the next recertification. This rule will reduce reporting requirements for those households not included in the Semi-Annual Reporting Option. This will benefit families as well as simplify the administration of the Food Stamp Program. The 2002 Farm Bill enacted May 13, 2002, allows State agencies the authority to extend semi-annual reporting to all households not exempt from periodic reporting. Households required to report changes less often than every three months would only have to report when income exceeds the gross monthly income limit for the household size. This change in policy will reduce household reporting requirements by extending the semi-annual reporting option to most food stamp households with income. Current household reporting requirements are very rigid. This option will benefit households by easing the burden of the current reporting requirements. This change will greatly benefit the citizens of North Carolina who currently are required to report even the most minute changes in situation. The new reporting requirements will also help those individuals who often adjust work schedules, school schedules, etc. to comply with the current food stamp reporting requirements. The new change-reporting requirements will also benefit North Carolina’s D.S.S. agencies as they face the challenge of increasing caseloads and staff reductions.
The 2002 Farm Bill enacted May 13, 2002, allows State agencies the authority to give up to five months of transitional food stamp benefits to households when they lose TANF cash assistance. Benefits issued under the transitional benefits program would be equal to the amount received by the household prior to the termination of TANF, adjusted to account for the loss of the TANF income. A household would not be eligible for the extension if it was losing TANF cash assistance because of a sanction, disqualification from the Food Stamp Program, or being in a category of households designated as ineligible for transitional benefits.

Due to our ever-changing economy, families need a minimum of five months of continued benefits to allow time to adapt to the many challenges that face the working poor. Families that leave TANF to begin working often need continued benefits to assist in their transition because of additional financial needs during the early months of employment, i.e. uniforms, tools transportation costs, etc. Families should be allowed time to adjust to the loss of cash assistance while continuing to have the much-needed assurance of food security.

Comment Procedures: Written comments should be sent to Kris Horton, 325 N. Salisbury Street, 2401 Mail Service Center, Raleigh, NC 27699-2401. Phone: 919-733-3055, Fax: 919-733-9386, email: kris.Horton@ncmail.net.

CHAPTER 11 - FINANCIAL EVALUATION DIVISION
SUBCHAPTER 11F - ACTUARIAL

SECTION .0200 - HEALTH INSURANCE MINIMUM RESERVE STANDARDS

11 NCAC 11F .0201 DEFINITIONS
As used in this section and in the Statement of Actuarial Opinion required by the NAIC Annual Statement Instructions pursuant to G.S. 58-2-165:

(1) “Annual claim cost” means the net annual cost per unit of benefit before the addition of expenses, including claim settlement expenses, and a margin for profit or contingencies. For example, the annual claim cost for a one hundred dollar ($100.00) monthly disability benefit, for a maximum disability benefit period of one year, with an elimination period of one week, with respect to a male at age 35, in a certain occupation might be twelve dollars ($12.00), while the gross premium for this benefit might be eighteen dollars ($18.00).

(2) The additional six dollars ($6.00) would cover expenses and profit or contingencies.

(3) "Claims accrued" means that portion of claims incurred on or before the valuation date that result in liability of the insurer for the payment of benefits for medical services that have been rendered on or before the valuation date, and for the payment of benefits for days of hospitalization and days of disability that have occurred on or before the valuation date, that the insurer has not paid as of the valuation date, but for which it is liable, and will have to pay after the valuation date. This liability is sometimes referred to as a liability for "accrued" benefits. A claim reserve, which represents an estimate of this accrued claim liability, must be established.

(4) "Claims reported" means when an insurer has been informed that a claim has been incurred, if the date reported is on or before the valuation date, the claim is considered as a reported claim for annual statement purposes.

(5) "Claims unaccrued" means that portion of claims incurred on or before the valuation date that result in liability of the insurer for the payment of benefits for medical services expected to be rendered after the valuation date, and for benefits expected to be payable for days of hospitalization and days of disability occurring after the valuation date. This liability is sometimes referred to as a liability for "unaccrued" benefits. A claim reserve, which represents an estimate of the unaccrued claim payments expected to be made (that may or may not be discounted with interest), must be established.

(6) "Claims unreported" means when an insurer has not been informed, on or before the valuation date, concerning a claim that has been incurred on or before the valuation date, the claim is considered as an unreported claim for annual statement purposes.

(7) "Date of disablement" means the earliest date the insured is considered as being disabled under the definition of disability in the contract, based on a doctor's evaluation or other evidence. Normally this date will coincide with the start of any elimination period.

(8) "Elimination period" means a specified number of days, weeks, or months starting at the beginning of each period of loss, during which no benefits are payable.
"Gross premium" means the amount of premium charged by the insurer. It includes the net premium (based on claim-cost) for the risk, together with any loading for expenses, profit or contingencies.

"Group insurance" means blanket insurance and franchise insurance and any other forms of group insurance.

"Level premium" means a premium calculated to remain unchanged throughout either the lifetime of the policy, or for some shorter projected period of years. The premium need not be guaranteed; in which case, although it is calculated to remain level, it may be changed if any of the assumptions on which it was based are revised at a later time. Generally, the annual claim costs are expected to increase each year and the insurer, instead of charging premiums that correspondingly increase each year, charges a premium calculated to remain level for a period of years or for the lifetime of the contract. In this case the benefit portion of the premium is more than needed to provide for the cost of benefits during the earlier years of the policy and less than the actual cost in the later years. The building of a prospective contract reserve is a natural result of level premiums.

"Long-term care insurance" has the same meaning as in G.S. 58-55-20(4); and also means a policy or certificate that provides for payment of benefits based upon cognitive impairment or the loss of functional capacity.

"Modal premium" means the premium paid on a contract based on a premium term that could be annual, semi-annual, quarterly, monthly, or weekly. Thus if the annual premium is one hundred dollars ($100.00) and if, instead, monthly premiums of nine dollars ($9.00) are paid then the modal premium is nine dollars ($9.00).

"Negative reserve" means a terminal reserve that has a value of less than zero resulting from benefits that decrease with advancing age or duration.

"Preliminary term reserve method" means the method of valuation under which the valuation net premium for each year falling within the preliminary term period is exactly sufficient to cover the expected incurred claims of that year, so that the terminal reserves will be zero at the end of the year. As of the end of the preliminary term period, a new constant valuation net premium (or stream of changing valuation premiums) becomes applicable such that the present value of all such premiums is equal to the present value of all claims expected to be incurred following the end of the preliminary term period.

"Present value of amounts not yet due on claims" means the reserve for claims unaccrued, which may be discounted at interest.

