This fiscal note analysis pertains to a series of proposed amendments to or adoptions of rules that the Wildlife Resources Commission (WRC) voted to take to public hearing. The purpose of each proposed rule amendment or adoption is set forth below.

For the following 9 rules the WRC intends to notice for permanent amendment, the WRC determined the following fiscal impact:

**Impact:**
- Local Funds: No
- State Funds: Yes (minimal)
- Substantial Economic Impact: Does not meet $1,000,000 threshold

**Authority:** G.S. § 113 - 134

For reasons which are outlined below, WRC believes that these rule changes do not meet the criteria requiring a fiscal note pursuant to G.S. § 150B-21.4. An analysis of the proposed changes for each rule follows.
PROPOSED RULE CHANGES

Background
The wildlife resources of the State belong to the people of the State as a whole, including the enjoyment of these resources. (G.S. § 113-131(a)). WRC is tasked with the conservation of wildlife resources of the State (G.S. § 143-239). This mission responsibility includes managing as equitably as possible the various competing interests regarding these resources, including the use and take of such resources. (G.S. § 113-131.1(a)) The statutes governing wildlife resources are found in Chapter 113, Subchapter IV of the General Statutes, and WRC has been granted rulemaking authority to implement the provisions of these statutes. (G.S. § 113-134)

As part of its mission, WRC conducts an annual review of its fish, wildlife, boating safety, and other regulations to determine whether such rules need to be adjusted in order to accomplish the objectives of: managing wildlife resources through a biologically sustainable harvest of such resources by hunters, trappers and anglers consistent with sound conservation objectives; ensuring the safety of the boating public; managing WRC-owned land for the conservation of wildlife resources and the enjoyment of the public; and implementing legislative directives. This review generally begins internally in January, and culminates with rule proposals in November. The proposals are taken to at least nine public hearings in January, and those proposals subsequently adopted or amended by the WRC are reviewed by the Rules Review Commission in March.

A summary of the proposed rule amendments is shown below, with the full text of each included in Appendix A.

15A NCAC 10C .0205

Description and Justification

The proposed changes to this rule modify the list of waters designated as Public Mountain Trout Waters (PMTW) and further classified as Hatchery Supported, Delayed Harvest, or Wild Trout Waters. Waters are also removed from the PMTW to reflect changes in landmarks and partnerships with private landowners. The changes would result in one new reach, the removal of one reach, and two boundary clarifications. The reach to be removed is not being actively stocked and is not currently accessible to the public. Overall the changes would result in a net loss of approximately 0.1 stream mile. Additional changes to this rule address technical corrections.

Fiscal Impact

Overall the proposed changes are expected to positively contribute to the fishing experience as they would refocus management to areas that have public access and are being stocked. It can reasonably be assumed that trout anglers will change their location for angling based upon availability, but there is no indication that their overall activity will increase or decrease. The
Commission does not have a mechanism to determine the specific fiscal impact of the proposed changes.

15A NCAC 10C .0305

Description and Justification

There are three proposed changes to this rule:

1) Establish an exception to the general statewide regulation for black bass in Lake Chatuge (Clay County) by increasing the daily creel limit from 5 fish to 10 fish in aggregate, decreasing the minimum size limit for Largemouth Bass from 14 inches with the exception that two fish less than 14 inches can be retained in the daily creel, to 12 inches with no exception, and removing the minimum size limit of 14 inches for Smallmouth and Spotted Bass.

2) Modify the exception to the general statewide regulation for black bass in the New River in Alleghany County downstream of Fields Dam (Grayson County, Virginia) by increasing the slot limit of 14 to 20 inches with only one fish greater than 20 inches to a slot limit of 14 to 22 inches with only one fish greater than 22 inches. The daily creel limit will remain 5 fish.

3) Establish an exception to the general statewide regulation for black bass in Lake Hampton (Yadkin County) by allowing no Largemouth Bass between 16 and 20 inches to be possessed. The daily creel limit will remain 5 fish, and the minimum size limit will remain 14 inches except that two fish less than 14 inches can be retained in the daily creel.

Fiscal Impact

No substantial fiscal impacts are anticipated. The first two changes will synchronize the black bass regulations for boundary waters with Georgia and Virginia, and anglers will benefit from reduced regulatory complexity. The third change is expected to improve the biological balance of the fishery and consequently increase angler satisfaction. While the proposed rule changes will alter what anglers may harvest, they are not expected to impact overall participation in fishing (i.e. number of licenses sold or fishing trips taken). The Commission does not have a mechanism to determine the specific fiscal impact of the proposed changes.

15A NCAC 10C .0306

Description and Justification

There are two proposed changes to this rule. The first change to this rule establishes an exception to the general statewide regulation for crappie in Lake Chatuge (Clay County) by implementing a 30-fish daily creel limit. There is no minimum size limit. The second proposed change establishes an exception to the general statewide regulation for crappie in Lake Hampton (Yadkin County) by implementing an 8-inch minimum size limit and a 20-fish daily creel limit.
Fiscal Impact

No substantial fiscal impacts are anticipated. The first change will synchronize crappie regulations for a boundary water with Georgia, and anglers will benefit from reduced regulatory complexity. The second change is expected to improve the biological balance of the fishery and consequently increase angler satisfaction. While the proposed rule changes will alter what anglers may harvest, they are not expected to impact overall participation in fishing (i.e. number of licenses sold or fishing trips taken). The Commission does not have a mechanism to determine the specific fiscal impact of the proposed changes.

