If the Board fails to timely file a report, all funds received after October 31 shall be deposited into an escrow account with a financial institution, as such term is defined in G.S. 90-210.60(2), until the report has been filed. Any period of suspension under G.S. 93B-2(d) shall have no effect upon the right of a license or permit applicant to the issue or renewal of any license or permit upon meeting all legal requirements; provided, however, that this Rule shall not impose any duty upon the Board to issue any license or permit outside its normal operating procedures.

Authority G.S. 90-210.23(a); 93B-2(d).
The following provisions shall apply to funeral director, funeral service, and embalmer licenses only:

(1) "Active military personnel" shall mean any person holding an applicable license or permit from the Board who meets the conditions of G.S. 105-249.2(a) and would be subject to any continuing education requirement, renewal fee, or renewal application to renew or reinstate any permit or license issued by the Board.

(2) "Active military status" shall mean any active military personnel who is not actively practicing because of military service.

(3) "Applicant" shall mean the active military personnel or any person authorized to conduct business affairs for the active military personnel under the authority granted by a power of attorney executed under the laws of any state.

The applicant shall furnish the full name of the active military personnel, license number, address and telephone number of the active military personnel, date of active military service, anticipated date the licensee will resume practice, if known, and documentation from the branch of service demonstrating entitlement to active military status. The Board shall notify the applicant in writing of its decision on the application and shall place the active military personnel on inactive status upon approving the application.

(2) No fees or renewal applications shall be required during the period of active military status. Continuing education shall not be required for any calendar year when active military status is effective. Time spent on active military status shall apply to the total years of continuing education required by a licensee under G.S. 90-210.25(a)(5)e.

(3) Active military status shall terminate upon the earlier of return to active status or upon six months after severance from active duty. Active military personnel may claim active military status retroactively within six months from severance from active duty with a branch of the armed forces. Active military personnel who fail to renew the license before the termination of active military status shall be subject to the provisions of reinstatement under G.S. 90-210.25(a)(5)b. for a lapsed license and shall not be entitled to any waivers of continuing education, renewal fees, or reinstatement fees.

(4) To return to active status, the licensee shall file an application for renewal and renewal fee for the calendar year regardless of the date of application.

If the Commissioner requests a memorandum and no such memorandum exists or if the Commissioner finds that the analysis described in the memorandum fails to meet the standards of the Board or the standards and requirements of this Section, the Commissioner shall designate a qualified actuary to review the opinion and prepare such supporting memorandum as is required for review. The reasonable and necessary expense of the independent review shall be paid by the company but shall be directed and controlled by the Commissioner.

4. The reviewing actuary shall have the same status as an examiner for purposes of obtaining data from the company and the work papers and documentation of the reviewing actuary shall be retained by the Commissioner; provided, however, that any information provided by the company to the reviewing actuary and included in the work papers shall be considered as material provided by the company to the Commissioner and shall be kept confidential to the same extent as is prescribed by law with respect to other material provided by the company to the Commissioner under G.S. 58-58-50(j). The regulatory asset adequacy issues summary shall be kept confidential to the same extent and under the same conditions as the actuarial memorandum.

(b) When an actuarial opinion under Rule .0306 of this Section is provided, the memorandum shall demonstrate that the analysis has been done in accordance with the standards for asset adequacy referred to in Rule .0303(d) of this Section and any additional standards under this Section. It shall specify:

(3) For the analysis basis:
   (A) Methodology;
   (B) Rationale for inclusion or exclusion of different blocks of business and how pertinent risks were analyzed;
   (C) Rationale for degree of rigor in analyzing different blocks of business (including in the rationale the level of "materiality" that was used in determining how rigorously to analyze different blocks of business);

11 NCAC 11F .0403 BASIC AND PREMIUM DEFICIENCY RESERVES

(a) At the election of the company for any one or more specified plans of life insurance, the minimum mortality standard for basic reserves may be calculated using the 1980 CSO valuation tables with select mortality factors (or any other valuation mortality table adopted by the NAIC after January 1, 2000, and adopted as a rule by the Commissioner for this purpose). If select mortality factors are elected, they may be:

(1) The ten-year select mortality factors incorporated into the 1980 amendments to the NAIC Standard Valuation Law;

(2) The select mortality factors in the NAIC Model Regulation entitled "Valuation of Life Insurance Policies Model Regulation";

(3) Any other table of select mortality factors adopted by the NAIC after January 1, 2000, and adopted as a rule by the Commissioner for the purpose of calculating basic reserves.