"Qualified Actuary" means an individual who:

(a) is a member in good standing of the American Academy of Actuaries; and

(b) is qualified to sign statements of actuarial opinion for life and health insurance company annual statements in accordance with the American Academy of Actuaries qualification standards for actuaries signing such statements; and

(c) is familiar with the valuation requirements applicable to life and health insurance companies; and

(d) has not been found by the Commissioner (or if so found has subsequently been reinstated as a qualified actuary), following appropriate notice and hearing, to have:

(i) violated any provision of, or any obligation imposed by, the insurance law or other law in the course of his or her dealings as a qualified actuary; or

(ii) been found guilty of fraudulent or dishonest practices; or

(iii) demonstrated his or her incompetency, lack of cooperation, or untrustworthiness to act as a qualified actuary; or

(iv) submitted to the Commissioner during the past five years, pursuant to this rule, an actuarial opinion or memorandum that the Commissioner rejected because it did not meet the provisions of this rule including standards set by the Actuarial Standards Board; or

(v) resigned or been removed as an actuary within the past five years as a result of acts or omissions indicated in any adverse report on examination or as a result of failure to adhere to generally acceptable actuarial standards; and

(e) has not failed to notify the Commissioner of any action taken by any commissioner of any other state similar to that under Sub-item Subparagraph (16)(d) of this Rule.
"Rating block" means a grouping of contracts determined by the valuation actuary based on common characteristics filed with the Commissioner, such as a policy form or forms having similar designs.

"Reserve" means all items of benefit liability, whether in the nature of incurred claim liability or in the nature of contract liability relating to future periods of coverage, and whether the liability is accrued or unaccrued. An insurer under its contracts promises benefits that result in:

(a) Claims that have been incurred, that is, for which the insurer has become obligated to make payment, on or before the valuation date. On these claims, payments expected to be made after the valuation date for accrued and unaccrued benefits are liabilities of the insurer that should be provided for by establishing claim reserves; or

(b) Claims that are expected to be incurred after the valuation date. Any present liability of the insurer for these future claims should be provided for by the establishment of contract reserves and unearned premium reserves.

"Terminal reserve" means the reserve at the end of a contract year, and is defined as the present value of benefits expected to be incurred after that contract year minus the present value of future valuation net premiums.

"Unearned premium reserve" means the value of that portion of the premium paid or due to the insurer that is applicable to the period of coverage extending beyond the valuation date. Thus if an annual premium of one hundred twenty dollars ($120.00) was paid on November 1, twenty dollars ($20.00) would be earned as of December 31 and the remaining one hundred dollars ($100.00) would be unearned. The unearned premium reserve could be on a gross basis as in this example, or on a valuation net premium basis.

"Valuation net modal premium" means the modal fraction of the valuation net annual premium that corresponds to the gross modal premium in effect on any contract to which contract reserves apply. Thus if the mode of payment in effect is quarterly, the valuation net modal premium is the quarterly equivalent of the valuation net annual premium.

11 NCAC 11F .0205 CONTRACT RESERVES

(a) General:

(1) Contract reserves are required, unless otherwise specified in 11 NCAC 11F.0205(a)(2) for:

(A) All individual and group contracts with which level premiums are used; or

(B) All individual and group contracts with respect to which, due to the gross premium pricing structure at issue, the value of the future benefits at any time exceeds the value of any appropriate future valuation net premiums at that time. This evaluation may be applied on a rating block basis if the total premiums for the block were developed to support the total risk assumed and expected expenses for the block each year, and a qualified actuary certifies the premium development. The actuary should state in the certification that premiums for the rating block were developed such that each year's premium was intended to cover that year's costs without any prefunding. If the premium is also intended to recover costs for any prior years, the actuary should also disclose the reasons for and magnitude of such recovery. The values specified in 11 NCAC 11F.0205(1)(B) 11 NCAC 11F .0205(a)(1)(B) shall be determined on the basis specified in 11 NCAC 11F .0205(b).

(2) Contracts not requiring a contract reserve are:

(A) Contracts that cannot be continued after one year from issue; or

(B) Contracts already in force on the effective date of these standards for which no contract reserve was required under the immediately preceding standards.

(3) The contract reserve is in addition to claim reserves and premium reserves.

(4) The methods and procedures for contract reserves shall be consistent with those for claim reserves for any contract, or else appropriate adjustment must be made when necessary to assure provision for the aggregate liability. The definition of the date of incurring must be the same in both determinations.

(b) Minimum Standards for Contract Reserves:

(1) Basis:

(A) Minimum standards with respect to morbidity are those set forth in 11 NCAC 11F .0207. Valuation net premiums used under each contract must have a structure consistent with the gross premium structure at issue of the contract as this relates to advancing age of insured, contract
duration and period for which gross premiums have been calculated. Contracts for which tabular morbidity standards are not specified in 11 NCAC 11F .0207 shall be valued using tables established for reserve purposes by a qualified actuary and acceptable to the Commissioner.

(B) The maximum interest rate is specified in 11 NCAC 11F .0207.

(C) Termination rates used in the computation of reserves shall be on the basis of a mortality table as specified in 11 NCAC 11F .0207 except as noted in Subparts Subparagraphs (b)(1)(C)(i) and (ii) of this Rule. Under contracts for which premium rates are not guaranteed, and where the effects of insurer underwriting are specifically used by contract duration in the valuation morbidity standard, or for return of premium or other deferred cash benefits, total termination rates may be used at ages and durations where these exceed specified mortality table rates, but not in excess of the lesser of:

(i) Eighty percent of the total termination rate used in the calculation of the gross premiums, or
(ii) Eight percent.

(i) Under contracts for which premium rates are not guaranteed, and where the effects of insurer underwriting are specifically used by contract duration in the valuation morbidity standard, or for return of premium or other deferred cash benefits, total termination rates may be used at ages and durations where these exceed specified mortality table rates, but not in excess of the lesser of:

(I) 80 percent of the total termination rate used in the calculation of the gross premiums, or
(II) 8 percent.

(ii) For long-term care individual policies or group certificates issued after April 1, 2003, the contract reserve may be established on a basis of separate mortality and other terminations.

Where a morbidity standard specified in 11 NCAC 11F .0207 is on an aggregate basis, such morbidity standard may be adjusted to reflect the effect of insurer underwriting by contract duration. The adjustments must be appropriate to the underwriting and be acceptable to the Commissioner.

(D) Reserve Method:

(i) For insurance except long-term care and return of premium or other deferred cash benefits, the minimum reserve is the reserve calculated on the two-year full preliminary term method; that is, under which the terminal reserve is zero at the first and also the second contract anniversary.

(ii) For long-term care insurance, the minimum reserve is the reserve calculated on the one-year full preliminary term method.

(iii) For return of premium or other deferred cash benefits, the minimum reserve is the reserve calculated as follows:

(I) On the one-year preliminary term method if such benefits are provided at any time before the 20th anniversary;

(II) On the two-year preliminary term method if such...
benefits are only provided on or after the 20th anniversary.

(iv) The preliminary term method may be applied only in relation to the date of issue of a contract. Reserve adjustments introduced later, as a result of rate increases, revisions in assumptions (e.g., projected inflation rates) or for other reasons, are to be applied immediately as of the effective date of adoption of the adjusted basis.

(E) Negative reserves on any benefit may be offset against positive reserves for other benefits in the same contract, but the total contract reserve with respect to all benefits combined may not be less than zero.

