The Rules Review Commission staff has completed its review of this rule prior to the Commission’s next meeting. The Commission has not yet reviewed this rule and therefore there has not been a determination as to whether the rule will be approved. (a) All commercial and recreational licenses issued under Article 14A, Article 14B, and Article 25A of Chapter 113 are subject to suspension and revocation.

(b) A conviction resulting from being charged by an inspector under G.S. 14-32, 14-33, 14-399 shall be deemed a conviction for license suspension or revocation purposes.

(c) Upon receipt of notice of a licensee’s conviction as specified in G.S. 113-171 or a conviction as specified in Paragraph (b) of this Rule, the Fisheries Director shall determine whether it is a first, a second, a third, or a fourth conviction. For a second conviction, the Fisheries Director shall suspend all licenses issued to the licensee for a period of 30 days; for a third conviction, the Fisheries Director shall suspend all licenses issued to the licensee for a period of 90 days; for a fourth or subsequent conviction, the Fisheries Director shall revoke all licenses issued to the licensee, except:

(4) For a conviction under G.S. 14-32 or 14-33, when the offense was committed against a marine fisheries inspector, the Fisheries Director shall revoke all licenses issued to the licensee; the former licensee shall not be eligible to apply for reinstatement of a revoked license or for any additional license authorized in Article 14A, Article 14B and Article 25A of Chapter 113 for a period of two years.

(d) After the Fisheries Director determines a conviction requires a suspension or revocation of the licenses of a licensee, the Fisheries Director shall cause the licensee to be served with written notice of suspension or revocation. The written notice may be served upon any responsible individual affiliated with the corporation, partnership, or association where the licensee is not an individual. The notice of suspension or revocation shall be served by an inspector or other agent of the Department or by certified mail, must state the ground upon which it is based, and takes effect immediately upon service. 15A NCAC 03O .0201  STANDARDS AND REQUIREMENTS FOR SHELLFISH BOTTOM LEASES
AND FRANCHISES AND WATER COLUMN LEASES

(a) All areas of the public bottoms underlying coastal fishing waters shall meet the
following standards and requirements, in addition to the standards in G.S. 113-202 in order to be deemed
suitable for leasing for shellfish cultivation purposes:

(1) The proposed lease area must not contain a natural shellfish bed which is defined as "natural
shellfish bed", as defined in G.S. 113-201.1 or have 10 bushels or more of shellfish per acre;

(2) The proposed lease area must not be closer than 100 feet to a developed shoreline, except
no minimum setback is required when the area to be leased borders the applicant's property or the
property of riparian owners, "riparian owners", as defined in G.S. 113-201.1 who have consented in
a notarized statement. In statement, or is in an area bordered by undeveloped shoreline, no minimum
setback is required.

(3) The proposed lease area shall not be less than one-half acre and shall not exceed five acres
for all areas except those areas open to the mechanical harvest of oysters where proposed lease area
shall not exceed 10 acres.

This Subparagraph shall not be applied to reduce any holdings as of July 1, 1983.

(b) Persons holding five or more acres under shellfish lease or franchise shall meet the standards established in
Paragraph (c) of this Rule prior to acceptance of applications for additional shellfish lease acreage.

To be deemed suitable for leasing for aquaculture purposes, water columns superjacent to leased bottom shall
meet the standards in G.S. 113-202.1 and water columns superjacent to franchises recognized pursuant to G.S. 113-
206 shall meet the standards in G.S. 113-202.2.

(c) Franchises: To avoid termination, franchises recognized pursuant to G.S. 113-206 and shellfish bottom leases shall
meet the following standards in addition to the standards in G.S. 113-202. In order to avoid termination, franchises
and shellfish bottom leases shall meet the following requirements, in addition to the standards in G.S. 113-202:

(1) Produce and market 10 bushels of shellfish per acre per year;

(2) Plant 25 bushels of seed shellfish per acre per year or 50 bushels of cultch per acre per year,
or a combination of cultch and seed shellfish where the percentage of required cultch planted and
the percentage of required seed shellfish planted totals at least 100 percent.

(d) To avoid termination, water column leases shall:

(1) Produce and market 40 bushels of shellfish per acre per year;

(2) Plant 100 bushels of cultch or seed shellfish per acre per year.