(b) Deficiency reserves, if any, are calculated for each policy as the excess, if greater than zero, of the quantity A over the basic reserve. The quantity A is obtained by recalculating the basic reserve for the policy using guaranteed gross premiums instead of net premiums when the guaranteed gross premiums are less than the corresponding net premiums. At the election of the company for any one or more specified plans of insurance, the quantity A and the corresponding net premiums used in the determination of quantity A may be based upon the 1980 CSO valuation tables with select mortality factors (or any other valuation mortality table adopted by the NAIC after January 1, 2000, and adopted as a rule by the Commissioner). If select mortality factors are elected, they may be any of the following:

(1) The ten-year select mortality factors incorporated into the 1980 amendments to the NAIC Standard Valuation Law;

(2) The select mortality factors in the NAIC Model Regulation entitled "Valuation of Life Insurance Policies Model Regulation";
(3) For durations in the first segment, X percent of the select mortality factors in the NAIC Model Regulation entitled "Valuation of Life Insurance Policies Model Regulation," subject to the following:

(A) X may vary by policy year, policy form, underwriting classification, issue age, or any other policy factor expected to affect mortality experience;

(B) X is such that, when using the valuation interest rate used for basic reserves, Item (i) is greater than or equal to Item (ii):

   (i) The actuarial present value of future death benefits calculated using the mortality rates resulting from the application of X;

   (ii) The actuarial present value of future death benefits calculated using anticipated mortality experience without recognition of mortality improvement beyond the valuation date;

(C) X is such that the mortality rates resulting from the application of X are at least as great as the anticipated mortality experience, without recognition of mortality improvement beyond the valuation date, in each of the first five years after the valuation date;

(D) The appointed actuary shall increase X at any valuation date where it is necessary to continue to meet all requirements of this Rule;

(E) The appointed actuary may decrease X at any valuation date as long as X continues to meet all the requirements of this Rule;

(F) The appointed actuary shall take into account the adverse effect on expected mortality and lapsation of any anticipated or actual increase in gross premiums; and

(G) If X is less than 100 percent at any duration for any policy, the following requirements shall be met:

   (i) The appointed actuary shall annually prepare an actuarial opinion and memorandum for the company in conformance with the requirements of 11 NCAC 11F .0300;

   (ii) The appointed actuary shall disclose, in the Regulatory Asset Adequacy Issues Summary, the effect of the insufficiency of assets to support the payment of benefits and expenses and the establishment of statutory reserves during one or more interim periods; and

The appointed actuary shall annually opine for all policies subject to this Section as to whether the mortality rates resulting from the application of X meet the requirements of this Rule. This opinion shall be supported by an actuarial report, subject to appropriate Actuarial Standards of Practice promulgated by the Actuarial Standards Board of the American Academy of Actuaries. The X factors shall reflect anticipated future mortality, without recognition of mortality improvement beyond the valuation date, taking into account relevant emerging experience;

(4) Any other table of select mortality factors adopted by the NAIC after January 1, 2000, and adopted as a rule by the Commissioner for the purpose of calculating deficiency reserves.

(c) This Rule applies to both basic reserves and deficiency reserves. Any set of select mortality factors may be used only for the first segment. However, if the first segment is less than 10 years, the appropriate 10-year select mortality factors, incorporated into the 1980 amendments to the NAIC Standard Valuation Law, may be used thereafter through the tenth policy year from the date of issue.

(d) In determining basic reserves or deficiency reserves, guaranteed gross premiums without policy fees may be used where the calculation involves the guaranteed gross premium, but only if the policy fee is a level dollar amount after the first policy year. In determining deficiency reserves, policy fees may be included in guaranteed gross premiums even if they are not included in the actual calculation of basic reserves.

(e) Reserves for policies that have changes to guaranteed gross premiums, guaranteed benefits, guaranteed charges, or guaranteed credits that are unilaterally made by the insurer after issue and that are effective for more than one year after the date of the change shall be the greatest of the following:

   (1) Reserves calculated ignoring the guarantee;

   (2) Reserves assuming the guarantee was made at issue; or

   (3) Reserves assuming that the policy was issued on the date of the guarantee.
11 NCAC 11F .0801  MODEL REGULATION PERMITTING THE RECOGNITION OF PREFERRED MORTALITY TABLES FOR USE IN DETERMINING MINIMUM RESERVE LIABILITIES

(a) The North Carolina Department of Insurance incorporates by reference, including subsequent amendments and editions, the National Association of Insurance Commissioners Model No. 815, Model Regulation Permitting the Recognition of Preferred Mortality Tables for Use in Determining Minimum Reserve Liabilities. Copies of Model No. 815 may be obtained from: The National Association of Insurance Commissioners, 2301 McGee Street, Kansas City, MO 64108-1662; the North Carolina Department of Insurance, Actuarial Services Division, 1201 Mail Service Center, Raleigh, NC 27699-1201; and from the Department of Insurance web page at http://www.ncdoi.com/.