(F) For long-term care insurance with nonforfeiture benefits, the contract reserve on a policy basis shall not be less than the net single premium for the nonforfeiture benefits at the appropriate policy duration, where the net single premium is computed according to the standards specified in this Rule.

(c) Provided the contract reserve on all contracts to which an alternative method or basis is applied is not less in the aggregate than the amount determined according to the applicable standards specified in this rule, an insurer may use any reasonable assumptions as to interest rates, termination or mortality rates, and rates of morbidity or other contingency. Also, subject to the preceding condition, the insurer may employ methods other than the methods stated in this rule in determining a sound value of its liabilities under such contracts, including, but not limited to the following:

1. the net level premium method;
2. the one-year full preliminary term method;
3. prospective valuation on the basis of actual gross premiums with reasonable allowance for future expenses;
4. the use of approximations such as those involving age groupings, groupings of several years of issue, average amounts of indemnity, grouping of similar contract forms;
5. the computation of the reserve for one contract benefit as a percentage of, or by other relation to, the aggregated contract reserves exclusive of the benefit or benefits so valued; and
6. the use of a composite annual claim cost for all or any combination of the benefits included in the contracts valued.

(d) Annually, a review shall be made of the insurer’s prospective contract liabilities on contracts valued by tabular reserves, to determine the continuing adequacy and reasonableness of the tabular reserves giving consideration to future gross premiums. The insurer shall make appropriate increments to such tabular reserves if such tests indicated that the basis of such reserves is no longer adequate; subject, however, to the minimum standards of 11 NCAC 11F .0205(b).

If an insurer has a contract or a group of related similar contracts, for which future gross premiums will be restricted by contract, insurance department rules, or for other reasons, such that the future gross premiums reduced by expenses for administration, commissions and taxes will be insufficient to cover future claims, the insurer shall establish contract reserves for such shortfall in the aggregate.

11 NCAC 11F .0207 SPECIFIC STANDARDS FOR MORBIDITY, INTEREST AND MORTALITY

(a) Minimum standard morbidity tables for valuation of specified individual contract accident and health insurance benefits are as follows:

1. Disability Income Benefits Due to Accident or Sickness.
   (A) Contract Reserves:
   (i) Contracts issued on or after January 1, 1965 and before January 1, 1986: The 1964 Commissioners Disability Table (64 CDT).
   (ii) Contracts issued on or after January 1, 1994: The 1985 Commissioners Individual Disability Tables A (85CIDA); or The 1985 Commissioners Individual Disability Tables B (85CIDB).
   (iii) Contracts issued during the years 1986 through 1993: Optional use of either the 1964 or the 1985 Tables.
   (iv) Each insurer shall elect, with respect to all individual contracts issued in any one statement year, whether it will use Tables A or Tables B as the minimum standard. The insurer may, however, elect to use the other tables with respect to any subsequent statement year.

(B) Claim Reserves: Minimum standard morbidity tables in effect for contract reserves on currently issued contracts, as of the date the claim is incurred.
   (i) For claims incurred on or after April 1, 2003: The 1985 Commissioners Individual Disability Table A (85CIDA) with claim termination rates multiplied...

* The adjusted termination rates derived from the application of the adjustment factors to the DTS Valuation Table termination rates shown in Exhibits 3a, 3b, 3c, 4, and 5 of Transactions of the Society of Actuaries (TSA XXXVII, pp. 457-463) are displayed. The adjustment factors for age, elimination period, class, sex, and cause displayed in Exhibits 3a, 3b, 3c, and 4 should be applied to the adjusted termination rates shown in this table.

**Applicable DTS Valuation Table duration rate from exhibits 3c and 4 (TSA XXXVII, pp. 462-463).

The 85 CIDA table so adjusted for the computation of claim reserves shall be known as 85 CIDC (The 1985 Commissioners individual disability Table C).

(ii) For claims incurred prior to April 1, 2003: Each insurer may elect which of the following to use as the minimum standard for claims incurred prior to April 1, 2003:

(I) The morbidity standard in effect for contract reserves on currently issued contracts, as of the date the claim is incurred, or

(II) The standard as defined in subparagraph (a)(1)(B)(i) of this rule.
rule, applied to all open claims.

(III) Once an insurer elects to calculate reserves for all open claims on the standard defined in subparagraph (a)(1)(B)(i) of this rule, all future valuations must be on that basis.

(2) Hospital Benefits, Surgical Benefits and Maternity Benefits (Scheduled benefits or fixed time period benefits only).

(A) Contract Reserves:

(i) Contracts issued on or after January 1, 1955, and before January 1, 1982: The 1956 Intercompany Hospital-Surgical Tables.

(ii) Contracts issued on or after January 1, 1982: The 1974 Medical Expense Tables, Table A.

(B) Claim Reserves: See 11 NCAC 11F .0207(a)(5).

(3) Cancer Expense Benefits (Scheduled benefits or fixed time period benefits only).

(B) Claim Reserves: See 11 NCAC 11F .0207(a)(5).

(4) Accidental Death Benefits.

(A) Contract Reserves: Contracts issued on or after January 1, 1965: The 1959 Accident Death Benefits Table.

(B) Claim Reserves: Actual amount incurred.

(5) Single Premium Credit Disability

(A) Contract Reserves:

(i) For contracts issued on or after April 1, 2003:

(I) For plans having less than a 30-day elimination period, the 1985 Commissioners Individual Disability Table A (85 CIDA) with claim incidence rates increased by twelve percent (12%).

(II) For plans having a 30-day and greater elimination period, the 85 CIDA for a 14-day elimination period with the adjustment in Subparagraph (a)(5)(A)(i)(I) of this Rule.

(ii) For contracts issued prior to April 1, 2003, each insurer may elect either Subparagraph (a)(5)(A)(ii)(I) or Subparagraph (a)(5)(A)(ii)(II) of this Rule to use as the minimum standard. Once an insurer elects to calculate reserves for all contracts on the standard defined in Subparagraph (a)(5)(A)(i) of this Rule, all future valuations must be on that basis.

(I) The minimum morbidity standard in effect for contract reserves on contracts as of the date the contract was issued, or

(II) The standard as defined in Subparagraph (a)(5)(A)(i) of this Rule, applied to all contracts.

(B) Claim Reserves: Claim reserves are to be determined as provided in 11 NCAC 11F .0203.

(6) Other Individual Contract Benefits.

(A) Contract Reserves: For all other individual contract benefits, morbidity assumptions are to be determined which will produce contract reserves that place a sound value on the liabilities of each such benefit.

(B) Claim Reserves: For all benefits other than disability, claim reserves are to be determined as provided in the standards as set out in this rule.

(b) Minimum standard morbidity tables for valuation of specified group contract accident and health insurance benefits are as follows:

(1) Disability Income Benefits Due to Accident or Sickness.

(A) Contract Reserves:

(i) Contracts issued before January 1, 1994: The same basis, if any, as that employed by the insurer as of January 1, 1994;
PROPOSED RULES

(ii) Contracts issued on or after January 1, 1994: The 1987 Commissioners Group Disability Income Table (87CGDT).

