

**Rules that Affected Local
Governments in
SFY 2006-2007**

and

**Schedule of Rule Actions
Anticipated in
SFY 2008-2009**

Prepared by the
North Carolina Office of State Budget and
Management,
Office of the Governor

March, 2008

2008 Rules that Affected Local Governments and Schedule of Anticipated Rule Actions

On May 17, 1994, Governor James B. Hunt Jr. issued Executive Order No. 49 entitled “Fiscal Notes on Administrative Rules Affecting Local Governments.” The Executive Order set forth policies and procedures for state agencies to follow when proposing permanent rules with an impact on local governments. In 1995, the General Assembly incorporated these policies as well as other changes in the Administrative Procedure Act (APA). The revised APA enables local governments to be more involved in estimating the fiscal impact of permanent rules on local budgets. State agencies also must be more aware of a proposed rule’s impact on local governments.

Each year, the North Carolina Office of State Budget and Management (OSBM) prepares an schedule of rule actions anticipated in the upcoming fiscal year, as required in the APA, G.S. 150B-21.28 (see Appendix). The APA also requires OSBM to summarize the rules adopted during the preceding fiscal year that affect local governments. OSBM is required to provide a copy of this report to the Governor, the General Assembly, the North Carolina Association of County Commissioners, and the North Carolina League of Municipalities.

Rule Changes Adopted in FY 2006-2007 Impacting Local Governments

Department of Environment and Natural Resources

Rule Title: Annual Emissions Reporting

Division: Division of Air Quality
Citation(s): 15A NCAC 2Q .0207

Rule Changes Anticipated in FY 2008-2009

Board of Sanitarian Examiners

Rule Title: Fee Increases

Division:

Citation(s): 21 NCAC 62 .0405

Contact Name: Malcolm Blalock

Contact Phone: 919-341-2739

Rule Summary: The proposal intends to increase several existing fees and create one new fee. Specifically, it is proposed to change (in .0405 (1)) to increase the fee for applications from \$35.00 to \$50.00. In paragraph .0405 (2), the proposal would establish a new \$50.00 administrative fee for taking the examination. In paragraph .0405 (3) increase the fee for reciprocity from \$35.00 to \$50.00. In paragraph .0405 (4) increase the fee for annual renewal from \$35.00 to \$50.00. The Board is seeking legislation in the 2008 Short Session to allow increases in fees, along with other technical changes. The current fees have not changed since 1982, and expenses are currently exceeding income.

Department of Environment and Natural Resources

Rule Title: Title V Annual Permit Fees
Division: Division of Air Quality
Citation(s): 15A NCAC 02Q .0203 and 02Q .0204
Contact Name: Mike Abraczinskas
Contact Phone: 919-715-3743
Rule Summary: This rule amendment raises the Title V annual permit fees and tonnage fees on a phased approach through 2011. During the phase-in period, no inflation adjustments will be made to the Title V fees. There are three State government facilities (steam plants at universities) that hold Title V permits. There are six local government facilities (typically city/county landfills) that hold Title V permits.
Federal Citation (if rule required by federal law): The Federal Clean Air Act requires that Title V expenses be covered by Title V fees in Section 502(b)(3)(A).

Rule Title: Conditional Exception to the Static Line
Division: Division of Coastal Management
Citation(s): 15A NCAC 07J .1200
Contact Name: Tancred Miller
Contact Phone: 252-808-2808
Rule Summary: The Coastal Resources Commission currently has rules requiring the creation of a static development setback line along oceanfront beaches that have undergone large-scale nourishment projects. The Commission is revising those rules to allow for a conditional exception to the static line if a town meets certain requirements. 7J.1200 is being adopted to define those requirements, as well as the procedures for requesting the exception, and conditions under which the exception may expire or be revoked.

Rule Title: **New fee for mammography facilities**
Division: Division of Environmental Health
Citation(s): 15A NCAC 11 .1105
Contact Name: Jon Granger
Contact Phone: 919-571-4141
Rule Summary: Although we are creating a new fee for mammography facilities, we expect the facilities to have at least a 20% reduction in their total fees. Our new fees will replace the current fees paid by the facility to the FDA which are higher than we expect to charge. We have state government facilities that will be impacted by this change. There should be no economic impact since all facilities have to comply with these rules on the federal level.

Rule Title: **Tracking of certain radioactive sources via web-based database system.**
Division: Division of Environmental Health
Citation(s): 15A NCAC 11 .1654
Contact Name: J. Marion Eaddy III, MSEH, Health Physicist
Contact Phone: 919.571.4141 ext. 236
Rule Summary: System will be developed by Federal Government (US NRC) and available to NC licensees at no charge. Unsure how many hours will be required to comply with this regulation. NRC's regulatory analysis (71 FR65685) indicates most of the burden will fall on manufacturers of these sources. There are no licensees in NC who manufacture these sources; therefore, the cost to licensees will be directly related to the amount of time entering information in to the tracking system and performing an annual reconciliation of the data.

Division: Division of Environmental Health
Citation(s): 15A NCAC 11 .0338
Contact Name: J. Marion Eaddy III, MSEH, Health Physicist
Contact Phone: 919.571.4141 ext. 236
Rule Summary: Adding additional security requirements for portable nuclear gauge licensees. NC DOT has a number of the portable gauge devices for use in road construction; county health departments and city street maintenance departments may have these devices, though the number is declining. NRC estimated in their analysis (70 FR 2001) that the cost would average to \$200.00 per gauge.