(b) For purposes of this Rule, Section 2 of Model No. 815 shall read as follows:

The purpose of this regulation is to recognize, permit and prescribe the use of mortality tables that reflect differences in mortality between Preferred and Standard lives in determining minimum reserve liabilities in accordance with G.S. 58-58-50 (c)(2)(a), 11 NCAC 11F .0403(a), and 11 NCAC 11F .0403(b).

(c) For purposes of this Rule, Section 4 of Model No. 815 shall read as follows:

At the election of the company, for each calendar year of issue, for any one or more specified plans of insurance and subject to satisfying the conditions stated in this regulation, the 2001 CSO Preferred Class Structure Mortality Table may be substituted in place of the 2001 CSO Smoker or Nonsmoker Mortality Table as the minimum valuation standard for policies issued on or after January 1, 2007. For policies issued on or after January 1, 2005 and before January 1, 2007, these tables may be substituted with the consent of the Commissioner and subject to the conditions of Section 5. In determining such consent, the Commissioner shall consider the consent of the insurance regulator of the company's state of domicile. No such election shall be made until the company demonstrates that at least 20% of the business to be valued on this table is in one or more of the preferred classes. A table from the 2001 CSO Preferred Class Structure Mortality Table used in place of a 2001 CSO Mortality Table, pursuant to the requirements of this regulation, shall be treated as part of the 2001 CSO Mortality Table only for purposes of reserve valuation pursuant to the requirements of 11 NCAC 11F .0601, 11 NCAC 11F .0602, 11 NCAC 11F .0603, and 11 NCAC 11F .0604.

(d) For purposes of this Rule, Paragraph C of Section 3, and Paragraph C of Section 5 of Model No. 815 are not applicable.

(e) For purposes of this Rule, Sections 1 and 7 of Model No. 815 are not applicable.

11 NCAC 12 .1902  UNFAIR OR DECEPTIVE ACTS OR PRACTICES

(a) The following are unfair or deceptive acts or practices in the business of insurance:

(1) To deny, refuse to issue, renew or reissue, cancel or otherwise terminate a health benefit plan, or restrict or exclude health benefit plan coverage or add a premium differential to any health benefit plan on the basis of the applicant's or insured's abuse status;

(2) To exclude or limit coverage for losses or deny a claim incurred by an insured on the basis of the insured's abuse status;

(3) To request information relating to acts of abuse or an applicant's or insured's abuse status, or make use of that information, however obtained, except for the limited purposes of complying with legal obligations or verifying a person's claim to be a subject of abuse; or

(4) To terminate group coverage for a subject of abuse because coverage was originally issued in the name of the abuser and the abuser has divorced, separated from, or lost custody of the subject of abuse, or the abuser's coverage has terminated voluntarily or involuntarily. Nothing in this Rule prohibits the insurer or insurance professional from requiring the subject of abuse to pay the full premium for coverage under the health benefit plan or from requiring as a condition of coverage that the subject of abuse reside or work within the insurer's service area, if the requirements are applied to all insureds of the insurer or insurance professional. The health carrier or insurance professional may terminate group coverage after the continuation coverage required by this subsection has been in force for 18 months, if it offers conversion to an individual plan as provided in Part 2 of Article 53 of Chapter 58 of the General Statutes. The continuation coverage required by this section shall be satisfied by coverage required under P.L. 99-272, the Consolidated Omnibus Budget Reconciliation Act (COBRA) of 1985, or under state continuation coverage required under Part 1 of Article 53 of Chapter 58 of the General Statutes, and is not intended to be in addition to coverage provided under COBRA or state continuation. Nothing in this
Subparagraph is intended to supersede or interfere with the provisions of G.S. 58-68-60 when the subject of abuse is an "eligible individual" as defined in G.S. 58-68-60(b).