15A NCAC 10C .0314

Description and Justification

The proposed change to this rule establishes an exception to the general statewide regulation for Striped Bass and Bodie Bass in Lake Chatuge (Clay County) by increasing the daily creel limit from four fish to 15 fish in aggregate, removing the minimum size limit of 20 inches, and allowing only two fish greater than 22 inches to be retained.

Fiscal Impact

No substantial fiscal impacts are anticipated. The change will synchronize Striped Bass and Bodie Bass regulations on a boundary water with Georgia, and anglers will benefit from reduced regulatory complexity. While the proposed rule changes will alter what anglers may harvest, they are not expected to impact overall participation in fishing (i.e. number of licenses sold or fishing trips taken). The Commission does not have a mechanism to determine the specific fiscal impact of the proposed changes.

15A NCAC 10C .0319

Description and Justification

The proposed change to this rule prohibits the transport, possession or release of live White Perch in waters in and west of Haywood, Buncombe, and Rutherford counties.

Fiscal Impact

No substantial fiscal impacts are anticipated. Stocking fish into public fishing waters is illegal without a permit issued by the Commission; however, species continue to be moved and introduced into new waters. The change will help delay the introduction of White Perch into additional reservoirs in western North Carolina and protect popular sport fisheries for White Bass, crappie, and Walleye in those reservoirs. The Commission does not have a mechanism to determine the specific fiscal impact of the proposed changes.
15A NCAC 10C .0401

Description and Justification

The proposed change to this rule establishes an exception to the general statewide regulation for Blue Catfish in Lake Tillery, Lake Wylie, and Mountain Island Reservoir by allowing only one fish greater than 32 inches to be possessed in the daily creel.

Fiscal Impact

No substantial fiscal impacts are anticipated. Interest in catfish angling is growing rapidly, and anglers seeking large catfish target the Blue Catfish populations in Lake Tillery, Lake Wylie, and Mountain Island Reservoir. The change will restrict harvest of large Blue Catfish to help maintain quality fisheries in these reservoirs. For harvest-oriented anglers, the effect should be minimal as harvest of fish less than 32 inches remains unrestricted. In addition, a survey of catfish anglers conducted in 2011 indicated that 0.2% of respondents sold any of the catfish that they caught in North Carolina. While the proposed rule changes will alter what anglers may harvest, they are not expected to impact overall participation in fishing (i.e. number of licenses sold or fishing trips taken). The Commission does not have a mechanism to determine the specific fiscal impact of the proposed changes.

15A NCAC 10C .0402

Description and Justification

The proposed change to this rule adds dip nets when used in conjunction with a licensed hand-crank electrofisher where authorized by local law to the list of equipment that can be used to take nongame fish for bait or personal consumption in inland fishing waters with an inland fishing license.

Fiscal Impact

No substantial fiscal impacts are anticipated. Hand-crank electrofishing is authorized by local law for only four rivers in southeastern North Carolina. Given the uniqueness of the device and approach, the number of operating hand-crank electrofishers is thought to be minimal and self-limiting. The number of individuals dipping the stunned fish (affected by the proposed change) is incidental to the total number of hand-crank electrofishers in use. Under this change, individuals dipping stunned nongame fish in conjunction with hand-crank electrofishing for recreational purposes would only be required to purchase an inland fishing license and would no longer be required to purchase a separate Special Device License. A survey of Special Device License holders in 2010 indicated that 33% of the respondents participated in hand-crank electrofishing. Extrapolating to fiscal year 2014-2015, the number of individuals participating in hand-crank electrofishing is estimated to be 133 (404 licenses purchased), which equates to $9,975 in license revenue ($75 per license). Respondents to the 2010 survey indicated that they exclusively targeted catfish and did not sell any fish.
15A NCAC 10I .0103 and 15A NCAC 10I .0105

Description and Justification

The proposed changes designate Atlantic Sturgeon as State Endangered when found in inland fishing waters and remove Atlantic Sturgeon from the State Special Concern list. Pursuant to N.C.G.S. § 113-334, all federally-listed animals in North Carolina shall have the same state designations as their federal status. The scientific name of Atlantic Sturgeon will be updated to match currently accepted nomenclature.

The removal of the eastern cougar from the list of State Endangered Species is discussed in a different fiscal and regulatory impact analysis authored by the Wildlife Management Division.

Fiscal Impact

No substantial fiscal impacts are anticipated. Atlantic Sturgeon is already designated as Special Concern in North Carolina and Endangered by NOAA Fisheries. Harvest is already prohibited and the proposed change in designation will not result in any additional regulatory burden.
