Reason for Proposed Action: The proposed change removes the requirement for a notary seal on the Non-Collusion Affidavit, Debarment Certification and Gift Ban Certification form. There are very few notaries who sign documents with a digital signature, which forces the apparent lowest responsible bidder to paper documentation. The proposed changes to 19A NCAC 02D .0818 provides consistency as all forms will be supplied electronically. The requested changes provide a seamless submittal of documentation for award of contract.

Reason for Proposed Action: There are many post-graduate educational programs available to chiropractic physicians, and these programs vary in length, academic rigor and value to patients. Physicians who earn certification upon completing program requirements often tout these credentials in advertising, but consumers have no way of determining a credential's legitimacy. The proposed rule establishes minimum standards for post-graduate educational programs below the level of diplomat and prohibits chiropractors from advertising credentials bestowed by non-compliant programs.

(E) A building or other structure greater than or equal to 40,000 square feet but less than 60,000 square feet requires a minimum setback of 150 feet or 75 times the shoreline erosion rate, whichever is greater;
(F) A building or other structure greater than or equal to 60,000 square feet but less than 80,000 square feet requires a
minimum setback of 160 feet or 80 times the shoreline erosion rate, whichever is greater;

(G) A building or other structure greater than or equal to 80,000 square feet but less than 100,000 square feet requires a minimum setback of 170 feet or 85 times the shoreline erosion rate, whichever is greater;

(H) A building or other structure greater than or equal to 100,000 square feet requires a minimum setback of 180 feet or 90 times the shoreline erosion rate, whichever is greater;

(I) Infrastructure that is linear in nature such as roads, bridges, pedestrian access such as boardwalks and sidewalks, and utilities providing for the transmission of electricity, water, telephone, cable television, data, storm water, and sewer requires a minimum setback of 60 feet or 30 times the shoreline erosion rate, whichever is greater;

(J) Parking lots greater than or equal to 5,000 square feet require a setback of 120 feet or 60 times the shoreline erosion rate, whichever is greater;

(K) Notwithstanding any other setback requirement of this Subparagraph, a building or other structure greater than or equal to 5,000 square feet in a community with a static line exception in accordance with 15A NCAC 07J .1200 requires a minimum setback of 120 feet or 60 times the shoreline erosion rate in place at the time of permit issuance, whichever is greater. The setback shall be measured landward from either the static vegetation line, the vegetation line, or measurement line, whichever is farthest landward; and

(L) Notwithstanding any other setback requirement of this Subparagraph, replacement of single-family or duplex residential structures with a total floor area greater than 5,000 square feet, and commercial and multi-family residential structures with a total floor area no greater than 10,000 square feet, shall be allowed provided that the structure meets the following criteria:

(i) the structure was originally constructed prior to August 11, 2009;

(ii) the structure as replaced does not exceed the original footprint or square footage;

(iii) it is not possible for the structure to be rebuilt in a location that meets the ocean hazard setback criteria required under Subparagraph (a)(5) of this Rule;

(iv) the structure as replaced meets the minimum setback required under Part (a)(5)(A) of this Rule; and

(v) the structure is rebuilt as far landward on the lot as feasible.

(6) If a primary dune exists in the AEC on or landward of the lot where the development is proposed the development shall be landward of the crest of the primary dune, the ocean hazard setback, or development line, whichever is farthest from vegetation line, static vegetation line, or measurement line, whichever is applicable. For existing lots, however, where setting the development landward of the crest of the primary dune would preclude any practical use of the lot, development may be located oceanward of the primary dune. In such cases, the development may be located landward of the ocean hazard setback, but shall not be located on or oceanward of a frontal dune or the development line. The words "existing lots" in this Rule shall mean a lot or tract of land which, as of June 1, 1979, is specifically described in a recorded plat and cannot be enlarged by combining the lot or tract of land with a contiguous lot(s) or tract(s) of land under the same ownership.

(7) If no primary dune exists, but a frontal dune does exist in the AEC on or landward of the lot where the development is proposed, the development shall be set landward of the frontal dune, ocean hazard setback, or development line, whichever is farthest from the vegetation line, static vegetation line, or measurement line, whichever is applicable.

(8) If neither a primary nor frontal dune exists in the AEC on or landward of the lot where development is proposed, the structure shall be landward of the ocean hazard setback or development line, whichever is more restrictive.