(b) Subparagraph (a)(3) of this Rule does not prohibit an insurer or insurance professional from asking about a medical condition or from using medical information to underwrite or to carry out its duties under the policy, even if the medical information is related to a medical condition that the insurer or insurance professional knows or has reason to know is abuse-related, to the extent otherwise permitted under this Rule and other applicable law.

11 NCAC 12 .1903 JUSTIFICATION OF ADVERSE INSURANCE DECISIONS
An insurer or insurance professional that takes an action that adversely affects an applicant or insured on the basis of a medical condition that the health insurer or insurance professional knows or has reason to know is abuse-related shall explain the reason for its action to the applicant or insured in writing and shall be able to demonstrate that its action, and any applicable plan provision:

1. Does not have the purpose or effect of treating abuse status as a medical condition or underwriting criterion;
2. Is not based upon any actual or perceived correlation between a medical condition and abuse;
3. Is otherwise permissible by law and applies in the same manner and to the same extent to all applicants and insureds with a similar medical condition without regard to whether the condition or claim is abuse-related; and
4. Except for claim actions, is based on a determination, made in conformance with sound actuarial principles and supported by actual or reasonably anticipated experience, that there is a correlation between the medical condition and a material increase in insurance risk.

**15A NCAC 07H .0209 COASTAL SHORELINES**

(a) Description. The Coastal Shorelines category includes estuarine shorelines and public trust shorelines. Estuarine shorelines AEC are those non-ocean shorelines extending from the normal high water level or normal water level along the estuarine waters, estuaries, sounds, bays, fresh and brackish waters, and public trust areas as set forth in an agreement adopted by the Wildlife Resources Commission and the Department of Environment and Natural Resources [described in Rule .0206(a) of this Section] for a distance of 75 feet landward. For those estuarine shorelines immediately contiguous to waters classified as Outstanding Resource Waters by the Environmental Management Commission, the estuarine shoreline AEC shall extend to 575 feet landward from the normal high water level or...
(d) Use Standards. Acceptable uses shall be those consistent with the management objectives in Paragraph (c) of this Rule. These uses shall be limited to those types of development activities that will not be detrimental to the public trust rights and the biological and physical functions of the estuarine and ocean system. Every effort shall be made by the permit applicant to avoid, mitigate or reduce adverse impacts of development to estuarine and coastal systems through the planning and design of the development project. In every instance, the particular location, use, and design characteristics shall comply with the general use and specific use standards for coastal shorelines, and where applicable, the general use and specific use standards for coastal wetlands, estuarine waters, and public trust areas described in Rule .0208 of this Section. Development shall be compatible with the following standards:

1. All development projects, proposals, and designs shall preserve and not weaken or eliminate natural barriers to erosion including peat marshland, resistant clay shorelines, and cypress-gum protective fringe areas adjacent to vulnerable shorelines.

2. All development projects, proposals, and designs shall limit the construction of impervious surfaces and areas not allowing natural drainage to only so much as is necessary to adequately service the major purpose or use for which the lot is to be developed. Impervious surfaces shall not exceed 30 percent of the AEC area of the lot, unless the applicant can effectively demonstrate, through innovative design, that the protection provided by the design would be equal to or exceed the protection by the 30 percent limitation. Redevelopment of areas exceeding the 30 percent impervious surface limitation may be permitted if impervious areas are not increased and the applicant designs the project to comply with the intent of the rule to the maximum extent feasible.

3. All development projects, proposals, and designs shall comply with the following mandatory standards of the North Carolina Sedimentation Pollution Control Act of 1973:

   A. All development projects, proposals, and designs shall provide for a buffer zone along the margin of the estuarine water which is sufficient to confine visible siltation within 25 percent of the buffer zone nearest the land disturbing development.

   B. No development project proposal or design shall permit an angle for graded slopes or fill which is greater than an angle which can be retained by vegetative cover or other erosion-control devices or structures.

   C. All development projects, proposals, and designs which involve uncovering more than one acre of land shall plant a ground cover sufficient to restrain erosion within 30 working days of completion of the grading; provided that this shall not apply to clearing land for the purpose of forming a reservoir later to be inundated.

4. Development shall not have a significant adverse impact on estuarine and ocean resources. Significant adverse impacts include development that would directly or indirectly impair water quality standards, increase shoreline erosion, alter coastal wetlands or Submerged Aquatic Vegetation (SAV), deposit spoils waterward of normal water level or normal high water, or cause degradation of shellfish beds.