Rule Title: Stormwater controls on new development activities in Jordan watershed

Division: Division of Water Quality

Citation(s): 15A 02B .0265

Contact Name: Rich Gannon or Jason Robinson

Contact Phone: 919-733-5083 x356 or x537

Rule Summary: Would require all local governments in the Jordan watershed to develop and implement programs to require stormwater controls on new development activities to meet sub watershed nutrient loading rate targets. Developers would control nutrient export to minimum levels onsite, and could meet remaining reduction needs through in-lieu fee payment to EEP, or to local governments with a Division-approved local offset plan. Control of flows for stream protection would also be required. Development in existing water supply watersheds would also be required to comply with density-related treatment thresholds and density caps designed to protect local water supplies where they are more stringent. Within one year of effective date, the Division would submit a model local program to the Commission for approval. Within another six months, local governments would submit programs for Division review and subsequent Commission approval. Within two and a half years after the effective date, local programs would be implemented. Annual reports would be required.

Rule Title: Loading reduction measures on existing developed lands
Division: Division of Water Quality
Citation(s): 15A NCAC 02B .0266
Contact Name: Rich Gannon or Jason Robinson
Contact Phone: 919-733-5083 x356 or x537
Rule Summary: Would require all local governments to implement loading reduction measures on existing developed lands toward long-term load reduction targets for those lands. They would conduct feasibility studies, and then submit program proposals for Division and Commission approval within three years after effective date. Programs would propose implementation rate, nature and overall timeframes envisioned. Programs would be implemented within four years of rule effective date. Programs for public education and illegal discharge detection and elimination are to be implemented within two and a half years. Annual reports are required.

Rule Title: Goose Creek Threatened and Endangered Species Site Specific Management Plan
Division: Division of Water Quality
Citation(s): 15A NCAC 2B
Contact Name: Jeff Manning
Contact Phone: 733-5083, ext 579
Rule Summary: Goose Creek Threatened and Endangered Species Site Specific Management Plan, requires stream protection via buffers and stormwater control, prohibits new or expanded discharges, and prohibits ammonia toxicity to the endangered species.

Federal Citation (if rule required by federal law):

Rule Title: Existing vegetated riparian areas in the Jordan watershed
Division: Division of Water Quality
Citation(s): 15A NCAC 02B .0267
Contact Name: Rich Gannon or Jason Robinson
Contact Phone: 919-733-5083 x356 or x537
Rule Summary: Would require local governments to protect existing vegetated riparian areas 50 feet wide adjacent to intermittent and perennial streams, lakes, and ponds in the Jordan watershed. The first 30 feet adjacent to waters would be largely undisturbed forest, while the outer 20 feet could be managed vegetation. Existing, ongoing activities within these buffers could continue, while a change in land use would invoke the protections. Certain uses of land within the buffer are identified as exempt, allowable, or allowable with mitigation, while uses not listed would be prohibited.

Rule Title: Point source annual N and P mass loading goals
Division: Division of Water Quality
Citation(s): 15A NCAC 02B .0270
Contact Name: Rich Gannon or Jason Robinson
Contact Phone: 919-733-5083 x356 or x537
Rule Summary: Would distribute the entire point source annual N and P mass loading goals for each arm in the form of annual mass allocations to existing dischargers within each of the three sub watersheds. Discharge concentration equivalents at full flow range from 3.04 mg/L TN and 0.23 mg/L TP in the Upper New Hope Arm to 5.30 mg/L TN and 0.67 mg/L TP in the Haw River Arm. By comparison, requirements for lower Neuse dischargers equate to 3.71 mg/L TN and 2.0 mg/L TP. As in the Neuse, includes provisions for new and expanding dischargers, an option for group compliance and in-lieu offset fees to EEP for exceeding the cap, and an option for transfer of allocation among individual dischargers. It would also require optimization of existing facilities, and would improve protections against localized water quality degradation.

Rule Title: **Reclassify surface waters**
 Division: Division of Water Quality
 Citation(s): 15A NCAC 2B
 Contact Name: Elizabeth Kountis
 Contact Phone: 733-5083, ext 369
 Rule Summary: Reclassify surface waters for various uses including Outstanding Resource Waters, High Quality Waters, Trout waters, and Water Supply watersheds. Reclassifications require additional protections implemented via DOT permits, through local ordinance watershed planning, and/or through state permitting actions.

Rule Title: Concealed handguns for retired law enforcement officers
Division: Criminal Justice Education and Training Standards Commission
Citation(s): 12NCAC 9H new section
Contact Name: Teresa Marrella
Contact Phone: 919-716-6470
Rule Summary: Federal law requires us to create a program to allow retired law enforcement officers to qualify annually with a handgun that they wish to carry concealed. We have been given legislative authority to create the program and to establish reasonable fees for it. It will impact State government at the Dept of Justice, Criminal Justice Standards Division, because we must assign a staff member to manage the program.

Rule Title: Public Safety Divers
Division: Occupational Safety & Health Division
Citation(s): 13 NCAC 07F .0800 et seq.
Contact Name: Erin T. Gould
Contact Phone: (919) 733-7885
Rule Summary: The proposed rule will set forth standards applicable to Public Safety Divers in order to provide a means of regulation for the same. Currently, there are federal standards applicable to commercial diving which exclude public safety operations and adoption of the proposed state specific rules will provide a safer, consistently regulated industry. The proposed rule will require unknown expenditures for the requisition of equipment, medical testing of employees, and additional training.

Appendix: North Carolina Statute Requiring this Report

§ 150B-21.28. Role of the Office of State Budget and Management.

The Office of State Budget and Management shall:

- (1) Compile an annual summary of the projected fiscal impact on units of local government of State administrative rules adopted during the preceding fiscal year.
- (2) Compile from information provided by each agency schedules of anticipated rule actions for the upcoming fiscal year.
- (3) Provide the Governor, the General Assembly, the North Carolina Association of County Commissioners, and the North Carolina League of Municipalities with a copy of the annual summary and schedules by no later than March 1 of each year.