(B) Claim Reserves:

(i) For claims incurred on or after January 1, 1994: The 1987 Commissioners Group Disability Income Table (87CGDT);

(2) Single Premium Credit Disability

(A) Contract Reserves:

(i) For contracts issued on or after April 1, 2003:

(I) For plans having less than a 30-day elimination period, the 1985 Commissioners Individual Disability Table A (85 CIDA) with claim incidence rates increased by twelve percent (12%).

(II) For plans having a 30-day and greater elimination period, the 85 CIDA for a 14–day elimination period with the adjustment in Subparagraph (b)(2)(A)(i)(I) of this Rule.

(ii) For contracts issued prior to April 1, 2003, each insurer may elect either Subparagraph (b)(2)(A)(ii)(I) or Subparagraph (b)(2)(A)(ii)(II) of this Rule to use as the minimum standard. Once an insurer elects to calculate reserves for all contracts on the standard defined in Subparagraph (b)(2)(A)(i) of this Rule, all future valuations must be on that basis.

(II) The standard as defined in (b)(2)(A)(i), applied to all contracts.

(B) Claim Reserves: Claim reserves are to be determined as provided in 11 NCAC 11F .0203.

(2)(3) Other Group Contract Benefits.

(A) Contract Reserves: For all other group contract benefits, morbidity assumptions are to be determined which will produce contract reserves that place a sound value on the liabilities of each such benefit.

(B) Claim Reserves: For all benefits other than disability, claim reserves are to be determined as provided in the standards as set out in this rule.

(c) Maximum interest rate standards for valuation of accident and health insurance benefits are as follows:

(1) For contract reserves the maximum interest rate is the maximum rate permitted by law in the valuation of whole life insurance issued on the same date as the accident and health insurance contract.

(2) For claim reserves on contracts that require contract reserves, the maximum interest rate is the maximum rate permitted by law in the valuation of whole life insurance issued on the same date as the claim incurral date.

(3) For claim reserves on contracts not requiring contract reserves, the maximum interest rate is the maximum rate permitted by law in the valuation of single premium immediate annuities issued on the same date as the claim incurral date, reduced by one hundred basis points.

(d) Minimum standard mortality tables for valuation of accident and health insurance benefits are as follows:

(1) Except as provided for in 11 NCAC 11F .0207(d)(2) or (3), the mortality basis used for all policies except long-term care individual policies and group certificates issued after April 1, 2003, shall be according to a table (but without use of selection factors) permitted by law for the valuation of whole life insurance issued on the same date as the accident and health insurance contract. For long-term care insurance individual policies or group certificates issued on or after April 1, 2003, the mortality basis used shall be the 1983 Group Annuity Mortality Table without projection.

(2) Other mortality tables adopted by the NAIC and promulgated by the Commissioner in accordance with G.S. 150B may be used in the calculation of the minimum reserves if
appropriate for the type of benefits and if approved by the Commissioner. The request for such approval must include the proposed mortality table and the reason that the standard specified in 11 NCAC 11F .0207(d)(1) is inappropriate.

(3) For single premium credit insurance using the 85 CIDA table, no separate mortality shall be assumed.

TITLE 15A – DEPARTMENT OF ENVIRONMENT AND NATURAL RESOURCES

Rule-making Agency: Environmental Management Commission

Rule Citation: 15A NCAC 02H .0126

Effective Date: November 1, 2002

Findings Reviewed and Approved by: Beecher R. Gray

Authority for the rulemaking: G.S. 142-214.1; 143-214.7; 143-215.1; 143-215.3(a)(1)

Reason for Proposed Action: The temporary rule process is necessary to allow the Commission and the Department of Environment and Natural Resources to meet Federal deadlines for implementation of the Phase II NPDES Stormwater Regulations. North Carolina is delegated authority to implement this federal permitting program. The federal regulations require permitting of a large number of local governments for stormwater discharges from their jurisdictions. Permit applications must be submitted by these entities beginning in March of 2003. These regulations are necessary to provide guidance to these local entities for permitting development to allow them to meet the application deadline. The regulation also establishes state designation criteria under the program required by the federal regulations for establishing such criteria. These criteria provide notice to potentially covered entities across the state on procedures that will be followed in reviewing them for potential designation in this program. The rule establishes necessary procedures for review and administration of petitions received from any group or person asking for an entity to be covered under the NPDES program. Federal regulations allow for this petitioning and the temporary rule establishes implementation measures for North Carolina. A number of factors, including legal issues unique to North Carolina, have hindered the Agency from moving forward with these regulations. In addition, due to the number of public entities affected by the federal rules, the complexity of the rules and the unique circumstances of coverage in North Carolina, the Agency felt a need to provide a number of opportunities in the process for public involvement in the rule development. These efforts have produced valuable information in establishing a reasonable implementation approach for the federal rules in North Carolina. Unfortunately, these efforts have also left very little time for the Agency to establish state rules in a timeframe that meets the federal requirements.

Comment Procedures: Comments from the public shall be directed to Bradley Bennett, 1617 Mail Service Center, Raleigh, NC 27699-1617, phone (919) 733-5083, ext. 525.

CHAPTER 02 – ENVIRONMENTAL MANAGEMENT

SUBCHAPTER 02H - PROCEDURES FOR PERMITS: APPROVALS

SECTION .0100 – PURPOSE

15A NCAC 02H .0126 STORMWATER DISCHARGES

Stormwater picks up pollutants as it drains to waters of the State. When man alters stormwater drainage, the pollutants carried by stormwater to waters of the State may be concentrated or increased, resulting in water pollution. The juncture at which stormwater reaches waters of the State will either be a terminus of a pipe, ditch or other discrete outlet, or in a diffuse sheet flow manner. Stormwater discharges subject to NPDES permitting are addressed in this Section, which incorporates, supplements and expands the federal rules on stormwater NPDES discharges. Other stormwater control requirements are mainly addressed in Section 02H .1000 entitled "Stormwater Management", but may also be addressed in Sections dedicated to particular water classifications or circumstances. If there is an overlap, the more stringent requirements apply. NPDES permits for stormwater discharges to surface waters shall be issued in accordance with these Rules and United States Environmental Protection Agency regulations 40 CFR 122.21 and 122.26 122.21, 122.26, and 122.28 through 122.37 which are hereby incorporated by reference including any subsequent amendments. Copies of this publication are available from the Government Institutes, Inc. 4 Research Place, Suite 200, Rockville, MD 20850-1714 for a cost of thirty-six, sixty-nine dollars ($36.00) ($69.00) each plus four-six dollars ($4.00) ($6.00) shipping and handling. Copies are also available at the

(2) Designation: Designation consists of an automatic federal designation of public entities as described by Sub-Item (2)(a) of this Rule and a two step state designation process as described by Sub-Item (2)(b) of this Rule. All regulated public entities shall comply with the permit application schedule set forth in Item (6) of this Rule.