5. Development shall not interfere with existing public rights of access to, or use of, navigable waters or public resources.
(6) No public facility shall be permitted if such a facility is likely to require public expenditures for maintenance and continued use, unless it can be shown that the public purpose served by the facility outweighs the required public expenditures for construction, maintenance, and continued use. For the purpose of this standard, "public facility" means a project that is paid for in any part by public funds.

(7) Development shall not cause irreversible damage to valuable, historic architectural or archaeological resources as documented by the local historic commission or the North Carolina Department of Cultural Resources.

(8) Established common-law and statutory public rights of access to the public trust lands and waters in estuarine areas shall not be eliminated or restricted. Development shall not encroach upon public accessways nor shall it limit the intended use of the accessways.

(9) Within the AECs for shorelines contiguous to waters classified as Outstanding Resource Waters by the EMC, no CAMA permit shall be approved for any project which would be inconsistent with applicable use standards adopted by the CRC, EMC or MFC for estuarine waters, public trust areas, or coastal wetlands. For development activities not covered by specific use standards, no permit shall be issued if the activity would, based on site-specific information, degrade the water quality or outstanding resource values.

(10) Within the Coastal Shorelines category (estuarine and public trust shoreline AECs), new development shall be located a distance of 30 feet landward of the normal water level or normal high water level, with the exception of the following:

(A) Water-dependent uses as described in Rule 07H .0208(a)(1) of this Section;

(B) Pile-supported signs (in accordance with local regulations);

(C) Post- or pile-supported fences;

(D) Elevated, slatted, wooden boardwalks exclusively for pedestrian use and six feet in width or less. The boardwalk may be greater than six feet in width if it is to serve a public use or need;

(E) Crab Shedders, if uncovered with elevated trays and no associated impervious surfaces except those necessary to protect the pump;

(F) Decks/Observation Decks limited to slatted, wooden, elevated and unroofed decks that shall not singularly or collectively exceed 200 square feet;

(G) Grading, excavation and landscaping with no wetland fill except when required by a permitted shoreline stabilization project. Projects shall not increase stormwater runoff to adjacent estuarine and public trust waters;

(H) Development over existing impervious surfaces, provided that the existing impervious surface is not increased and the applicant designs the project to comply with the intent of the rules to the maximum extent feasible;

(I) Where application of the buffer requirement would preclude placement of a residential structure with a footprint of 1,200 square feet or less on lots, parcels and tracts platted prior to June 1, 1999, development may be permitted within the buffer as required in Subparagraph (d)(10) of this Rule, providing the following criteria are met:

(i) Development shall minimize the impacts to the buffer and reduce runoff by limiting land disturbance to only so much as is necessary to construct and provide access to the residence and to allow installation or connection of utilities such as water and sewer; and

(ii) The residential structure development shall be located a distance landward of the normal high water or normal water level equal to 20 percent of the greatest depth of the lot. Existing structures that encroach into the applicable buffer area may be replaced or repaired consistent with the criteria set out in Rules .0201 and .0211 in Subchapter 07J of this Chapter; and

(J) Where application of the buffer requirement set out in 15A NCAC 07H .0209(d)(10) would preclude placement of a residential structure on an undeveloped lot platted prior to June 1, 1999 that are 5,000 square feet or less that does not require an on-site septic system, or on an undeveloped lot that is 7,500 square feet or less that requires an on-site septic system, development may be...
permitted within the buffer if all the following criteria are met:

(i) The lot on which the proposed residential structure is to be located, is located between:

(I) Two existing waterfront residential structures, both of which are within 100 feet of the center of the lot and at least one of which encroaches into the buffer; or

(II) An existing waterfront residential structure that encroaches into the buffer and a road, canal, or other open body of water, both of which are within 100 feet of the center of the lot;

(ii) Development of the lot shall minimize the impacts to the buffer and reduce runoff by limiting land disturbance to only so much as is necessary to construct and provide access to the residence and to allow installation or connection of utilities;

(iii) Placement of the residential structure and pervious decking may be aligned no further into the buffer than the existing residential structures and existing pervious decking on adjoining lots;

(iv) The first one and one-half inches of rainfall from all impervious surfaces on the lot shall be collected and contained on-site in accordance with the design standards for stormwater management for coastal counties as specified in 15A NCAC 02H.1005. The stormwater management system shall be designed by an individual who meets applicable State occupational licensing requirements for the type of system proposed and approved during the permit application process. If the residential structure encroaches into the buffer, then no other impervious surfaces will be allowed within the buffer; and

(v) The lots must not be adjacent to waters designated as approved or conditionally approved shellfish waters by the Shellfish Sanitation Section of the Division of Environmental Health of the Department of Environment and Natural Resources.