(e) The following standards shall be applied to determine compliance with Subparagraphs (1) and (2) of Paragraph
Paragraphs (c) and (d) of this Rule:

(1) Only shellfish marketed, planted, or produced or marketed according to the definitions as defined
in 15A NCAC 03I .0101 as the fishing activities "shellfish marketing from leases and franchises".
"shellfish planting effort on leases and franchises", or "shellfish production on leases and franchises"
shall be submitted on production/utilization reporting forms as set forth in Rule .0207 of this Section
for shellfish leases and franchises.

(2) If more than one shellfish lease or franchise is used in the production of shellfish, one of the leases
or franchises used in the production of the shellfish must be designated as the producing lease
or franchise for those shellfish. Each bushel of shellfish may be produced by only one shellfish
lease or franchise. Shellfish transplanted between leases or franchises may be credited as planting
effort on only one lease or franchise.

(3) Production and marketing information and planting effort information shall be compiled and
averaged separately to assess compliance with the standards. The lease or franchise
must meet both the production requirement and the planting effort requirement within the dates
set forth in G.S. 113-202.1 and 202.2 to be judged in compliance with these standards for
shellfish bottom leases. The lease or franchise shall meet either the production requirement or the
planting effort requirement within the dates set forth in G.S. 113-202.1 and 202.2 to be deemed in
compliance for water column leases.

(4) All bushel measurements shall be in standard U.S. bushels.

(5) In determining production and marketing averages and planting effort averages for information not
reported in bushel measurements, the following conversion factors shall be used:

(A) 300 oysters, 400 clams, or 400 scallops equal one bushel; and

(B) 40 pounds of scallop shell, 60 pounds of oyster shell, 75 pounds of clam shell and shell, or
90 pounds of fossil stone equal one bushel.

(5) In the event that a portion of an existing lease or franchise is obtained by a new owner, the production
history for the portion obtained shall be a percentage of the originating lease or franchise production
equal to the percentage of the area of lease or franchise site obtained to the area of the originating
lease or franchise.

(6) Production and marketing rate averages shall be computed irrespective of transfer of the lease or
franchise. The production and marketing rates shall be averaged for the following situations using the time periods described:

(A) for an initial bottom lease or franchise, over the consecutive full calendar years remaining
on the bottom lease or franchise contract after December 31 following the second
anniversary of the initial bottom leases and franchises lease or franchise;

(B) for a renewal bottom lease or franchise, over the consecutive full calendar years beginning
January 1 of the final year of the previous bottom lease or franchise term and ending
December 31 of the final year of the current bottom lease contract for renewal leases or
franchise contract:
(C) for a water column lease, over the first five-year period for an initial water column lease and over the most recent five-year period thereafter for a renewal water column lease; or

(D) for a bottom lease or franchise issued an extension period under Rule .0208 of this Section, over the most recent five-year period.

Production and marketing rate averages shall be computed irrespective of transfer of the shellfish lease or franchise.

(7) All bushel measurements shall be in U.S. Standard Bushels.

(7) In the event that a portion of an existing lease or franchise is obtained by a new owner, the production history for the portion obtained shall be a percentage of the originating lease or franchise production equal to the percentage of the area of lease or franchise site obtained to the area of the originating lease or franchise.

(f) Persons holding five or more acres under all shellfish bottom leases and franchises combined shall meet the requirements established in Paragraph (c) of this Rule prior to the Division of Marine Fisheries accepting applications for additional shellfish lease acreage.

(e) Water columns superjacent to leased bottoms shall meet the standards in G.S. 113-202.1 in order to be deemed suitable for leasing for aquaculture purposes.

(f) Water columns superjacent to franchises recognized pursuant to G.S. 113-206 shall meet the standards in G.S. 113-202.2 in order to be deemed suitable for leasing for aquaculture purposes.

(g) Water column leases must produce and market 40 bushels of shellfish per acre per year to meet the minimum commercial production requirement or plant 100 bushels of cultch or seed shellfish per acre per year to meet commercial production by planting effort. The standards for determining production and marketing averages and planting effort averages shall be the same for water column leases as for bottom leases and franchises set forth in Paragraph (d) of this Rule except that either the produce and market requirement or the planting requirement must be met.