(a) Federal designation. In accordance with 40 CFR 122.32, all small MS4s located in whole or in part within an urbanized area as determined by the most recent Decennial Census by the Bureau of the Census must seek coverage under a NPDES permit for stormwater management.

(b) State designation process. The department shall identify additional public bodies that have the potential to discharge stormwater resulting in exceedances of water quality standards, including impairment of designated uses, or other significant water quality impacts, including adverse habitat and biological impacts. As a first step, the public bodies shall be identified based on the categories listed at Sub-Item (2)(b)(i) of this Rule. Once a public body has been identified, the designation of that body, step two, as subject to the requirement to apply for permit coverage will be made based on the criteria at Sub-Item (2)(b)(ii) of this Rule.

(i) Step One: Identification of public bodies potentially subject to regulation.

(A) Municipality. A municipality, outside of an urbanized area as determined by the most recent Decennial Census by the Bureau of the Census, will be identified as a potential regulated MS4 if:

(I) The population is greater than 10,000; and

(II) The population density is at least 1,000 people per square mile.

(B) County. A County, outside of an urbanized area as determined by the most recent Decennial Census by the Bureau of the Census, will be identified as a potential regulated public body if the county municipal and non-municipal
(C) Other public bodies. A public body may be designated if:

(i) They are a municipality located within a regulated county, and have not been designated under any other category; or

(ii) They are a municipality and have not been designated under any other category; or

(iii) They are a MS4 such as, but not limited to, state and federal facilities, universities, community colleges, local sewer districts, hospitals, military bases, and prisons.

(ii) Step Two: Criteria for designation of public bodies.

In making designations, the department will evaluate the public bodies identified per Sub-Item (2)(b)(i) of this Rule for designation using the following criteria:

(A) Whether the public body discharges or has the potential to discharge stormwater to sensitive waters, including:

(I) Waters classified as high quality, outstanding resource, shellfish, trout or nutrient sensitive waters in accordance with 15A NCAC 2B .0101(d) and (e);

(II) Waters which have been identified as providing habitat for federally-listed aquatic animal species that are listed as threatened or endangered by the U.S. Fish and Wildlife Service or National Marine Fisheries Service under the provisions of the Endangered Species Act 16 U.S.C. 1531-1544; or

population (including permanent and seasonal population) is greater than 45,000 persons. The seasonal population will be determined from the most recent data available from local, state and/or federal sources.
(III) Waters for which the designated use, as set forth in the classification system at 15A NCAC 02B .0101(c), (d) and (e); have been determined to be impaired in accordance with the requirements of 33 U.S.C. 1313(d); and

(B) Has exhibited high population growth or population growth potential, where:

(I) High growth shall be defined as a 10 year rate of growth exceeding 1.3 times the state population growth rate for that same period or a two year rate of growth which exceeds 15 percent; or

(II) An area having growth potential shall be defined as a jurisdictional area adjoining an area determined to have high growth in accordance with Sub-Item (2)(b)(ii)(B)(I) of this Rule or an area having a projected growth rate exceeding 1.3 times the state growth rate for the previous 10 years; and

(C) Whether the public body discharges are, or have the potential to be, a significant contributor of pollutants to waters of the United States.

(3) State Designation Administration: Review and finalization of public body designation shall be handled under the following guidelines:

(a) The department will implement the designation process in accordance with the department schedule for Basinwide Plans starting January 01, 2004;

(b) The department shall publish a list of public bodies identified in accordance with Sub-Item (2)(b)(i) of this Rule. Lists shall be developed for a river basin area in accordance with North Carolina’s Basinwide Planning Schedule. Publication of this list may be coordinated with public notices issued through basinwide planning efforts;

(c) All public bodies identified shall be notified in writing by the department prior to publication of the list in Sub-Item (3)(b) of this Rule;

(d) The department shall accept public comment on the application of the evaluation criteria in Sub-Item (2)(b)(ii) of this Rule for each of the identified public bodies. A public comment period of not less than 30 days will be provided;
(e) After review of the evaluation criteria in Sub-Item (2)(b)(ii) of this Rule and review of public comments received, the department will review the effectiveness of any existing water quality protection programs. The effectiveness will be determined based upon the water quality of the receiving waters, and whether the waters have been determined to be supporting the uses as set forth in the classifications pursuant to 15A NCAC 02B.0101(c), (d) and (e) and the specific classification of the waters pursuant to 15A NCAC 02B.0300. The Department shall then make a final determination on designation for each of the listed public bodies; and

(f) The department shall notify a public body of its designation for NPDES stormwater coverage in writing. This notification shall include the category under which the public body was designated, the basis(es) of the designation and the date on which the application for coverage shall be submitted to the Department.

(4) Other State designations

(a) Total Maximum Daily Load (TMDL) MS4s. TMDL MS4s include public bodies discharging pollutants that are contributing to the impairment of a water body's use, as determined in accordance with 33 U.S.C 1313 (d). TMDL MS4s shall be designated if the MS4 is specifically listed by name for urban stormwater Total Maximum Daily Load development.

(b) Designated by petition. Entities subject to a petition shall be designated by the department based on the process and procedures identified in Item (5) of this Rule.

(5) Petitions

(a) In accordance with 40 CFR 122.26(f):
(i) Any operator of a MS4 may petition the department to require a separate NPDES stormwater permit for any discharge into the MS4; and
(ii) Any person may petition the department to require a NPDES stormwater permit for a discharge composed entirely of stormwater which contributes to a violation of a water quality standard or is a significant contributor of pollutants to waters of the United States.

(b) Petition Submittal. Petitions to designate a small MS4 or discharge for NPDES stormwater permit coverage must meet the following requirements:
(i) Petitions must be submitted on department approved forms;
(ii) A separate petition must be filed for each petitioned entity;
(iii) The petition must be complete prior to consideration by the department;
(iv) Petitions must demonstrate the need for NPDES stormwater permit coverage for the petitioned entity based on the following standards:
(A) For stormwater discharges to impaired waters, monitoring data must be submitted to demonstrate that the petitioned entity is the source of or a significant contributor of pollutants to the impairment;
(B) For stormwater discharges to non-impaired waters, monitoring data must be submitted to demonstrate that the petitioned entity is a significant contributor of pollutants to the receiving waters;
(C) Monitoring data must include, at a minimum, representative sampling of the stormwater discharges subject to the petition;
(D) The petitioner must present information documenting how the sampling may be considered representative of the stormwater discharges. The petitioner may...
present technical scientific literature to support the sampling methods; and

(E) The Petitioner shall notify the potential petitioned entity in advance of stormwater discharge monitoring activities.

