Class Concept
Employees are responsible for one-to-one support to a student with deaf-blindness and facilitates a student's acclimation to his/his environment. The work performed is guided by the student's Individualized Education Plan (IEP) and residential program goals. Work includes assisting the teacher in implementing and documenting the IEP and residential program goals; teaching students their daily routine and activities; acclimating student to his/her surroundings; and utilizing the student's individual communication methods and strategies (sign language, tactile sign language, braille communicator, assistive technology devices and aides, among others). Employees are responsible for determining the best methods of implementing and carrying out student's goals. Decisions made by the Intervenor could have an adverse effect on the student (e.g. physical injury, failing to receive information, inhibiting the development of language, etc.). Employees have contact with students and their families and with the faculty and staff (e.g. psychologists, physicians, etc.) of the school.
