

FORESTRY TECHNICIAN II

CLASS CONCEPT

Work in this class involves overseeing and conducting a variety of forestry services that may include forest protection, forest management, and information/education and/or disaster/emergency response within an assigned unit such as a county forestry program, educational state forest, forestry nursery, youthful offenders program or other forestry program. Work is typically overseen by a Forestry Supervisor or higher-level Forestry Technician, and involves the supervision and training of permanent Forestry Technician I and/or temporary employees. Other related duties may be assigned as necessary. Work is subject to hazards such as fire, pests, wild animals, weather and difficult terrain. Work is also subject to on-call and rotating shifts and rotation of work areas.

EXAMPLES OF DUTIES PERFORMED

Oversees forest management activities within an assigned county, educational state forest or other unit including writing forest management plans and monitoring cost-share programs in consultation with landowners.

Monitors forest management projects for compliance with water quality and best management practice standards.

Conducts forest establishment work including overseeing site planning and preparation.

Oversees the development, presentation and scheduling of information and education programs to school and civic groups.

Promotes forestry and forestry education with school groups.

Educates public on forestry topics through day to day contacts and exhibits/presentations at workshops.

Oversees fire control activities within assigned county, educational state forest or other areas as needed. This includes serving as incident commander on fires and providing coordination of resources from multiple agencies.

Investigates incidents and issues warning tickets and/or citations.

Assures equipment and resource readiness and oversees fire training activities.

Oversees program operations within assigned area in consultation with Forestry Supervisor or higher-level Forestry Technician. This includes planning, budgeting, safety, performance management and other technical and administrative areas.

Responds to disaster/emergency situations.

Functions in assigned role within Incident Command System as needed.