(v) The petitioner must certify that a copy of the petition and any subsequent additional information submitted by the petitioner has been provided to the chief administrative officer of the petitioned entity within 48 hours of submitting said petition and additional information to the department;

(vi) Petitions must include the following to be eligible for consideration:

(A) Completed set of petition form(s);

(B) In accordance with Sub-Item (5)(b)(iv) of this Rule, a demonstration of the need for NPDES stormwater permit coverage. These data may be supplemented with technical study information on land uses in the drainage area and the characteristics of stormwater runoff from these land uses;

(C) Documentation of receiving waters impairment or degradation;

(D) A map delineating the drainage area of the petitioned entity, the location of sampling stations, the location of the stormwater outfalls in the adjacent area, and general features such as, surface waters, major roads and political boundaries to appropriately locate the area of concern for the reviewers; and

(E) Certification of petitioned entity notification;

(vii) On a case by case basis the department may request additional information necessary to evaluate the petition.

(c) Petition Administration. All petitions received by the department will be processed under the following guidelines:

(i) The department will make a determination on the completeness of the petition and acknowledge receipt of the petition within 90 days of receipt. The petition is considered complete if the department does not notify the petitioner of receipt within 90 days.

(ii) Substantially incomplete petitions will be returned to the petitioner with guidance on what is needed to complete the petition package.

(iii) Pursuant to 40 CFR 122.26(f)(5), the department must make a final determination on any petition within 180 days of receipt. The 180-day period begins upon receipt of a complete petition application. The department will draft the designation decision pursuant to the applicable designation criteria from Sub-Item (2)(b)(ii) of this Rule.

(iv) The petition will be sent to public notice, which includes a public comment period of at least 30 days.

(v) The department may hold a public hearing on any petition and shall hold a public hearing if the department receives a
written request for a public hearing on the petition within 15 days after the notice of the petition is published and the department determines that there is a significant public interest in holding such hearing. The hearing date will be no less than 15 days from the receipt of the request for public hearing.

(vi) Information on the petitioned entity will be accepted until the end of the public comment period and will be considered in making the final determination on the petition. New petitions for the same entity received during this time will become a party to the original petition.

(vii) New petitions for the same entity received after the public comment period ends and before the final determination is made will be considered incomplete and placed on administrative hold pending a final determination on the original petition.

(A) If the department designates the petitioned entity, any new petitions placed on administrative hold will be considered incomplete and will be considered in the development of the NPDES permit.

(B) If the department makes the final determination that the petitioned entity should not be designated, new petitions for the previously petitioned entity must present new information or demonstrate that conditions have changed substantially in order to be considered. If new information is not provided, the petition shall be returned substantially incomplete.

(viii) If the final determination is that the petitioned entity shall be designated, then the department will notify the petitioned entity of its designation and will require a stormwater permit application. The application shall be required to be submitted no later than 18 months from the date of notification.

(6) Application schedule. Regulated public entities must submit applications on department approved forms. Designated small MS4 applications shall include program descriptions for the minimum measures identified in Item (7) of this Rule. The application for regulated public entities that do not own or operate a small MS4 shall certify the lack of ownership or operation of a small MS4. Regulated public entities that do not own or operate a small MS4 may elect to implement a stormwater management program pursuant the options available in this Rule.

(a) The application deadline will not be less than 18 months from the date of designation notification, except for:

(i) 1990 Decennial Census regulated public entities, which must apply by March 10, 2003;

(ii) Municipally operated industrial activities, which must apply by March 10, 2003.

(b) Regulated public entities that are newly identified based upon the 2000 Decennial Census, or a future decennial census, must apply for permit coverage within 18 months of State notification. The Department, within three months of federal verification of decennial census data, will notify in writing all the public entities identified.

(7) Stormwater Management Requirements

(a) All regulated public entities subject to this Rule shall develop, implement and enforce a stormwater management plan approved by the department in accordance with Sub-Items (7)(b)-(7)(e) of this Rule. The plan shall be designed to reduce discharge of pollutants to the maximum extent practicable and,
TEMPORARY RULES

(except as otherwise provided, shall include but not be limited to the following minimum measures:)

(i) A public education and outreach program on the impacts of stormwater discharges on water bodies to inform citizens of how to reduce pollutants in stormwater runoff. The public body may satisfy this requirement by developing a local education and outreach program; by participating in a statewide education and outreach program coordinated by the department; or a combination of those approaches;

(ii) A public involvement and participation program consistent with all applicable state and local requirements;

(vi) A pollution prevention/good housekeeping program for municipal operations that addresses operation and maintenance, including a training component, to prevent or reduce pollutant runoff from those operations.

(b) Minimum measures and permit coverage for regulated public entities:

(i) For municipalities which own and operate a small MS4:

(A) They shall implement all six minimum measures; and

(B) Their permit will cover their jurisdictional area including any area where they have exercised their Extraterritorial Jurisdiction under G.S. 160A-360. They shall implement the six minimum measures in their ETJ areas to the extent allowable under existing rules and statutes.

(ii) For counties which own and operate one or more small MS4s:

jurisdictional area; and

(C) The county may elect to implement the six minimum measures throughout the remaining unincorporated areas of the county that drain in whole or in part to publicly owned MS4’s using the “permitted by rule” option pursuant to Item (11) of this Rule. The county may also elect to cover all unincorporated areas of the county.

(iii) For regulated public entities that do not own or operate a small MS4

(C) The permit coverage areas would be as follows:

(I) For municipalities, their permit will cover their jurisdictional area including any area where they have exercised their Extraterritorial Jurisdiction

 Authorities under G.S. 160A-360. They shall implement the six minimum measures in their ETJ areas to the extent allowable under existing rules and statutes;

(II) For counties, the permit would cover the unincorporated areas of the county that drain in whole or in part to publicly owned MS4’s. The county may also elect to cover all unincorporated areas of the county; and

(III) For all other public bodies, the permit would cover their jurisdictional area.

(c) All public bodies designated by petition shall meet the requirements set out in Sub-Item (7)(b) of this Rule as applicable.

(d) All public bodies designated by TMDL, pursuant to Item (4) of this Rule, shall meet the requirements as set out in Sub-Item (7)(b) of this Rule as applicable including, but not limited to additional requirements associated with the TMDL.

(e) The Department may allow regulated public entities to use existing state and local programs to meet the required permit minimum measures either in whole or in part.

(f) Within the jurisdictional area of all regulated public entities, the post construction controls pursuant to Item
(10) of this Rule, shall be required and implemented where the construction activity drains in whole or in part to a publicly owned MS4.

(8) Waiver. The department may waive the requirements set out in Item (7) of this Rule pursuant to 40 CFR 122.32(d) or 40 CFR 122.32(e).

(9) Implementation Schedule.
   (a) Regulated public entities, pursuant to Item (2) of this Rule, shall have permit conditions that establish schedules for implementation of each component of the stormwater management program based on the submitted application, and shall fully implement a program meeting the requirements set out in Item (7) and Item (10) of this Rule within five years from permit issuance.
   (b) Regulated public entities electing to be permitted by rule shall adopt ordinances and fully implement the required post-construction program meeting the applicable requirements set out in Item (7) and Item (10) of this Rule. They will thereafter report annually on the implementation of the ordinance(s). They shall fully implement the pollution prevention/good housekeeping measure at their publicly owned facilities within two years of notification of approval of their application for permitted by rule status.