(9) Structural additions or increases in the footprint or total floor area of a building or structure represent expansions to the total floor area and shall meet the setback requirements established in this Rule and 15A NCAC 07H .0309(a). New development landward of the applicable setback may be cosmetically, but shall not be
Established common law and statutory public rights of access to and use of public trust lands and waters in ocean hazard areas shall not be eliminated or restricted. Development shall not encroach upon public accessways, nor shall it limit the intended use of the accessways.

Beach fill as defined in Rule .0305(a)(7) of this Section, represents a temporary response to coastal erosion, and compatible beach fill as defined in 15A NCAC 07H .0312 may be expected to erode at least as fast as, if not faster than, the pre-project beach. Furthermore, there is no assurance of future funding or beach-compatible sediment for continued beach fill projects and project maintenance. A vegetation line that becomes established oceanward of the pre-project vegetation line in an area that has received beach fill may be more vulnerable to natural hazards along the oceanfront if the beach fill project is not maintained. A development setback measured from the vegetation line may provide less protection from ocean hazards. Therefore, development setbacks in areas that have received large-scale beach fill as defined in 15A NCAC 07H .0305 shall be measured landward from the static vegetation line as defined in this Section, unless a development line has been approved by the Coastal Resources Commission in accordance with 15A NCAC 07J .1300.

In order to allow for development landward of the large-scale beach fill project that cannot meet the setback requirements from the static vegetation line, but can or has the potential to meet the setback requirements from the vegetation line set forth in Subparagraphs (a)(1) and (a)(5) of this Rule, a local government, group of local governments involved in a regional beach fill project, or qualified "owners' association" defined in G.S. 47F-1-103(3) that has the authority to approve the locations of structures on lots within the territorial jurisdiction of the association, and has jurisdiction over at least one mile of ocean shoreline, may petition the Coastal Resources Commission for a "static line exception" in accordance with 15A NCAC 07J .1200. The static line exception applies to development of property that lies both within the jurisdicational boundary of the petitioner and the boundaries of the large-scale beach fill project. This static line exception shall also allow development greater than 5,000 square feet to use the setback provisions defined in Part (a)(5)(K) of this Rule in areas that lie within the jurisdicational boundary of the petitioner, as well as the boundaries of the large-scale beach fill project.

The procedures for a static line exception request are defined in 15A NCAC 07J .1200. If the request is approved, the Coastal Resources Commission shall allow development setbacks to be measured from a vegetation line that is oceanward of the static vegetation line under the following conditions:

(A) Development meets all setback requirements from the vegetation line defined in Subparagraphs (a)(1) and (a)(5) of this Rule;

(B) Development setbacks shall be calculated from the shoreline erosion rate in place at the time of permit issuance;

(C) No portion of a building or structure, including roof overhangs and elevated portions that are cantilevered, knee braced, or otherwise extended beyond the support of pilings or footings, extends oceanward of the landward-most adjacent building or structure. When the configuration of a lot precludes the placement of a building or structure in line with the landward-most adjacent building or structure, an average line of construction shall be determined by the Division of Coastal Management on a case-by-case basis in order to determine an ocean hazard setback that is landward of the vegetation line, a distance no less than 30 times the shoreline erosion rate or 60 feet, whichever is greater;

(D) With the exception of swimming pools, the development defined in Rule .0309(a) of this Section shall be allowed oceanward of the static vegetation line; and

(E) Development shall not be eligible for the exception defined in Rule .0309(b) of this Section.

(b) In order to avoid weakening the protective nature of ocean beaches and primary and frontal dunes, no development shall be permitted that involves the removal or relocation of primary or frontal dune sand or vegetation thereon that would adversely affect the integrity of the dune. Other dunes within the ocean hazard area shall not be disturbed unless the development of the property is otherwise impracticable. Any disturbance of these other dunes shall be allowed only to the extent permitted by 15A NCAC 07H .0308(b).

(c) Development shall not cause irreversible damage to historic architectural or archaeological resources as documented by the local historic commission, the North Carolina Department of Natural and Cultural Resources, or the National Historical Registry.

(d) Development shall comply with minimum lot size and setback requirements established by local regulations.
(e) Mobile homes shall not be placed within the high hazard flood area unless they are within mobile home parks existing as of June 1, 1979.

(f) Development shall comply with the general management objective for ocean hazard areas set forth in 15A NCAC 07H .0303.

(g) Development shall not interfere with legal access to, or use of, public resources, nor shall such development increase the risk of damage to public trust areas.

(h) Development proposals shall incorporate measures to avoid or minimize adverse impacts of the project. These measures shall be implemented at the applicant's expense and may include actions that:

(1) minimize or avoid adverse impacts by limiting the magnitude or degree of the action;

(2) restore the affected environment; or

(3) compensate for the adverse impacts by replacing or providing substitute resources.