(e) The buffer requirements in Paragraph (d) of this Rule shall not apply to Coastal Shorelines where the Environmental Management Commission (EMC) has adopted rules that contain buffer standards, or to Coastal Shorelines where the EMC adopts such rules, upon the effective date of those rules.

(f) Specific Use Standards for Outstanding Resource Waters (ORW) Coastal Shorelines.

(1) Within the AEC for estuarine and public trust shorelines contiguous to waters classified as ORW by the EMC, all development projects, proposals, and designs shall limit the built upon area in the AEC to no more than 25 percent or any lower site specific percentage as adopted by the EMC as necessary to protect the exceptional water quality and outstanding resource values of the ORW, and shall:

(A) have no stormwater collection system;

(B) provide a buffer zone of at least 30 feet from the normal high water line or normal water line;

(C) otherwise be consistent with the use standards set out in Paragraph (d) of this Rule.

(2) Development (other than single-family residential lots) more than 75 feet from the normal high water line or normal water line but within the AEC as of June 1, 1989 shall be permitted in accordance with rules and standards in effect as of June 1, 1989 if:

(A) the development has a CAMA permit application in process, or

(B) the development has received preliminary subdivision plat approval or preliminary site plan approval under applicable local ordinances, and in which financial resources have been invested in design or improvement.

(3) Single-family residential lots that would not be buildable under the low-density standards
defined in Paragraph (f)(1) of this Rule may be
developed for single-family residential
purposes so long as the development complies
with those standards to the maximum extent
possible.

(4) For an ORW nominated subsequent to June 1,
1989, the effective date in Paragraph (f)(2) of
this Rule shall be the dates of nomination by
the EMC.

(g) Urban Waterfronts.

(1) Description. Urban Waterfronts are waterfront
areas, not adjacent to Outstanding Resource
Waters, in the Coastal Shorelines category that
lie within the corporate limits of any
municipality duly chartered within the 20
coastal counties of the state. In determining
whether an area is an urban waterfront, the
following criteria shall be met as of the
effective date of this Rule:

(A) The area lies wholly within the
corporate limits of a municipality; and

(B) the area has a central business district
or similar commercial zoning
classification where there is minimal
undeveloped land, mixed land uses,
and urban level services such as
water, sewer, streets, solid waste
management, roads, police and fire
protection, or in an area with an
industrial or similar zoning
classification adjacent to a central
business district.

(2) Significance. Urban waterfronts are
recognized as having cultural, historical and
economic significance for many coastal
municipalities. Maritime traditions and
longstanding development patterns make these
areas suitable for maintaining or promoting
dense development along the shore. With
proper planning and stormwater management,
these areas may continue to preserve local
historical and aesthetic values while enhancing
the economy.

(3) Management Objectives. To provide for the
continued cultural, historical, aesthetic and
economic benefits of urban waterfronts.
Activities such as in-fill development, reuse
and redevelopment facilitate efficient use of
already urbanized areas and reduce
development pressure on surrounding areas, in
an effort to minimize the adverse cumulative
environmental effects on estuarine and ocean
systems. While recognizing that opportunities
to preserve buffers are limited in highly
developed urban areas, they are encouraged
where practical.

(4) Use Standards:

(A) The buffer requirement pursuant to
Subparagraph (d)(10) of this Rule is
not required for development within
Urban Waterfronts that meets the
following standards:

(i) The development must be
consistent with the locally
adopted land use plan;

(ii) Impervious surfaces shall
not exceed 30 percent of the
AEC area of the lot. Impervious
surfaces may exceed 30 percent if
the applicant can effectively
demonstrate, through a
stormwater management
system design, that the
protection provided by the
design would be equal to or
exceed the protection by the
30 percent limitation. The
stormwater management
system shall be designed by
an individual who meets any
North Carolina occupational
licensing requirements for
the type of system proposed
and approved during the
permit application process.
Redevelopment of areas
exceeding the 30 percent
impervious surface
limitation may be permitted
if impervious areas are not
increased and the applicant
designs the project to
comply with the intent of the
rule to the maximum extent
feasible; and

(iii) The development shall meet
all state stormwater