(10) Post-construction stormwater management
   (a) All regulated public entities, required to implement the post-construction stormwater management minimum measure, must develop, implement and adopt by ordinance a post-construction stormwater management program for all new development and redevelopment as part of their plan to meet the minimum requirements pursuant to Sub-Item (7)(a)(v) of this Rule. These ordinances, and subsequent modifications, will be reviewed and approved by the Department prior to implementation. The approval process will establish subsequent timeframes when the Department will review performance under the ordinance(s). The reviews will occur, at a minimum, every five years. Regulated public entities without ordinance making powers, shall demonstrate similar actions taken in their post construction stormwater management program to meet the minimum measure requirements.
   (b) The post-construction program shall apply to all new development projects that cumulatively disturb one acre or more, and to projects less than an acre that are part of a larger common plan of development or sale. The post-construction program shall apply to all redevelopment projects that cumulatively disturb one acre or more, and to projects less than an acre that are part of a larger common plan of development or sale.
   (c) The department shall submit a model ordinance including best management practices to control and manage stormwater runoff from development and redevelopment sites subject to this Rule to the Commission for approval. The department shall work in cooperation with local governments to develop this model ordinance. The model ordinance shall include both structural and non-structural best management practices adequate to meet the minimum requirements of this Rule.
   (d) The deadlines for implementation of the local post-construction program are as follows:

(I) Control and treat the difference in stormwater runoff volume leaving the project site between the pre and post development conditions for the one year 24 hour storm. Runoff volume drawdown time shall be a minimum of 24 hours, but not more than 120 hours;

(II) All structural stormwater treatment systems used to meet the requirements of the program shall be designed to have an 85% average annual removal for Total Suspended Solids;

(III) General Engineering Design Criteria for all projects shall be in accordance with 15A NCAC 2H .1008(c);

(IV) All BUA shall be at a minimum of 30 feet landward of all perennial and intermittent surface waters. For the purpose of this Rule, a surface water shall be present if the feature is approximately shown on either the most recent version of the soil survey map prepared by the Natural Resources Conservation Service of the United States Department of Agriculture or the most recent version of the 1:24,000 scale (7.5 minute) quadrangle topographic maps prepared by the United States Geologic Survey (USGS). An exception to this requirement may be allowed when surface waters are not present in accordance with the provisions of 15A NCAC 2B .0233 (3)(a); and

(V) The permit shall
require recorded deed restrictions and protective covenants to ensure that development activities maintain the development consistent with the approved project plans.

(f) The program shall include an operation and maintenance component that ensures the adequate long-term operation of the structural BMP's required by the program. The program shall include a requirement that the owner of a permitted structural BMP, submit annually to the local program, a maintenance inspection report on each structural BMP. The inspection must be conducted by a qualified professional;

(g) A program shall be developed to control, to the maximum extent practicable, the sources of fecal coliform. At a minimum, the program shall include the development and implementation of an oversight program to ensure proper operation and maintenance of on-site wastewater treatment systems for domestic wastewater. For municipalities, this program should be coordinated with the local county health department;

(h) For programs with development/redevelopment draining to SA waters, the following additional requirements must be incorporated into their program:

(i) A local ordinance shall be developed, adopted and implemented to ensure that the best practice for reducing fecal coliform loading is selected. The best practice shall be the practice that results in the highest degree of fecal die off and controls to the maximum extent practicable sources of fecal coliform while still meeting the requirements of Sub-Item (10)(d) of this Rule.

The local ordinance(s) shall incorporate a program to control the sources of fecal coliform to the maximum extent practical, including:

(A) Implementation of a pet waste management program. Appropriate revisions to an existing litter ordinance can be used to meet this requirement; and

(B) Implementation of an oversight program to ensure proper operation and maintenance of on-site wastewater treatment systems for domestic wastewater. For municipalities, this program should be coordinated with the local county health department;

(ii) New direct points of stormwater discharge to SA waters or expansion of existing points of discharge to any constructed stormwater conveyance system, or constructed system of conveyances that discharge to SA waters, shall not be allowed. Expansion is defined as an increase in drainage area or an increase in impervious surface within the drainage area resulting in a net increase in peak flow or volume from the one year 24 hour storm. Overland sheetflow of stormwater or stormwater discharge to a wetland, vegetated buffer or other natural area capable of providing treatment or absorption will not be considered a direct point of stormwater discharge for the purposes of this Rule;

(i) For programs with development/redevelopment draining to trout (Tr) waters, the following
additional requirements must be incorporated into their program. A local ordinance shall be developed, adopted and implemented to ensure that the best management practices selected do not result in a sustained increase in the receiving water temperature, while still meeting the requirements of Sub-Item (10)(d) of this Rule;

(j) For programs with development/redevelopment draining to Nutrient Sensitive waters, the following additional requirements must be incorporated into their program:

   (i) A local ordinance shall be developed, adopted and implemented to ensure that the best management practice for reducing nutrient loading is selected while still meeting the requirements of Sub-Item (10)(d) of this Rule. Where a Department approved NSW Urban Stormwater Management Program is in place, the provisions of that program fulfill this requirement; and

   (ii) A nutrient application (both inorganic fertilizer and organic nutrients) management program shall be developed and included in the stormwater management program

(k) Public bodies may develop and implement comprehensive watershed protection plans that may be used to meet part, or all, of the requirements of Item (10) of this Rule;

(l) The department may require more stringent stormwater management measures on a case-by-case basis where it is determined that additional measures are required to protect water quality and maintain existing and anticipated uses of these waters; and

(m) The Department may develop guidance on the scientific and engineering standards for best management practices that shall be used to meet the post construction elements of this Rule. Alternative design criteria may be approved by the Department where a demonstration is made that the alternative design will provide:

   (i) Equal or better management of the stormwater;

   (ii) Equal or better protection of the waters of the state; and

   (iii) No increased potential for nuisance conditions.

(11) Permitted by Rule Option. To be "permitted by rule" the public body shall:

   (a) Adopt ordinance(s) and implement programs addressing post-construction stormwater runoff throughout the public bodies entire jurisdictional area, pursuant to Item (10) of this Rule; and

   (b) Institute the pollution prevention/good housekeeping measure at their publicly owned facilities, pursuant to Sub-Item (7)(a)(vi) of this Rule, in accordance with a separate NPDES permit for municipal operations.

If the public body selects this option, the State will implement the remaining four minimum measure requirements throughout the public bodies entire jurisdictional area through existing programs and NPDES stormwater permits to the extent allowed under those programs and permits.