(i) Prior to the issuance of any permit for development in the ocean hazard AECs, there shall be a written acknowledgment from the applicant to the Division of Coastal Management that the applicant is aware of the risks associated with development in this hazardous area and the limited suitability of this area for permanent structures. By granting permits, the Coastal Resources Commission does not guarantee the safety of the development and assumes no liability for future damage to the development.

(j) All relocation of structures requires permit approval. Structures relocated with public funds shall comply with the applicable setback line as well as other applicable AEC rules. Structures including septic tanks and other essential accessories relocated entirely with non-public funds shall be relocated the maximum feasible distance landward of the present location. Septic tanks may not be located oceanward of the primary structure. All relocation of structures shall meet all other applicable local and state rules.

(k) Permits shall include the condition that any structure shall be relocated or dismantled when it becomes imminently threatened by changes in shoreline configuration as defined in 15A NCAC 07H .0308(a)(2)(B). Any such structure shall be relocated or dismantled within two years of the time when it becomes imminently threatened, and in any case upon its collapse or subsidence. However, if natural shoreline recovery or beach fill takes place within two years of the time the structure becomes imminently threatened, so that the structure is no longer imminently threatened, then it need not be relocated or dismantled at that time. This permit condition shall not affect the permit holder's right to seek authorization of temporary protective measures allowed under 15A NCAC 07H .0308(a)(2).

(b) The holder of license as a State and local government Heating Group 1 Technician, Heating Group 2 Technician, Heating Group 3 Technician, or Plumbing Technician shall be a full-time employee of a State or local government agency.

(c) A licensed State and local government technician licensee shall ensure that a permit is obtained from the appropriate State or local Code Enforcement official before commencing any work for which a license is required by the Board. The licensee shall also ensure that a request for final inspection of the work for which a license is required is made within 10 days of the earlier of the system being made operational or placed in service, absent agreement with the appropriate State or local Code Enforcement official. Absent agreement with the local Code Enforcement official the licensee shall not be relieved of responsibility to the Board to arrange inspection until a certificate of compliance or the equivalent is obtained from the appropriate State or local code enforcement official or the licensee has documentary evidence of his effort to obtain the same.

(d) The failure of a licensee to comply with the permit and inspection obligations outlined in this Rule shall be considered by the Board as evidence of incompetence or misconduct in the use of license from the Board.

(e) A licensed State and local government technician licensee shall be responsible for general supervision to the extent of his qualifications, compliance with all applicable codes and standards, and assurance that permits and inspections are obtained.

(f) The "general supervision" required by G.S. 87-26 is the degree of supervision necessary and sufficient to ensure that the work is performed in a workmanlike manner and with the requisite skill and that the installation is made in accordance with applicable codes, rules and manufacturer installation instructions and industry practice. General supervision requires that review of the work done pursuant to the State and local government technician license be performed by the State and local government technician licensee while the work is in progress.

(g) In each State or local government agency location, branch, or facility of any kind from which work requiring a license pursuant to G.S. 87, Article 2 is carried out there shall be on duty the lesser of 1500 hours annually, or all hours during which the activities described herein are carried out, at least one licensee who holds the appropriate State and local government technician license in the classification required for the work being proposed or performed, whose license is listed in the name of the particular State or local government agency at that location, and who is engaged in the work of the State or local government at the agency location or at an agency job site and who has the responsibility to exercise general supervision over the work and who has been empowered to act for the State or local government agency, as defined in Rule .0505 of this Chapter, of all work falling within his or her license qualification. Evidence of compliance shall be required as a condition of renewal or retention of license and falsification shall constitute fraud in obtaining license. The standards set forth in Rule .0512 of this Chapter shall be applied.

(h) An unlicensed person employed by a State and local government agency licensed and supervised pursuant to G.S. 87, Article 2 shall not be required to have a license and shall not be subject to an action for injunctive relief brought by the Board if the unlicensed person is a bona-fide employee of the State and local government.

(b) A licensee may be listed on only one contractor license at any given time, whether the license is issued in the name of the individual or in the name of a firm; provided, however, that the Fire Sprinkler Maintenance Technician qualification and the State and local government technician qualification may be listed separately in the name of the employer to which restricted.

(c) The holder of qualification as a contractor may, upon deletion of his name and qualifications from a firm license, reinstate his personal license, either as an individual or in the name of some other corporation, partnership, or business that has a trade name, upon compliance with G.S. 87-26.