Effective Date: October 17, 2002

Findings Reviewed and Approved by: Beecher R. Gray

Authority for the rulemaking: G.S. 74-F

Rule-making Agency: Office of Administrative Hearings

Rule Citation: 26 NCAC 02C .0104, .0112, .0303, .0305-.0306, .0410

Effective Date for Temporary Rule: January 1, 2003

Findings Reviewed and Approved by: Jeffrey P. Gray

Authority for the rulemaking: G.S. 150B-21.19

Reason for Proposed Action for Temporary Rule: 26 NCAC 02C .0104, .0112, .0305-.0306, .0410 – These temporary rules are necessary in order to respond to budget cuts incurred from the 2002 Session of the General Assembly. These amendments utilize technology in an effort to reduce expenditures. The agencies will continue to receive documents prepared by OAH but through email rather than print copies. All agencies that currently file for publication in the Register and Code have provided OAH with an email address. OAH cannot wait to address this budget issue through normal rulemaking. The public interest will best be served by implementing these cost saving measures as quickly as possible.

26 NCAC 02C .0303 – Senate Bill 1224 mandates OAH to provide the NC Register on the Internet at no charge. This amendment provides information for accessing the OAH website. Subsequently, this mandate eliminates the need for diskette and email subscriptions. In order to reduce unnecessary cost, OAH will only print the number of copies necessary to fulfill current subscriptions at the time of issuance of each issue. The public will be best served by implementing these cost saving measures as quickly as possible.

Date: February 10, 2003
Time: 10:00 a.m.
Location: 422 North Blount Street, Raleigh, NC

Proposed Effective Date for Permanent Rule: August 1, 2004

Reason for Proposed Action: To allow more to be done electronically versus print copies; availability of the Register; and make other clarifying changes.

Comment Procedures: Comments should be submitted to Molly Masich, 6714 Mail Service Center, Raleigh, NC 27699-6714; or email to molly.masich@ncmail.net. Comments should be submitted by February 10, 2003.

TITLE 10 – DEPARTMENT OF HEALTH AND HUMAN SERVICES

10 NCAC 03C .3102  PLAN APPROVAL
(a) The facility design and construction shall be in accordance with the construction standards of the Division, the North Carolina Building Code, and local municipal codes.

(b) Submission of Plans:
(1) Before construction is begun, color marked plans and specifications covering construction of the new buildings, alterations or additions to existing buildings, or any change in facilities shall be submitted to the Division for approval.
(2) The Division shall review the plans and notify the licensee that said buildings, alterations, additions, or changes are approved or disapproved. If plans are disapproved the Division shall give the applicant notice of deficiencies identified by the Division.
(3) In order to avoid unnecessary expense in changing final plans, as a preliminary step, proposed plans in schematic form shall be submitted by the applicant to the Division for review.
(4) The plans shall include a plot plan showing the size and shape of the entire site and the location of all existing and proposed facilities.
(5) Plans shall be submitted in triplicate in order that the Division may distribute a copy to the Department of Insurance for review of State Building Code requirements and to the Department of Environment, Health, and Natural Resources for review under state sanitation requirements.
10 NCAC 03C .4305 ORGANIZATION OF NEONATAL SERVICES

(a) The governing body shall approve the scope of all neonatal services and the facility shall classify its capability in providing a range of neonatal services using the following criteria:

(1) LEVEL I: Full-term and pre-term neonates that are stable without complications. This may include, small for gestational age or large for gestational age neonates.

(2) LEVEL II: Neonates or infants that are stable without complications but require special care and frequent feedings; infants of any weight who no longer require Level III or LEVEL IV neonatal services, but who still require more nursing hours than normal infant. This may include infants who require close observation in a licensed acute care bed.

(3) LEVEL III: Neonates or infants that are high-risk, small (or approximately 32 and less than 36 completed weeks of gestational age) but otherwise healthy, or sick with a moderate degree of illness that are admitted from within the hospital or transferred from another facility requiring intermediate care services for sick infants, but not requiring intensive care. The beds in this level may serve as a "step-down" unit from Level IV. Level III neonates or infants require less constant nursing care, but care does not exclude respiratory support.

(4) LEVEL IV (Neonatal Intensive Care Services): High-risk, medically unstable or critically ill neonates approximately under 32 weeks of gestational age, or infants, requiring constant nursing care or supervision not limited to continuous cardiopulmonary or respiratory support, complicated surgical procedures, or other intensive supportive interventions.

(b) The facility shall provide for the availability of equipment, supplies, and clinical support services.

(c) The medical and nursing staff shall develop and approve policies and procedures for the provision of all neonatal services.

10 NCAC 03R .1413 DEFINITIONS

The definitions in this Rule shall apply to all rules in this Section:

(1) "Approved neonatal service" means a neonatal service that was not operational prior to the beginning of the review period.

(2) "Existing neonatal service" means a neonatal service in operation prior to the beginning of the review period.

(3) "High-risk obstetric patients" means those patients requiring specialized services provided by an acute care hospital to the mother and fetus during pregnancy, labor, delivery and to the mother after delivery. The services are characterized by specialized facilities and staff for the intensive care and management of high-risk maternal and fetal patients before, during, and after delivery.

(4) "Level I neonatal services" means services provided by an acute care hospital to full term and pre-term neonates that are stable, without complications, and may include neonates that are small for gestational age or large for gestational age.

(5) "Level II neonatal service" means services provided by an acute care hospital to infants of any weight who no longer require Level III or Level IV neonatal services, but who still require more nursing hours than normal infants; and infants who require close observation in a licensed acute care bed.

(6) "Level III neonatal service" means services provided by an acute care hospital in a licensed acute care bed to neonates or infants that are high-risk, small (approximately 32 and less than 36 completed weeks of gestational age) but otherwise healthy, or sick with a moderate degree of illness that are admitted from within the hospital or transferred from
another facility requiring intermediate care services for sick infants, but not intensive care. Level III neonates or infants require less constant nursing care than Level IV services, but care does not exclude respiratory support.

“Level IV neonatal service” means neonatal intensive care services provided by an acute care hospital in a licensed acute care bed to high-risk medically unstable or critically ill neonates (approximately under 32 weeks of gestational age) or infants requiring constant nursing care or supervision not limited to continuous cardiopulmonary or respiratory support, complicated surgical procedures, or other intensive supportive interventions.

“Neonatal bed” means a licensed acute care bed used to provide Level II, III or IV neonatal services.

“Neonatal intensive care services” shall have the same meaning as defined in G.S. 131E-176(15b).

“Neonatal service area” means a geographic area defined by the applicant from which the patients to be admitted to the service will originate.

“Neonatal services” means any of the Level I, Level II, Level III or Level IV services defined in this Rule.

“Obstetric services” means any normal or high-risk services provided by an acute care hospital to the mother and fetus during pregnancy, labor, delivery and to the mother after delivery.

“Perinatal services” means services provided during the period shortly before and after birth.

History Note: Authority G.S. 131E-177(1); 131E-183; Temporary Adoption Eff. September 1, 1993 for a period of 180 days or until the permanent rule becomes effective, whichever is sooner; Eff. 10 NCAC 03R .1414 INFORMATION REQUIRED OF APPLICANT

(a) An applicant proposing to develop a new Level I nursery or increase the number of Level II, III or IV neonatal beds shall use the Acute Care Facility/Medical Equipment application form.

(b) An applicant proposing to develop a new Level I nursery service or to increase the number of Level II, III or IV neonatal beds shall provide the following additional information:
